

JING-ZHANG FOR LIFE

A century of Jing-Zhang, a city for every life.

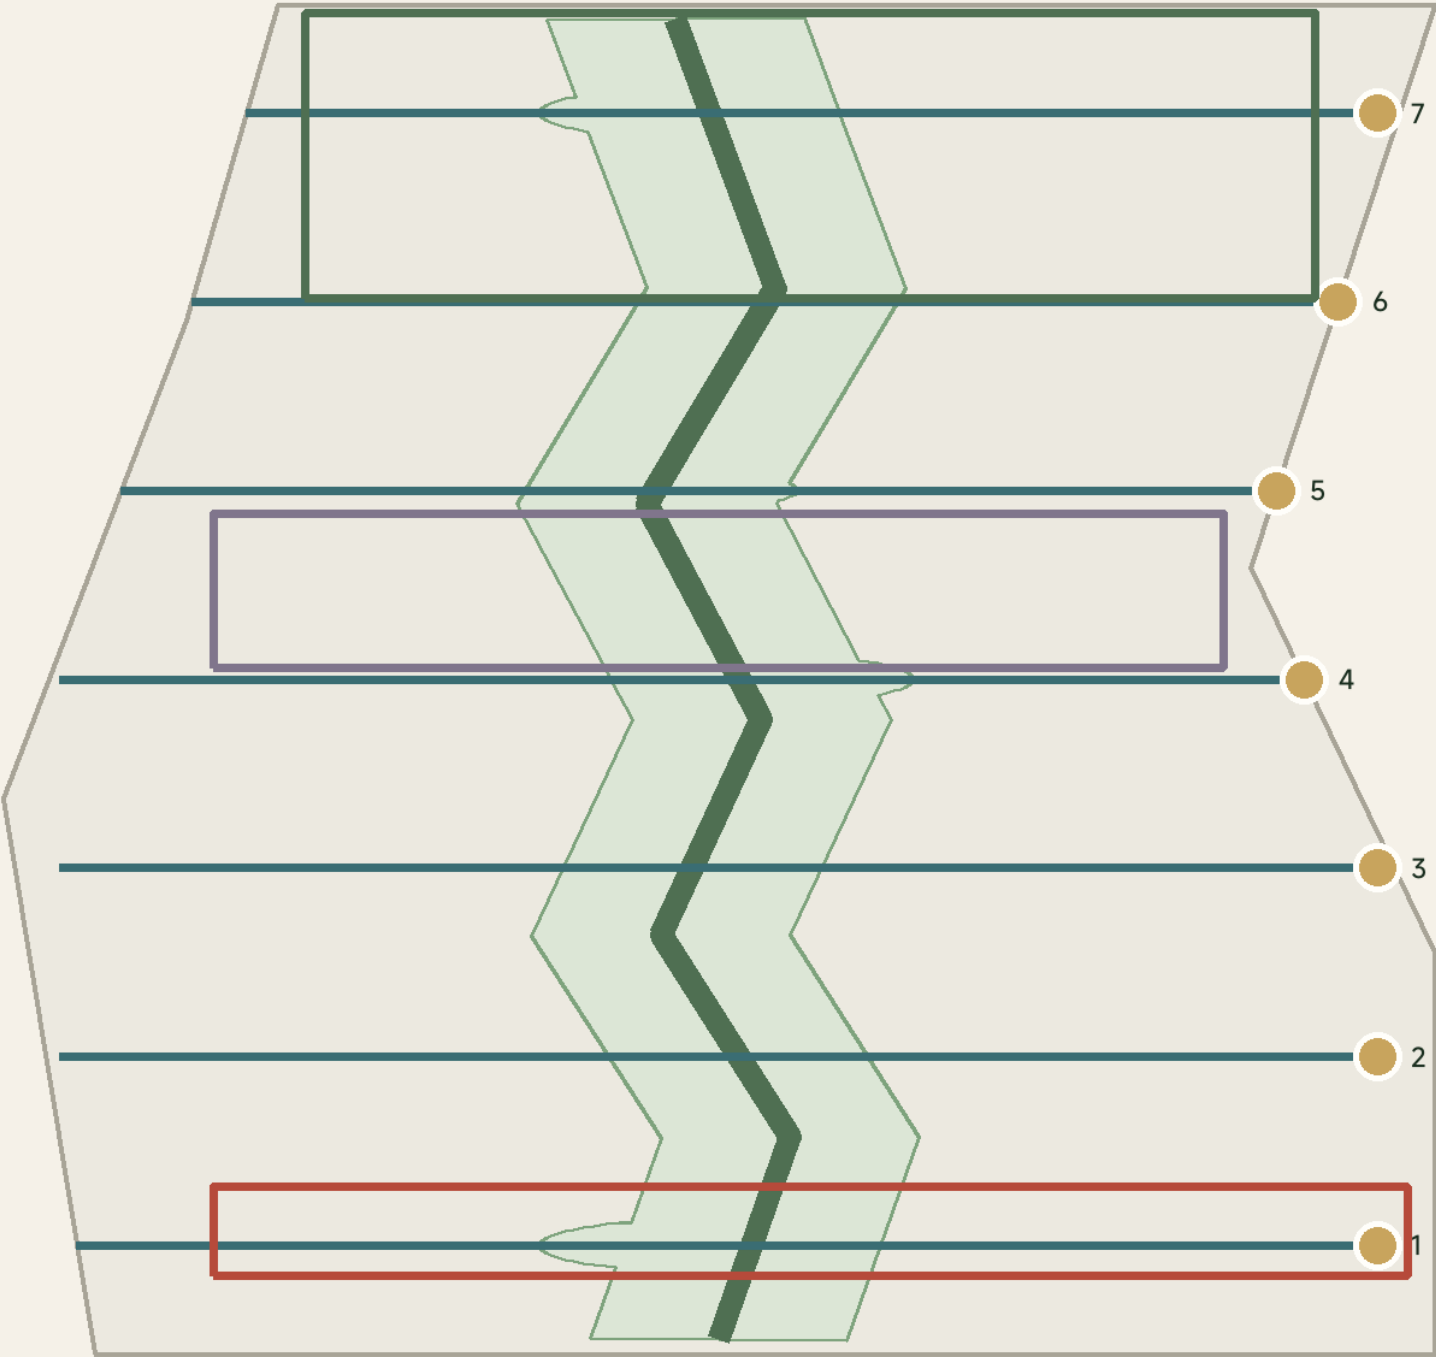

Overall structure

JING-ZHANG FOR LIFE / FIG.01

One Corridor · Seven Circles · Three Civic Landmarks

A city should accompany a complete life, not only its most productive years.

PROVISIONAL / NOT OFFICIAL

15-minute life-support circle

- Housing, learning, work, care, health, recreation, culture
- Repair life transitions; never rank human worth by productivity

Public AI: understandable and rejectable

- Invisible daily, visible at civic nodes, optional throughout
- Know, explain, choose, offline, human takeover, correct and exit

Landmarks are not sculptures

- Zhongzhiyuan: Public Validation Yard
- AI Origin: Intergenerational Commons
- Dazhongsi: Civilization Content Forum

Brand

- JING-ZHANG FOR LIFE / 京张一生
- A century of Jing-Zhang, a city for every life.

Seven life supports

JING-ZHANG FOR LIFE / FIG.02

Seven Supports as the Spatial Baseline

Not seven silos: every circle carries a minimum baseline, complemented by time-sharing.

