

JING-ZHANG CIVIC FOUNDRY

A CULTURAL-PRODUCTION BELT FOR CIVIC AI PRODUCTS

Culture turns AI into civic products.

WHY A CULTURAL-PRODUCTION BELT FOR CIVIC AI PRODUCTS

Jing-Zhang needs urban capacity that converts technical output into real use, durable operation, and public reinvestment.

V6.0 • CULTURE TURNS AI INTO CIVIC PRODUCTS

JING-ZHANG CIVIC FOUNDRY

A cultural-production belt for civic AI products, built on an existing public corridor rather than a blank site.

CIVIC FOUNDRY

Culture turns AI into civic products.

43.6 km²

COORDINATION NETWORK

11.4 km² $3 + 2$

THREE ZONES + TWO WINGS

PUBLIC START

Nine kilometres, 70 communities, and 450,000 residents precede technology.

CULTURAL ROLE

Organise context, authors, rights, distribution, use, and reinvestment.

THREE PRODUCTS

Content pack, experience module, urban service; public baseline survives exit.

DIRECT TASKBOOK RESPONSE • 3 + 5 + 3 + 2

Not four lists, but one demand-and-supply loop from capability to civic-adoption evidence.

SPATIAL STRUCTURE • REAL GEOMETRY, PROVISIONAL BOUNDARY

THREE ZONES + TWO WINGS • ONE LINE + THREE GROUNDS + NINE ROOMS

A transverse production relationship among technology service, civic floor, and everyday scenarios.

One longitudinal civic floor protects continuity; nine transverse rooms create exchange.

ZHONGZHIYUAN • VALIDATE

L1: Hard tech, high risk, low exposure

AI ORIGIN • CO-PRODUCE

L2: Real briefs, culture, human-AI making

DAZHONGSI • PREMIERE

L3: Low risk, high exposure, adoption review

WEST / 西翼

ZHONGGUANCUN TECH-SERVICE WING Talent • IP • capital • compute • professions

EAST / 东翼

XIAOYUE RIVER SCENARIO WING Community • ecology • care • mobility • services

3 POSITIONINGS

Centennial culture • metropolitan AI life • AI-integrated innovation

5 FUNCTIONS

Full stack • ecosystem • scenarios • vibrant city • governance voice

3 ZONES + 2 WINGS

Zhongzhiyuan–AI Origin–Dazhongsi; tech-service and scenario wings

FIVE-LAYER SPATIAL DECISION METHOD

Daily life, legibility, ecology, five-minute experience, and incremental construction release space in sequence.

LIFE-SPACE-BUILDING • ECOLOGICAL SUITABILITY

DECIDE WHERE TO KEEP QUIET BEFORE DECIDING WHERE AI MAY ENTER

Six ecological overlays + 2x3 public-life observation + three five-minute sequences determine block action.

L1 LIFE

Mixed ground floor and multiple times first.

L2-L3 SKELETON + FIT

Legibility plus water-soil-tree-heat-sound-habitat decisions.

L4-L5 PEOPLE + PATTERN

Five-minute sequences and six reversible patterns.

THREE SCOPE LEVELS ARE NOT ONE DRAWING AT THREE SCALES

The network allocates capability; the corridor organises transverse civic interfaces; prototypes match risk and exposure.

V6.0 • CULTURE TURNS AI INTO CIVIC PRODUCTS

JING-ZHANG CIVIC FOUNDRY

A cultural-production belt for civic AI products, built on an existing public corridor rather than a blank site.

43.6 km² NETWORK

Civic commissions, professions, cultural production,
regional interfaces.

11.4 km² CORRIDOR

One line, nine rooms, quiet-active rhythm, functional weave.

368.4 ha PROTOTYPES

Three risk gradients and five-minute spatial sequences.

OVERALL PLAN • ONE LINE, THREE GROUNDS, NINE ROOMS

Longitudinal continuity is not a linear industry belt; nine transverse rooms connect capability and daily problems.

SPATIAL STRUCTURE • REAL GEOMETRY, PROVISIONAL BOUNDARY

THREE ZONES + TWO WINGS • ONE LINE + THREE GROUNDS + NINE ROOMS

A transverse production relationship among technology service, civic floor, and everyday scenarios.

One longitudinal civic floor protects continuity; nine transverse rooms create exchange.

