

# Open Weave / Jingzhang Civic Loop

Concept proposal for the Centennial Jing-Zhang AI Innovation Belt

## Open Weave: one belt, three cores, one civic loop

Heritage as spine, open testing as heart, everyday services as scale

### DESIGN THESIS

A heritage spine becomes a civic loop: every core offers a different AI public value, while the loop keeps work, learning, culture and daily life within reach.

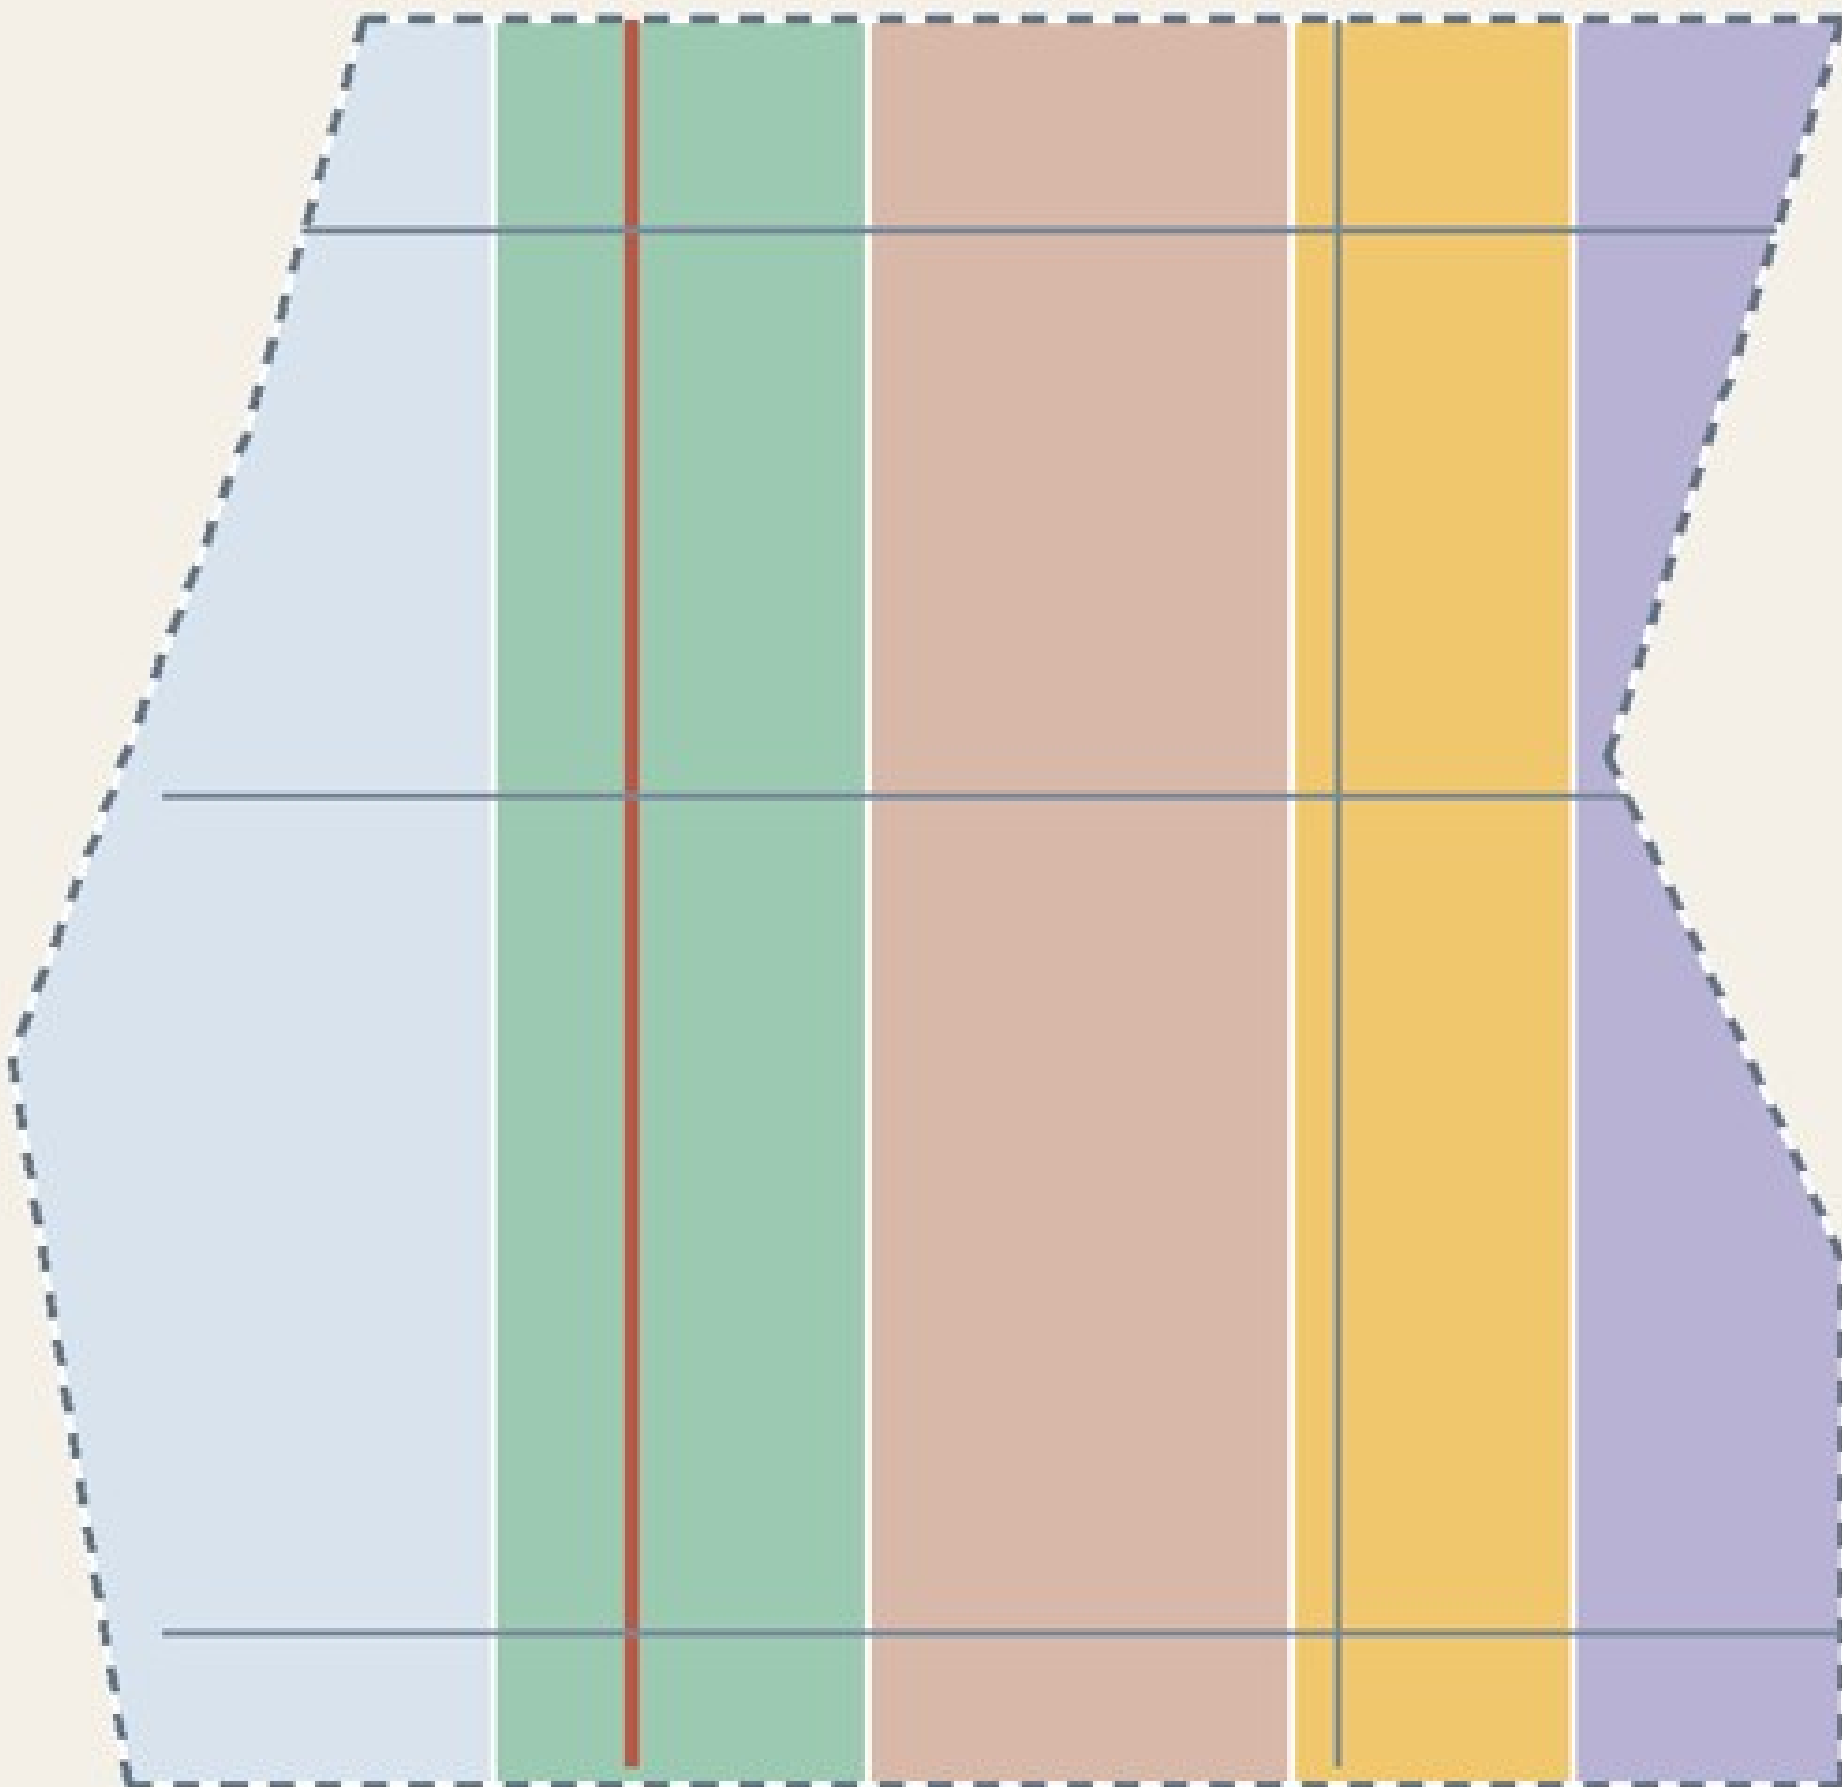

- 3 cores / 三核
- 2 wings / 两翼
- 10 scenario cards / 场景卡
- 4 AI landmarks / 朝圣节点

### CONSTRAINT NOTE

The dashed outline is a provisional design constraint, not an official boundary or redline.

## Spatial structure: one belt, three cores, two wings

Land use is a framework; the open loop connects function, public space and operations

### LAND-USE LOGIC

- 0802 / R&D + open source
- 1401 / blue-green commons
- 0803 / culture + exhibition
- 09 / enterprise services
- 0702 / community services