PROVISIONAL / NOT OFFICIAL

H Housing / anti-displacement
Minimum in every circle + specialist dignity safeguards

L Learning / reskilling
Minimum in every circle + specialist dignity safeguards

W Work / making / transition
Minimum in every circle + specialist dignity safeguards

C Childcare / eldercare / respite
Minimum in every circle + specialist dignity safeguards

M Health / rehabilitation
Minimum in every circle + specialist dignity safeguards

R Nature / play / rest
Minimum in every circle + specialist dignity safeguards

C Memory / craft / communication
Minimum in every circle + specialist dignity safeguards

Three key areas

JING-ZHANG FOR LIFE / FIG.03

Three Key Areas: Different Capabilities, One Public Value

Leading firms provide capability; the public city defines value. Each landmark requires institution, architecture and recurring event.

PROVISIONAL / NOT OFFICIAL

Zhongzhiyuan Public Validation Yard

- Making and public validation
- Open briefs / model cards / failure archive
- Quarterly public validation day

AI Origin Intergenerational Commons

- Learning and daily life
- Seven supports in one commons
- Monthly life-transition support week

Dazhongsi Civilization Content Forum

- Content tech and Chinese civilization
- Public newsroom / multilingual studio
- Annual civilization content season

Gate: no operator and no ten-year operating budget, no project.

Source: submitted GeoJSON and metrics.json; recalculated in EPSG:4548. Concept diagram, not statutory or engineering evidence.