ZHONGZHUYUAN • VALIDATE

L1 Hard tech, high risk, low exposure

AI ORIGIN • CO-PRODUCE

L2 Real briefs, culture, human-AI making

DAZHONGSI • PREMIERE

L3 Low risk, high exposure, adoption review

WEST / 西翼

ZHONGGUANCUN TECH-SERVICE WING Talent • IP • capital • compute • professions

EAST / 东翼

XIAOYUE RIVER SCENARIO WING Community • ecology • care • mobility • services

ONE LINE

Existing green corridor plus civic-product route; events never cut it.

THREE GROUNDS

Validate-co-produce-premiere, but never a mechanical assembly line.

NINE ROOMS

Transverse exchange among capability, civic floor, and everyday life.

THREE KEY AREAS • PEOPLE RECEIVE A COMPLETE ROUTE FIRST

Architectural image follows risk exposure, human sequence, takeover, and non-participation bypass.

THREE GROUNDS • THREE RISK GRADIENTS • SIX REUSABLE PATTERNS

THREE KEY AREAS ARE RISK GRADIENTS, NOT THREE ICONIC OBJECTS

Each gives people a complete non-participation route before technology receives a visible, time-limited, reversible space.

ZHONGZHIYUAN • VALIDATE

QUIET-TEST-OBSERVE-EXIT

Failure archive and public observation outside; green buffer in the middle; controlled test and human takeover inside. Logistics never crosses public observation.

AI ORIGIN • CO-PRODUCE

STREET-PORCH-COURT-WORKSHOP

Commission porch, free shared court, and openable workshop form a sequence; provenance, authors, licences, and staffed help stay visible.

DAZHONGSI • PREMIERE

STATION-STREET-GROUND-HALL

Transit arrival meets ordinary street and neighbourhood ground floor, then a daily step, and only then a low-risk premiere hall.

P1 COMMISSION PORCH

Issue a brief without an app

P2 WORKSHOP EDGE

Free civic room beside making

P3 PROTOTYPE BAY

Main path stays open; device leaves

P4 QUIET BYPASS

No scan, no fee, no detour

Keep P4 first; add P1/P2 next; P3/P5 appear only after gates; P6 starts on day one.

P5 PREMIERE STEP

Ordinary seating outside events

P6 MAINTENANCE + EXIT

Record fault and restoration from day one

QUIET-TEST-OBSERVE-EXIT

Zhongzhiyuan: high threshold, low public exposure.

STREET-PORCH-COURT-WORKSHOP

AI Origin: co-production, medium threshold.

STATION-STREET-GROUND-HALL

Dazhongsi: low-risk premiere, high public exposure.

BLUE-GREEN + PUBLIC LIFE • NOT EVERY PLACE NEEDS ACTIVATION

Six suitability overlays decide spatial action; 2×3 observation decides seats, shade, ground floors, light, and staffed help.

LIFE-SPACE-BUILDING • ECOLOGICAL SUITABILITY

DECIDE WHERE TO KEEP QUIET BEFORE DECIDING WHERE AI MAY ENTER

Six ecological overlays + 2×3 public-life observation + three five-minute sequences determine block action.

KEEP QUIET

High sensitivity or heavy daily use; conserve and intervene lightly.

REPAIR DAILY LIFE

Repair crossing, access, seat, shade, staffed help first.

REVERSIBLE / REFUSE

Trial only on maintainable hard edges; refuse root, heritage, no-exit conflicts.

SIX SPATIAL PATTERNS • START WITH ONE PORCH OR BYPASS

A good proposal is a minimum unit communities can reuse, rewrite, maintain, and restore—not a one-shot megastructure.

THREE GROUNDS • THREE RISK GRADIENTS • SIX REUSABLE PATTERNS

THREE KEY AREAS ARE RISK GRADIENTS, NOT THREE ICONIC OBJECTS

Each gives people a complete non-participation route before technology receives a visible, time-limited, reversible space.

ZHONGZHIYUAN • VALIDATE

QUIET-TEST-OBSERVE-EXIT

Failure archive and public observation outside; green buffer in the middle; controlled test and human takeover inside. Logistics never crosses public observation.

AI ORIGIN • CO-PRODUCE

STREET-PORCH-COURT-WORKSHOP

Commission porch, free shared court, and openable workshop form a sequence; provenance, authors, licences, and staffed help stay visible.

DAZHONGSI • PREMIERE

STATION-STREET-GROUND-HALL

Transit arrival meets ordinary street and neighbourhood ground floor, then a daily step, and only then a low-risk premiere hall.

