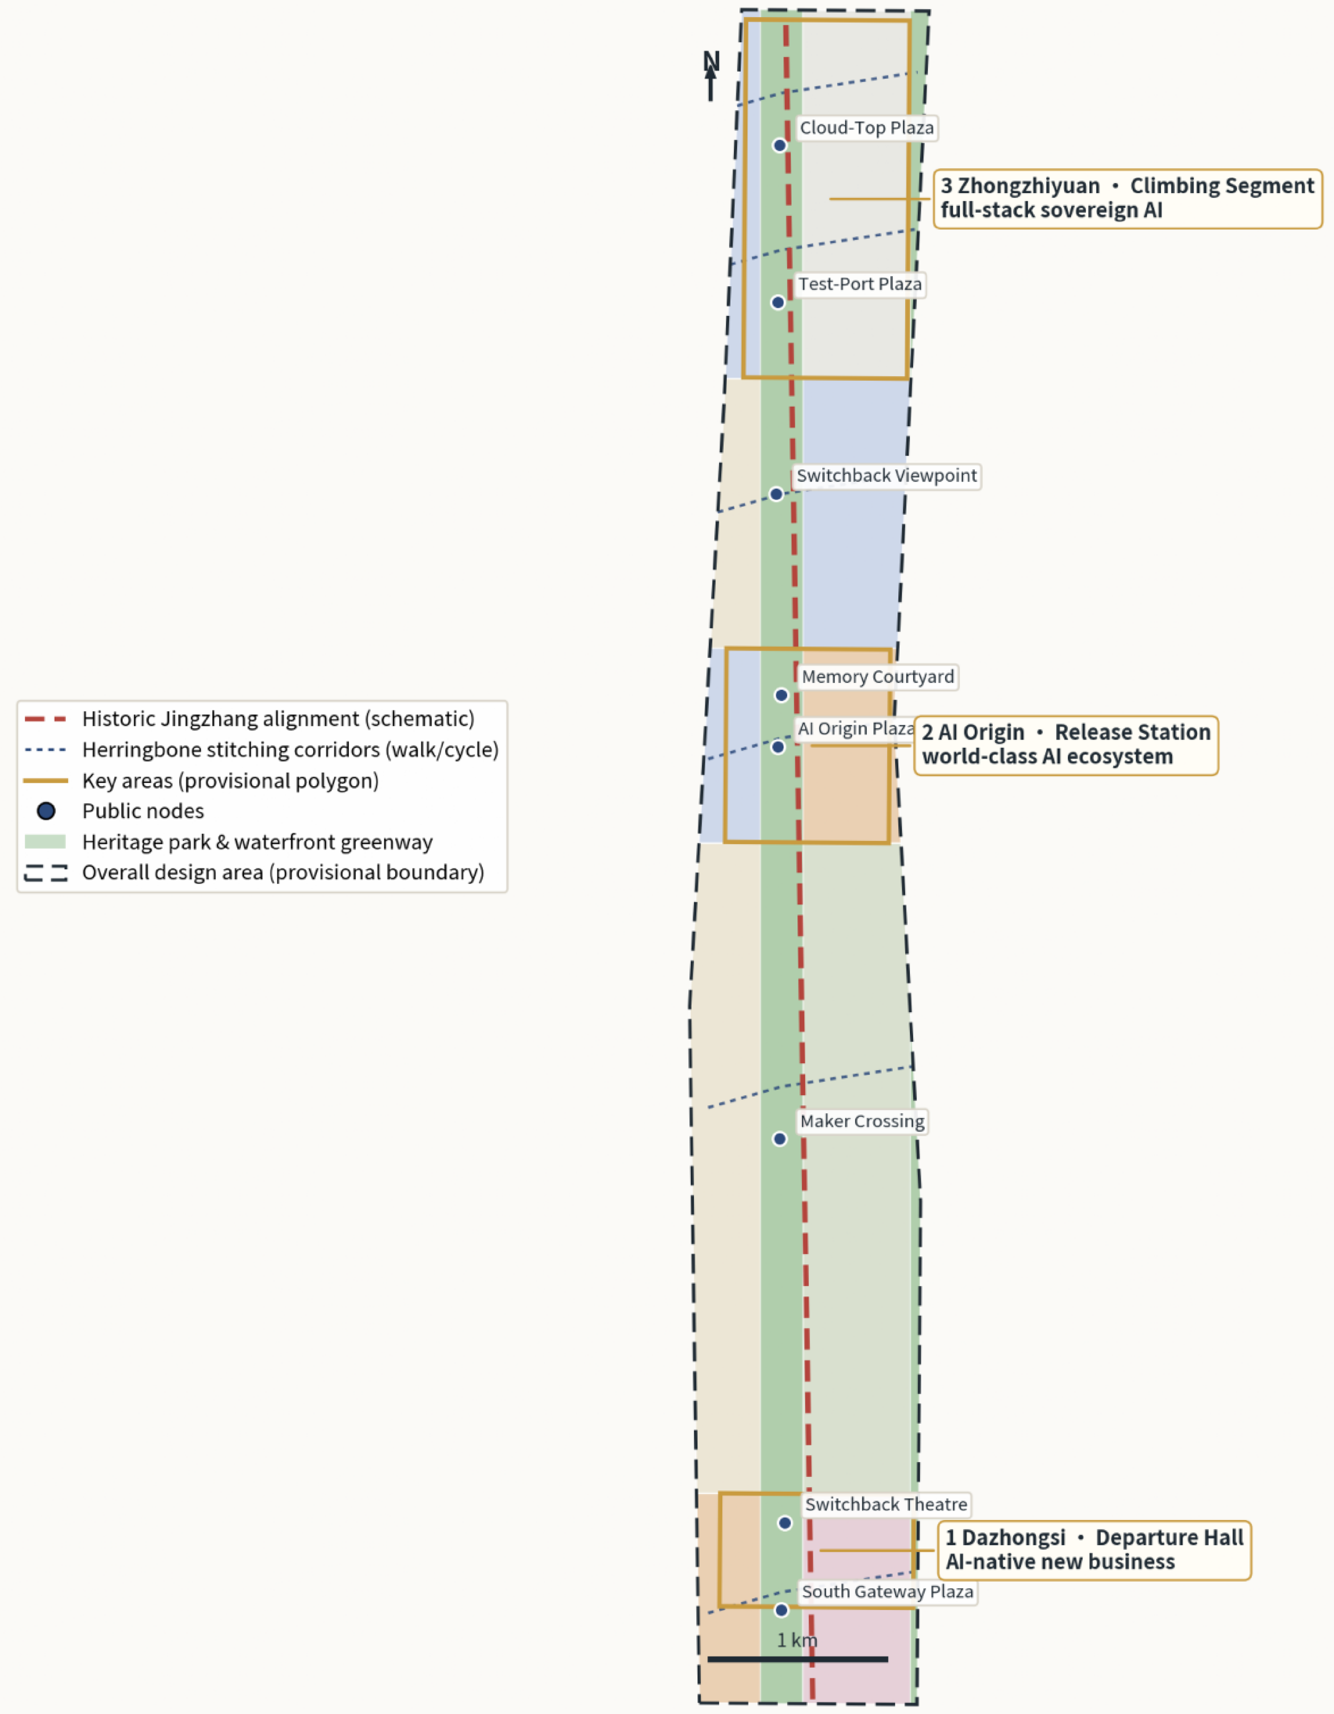
THE SWITCHBACK LINE

Jingzhang's Second Ascent • Overall Concept and Structure Board

THE SWITCHBACK LINE • Overall Concept

Jingzhang's Second Ascent — one spine, three folds, six stitching corridors, two wings (concept proposal)

Two rail strokes meet at the switchback: heritage rail (brick) and data rail (indigo). Three key areas are three accelerating switchback stations.



Boundaries and key areas are provisional rough polygons (provisional_constraint) for concept display and self-check only; areas recomputed under EPSG:4548. Source: SRC-PROVISIONAL-BOUNDARIES-2026.