### EVIDENCE

The colored bands are complete intersections with the submitted provisional boundary. They are design proposals, not statutory zoning.

21.4% green ratio / 绿地比例  
2.2% public space / 公共空间

| 0 - Public problem                 | 1 - Minimum data                    | 2 - Human review                  | 3 - Reversible pilot                     | 4 - Public review                |
|------------------------------------|-------------------------------------|-----------------------------------|------------------------------------------|----------------------------------|
| Problem, beneficiaries, provenance | Authorization, bias, access risks   | Professional opinion and feedback | Staffing, notice, complaint, rollback    | Success, failure, exit, revision |
| JZ-01 Slow mobility                | Continuous route + access audit     | Human guidance if audit fails     | No retrofit before ownership/fire review | No pilot without staff/rollback  |
| JZ-03 Transfer street              | Open ground floor + service         | Stop on breach or incident        | No route without complete list           |                                  |
| JZ-05 Public nodes                 | Service, compute, energy sheet      |                                   |                                          |                                  |
| JZ-07 Robotics                     | Controlled site + safety list       |                                   |                                          |                                  |
| JZ-08 Event route                  | Capacity, access, safety, copyright |                                   |                                          |                                  |

Design target: AI fluency is not a proxy for public interest. People without smartphones can still ask, register, complain and opt out; no face recognition, route profiling or covert collection. Roles remain proposed until professional confirmation.