P1 COMMISSION PORCH

Issue a brief without an app

P2 WORKSHOP EDGE

Free civic room beside making

P3 PROTOTYPE BAY

Main path stays open; device leaves

P4 QUIET BYPASS

No scan, no fee, no detour

P5 PREMIERE STEP

Ordinary seating outside events

P6 MAINTENANCE + EXIT

Record fault and restoration from day one

Keep P4 first; add P1/P2 next; P3/P5 appear only after gates; P6 starts on day one.

P1-P2

Commission porch + co-author workshop edge

P3-P4

Reversible prototype bay + quiet no-scan bypass

P5-P6

Civic premiere step + maintenance/exit bench

CULTURAL-PRODUCTION CHAIN • PROFESSIONAL PRACTICE BECOMES CIVIC CAPABILITY

Content discovery, heritage activation, creative calls, rights design, place operation, and long-term market organisation run through the lifecycle.

TECHNICAL CONVERSION

Model/prototype → contextual, accountable civic product

SOCIAL CONVERSION

Civic product → understandable, refusable, actually used

VALUE CONVERSION

Real use → operation, creator return, public reinvestment

THREE-LAYER CULTURAL LANDSCAPE + ORIGINAL IDENTITY

Railway engineering, Zhongguancun open innovation, and human accountability for AI coexist; source labels remain separate from the belt logo.

FACT

Source, reviewer, correction; unknown remains unknown.

CO-PRODUCED

Authors, licence, version, next maintainer visible.

AI STATUS

Purpose, data, risk, accountability, refusal, exit visible.

TWELVE CIVIC COMMISSIONS ARE NOT A FEATURE LIST

Each has a commissioner, non-AI baseline, limited AI role, space, human accountability, and stop condition.

SC-01 PUBLIC UNDERSTANDING

Remove uncorrectable claim

SC-02 SME CONTENT

Stop unauthorised data

SC-03 CULTURAL EVIDENCE

No source, no release

SC-04 ACCESS AUDIT

Field test required

SC-05 CIVIC BRIEF

No sensitive-case training

SC-06 CO-AUTHORSHIP

Rights dispute stops premiere

SC-07 RETROFIT OPTIONS

AI never orders demolition

SC-08 PUBLIC AI RED TEAM

Close high risk before release

SC-09 PHYSICAL AI TEST

Stop on escape or control loss

SC-10 CULTURAL MEDIATION

Remove uncorrectable mistranslation

SC-11 MICROCLIMATE

No face tracking for climate

SC-12 ADOPTION + REINVEST

Scale down or exit

FIVE REGIONAL INTERFACES • JING-ZHANG CONVERTS CAPABILITY

Do not compete for the same title; every interface states input, Jing-Zhang conversion, civic output, and human gate.

BEIWEI / FUTURE SCIENCE CITY

Daily problems and frontier R&D enter real briefs and city validation.

HUIAIROU / E-TOWN

Science culture and manufacturing enter content, experience, and service components.

BEIJING-TIANJIN-HEBEI

Test transferability of patterns and protocols, not architectural copies.

LONG-TERM OPERATION • CIVIC PROTOTYPE YEAR + SIX DELIVERY PACKAGES

Spring brief, early-summer co-make, summer validate, autumn premiere, winter adopt/exit; every beat leaves usable evidence.

FIRST 100 DAYS

Close data gaps, set chain, select three briefs, test reversible prototypes, establish baselines.

SIX PACKAGES

Base map • civic floor • chain • prototypes • culture
• adoption

FISCAL FIREWALL

Capex + annual opex + exit reserve; one missing means no field trial.

FORMAL-REVIEW READY WITHOUT INVENTING BOUNDARIES

Intensity, responsible entities, budgets, procurement, schedules, and implementation remain subject to competent authority.

3 + 2

ZONES + WINGS

1 + 3 + 9

LINE + GROUNDS + ROOMS

12 / 8 / 4

SCENES / PERSONAS /
LANDMARKS

5 / 6

DECISION LAYERS / PATTERNS

PROVISIONAL

official_boundary=false; recalculate the whole package after official polygons.

PUBLIC BASELINE

Access, shade, accessibility, and staffed help survive AI exit.

NO FALSE CLAIM

No government adoption, partner, investment, procurement, scale, or engineering claim.