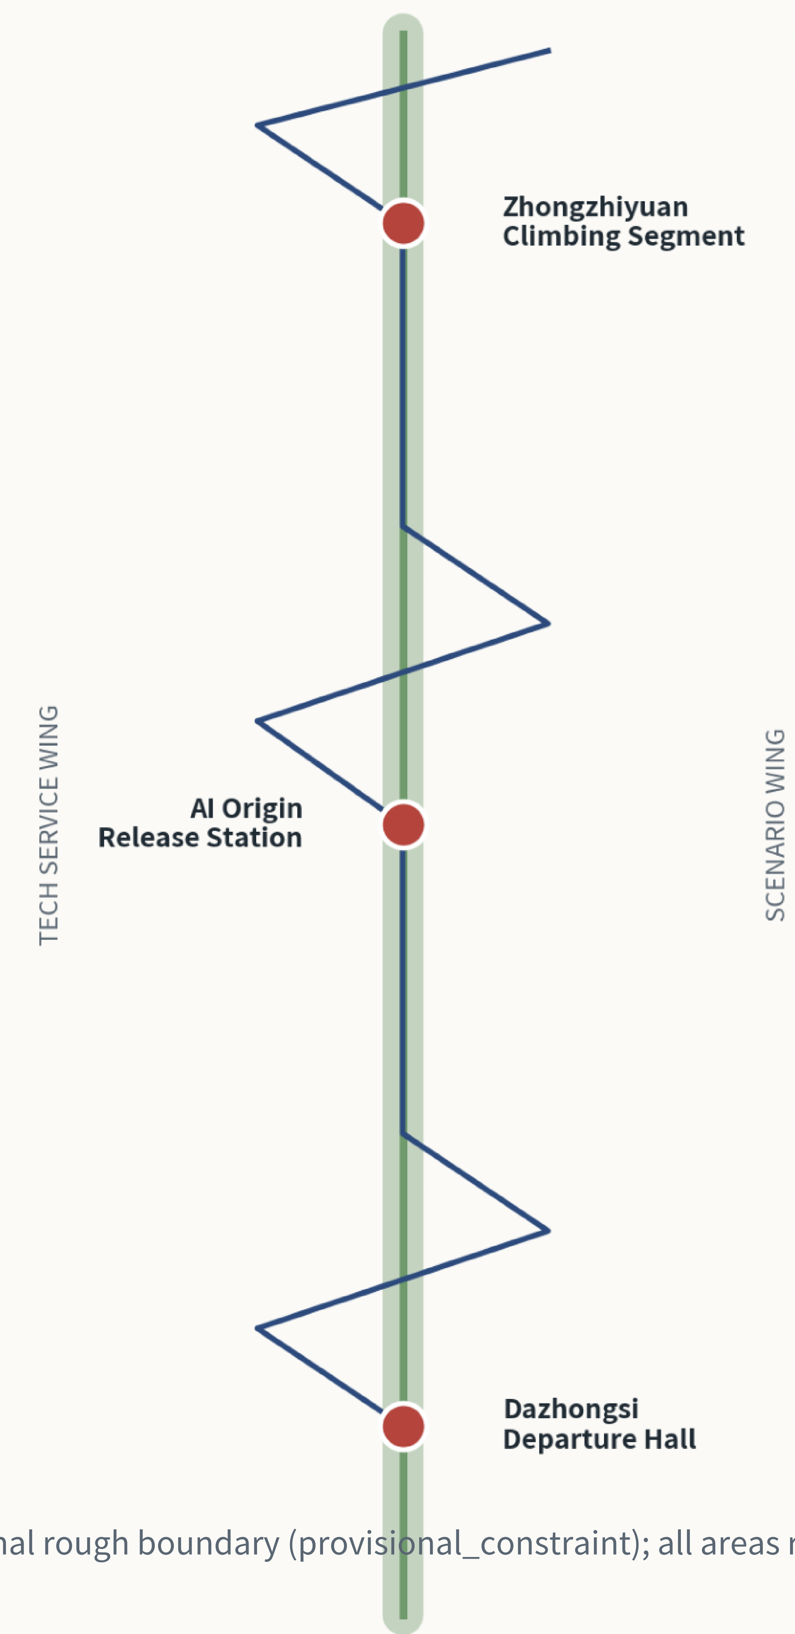
One spine: the heritage park vitality belt (central green spine, park green 262 ha). Three folds: Dazhongsi Departure Hall / AI Origin Release Station / Zhongzhiyuan Climbing Segment. Six corridors: herringbone E-W stitching links (walk/cycle first, 5-8 min spacing). Two wings: tech service / scenario empowerment.

