

Centennial Jing-Zhang · A Living Intelligent City

Integrated Design of Jing-Zhang Heritage and Civic AI-Agent Governance — Formal Concept Package

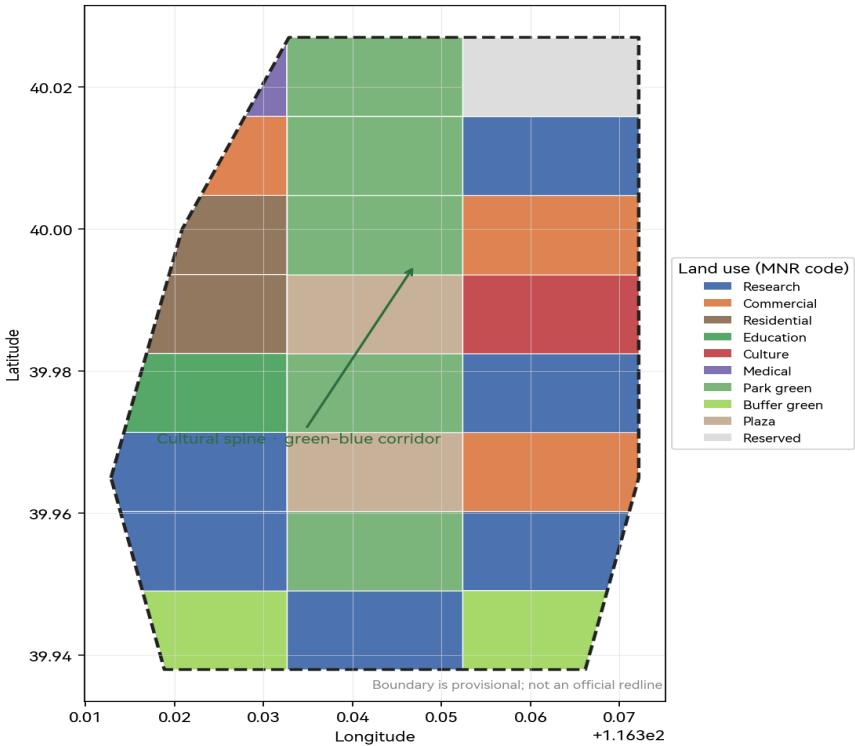

1. Design Basis & Three-Level Scope

A concept design for the Centennial Jing-Zhang AI Innovation Belt: 43.6 km² coordinated research area (North 5th Ring Rd to Xizhimen Outer St), 11.4 km² overall design area, and ~368.4 ha across three key areas. Boundaries are provisional rough substitutes, not official red lines; recompute areas and indicators when the official polygon is released.

Centennial Jing-Zhang AI Belt — Overview & Spatial Structure

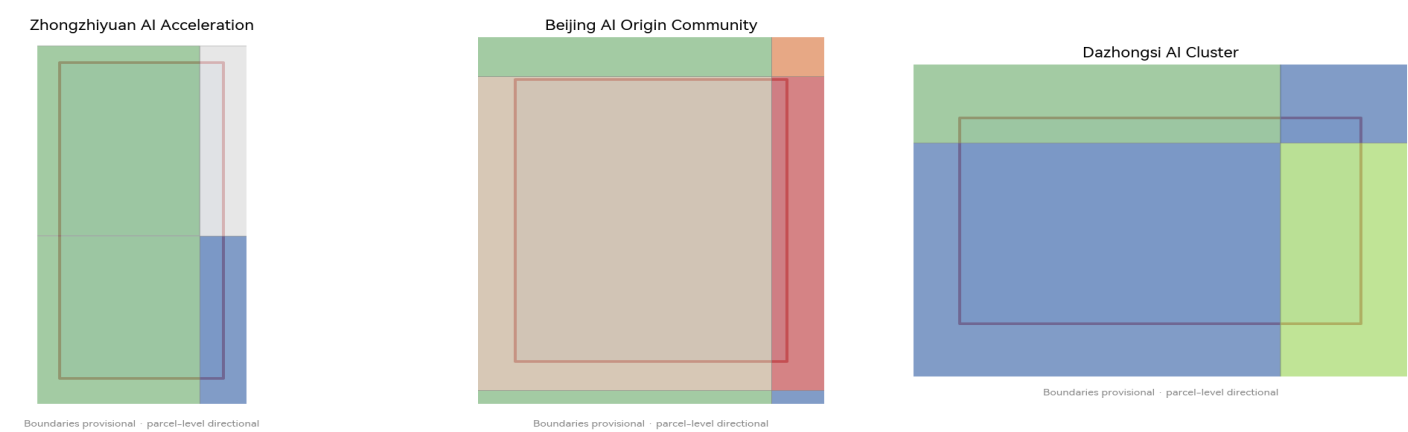

Land Use & Development Intensity (conceptual)

2. Three Key Area Detailed Design

Zhongzhiyuan AI Autonomous Innovation Acceleration Area (~192.1 ha); Beijing AI Origin Community (~104.3 ha); Dazhongsi AI Industry Cluster (~72.0 ha). Each delivers positioning + spatial structure + building regeneration + slow mobility + public space + AI scenarios + implementation risk; parcel-level conclusions are directional.

