

# JINGZHANG ENCOUNTER COMMONS

LET DENSE TALENT CREATE MEANINGFUL CONNECTIONS.

AI MATCHES TASKS, NOT PEOPLE

PEOPLE DECIDE ENTRY AND EXIT

CONCEPT / STOPPABLE

# How to Read This Civic Field Manual

This is not a promised master plan. It is a public-space protocol that can be tested, stopped, handed off, and recomputed.

01 / VERSION

v1.3 / feixukeji / Codex

02 / BILINGUAL

Chinese and English page counts, figure order, metrics, and warnings stay isomorphic.

03 / BOUNDARY

Overall and key-area geometries are provisional and are not official boundaries.

04 / AUTHORITY

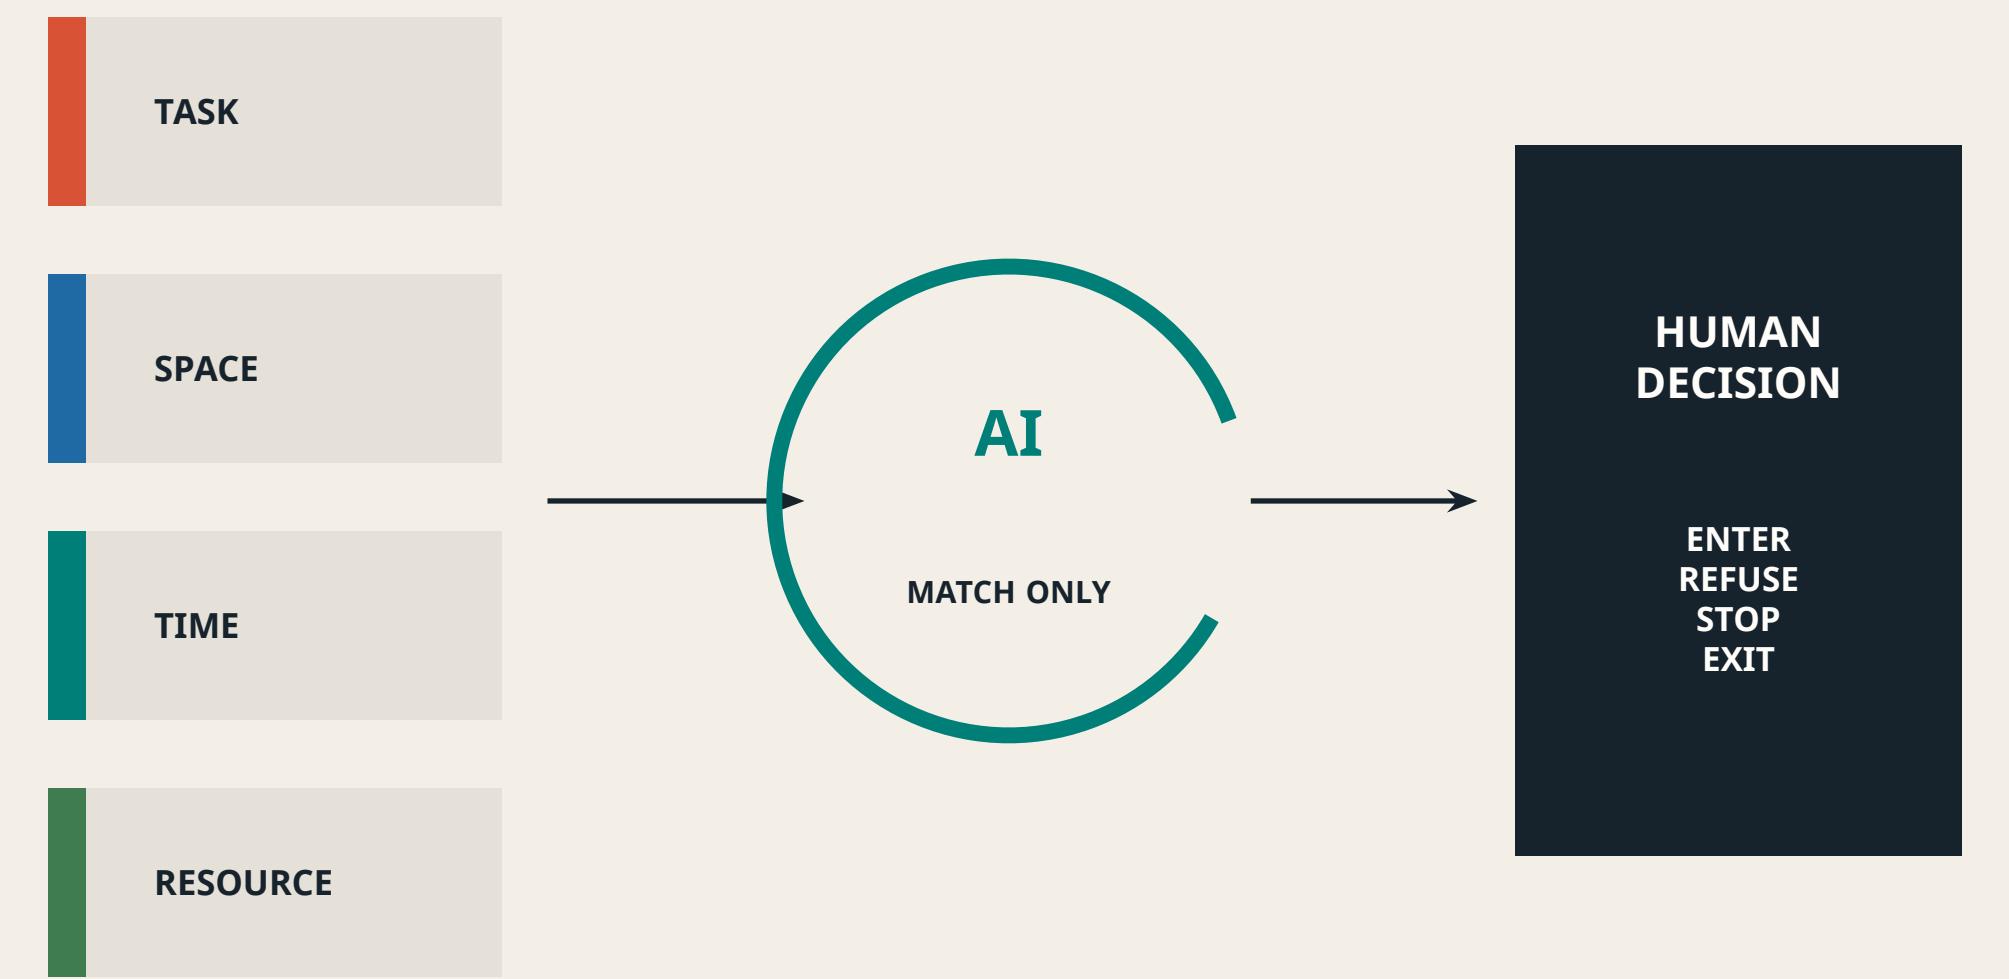

All three pilot contracts remain unauthorised; field performance remains null.

05 / STATUS

Concept advice; not statutory planning, professional design, or government approval.

# AI Does Not Identify People

AI matches public tasks, spaces, times, and authorised resources; people decide entry, refusal, stop, and exit.

JUDGMENT

NO IDENTIFICATION

No profiles and no private relationship inference.

MECHANISM

RULES BEFORE MODEL

Eight fields, named host, and human release.

BLOCK

NO EQUIVALENT, NO LAUNCH

No-account, non-AI, and offline routes must be equivalent.

# Declare Evidence Status Before Drawing Space

Facts, inferences, and field-check items must not share one graphic voice.

01 / PRIMARY

Public announcement, Agent taskbook, repository standards, and Haidian government pages.

02 / LOCAL BASELINE

Open Phase I facts are separated from Phase II plan and construction status.

03 / MECHANISMS

Six primary cases transfer mechanisms, never authority, scale, or performance.

04 / GAPS

Official geometry, entrances, ownership, heritage, transport, utilities, cost, and operating agreements.

05 / HARD RULE

A critical unknown blocks launch, publication, and scaling.