Spatial Structure and Land-Use Composition

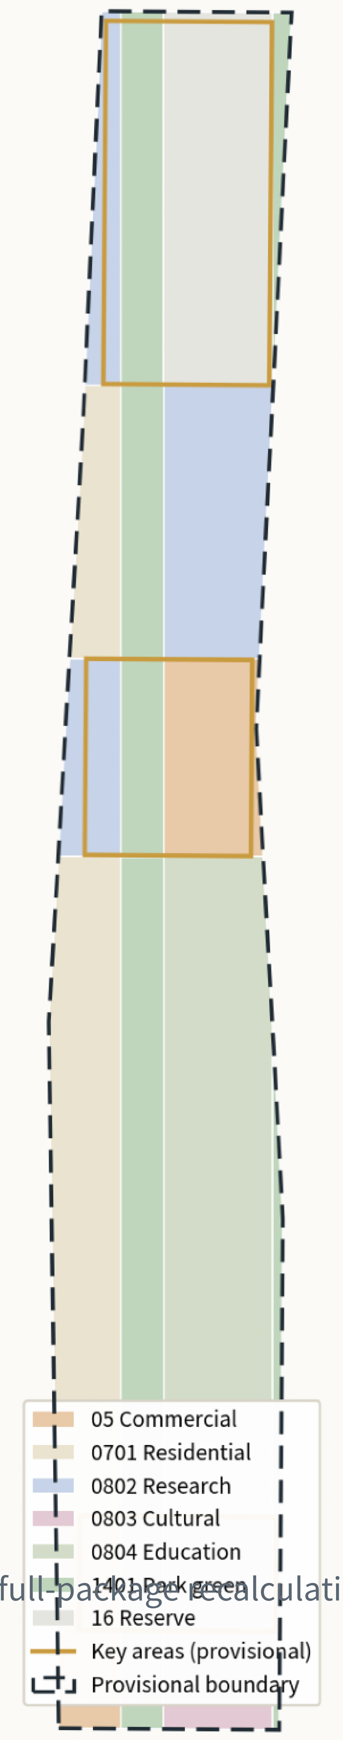
One spine (heritage green spine) • three folds (key areas) • six corridors (E-W stitching) • two wings

Land use (topology-safe partition • 19 parcels • national codes)

Herringbone switchback • spatial grammar



Fold = nodes; Return = innovation flowing back to the city



Three-level scope cascade

Research 43.6 km2 → industry narrative & synergy

Overall design 11.4 km2 → regulatory-depth urban design

Key areas 368.4 ha → implementation-plan depth

Composition (provisional recalculation)

- 0802 Research 159 ha
- 0804 Education 229 ha
- 0701 Residential 182 ha
- 05 Commercial 104 ha
- 0803 Cultural 75 ha
- 1401 Park green 262 ha
- 16 Reserve 131 ha

Public first, industry second; stitch first, then build.

Data status: provisional rough boundary (provisional_constraint); all areas recomputed under EPSG:4548; full-package recalculation on official redline release. This board is a concept suggestion, not approval or implementation commitment.

