

Chun Road Smart-Core: Station-City Integration & AI Mobility Serv

Concept proposal · Centennial Jing-Zhang AI Innovation Belt

Centennial Jing-Zhang AI Innovation Belt International Design Call · Concept Proposal
Three-tier scope: ~43.6 / ~11.4 km² / ~368.4 ha | PROVISIONAL: concept boundary, not an official redline

Contents: three-tier scope / overall design / land-use structure / key areas & N1-N3 /
slow-mobility & blue-green network / core metrics (ratios vs counts) / synergy loops /
AI data-flow & human takeover topology. All concept; recompute when official data is released.

In Overview: three-tier scope, key areas & task mapping (provisional)

Official three-tier scope (announcement)

- 1) Coordinated research scope ~43.6 km²
 - 2) Overall design scope ~11.4 km² (this package: geomet
 - 3) Key areas ~368.4 ha (Zhongzhiyuan 192.1 / Origin 104
- This package sub-scope: key-area detailed design (provis

Task mapping (agent.1-6)

- agent.1 three-tier framework & positioning -> this figure
- agent.2 AI innovation ecology -> scenario cards & factor
- agent.3 AI+ scenarios -> nodes N1/N2/N3
- agent.4 public space & landmarks -> public-space strateg
- agent.5 culture & communication -> narrative & signage
- agent.6 long-term operation -> annual programmes & op

Legend

- Research/Business/Commercial/Residential/Culture/Transp
- Jing-Zhang heritage park belt (heritage awareness zone, i
- Three key-area boundaries (provisional, not official redlin
- Slow-mobility spine RD-SPINE (concept) / links RD-CROSS
- AI scenario nodes (11) / landmark nodes N1-N3
- Zhichunlu interchange (concept location)