# Three Scope Levels, Three Questions

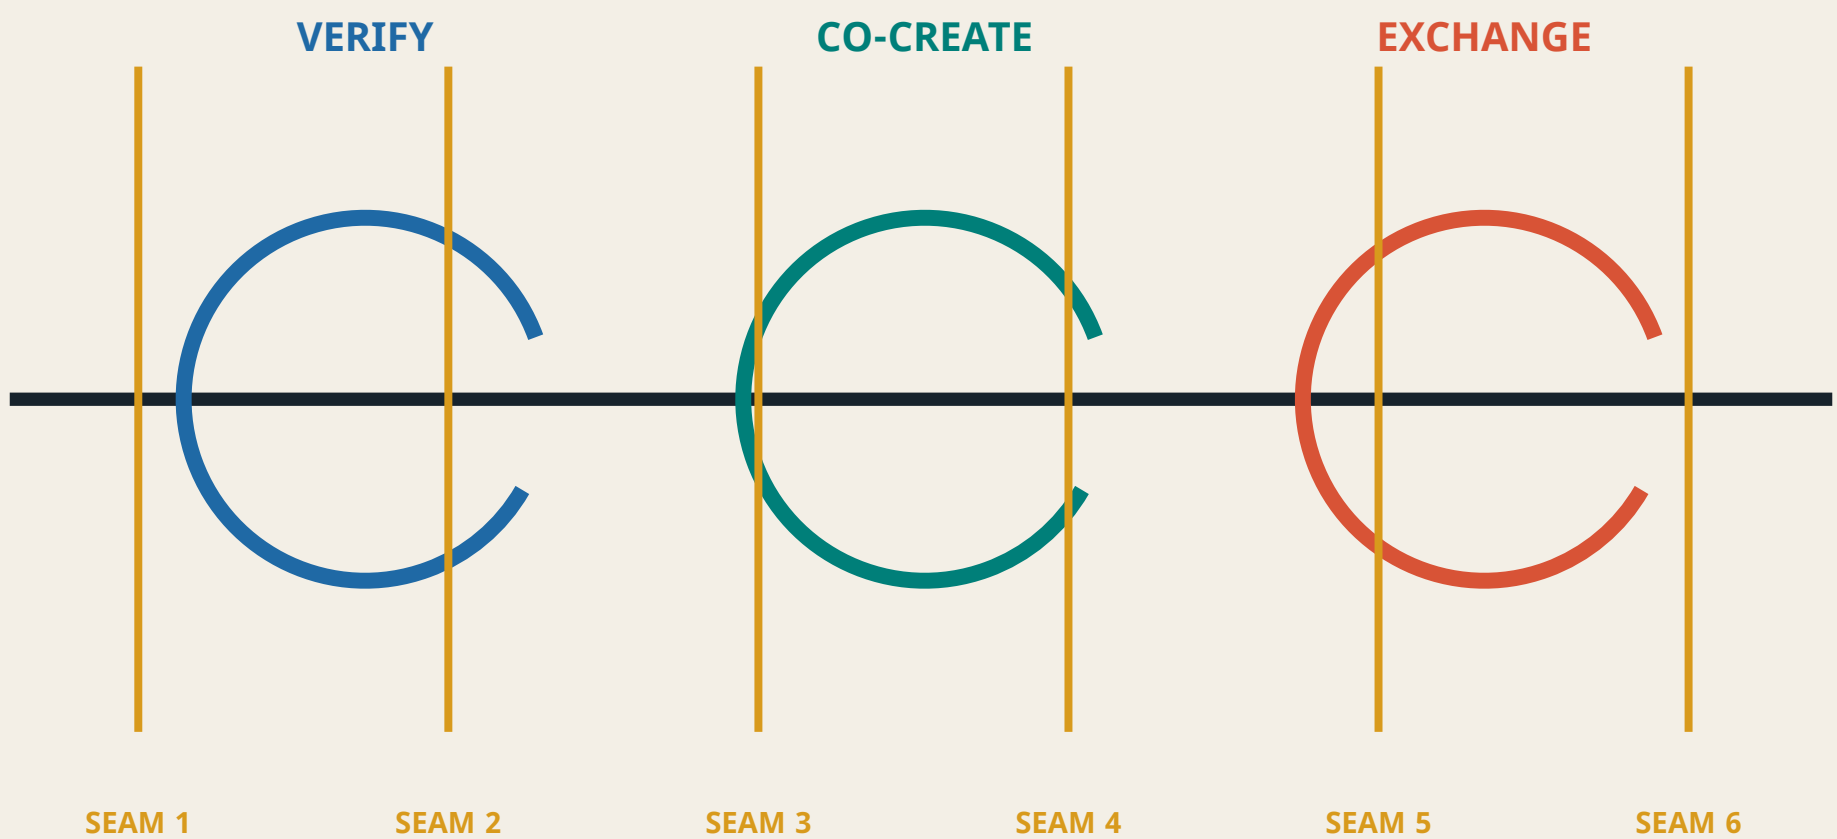

The strategic level links resources, the system level organises services, and key areas test prototypes; they are not one statutory boundary.

