

Jingzhang AI Civic Services Belt

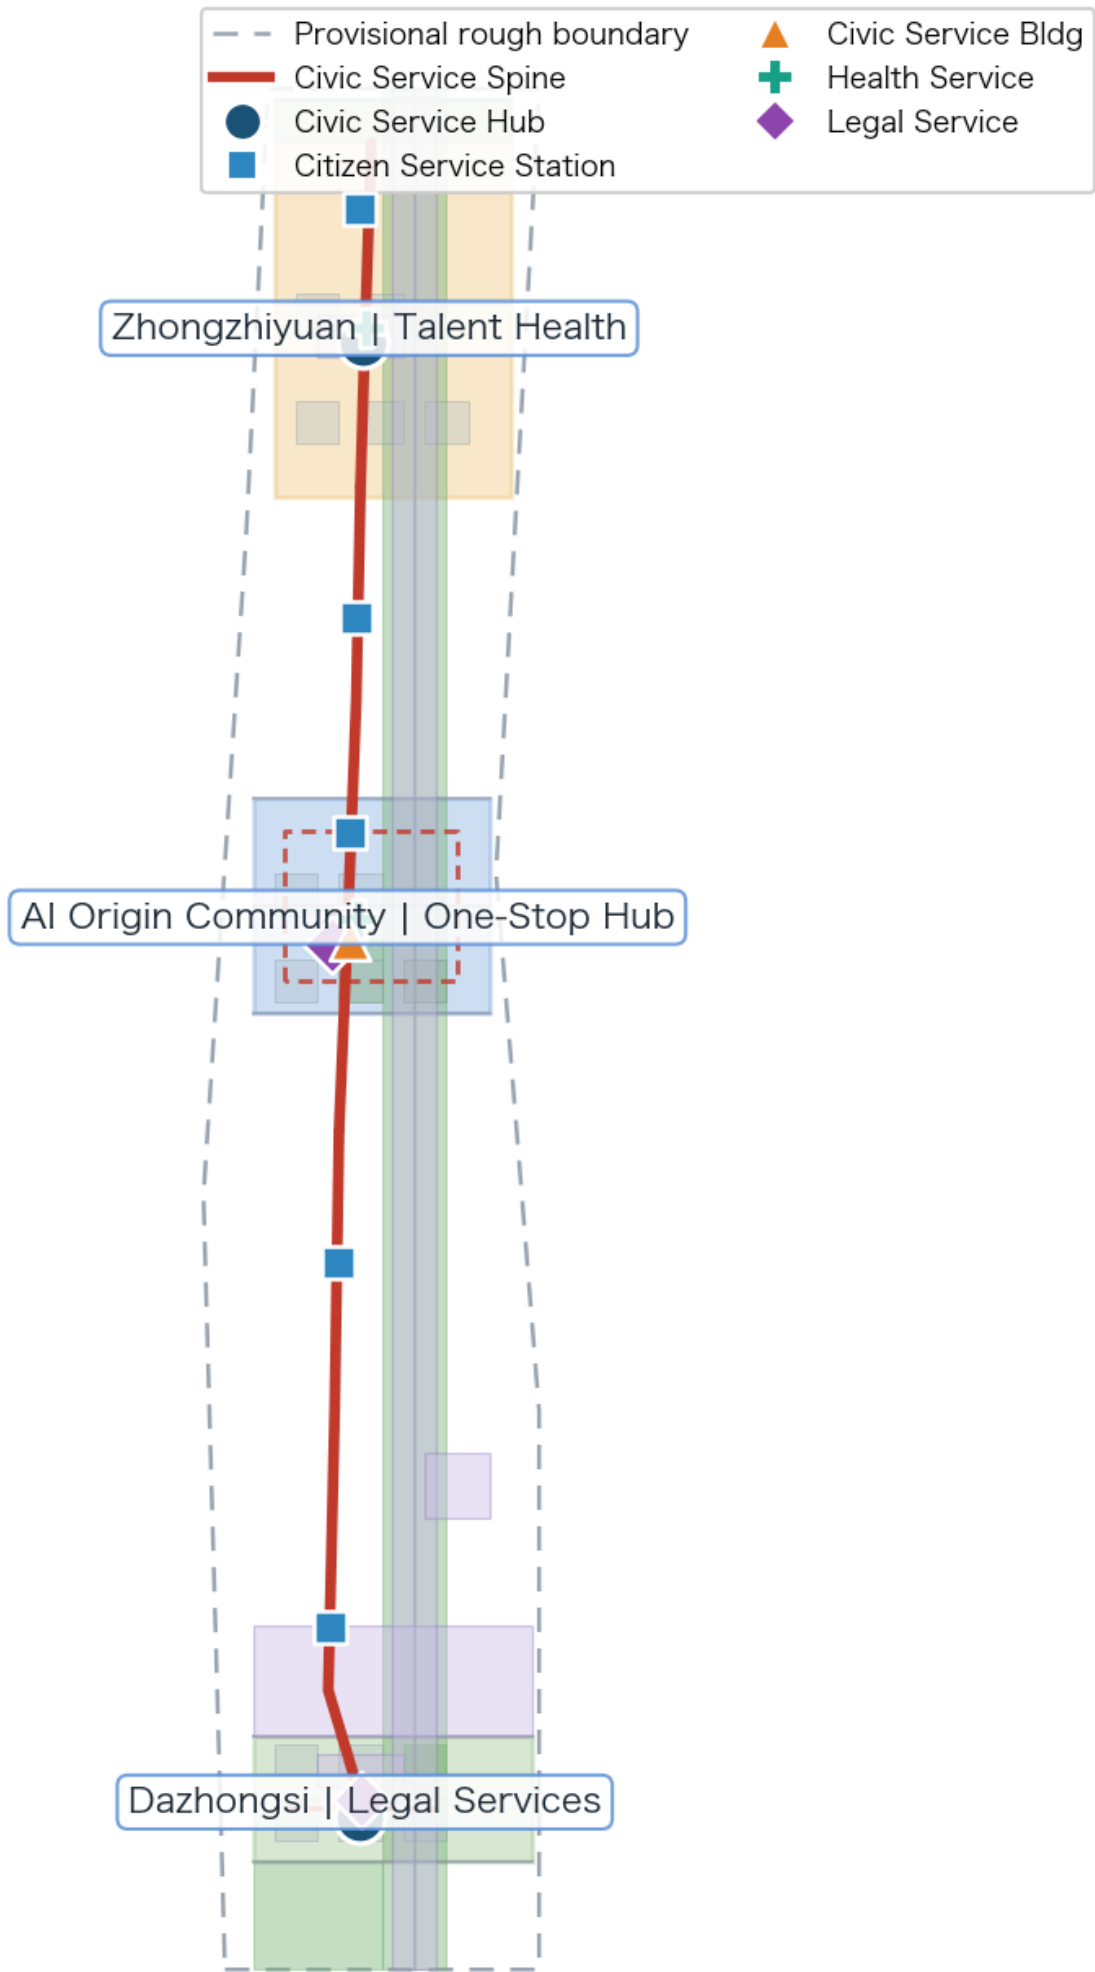

One-stop Government·Health·Legal Services Network | AI Civic Service Spine (conceptual)

Geometry uses a provisional rough boundary (not an official redline); all spatial/service outcomes are conceptual, not formal planning.

1. Concept & Service Network

- Concept: AI Civic Service Spine — turn the Jingzhang Heritage Park slow-traffic axis into a civic-service belt.
- One axis, three zones, many stations: spine + 3 key areas + 3 hub plazas + 5 street stations.
- Three services: one-stop government, health navigation, legal navigation (AI navigates only; no diagnosis/approval).
- Human review: medical, legal and data-security professionals review all service content.