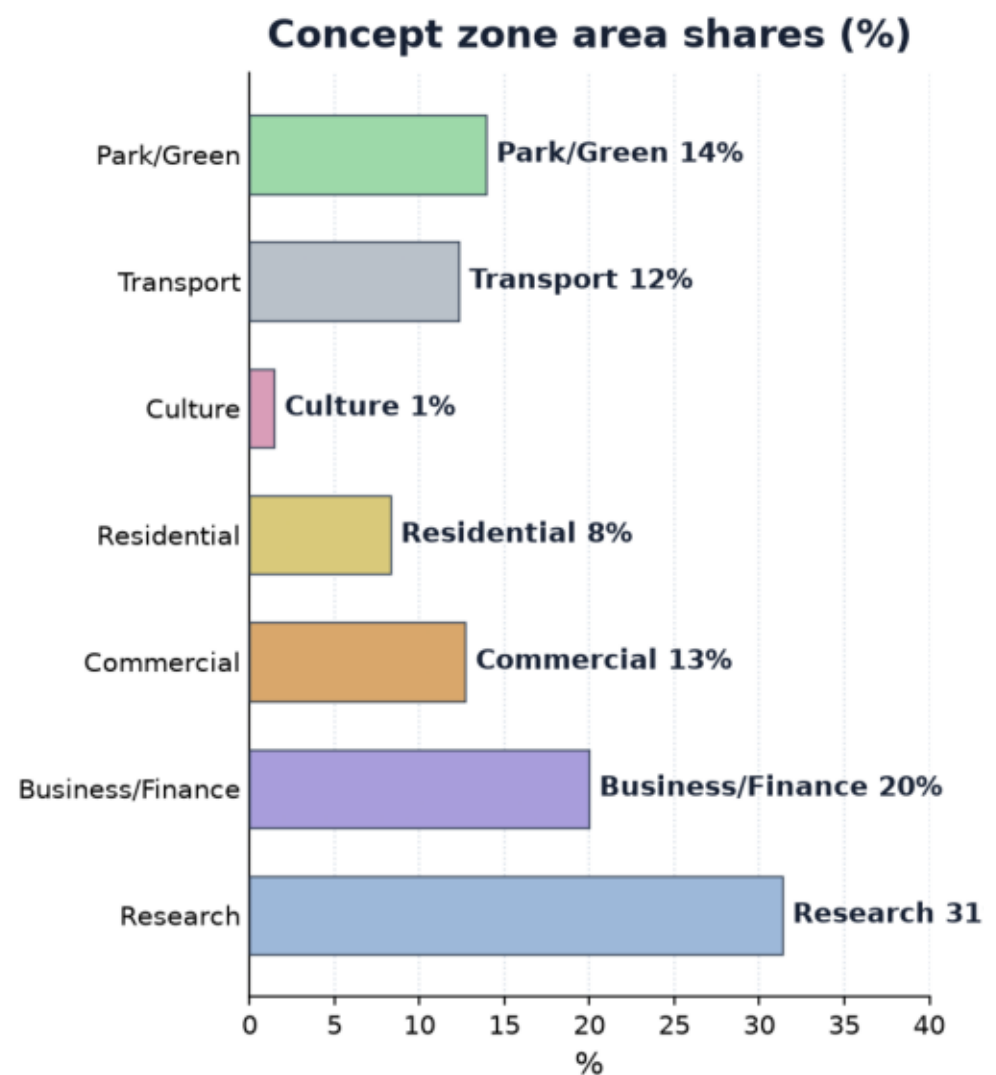

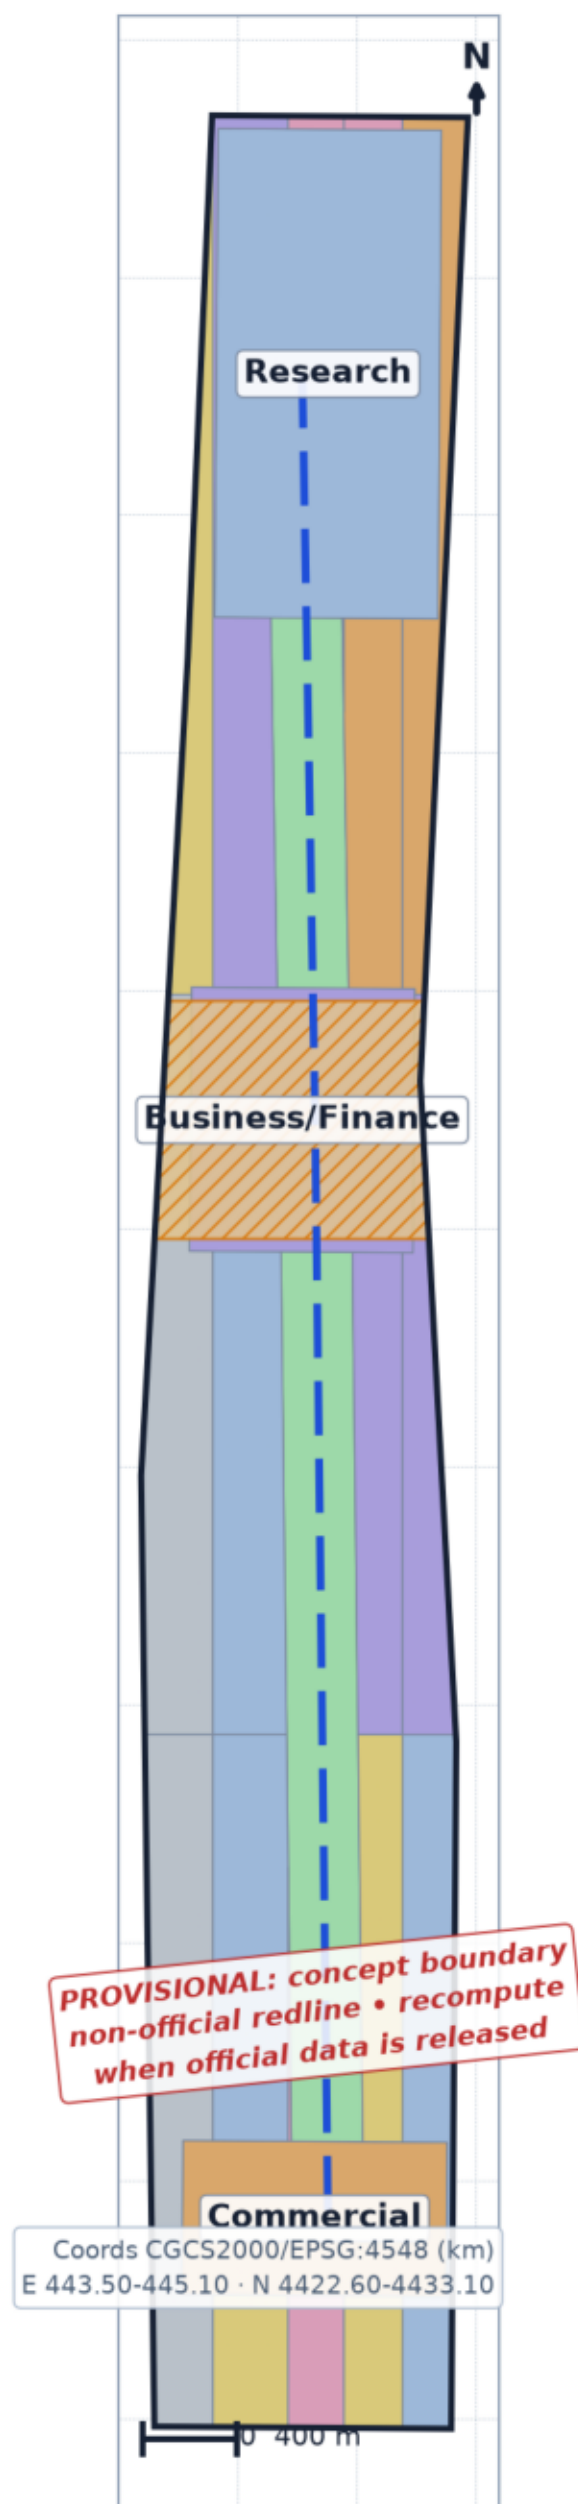

Core metrics (metrics.json, provisional)

- site_area_sqm ~ 11.41 km² (confidence: medium)
- green_ratio ~ 23.2% (confidence: low)
- public_space_ratio ~ 0.5% (confidence: low)
- road_network_length_m ~ 10.2 km (concept network, low
- key_area_count = 3 landmark_count = 3
- All values recomputed when official geometry is released

Data & caliber notes

- Geometry: geometry/*.geojson (CGCS2000 lon/lat; map p
- Boundary: provisional, not an official redline; road names
- Grid: schematic km grid; exact coordinates follow official
- Use: concept display & machine checks; not for statutory

use structure: concept zones & shares (provisional; caliber = land_use.ge

Legend (land-use codes, national classification)

Heritage awareness zone (concept) | Slow spin

Caliber & recompute notes

- Denominator: total concept zone area (~overall)
- Source: geometry/land_use.geojson (23 concepts)
- Confidence: low (concept); recompute when options change
- Use: option comparison only; not for statutory

Three key areas & N1-N3 node locations (provisional, not official redlines)

Key-area ledger (announcement vs geom

	Area	Geometry	Status
Zhongzhixuan AI Acceleration	192.1 ha	192.92 ha	provisional
Beijing AI Origin Community	104.3 ha	104.32 ha	provisional
Dazhongsi AI Industry Cluster	72.0 ha	72.05 ha	provisional