| COORDINATE                                  | SYSTEM                                                            | PROTOTYPES                                                  |
|---------------------------------------------|-------------------------------------------------------------------|-------------------------------------------------------------|
| 43.6 km²                                    | 11.4 km²                                                          | 368.4 ha                                                    |
| Announced regional coordination study area. | Provisional geometry computes 11.41 km²; not an official polygon. | Three announced areas; exact locations await official data. |

Announced values, provisional calculations, and statutory boundaries must remain separate.

# One Spine, Three Commons, Two Wings, Six Seams

The Encounter Spine is a service and programme sequence, not a new road; six seams are field-audit questions.

**ARRIVE - CROSS - ENTER - STAY - EXIT**

Any safety-critical unknown withdraws the connectivity claim.

**Six seams are representative audits, not six new roads.**

# Protocol Before Permanent Works

Every advance requires fresh venue, fire, ownership, and access evidence.

|                                                                                                                       |                                                                                                                          |                                                                                                              |
|-----------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------|
| <div>01</div> <div>VENUE PROTOCOL</div> <div>Verify operator, entry, exit, and hours; no exit means no opening.</div> | <div>02</div> <div>REVERSIBLE KIT</div> <div>Paper, signs, tables, and physical stop; removable after ninety days.</div> | <div>03</div> <div>PROFESSIONAL WORKS</div> <div>Sign off ownership, structure, fire, MEP, and access.</div> |
|-----------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------|

FAR / height / parking / removal: remain unknown without official evidence.

# Nine Kilometres Is Not an Operating Promise

Release a route only after obtaining as-built boundaries and entrance registers and checking access point by point.

| KNOWN                                                                                                         | INFERENCE                                                                                   | FIELD RELEASE                                                                                                          |
|---------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------|
| <div>9 km / 70 ha / 46 / 9</div> <div>2024 public plan; 2026 reports main works in implementable areas.</div> | <div>6 REPRESENTATIVE AUDITS</div> <div>Not the nine planned links and not new roads.</div> | <div>REGISTER - WALK - RELEASE</div> <div>Hours, crossing, width, slope, lighting, noise, and egress all matter.</div> |

Any critical site condition unknown: do not publish the route.