Overview | AI Civic Service Spine

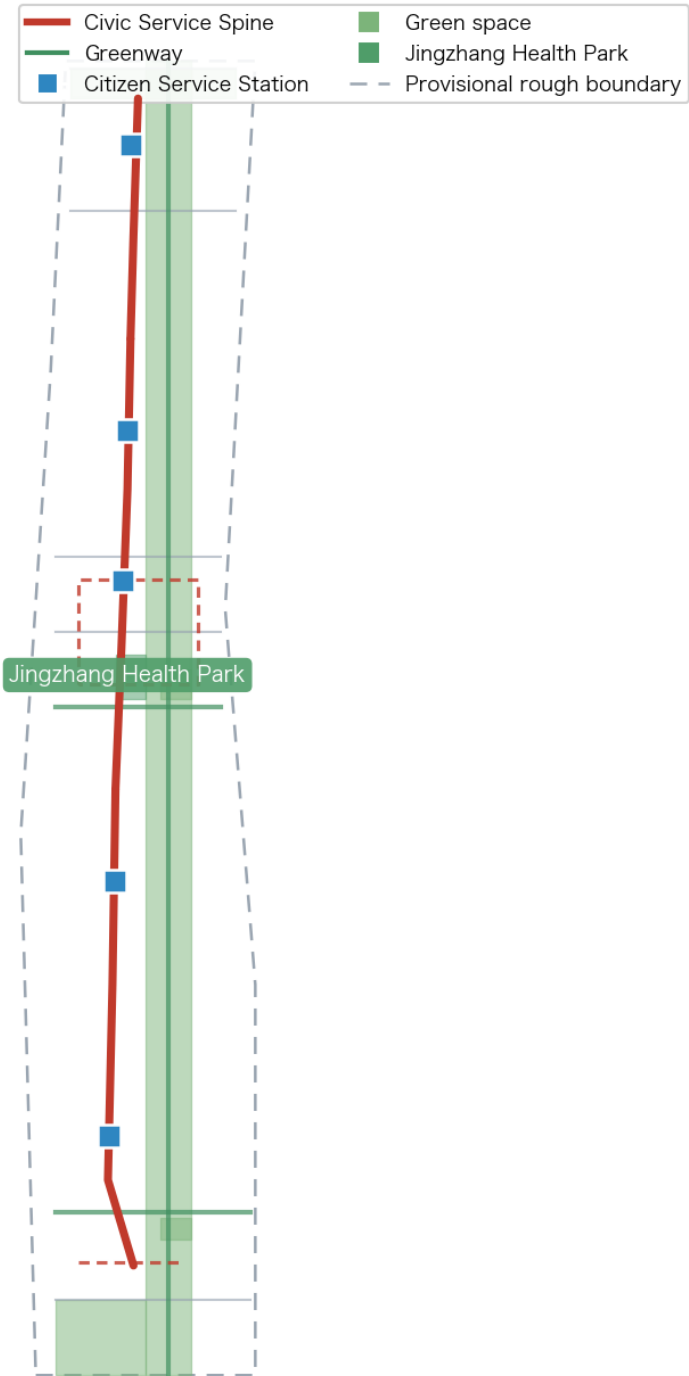

2. Three-Zone Service Positioning

- Zhongzhiyuan (N, ~192.1 ha): talent health — health-check navigation and tech validation.
- AI Origin Community (C, ~104.3 ha): one-stop hub — core of government/health/legal services.
- Dazhongsi (S, ~72.0 ha): legal services — legal-consultation industry and enterprise civic services.