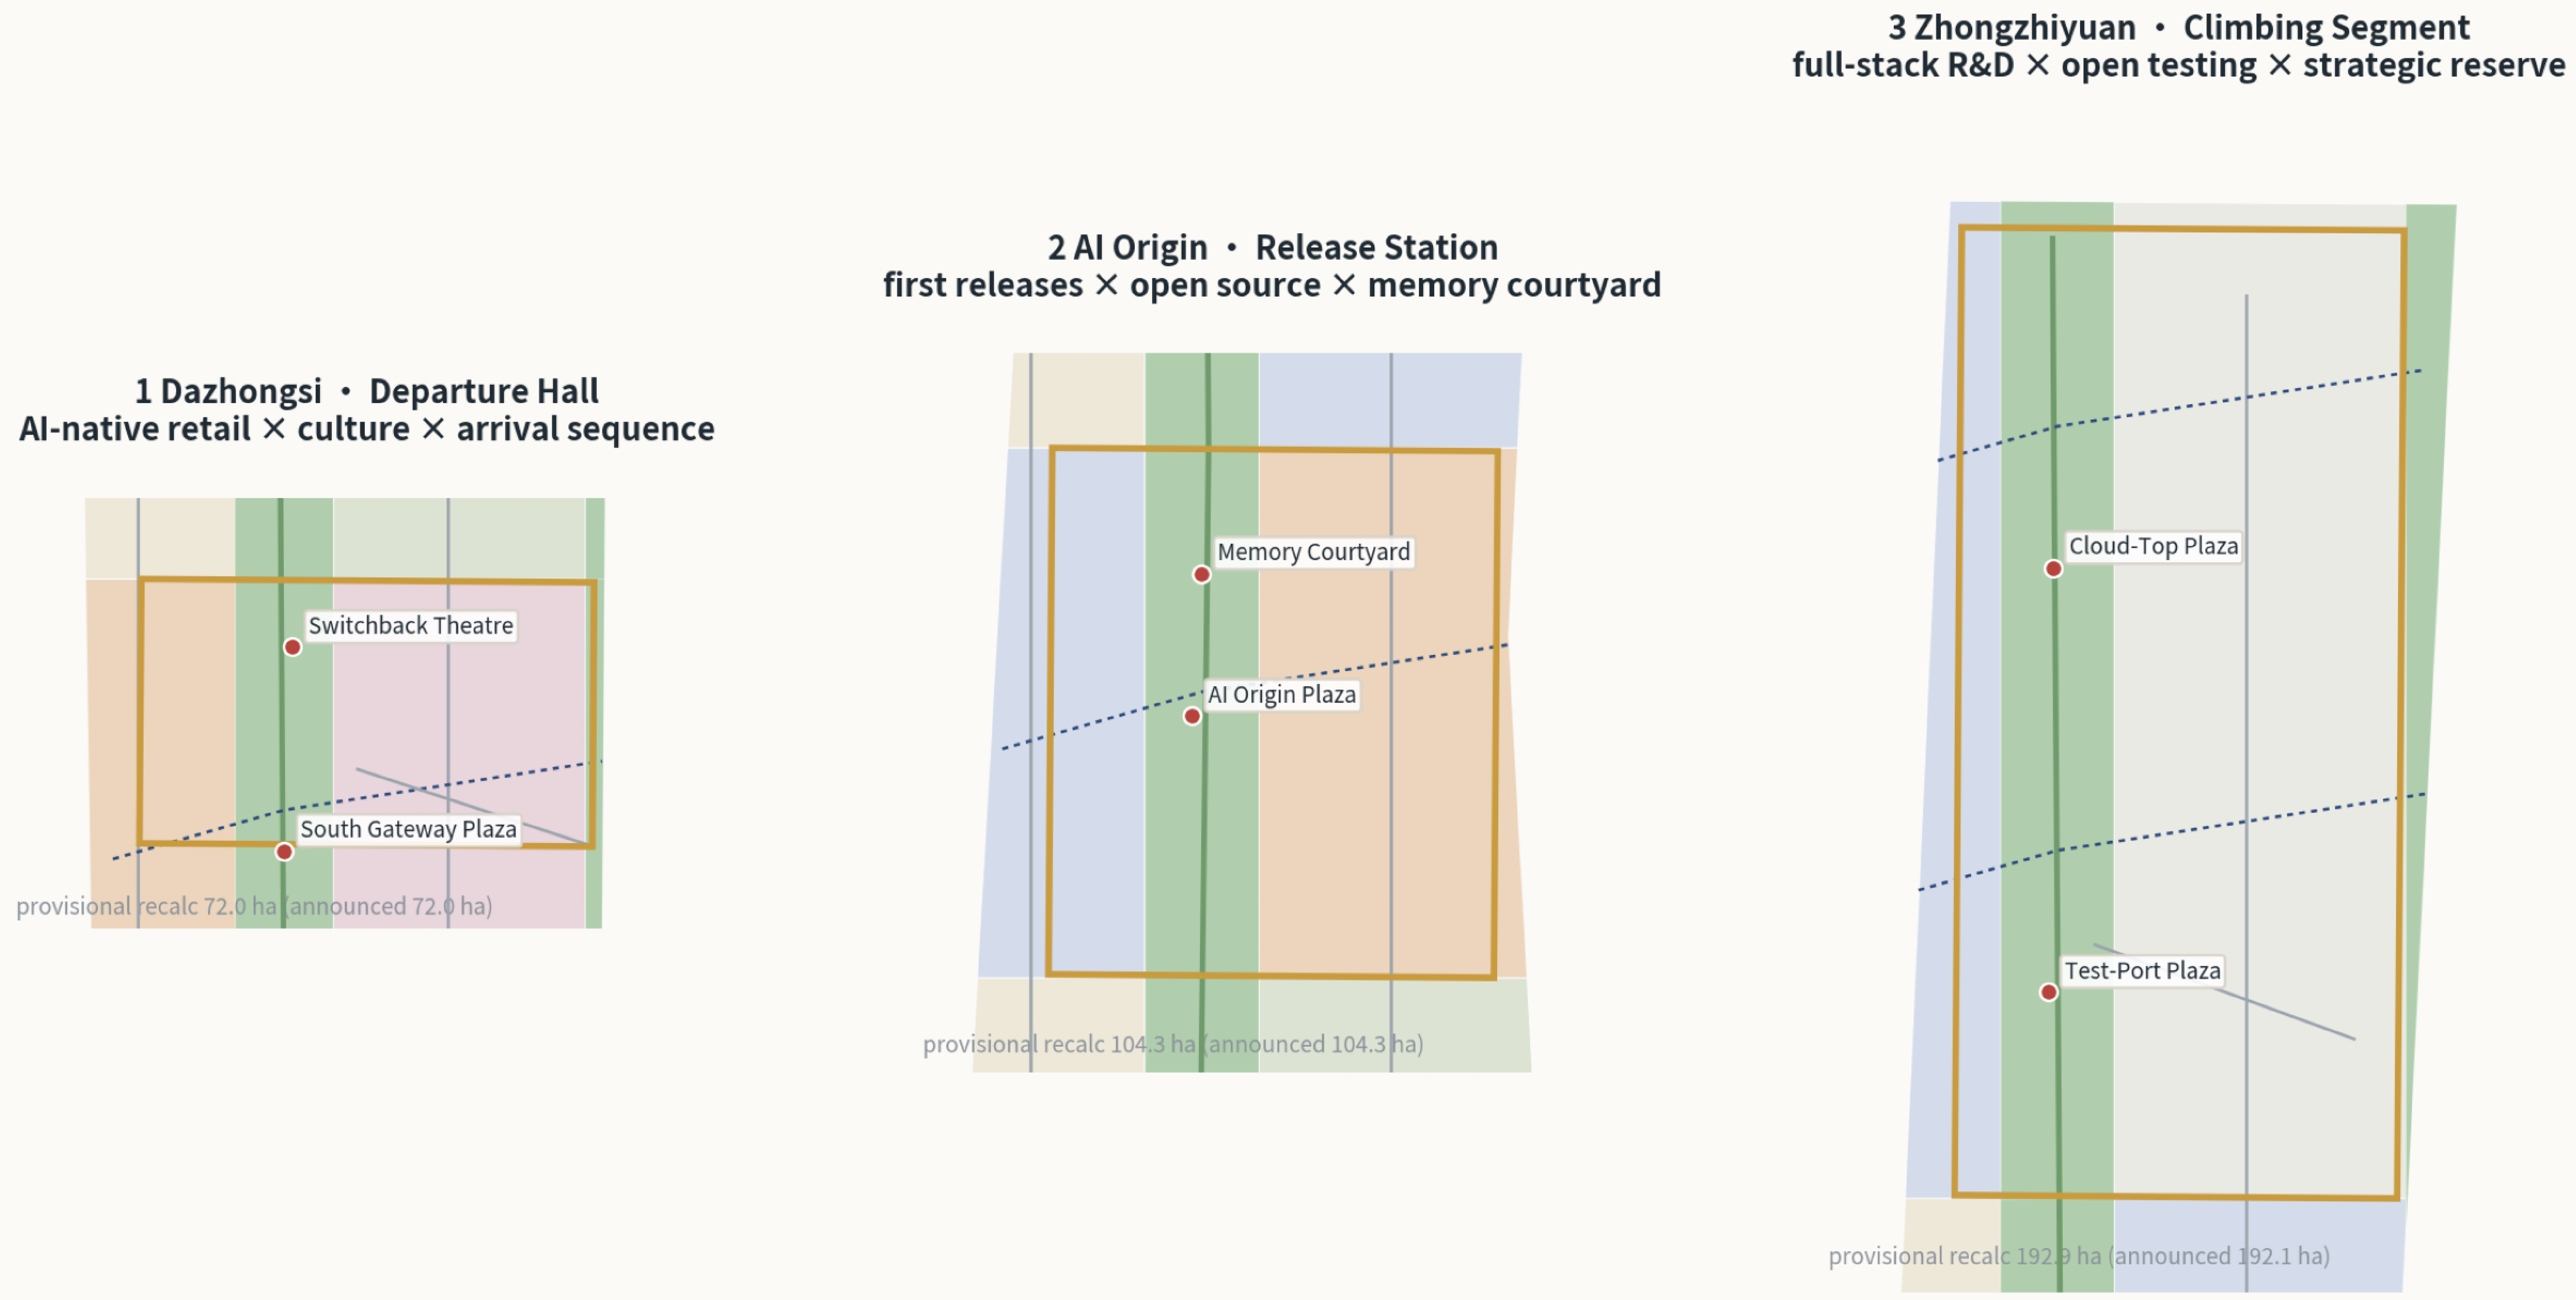
Key Areas • Scenarios • Metrics Evidence Board

