

Qinghe Smart Shore - AI Innovation Commons (QSS-AIC)

Centennial Jing-Zhang AI Innovation Belt (Haidian) - Qinghe Riverfront Demonstration Segment - Concept Proposal

Official three-level scopes (announcement):

Coordinated research area approx. 43.6 km2 (tier 1, strategic)

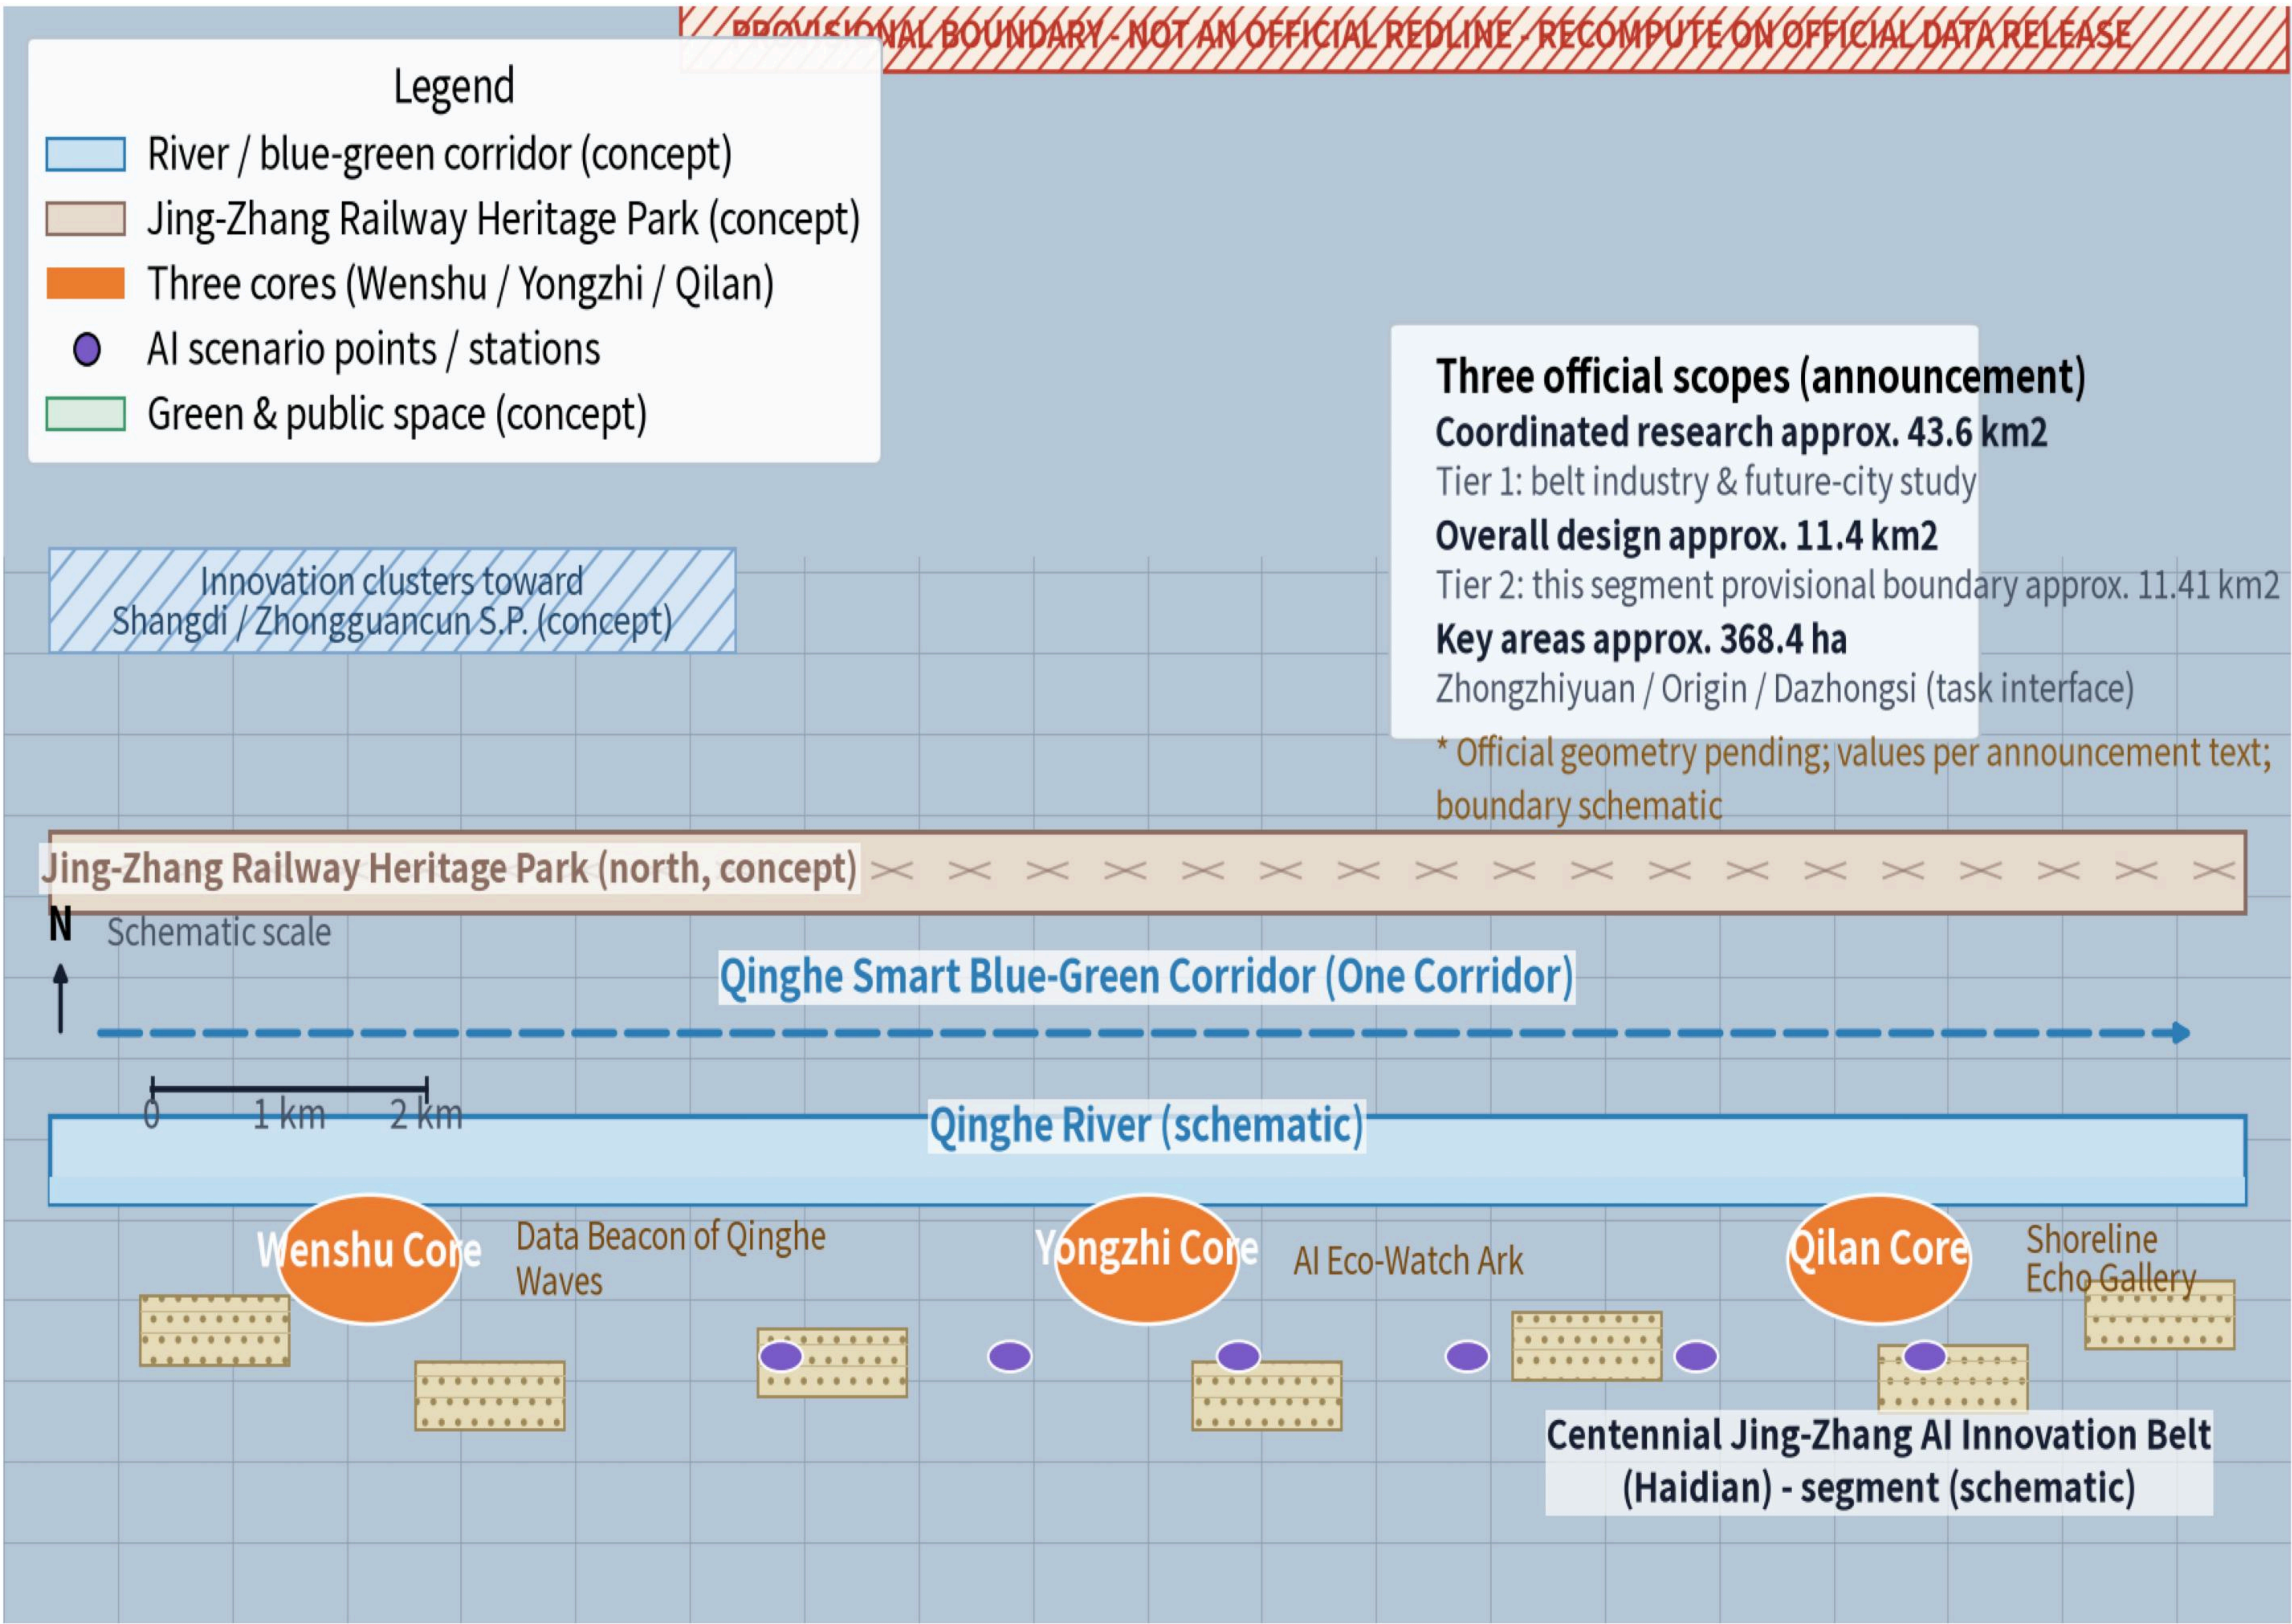

Overall design area approx. 11.4 km2 (tier 2; this segment provisional boundary approx. 11.41 km2)

Key areas approx. 368.4 ha (Zhongzhiyuan 192.1 / Origin 104.3 / Dazhongsi 72.0)

Official geometry pending; all boundaries here are schematic; recompute on official release

Site Overview: One Corridor, Three Cores, Multiple Nodes & Three-level Scopes

Provisional schematic concept map

Philosophy: Waterfront as Commons - One Corridor, Three Cores, Multiple Nodes - dual-use space - data commons - human review for AI

All outcomes are conceptual (provisional) and do not replace statutory planning; areas and ratios are schematic pending official data.