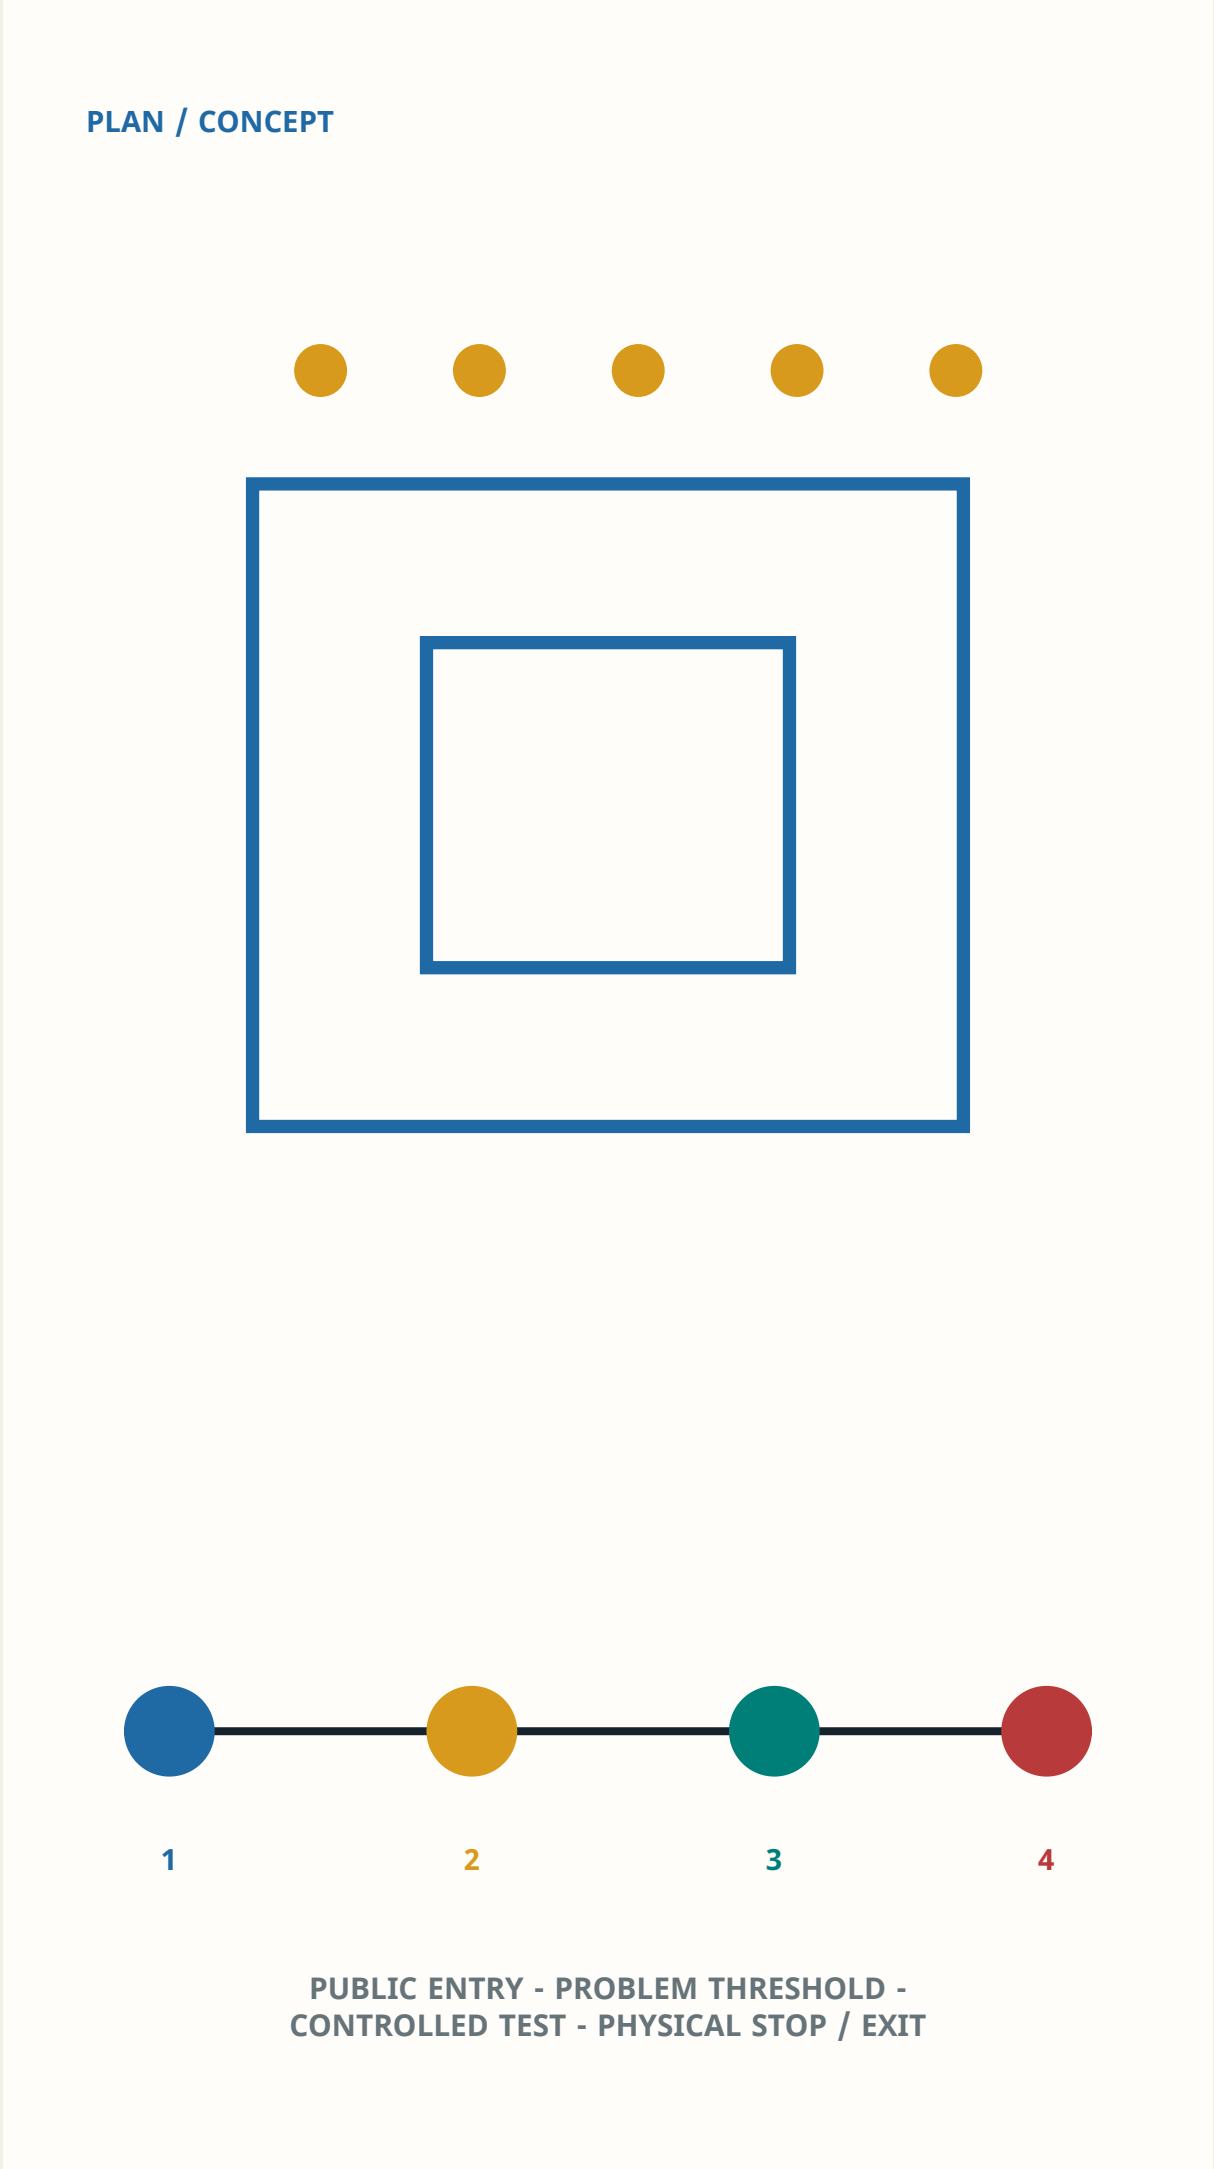

# Three Commons, Three Different Prototypes

All three have physical entry, human threshold, core activity, stop, and visible exit, but their spatial organisations differ.

|                                                                                                                       |                                                                                                                 |                                                                                                                 |
|-----------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------|
| <div>ZHONGZHIYUAN</div> <div>CONTROLLED YARD</div> <div> </div> <div>ENTRY - THRESHOLD<br/>- CORE - STOP / EXIT</div> | <div>AI ORIGIN</div> <div>COMMON TABLE</div> <div> </div> <div>ENTRY - THRESHOLD<br/>- CORE - STOP / EXIT</div> | <div>DAZHONGSI</div> <div>CITY GALLERY</div> <div> </div> <div>ENTRY - THRESHOLD<br/>- CORE - STOP / EXIT</div> |
|-----------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------|

Exact location, dimensions, and permanence await professional sign-off.

# Zhongzhiyuan Common Problem Yard

ROUTE

PUBLIC ENTRY, ISOLATED TEST

Core activity and bypass exit must both be visible.

FIRST EVIDENCE

VENUE RELEASE

Named data, ethics, and safety owners.

STOP

NO DUTY HOLDER, STOP

No separation, unclear boundary, or any safety event also stops.