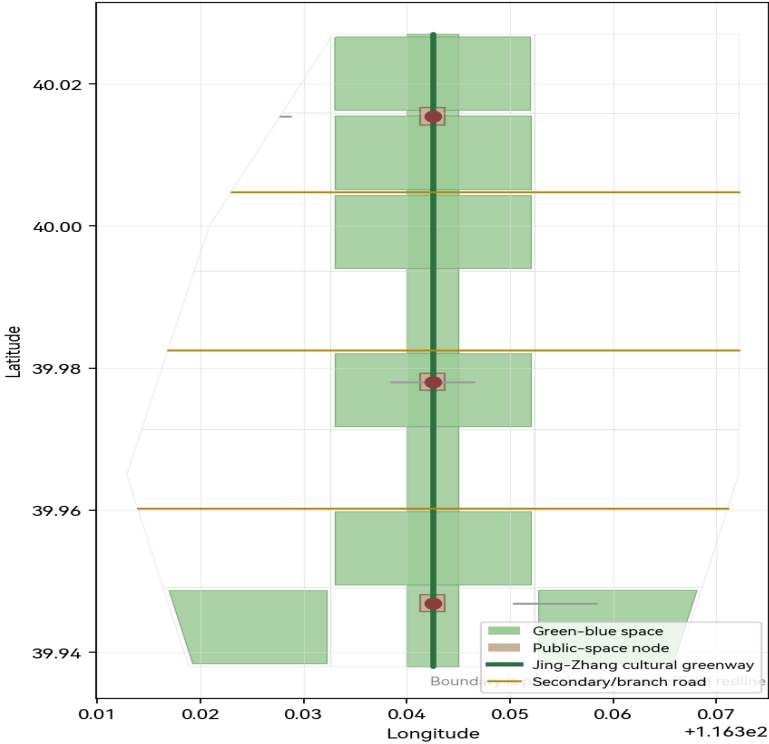

Three Key Areas — Detailed Design Index (Provisional)

3. Mobility, Slow-Transport & Blue-Green Public Space

A Jing-Zhang cultural greenway connects north-south greenways and east-west secondary roads; the Jing-Zhang Heritage Park active belt and the Xiaoqing (Xiaoyuehe) network form the blue-green system, with plazas, developer streets, and node parks.

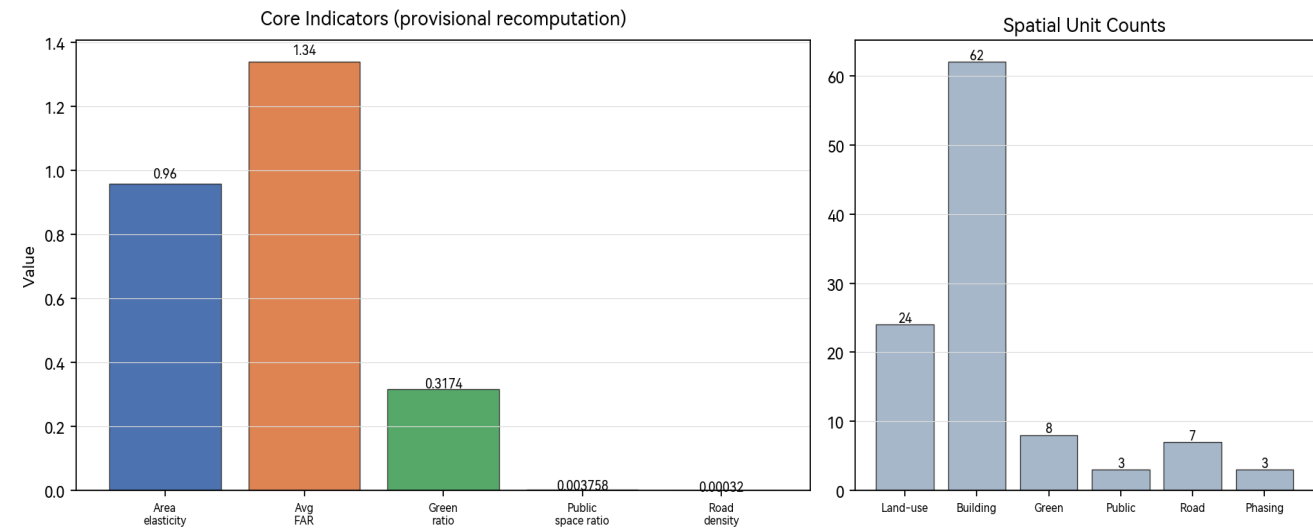

Mobility, Slow-Transport & Green-Blue Public Space System

4. Core Indicators & Service Targets

Covers 5 user personas and ≥10 AI scenario cards (incl. 3 industry test/validation scenarios and 3 AI pilgrimage landmarks); compliance response across 5 mandatory standards and 17+6 tasks.

Indicator Recomputation & Evidence Chain (from geometry/* + metrics.json)