Key Areas | Three Service Zones

Slow-Mobility & Blue-Green | Access

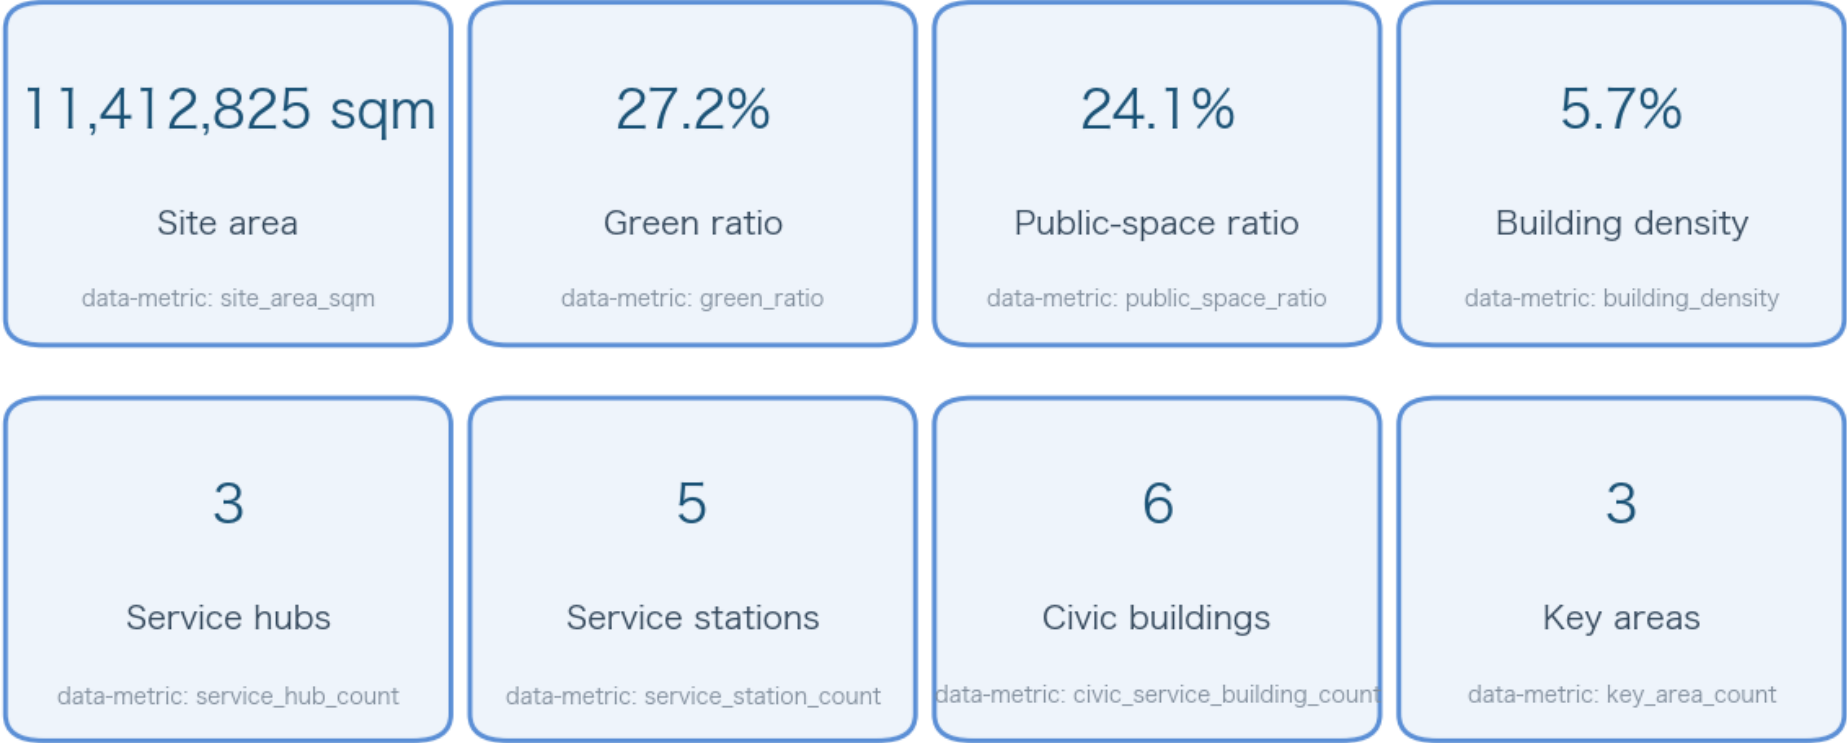

3. Core Indicator Recalc

4. Scenario Cards & Compliance

12 scenario cards (SC-03/07/10 are test/validation), 5 personas; all with human review & data-security boundaries.

Metrics | Core Indicator Recalc

Areas recalculated in EPSG:4548 from provisional rough boundary; to be recomputed after official redline (conceptual).