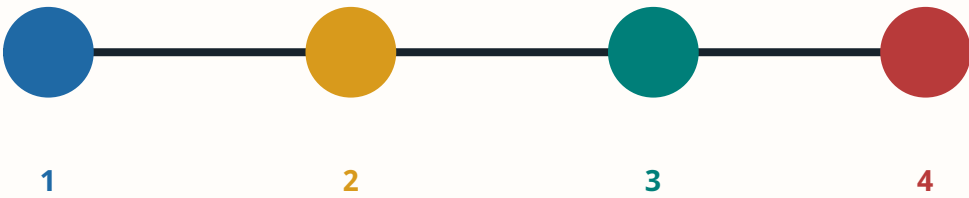

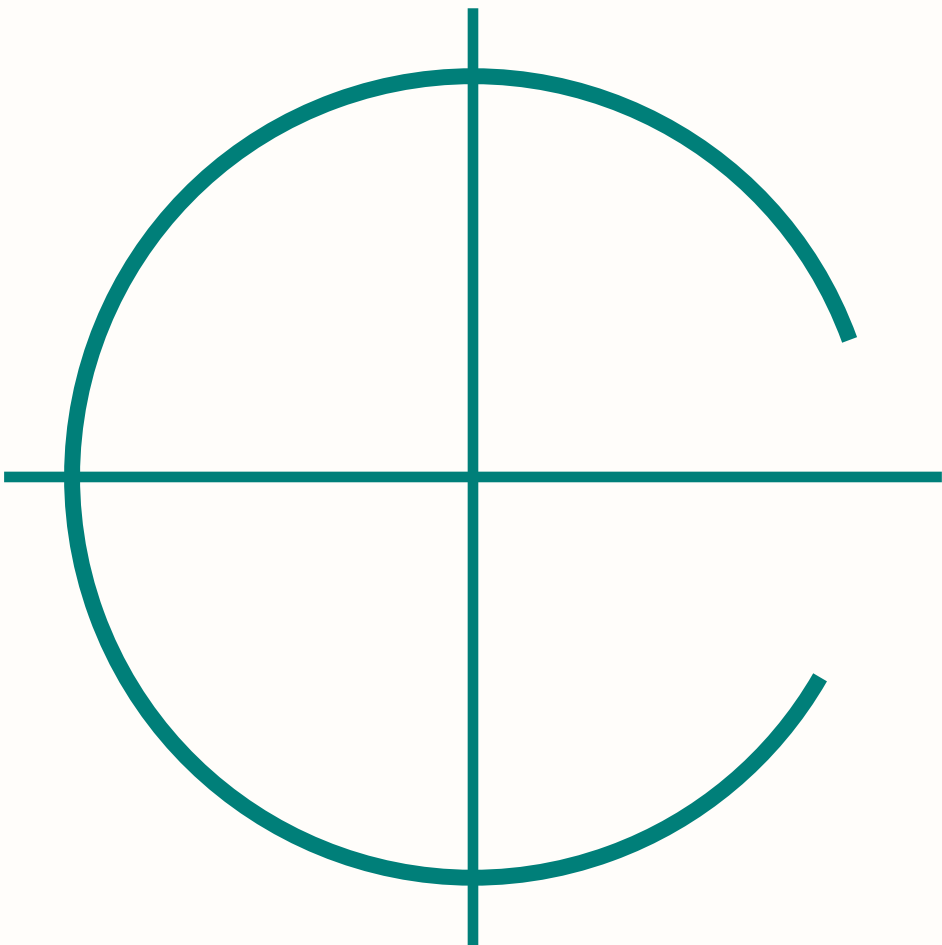

HANDOFF

PROFESSIONAL SIGN-OFF

Architecture, structure, fire, access, and venue operations.

# AI Origin Common Table Yard

PLAN / CONCEPT

NO-LOCAL-ACCOUNT ENTRY - HUMAN  
HOST - COMMON TABLE - OFFLINE EXIT

ROUTE

COMMON TABLE, NOT  
PEOPLE MATCHING

A human threshold explains task, data  
boundary, and exit.

FIRST EVIDENCE

NINETY-DAY ROSTER

No-account, offline, and multilingual routes  
are equivalent.

STOP

NO HOST, STOP

Overload, unchecked translation, or failed  
offline route also stops.