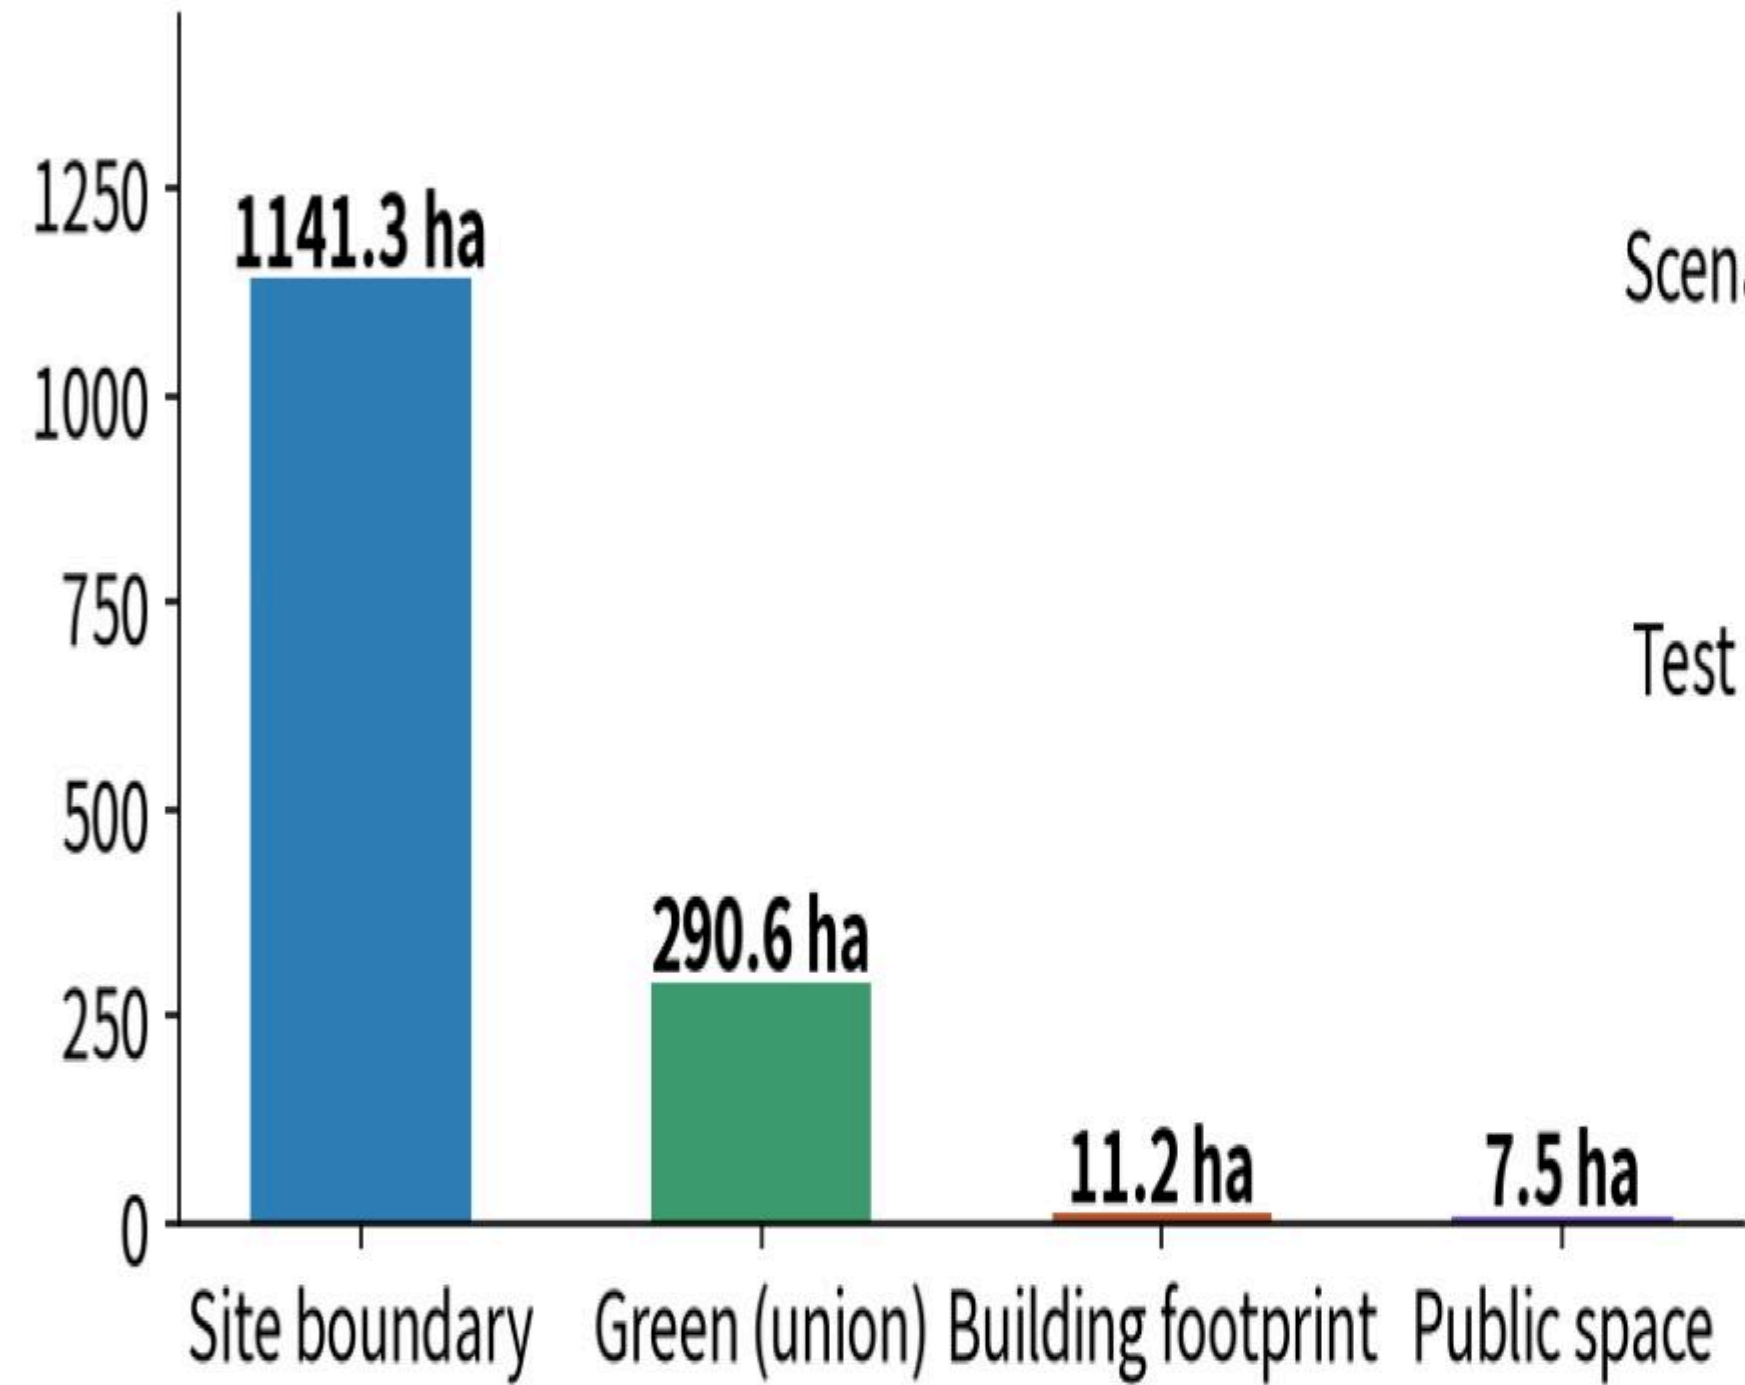

Scenario System, Core Metrics & Implementation Framework