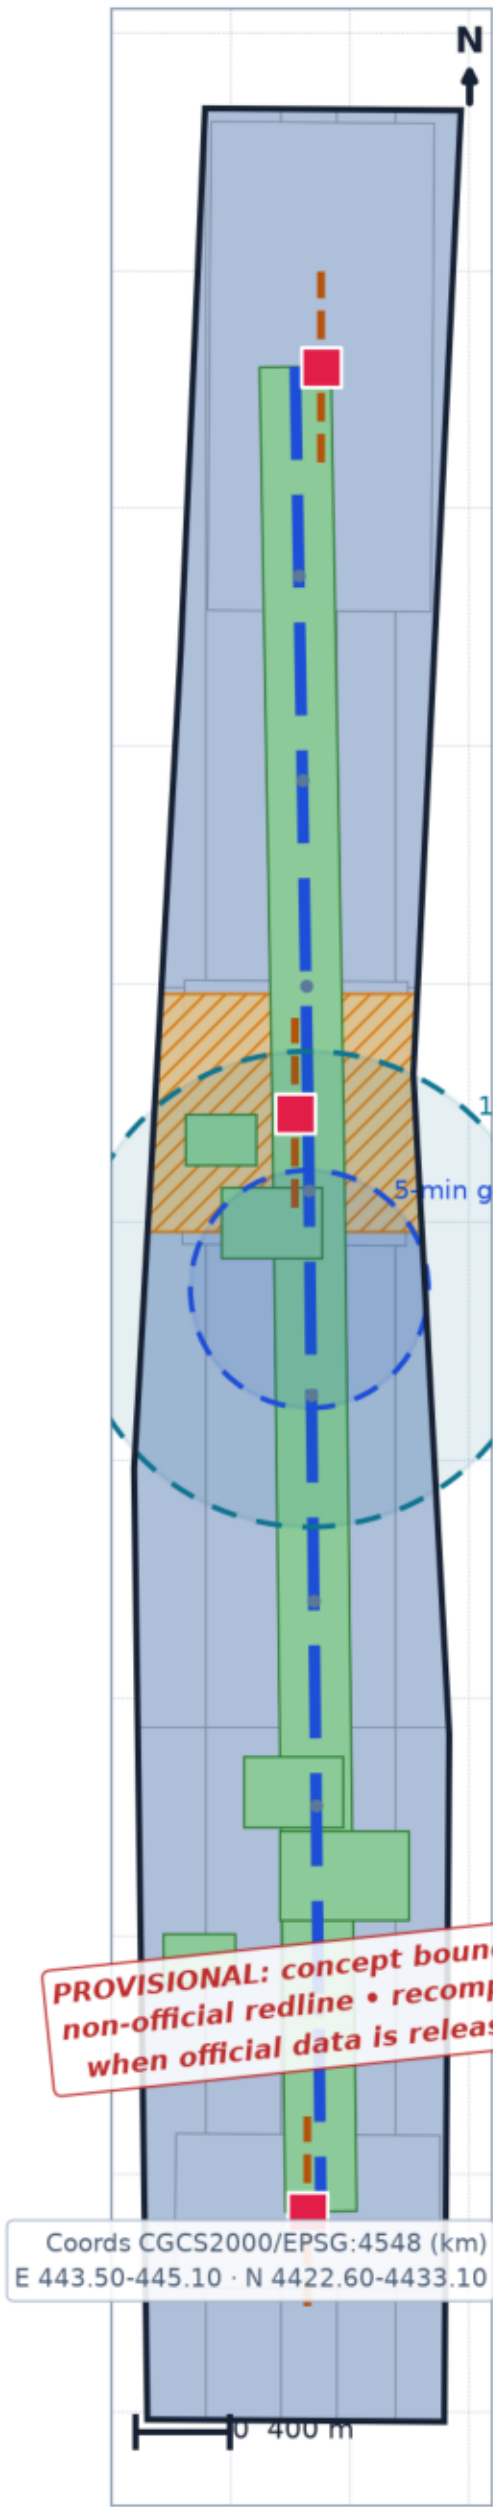

N1-N3 nodes (concept placement at the three ke

- N1 Smart-Core Plaza: pre-station plaza + urban
- N2 AI Mobility Hall: commute assistant + access
- N3 Smart Transit Link: weatherproof link + multi
- 8 AI scenario nodes (PS-SN00-07) along the skyline

Caliber notes

- The announcement gives no extents for the ke provisional ranges, not parcel or road redlines
- Node IDs N1-N3 match the text; labels are over
- Official polygons -> redraw, recompute, re-lab

/ & blue-green network: radial links and the 5-10 min accessibility goal (to

5-10 min full coverage = to-be-verified goal

• Method: official network base; walking 4.5 km

equivalent-time grid -> isochrones & coverage

• Assumptions: actual crossing paths, no straight

• Results & limits published with the recompute

• Circles here are concept radii only, not isochrone

Blue-green network (concept)

• Green-chain: tree-lined corridors + pocket par

• Jing-Zhang heritage park belt: history / slow-lit

• Greenway link towards Yuandadu city-wall par

• Permeable paving & rain gardens in plazas an