Detailed design of three switchbacks / 12 scenario cards / reproducible metrics

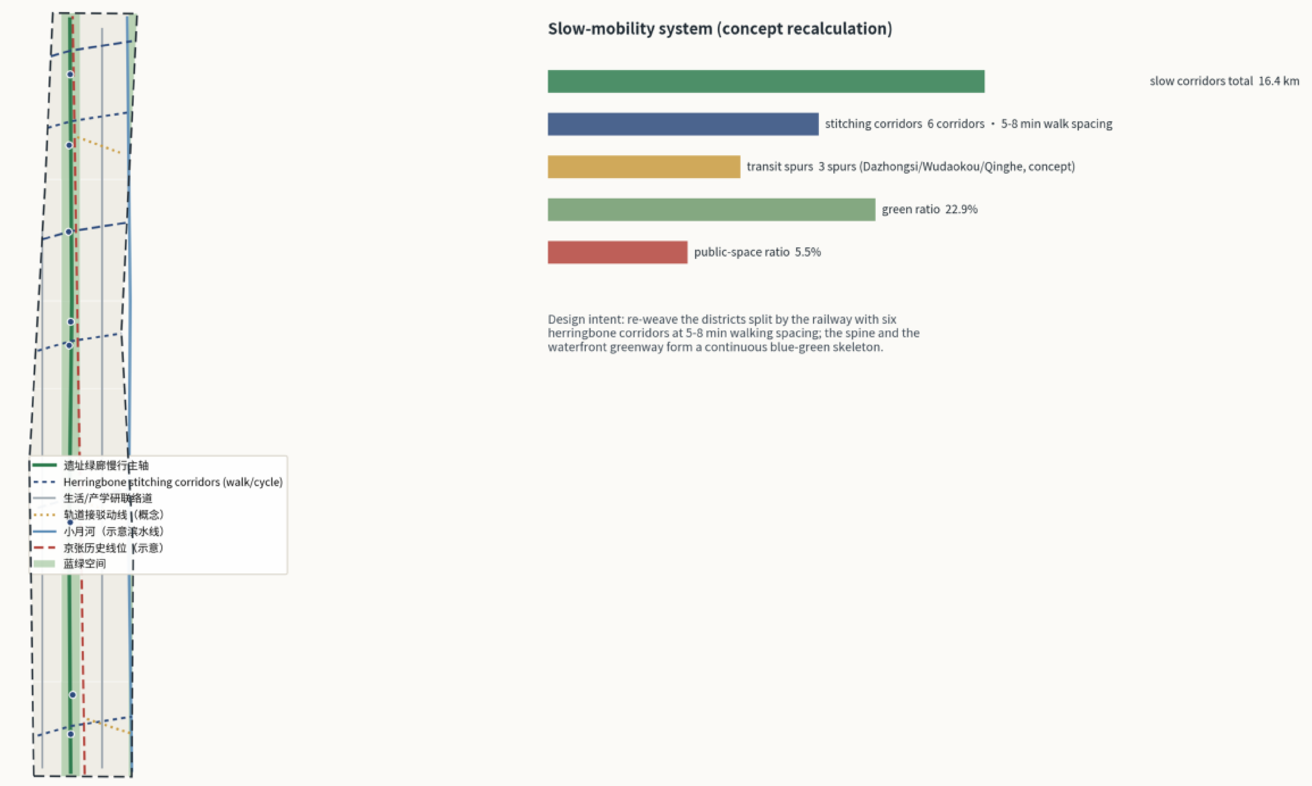
Key Areas: Detailed Design Index

Three switchbacks: depart (Dazhongsi) → release (AI Origin) → accelerate (Zhongzhiyuan); gold = provisional key-area polygons; all concept suggestions



Mobility × Blue-Green Public Space Composite System

East-west stitching first: stitching corridors + green spine + waterfront greenway + transit links



Boundaries and key areas are provisional rough polygons (provisional_constraint) for concept display and self-check only; areas recomputed under EPSG:4548. Source: SRC-PROVISIONAL-BOUNDARIES-2026.