Daily scenario cards (10): S01-S10

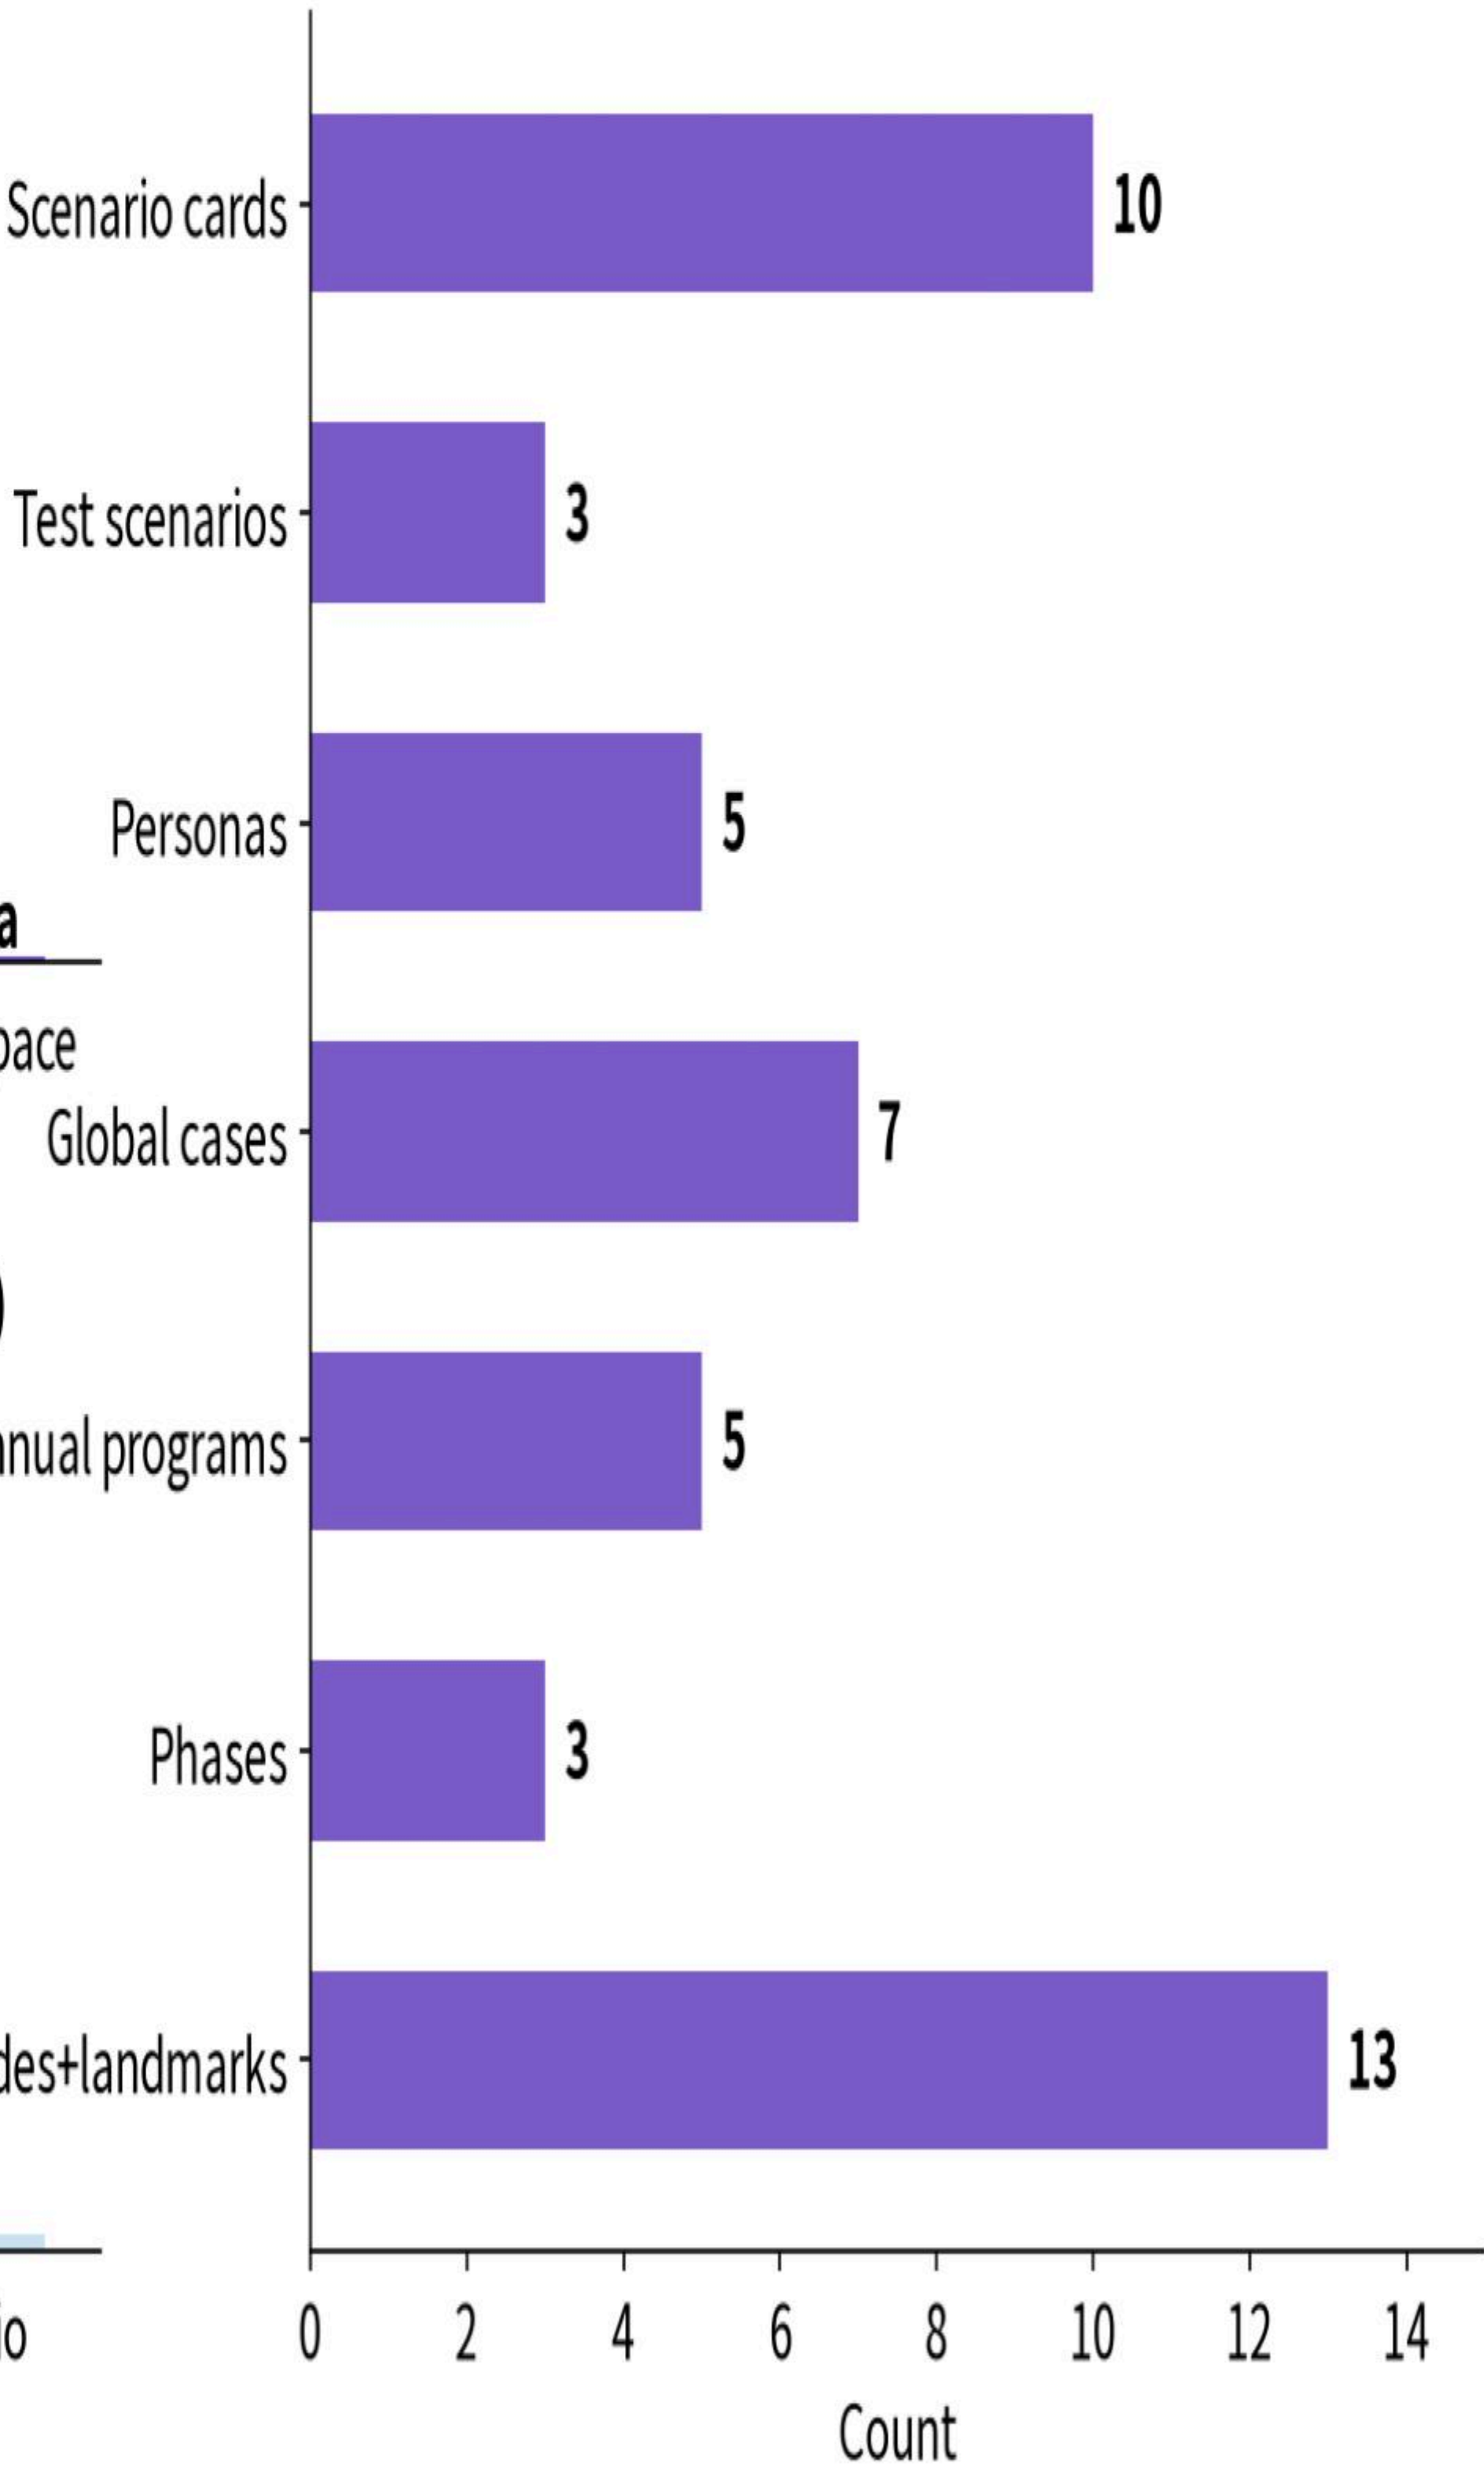

Core Metric Evidence: area / ratio / count on SEPARATE axes

Source: geometry/*_geojson; formulas & confidence in metrics.json; provisional values schematic only