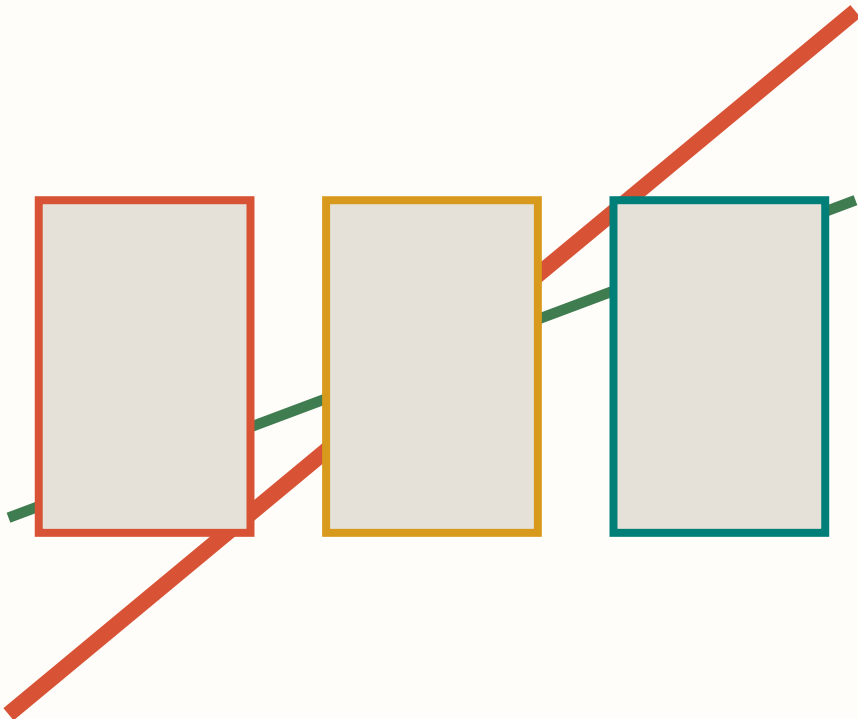

HANDOFF

OPERATIONS AND DATA

Public service, information access, staffing,  
and data governance.

# Dazhongsi Common City Yard

PLAN / CONCEPT

URBAN ENTRY - EVENT RELEASE - FIRST USE / CULTURE - QUIET EGRESS

ROUTE

EVENT-BY-EVENT RELEASE

Not station-anchored and not a permanent event promise.

FIRST EVIDENCE

REAL CANDIDATE SITE

Then check heritage, noise, egress, and access.

STOP

LIMIT FAILS, STOP

Crowd, noise, egress, or exit-route failure stops the event.

HANDOFF

DISCIPLINE SIGN-OFF

Planning, transport, heritage, fire, acoustics, and community.

# One Person, Not a User Profile

First visit, limited Chinese, no local account, and an empty phone battery. Ninety minutes is a script to test, not observed performance.

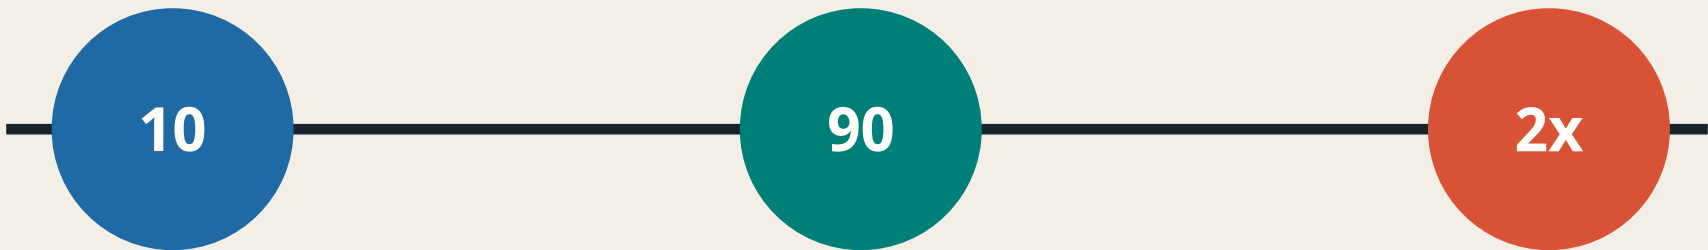

STOP / No host, critical mistranslation, missing source, failed no-account route, or blocked exit.

# Twelve Scenarios, Three Offline Replays

S01-S03 are synthetic validation, not field performance; S04-S12 remain pending authorisation.

|                                                                                                         |                                                                                                      |

# It Is Not Open Unless People Can Exit

The endpoint is not launch. It is the ability to understand, refuse, complain, delete, leave, and leave a verifiable restoration record.

01 / PRIVACY

No face, contacts, precise trajectory, health inference, relationship graph, or personal score.

02 / SPACE

All boundaries are provisional; recompute when official data arrive.

03 / OPERATIONS

Named owners, non-AI equivalent, physical stop, restoration, and retirement are mandatory.

04 / RIGHTS

Sources, ODbL orientation context, Noto OFL, and original figures are registered.

05 / NEXT

Real entrance and access walk - operator verification - controlled ninety-day pilot.