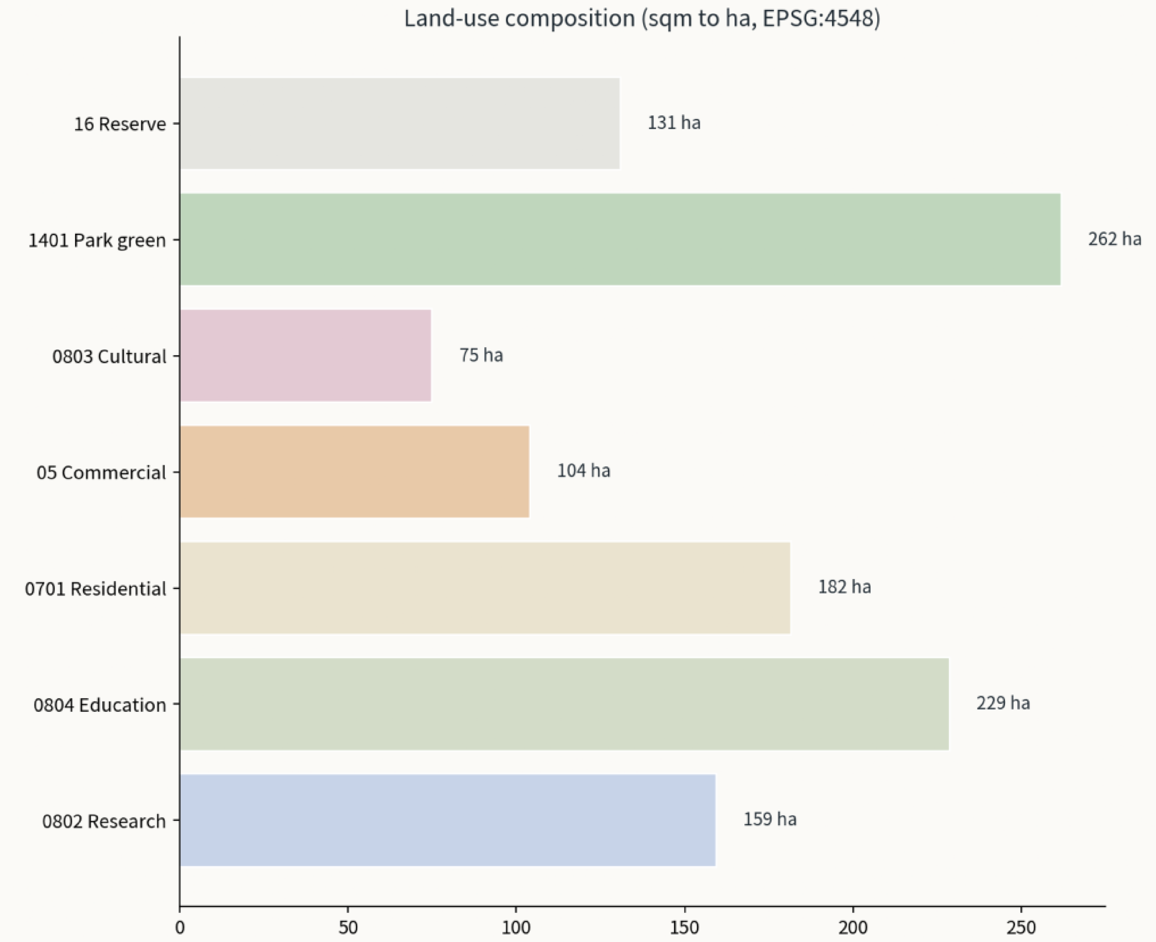
Core Metrics Recomputation and Evidence Chain

All areas and ratios independently reproducible from GeoJSON; provisional boundary and concept estimates flagged

Evidence chain: geometry/*.geojson → EPSG:4548 recompute → metrics.json → this figure / visual / A3/A0 cite the same values; self_check all PASS.

Pending regulatory conditions: FAR, height, density, setbacks — status unknown, listed in assumptions.json (A-CONTROLS-001).

Land-use composition (sqm to ha, EPSG:4548)



Core metric cards (consistent with metrics.json)

Site area **11.41 km²** provisional recalculation	green ratio **22.9%** spine + waterfront	public-space ratio **5.5%** 8 nodes + 2 promenades
building density (concept) **7.4%** design intent	concept GFA **816×10⁴ m²** assumed-floors estimate	Slow corridors **16.4 km** greenway/walk/cycle

Key-area areas: provisional recalc vs announced