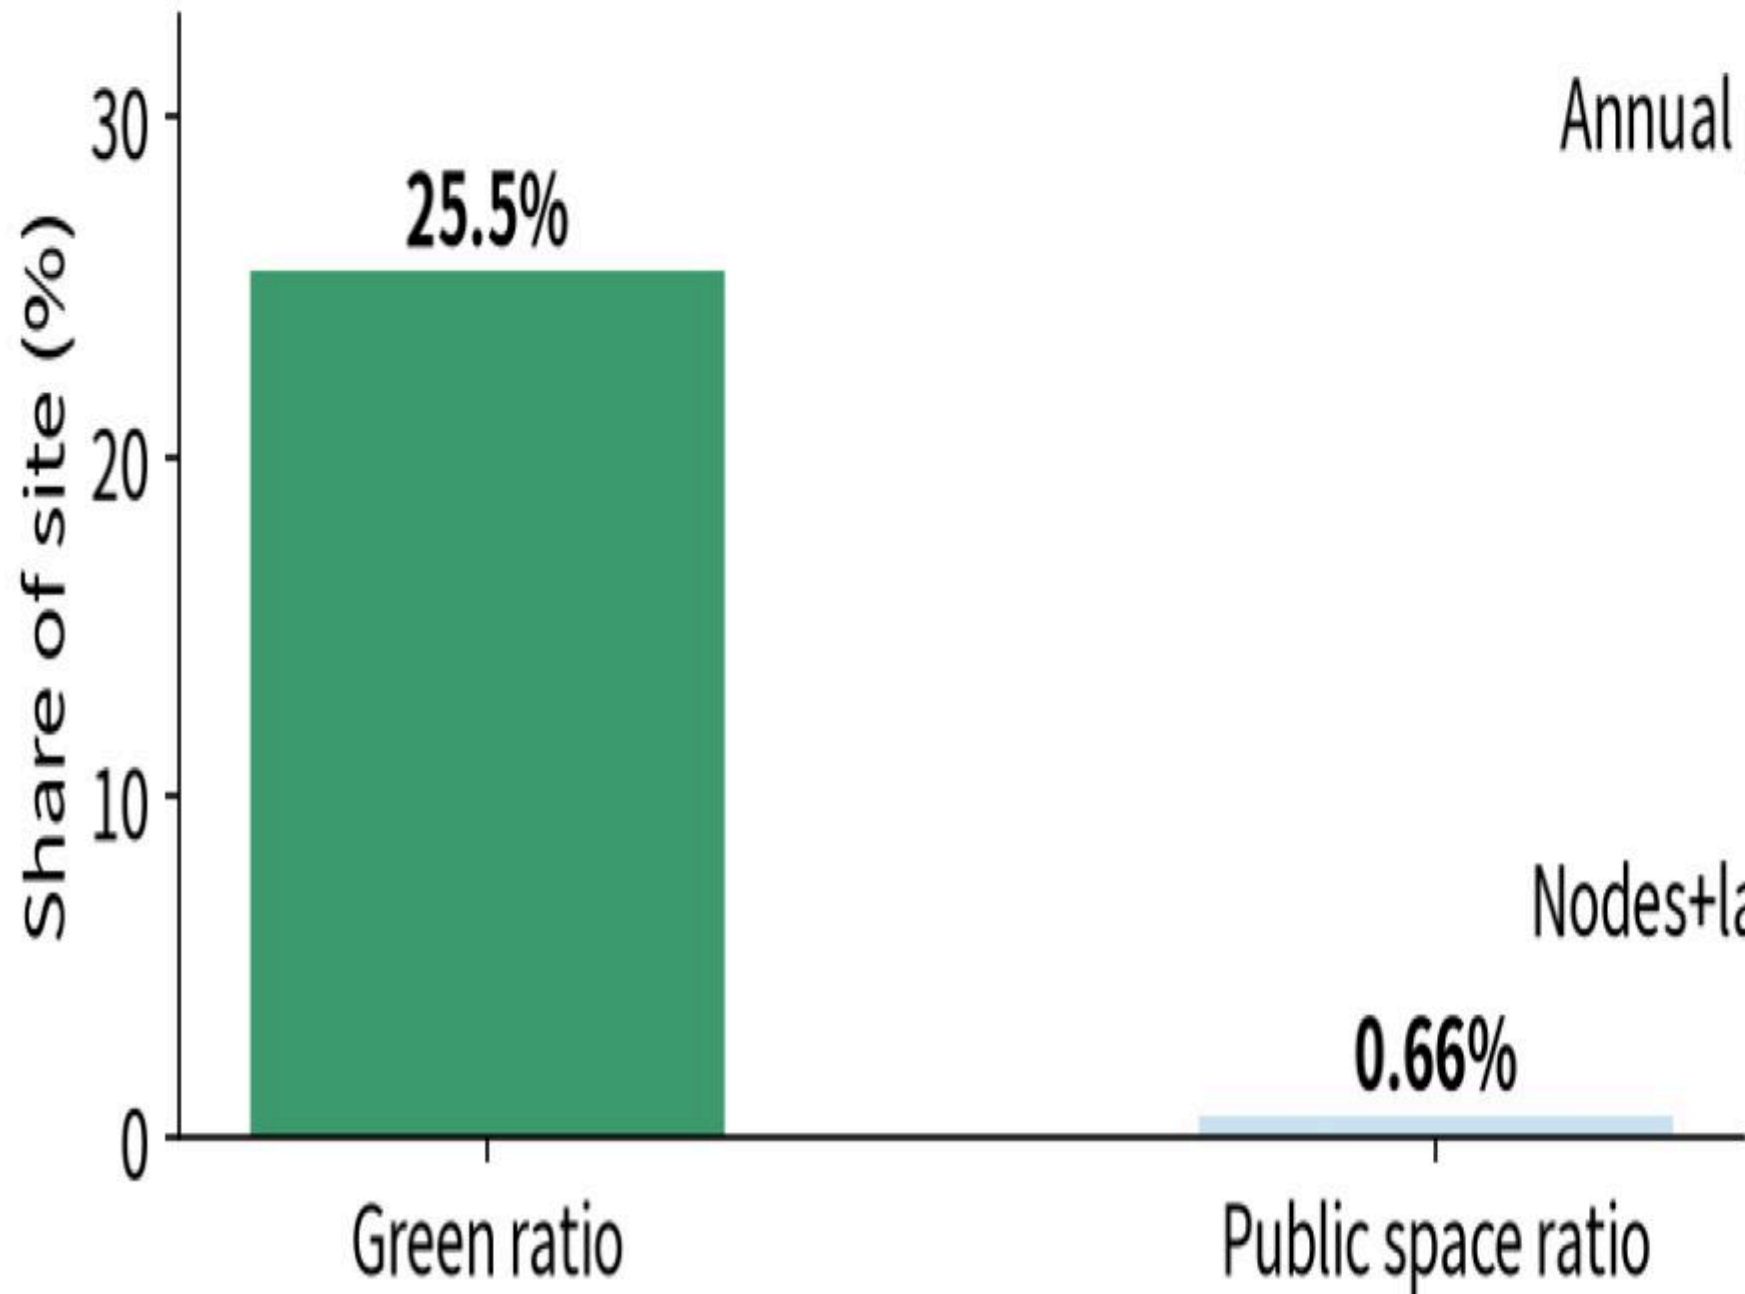

A. Area metrics (single unit: ha)

C. Count metrics (separate from ratios)

B. Ratio metrics (own axis; small ratio visible)

Evidence chain:

PROVISIONAL BOUNDARY - NOT AN OFFICIAL REDLINE - RECOMPUTE ON OFFICIAL DATA RELEASE

Formulas: site area = polygon area (EPSG:4548 recompute); green_ratio = green union / site; public_space_ratio = public-space union / site |

Source: geometry/*_geojson (provisional) | Confidence: low/medium | Use limit: schematic only, no statutory or engineering conclusion | Recompute

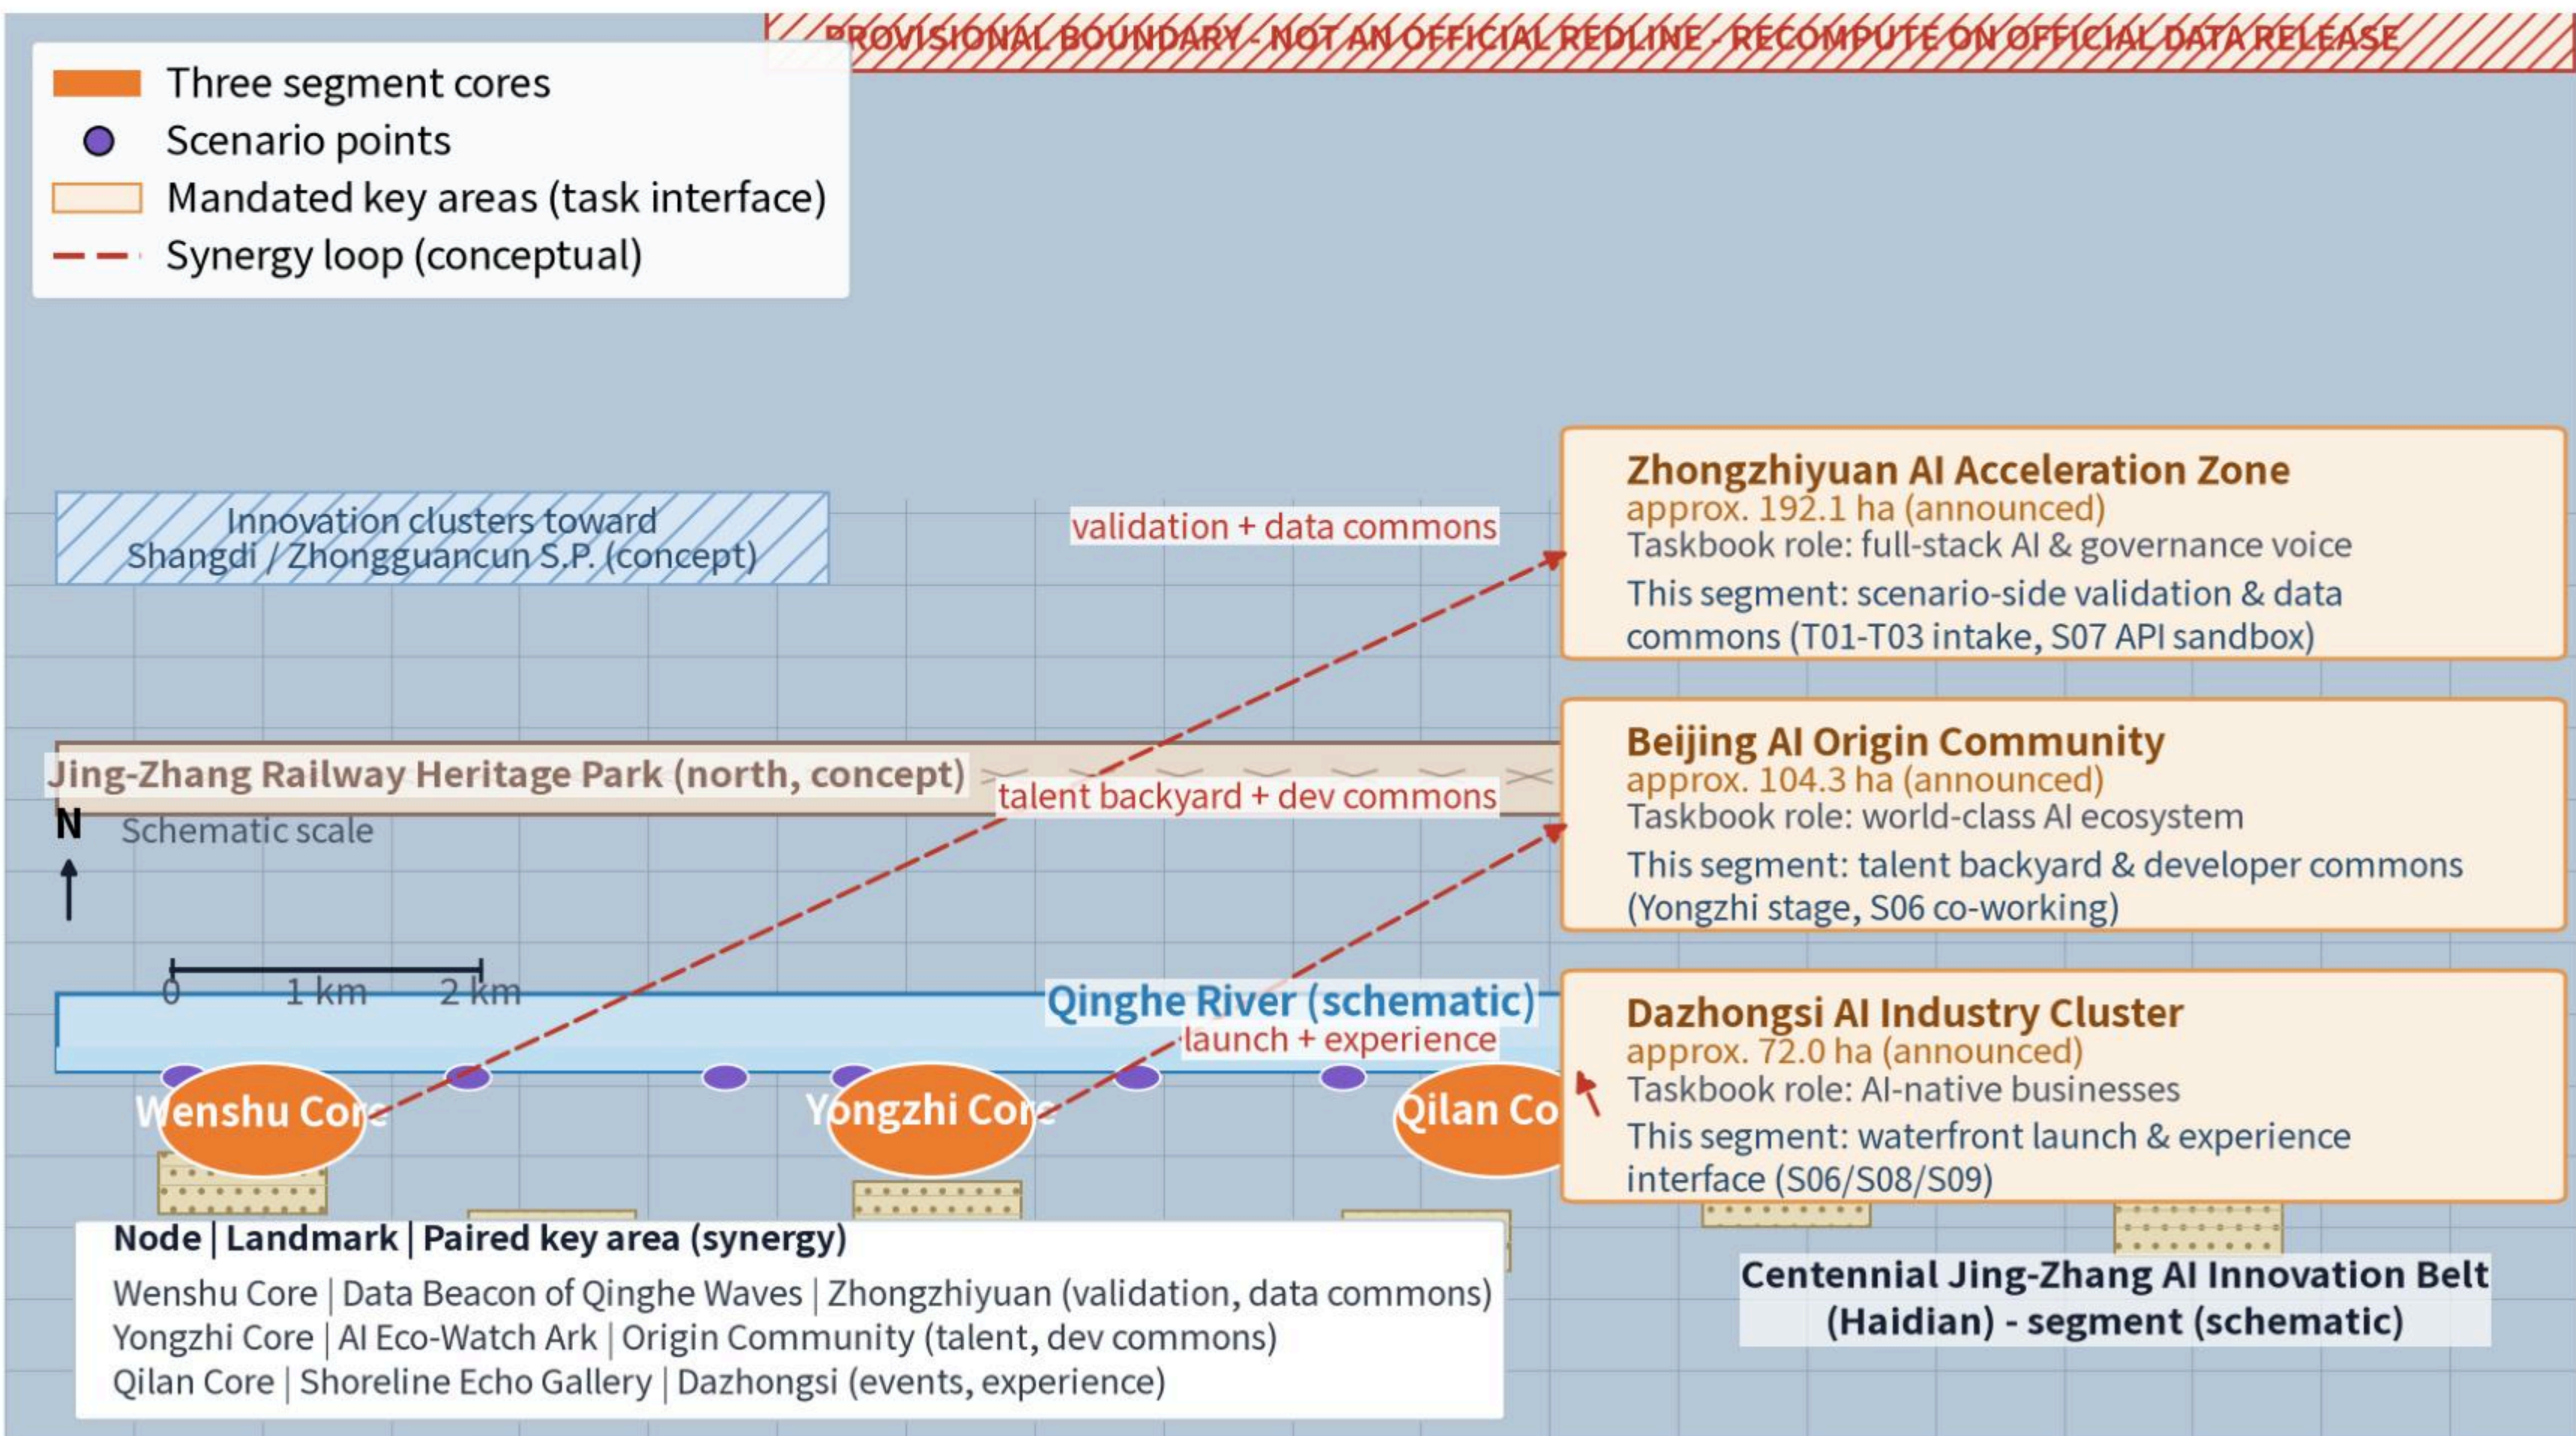

trigger: official boundary, river management range and terrain data release.

Annual programs 5 (Tech Week / Light & Shadow / Hackathon / Study Season / White Paper) - phases: 1-2 / 3-4 / 5-6 years

Implementation: RACI matrix (lead/collaborate/support), minimum pilot, pre-approvals, public KPIs, feedback loops

Three Segment Nodes x Three Mandated Key Areas

Node-landmark-key-area synergy loops (conceptual; official geometry pending)

Brand: QSS-AIC bilingual lock-up (VI concept draft) - internal working codename until trademark cleared

Risks: statutory boundary, data/monitoring boundary, AI compliance, copyright, privacy, force majeure

PROVISIONAL BOUNDARY - NOT AN OFFICIAL REDLINE - RECOMPUTE ON OFFICIAL DATA RELEASE