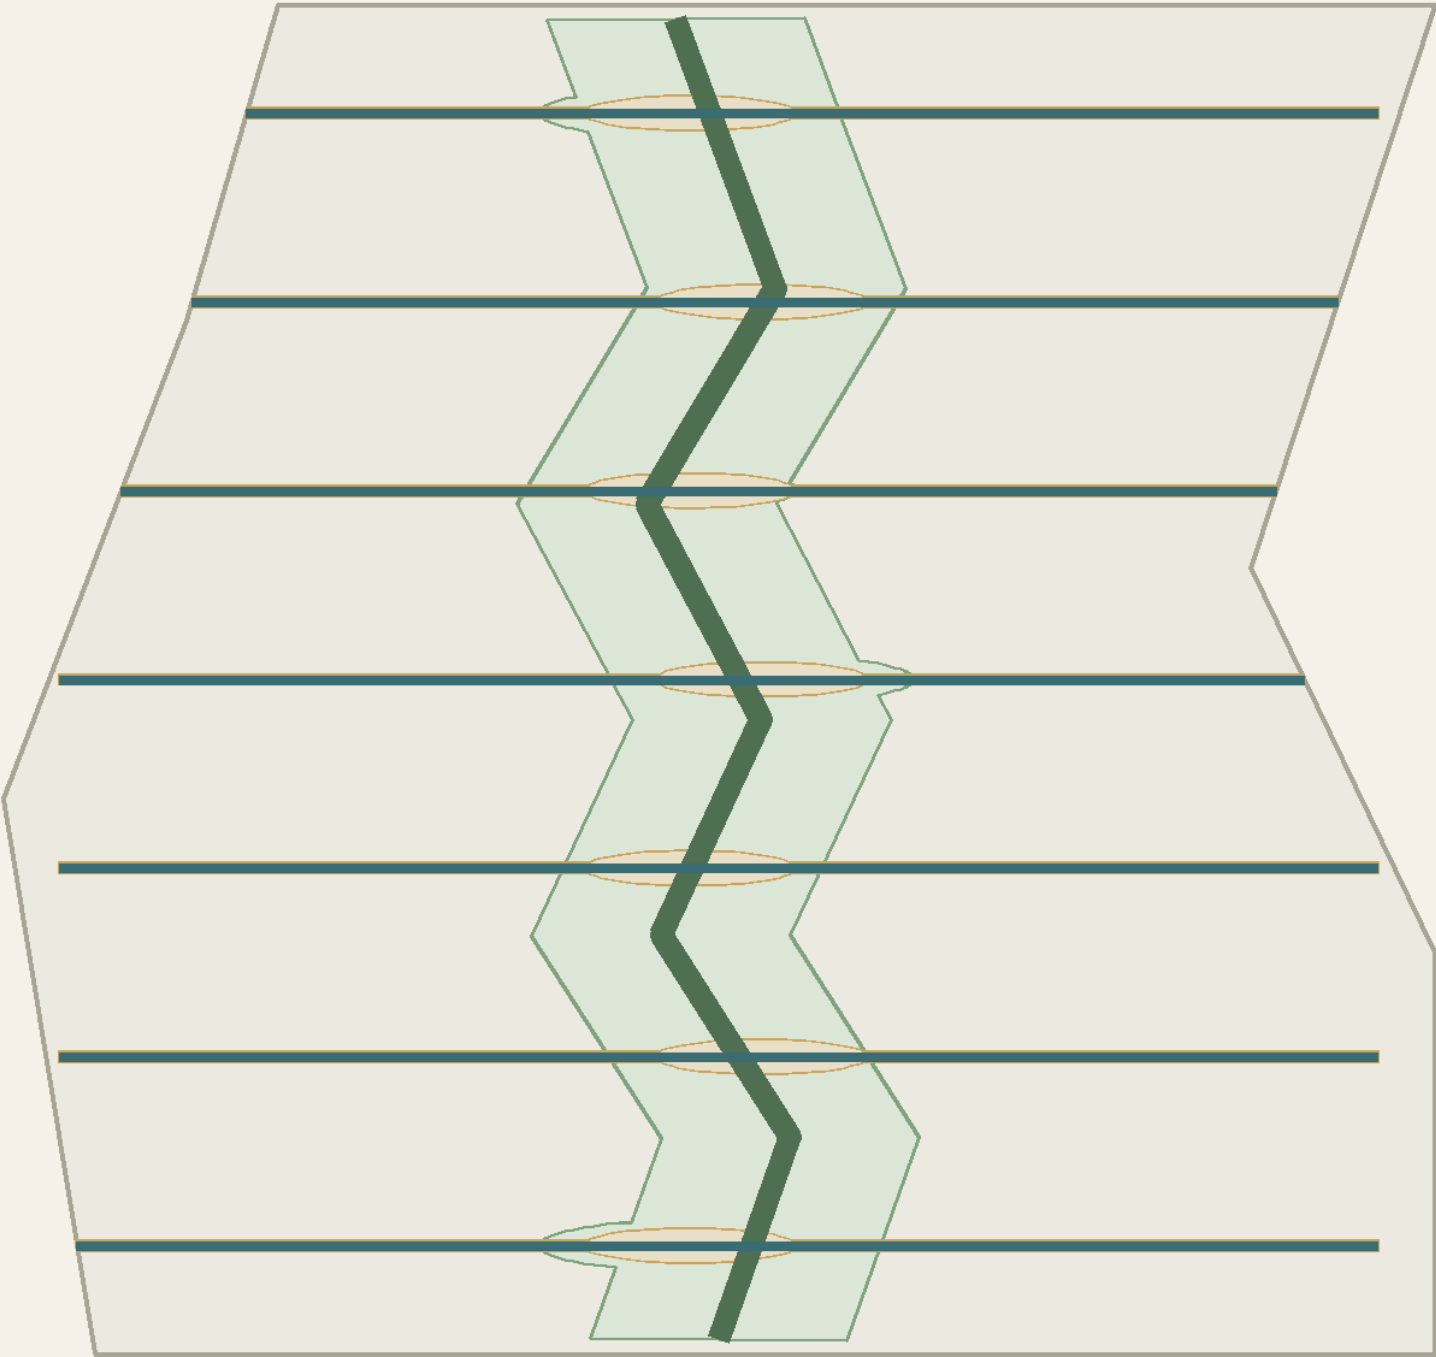

Mobility and ecological infrastructure

JING-ZHANG FOR LIFE / FIG.04

Ecology Is Infrastructure; Independent Access at 8 and 80

Connect before development; nature before cars and parking; continuous walking before spectacle mobility.

PROVISIONAL / NOT OFFICIAL

Independent mobility test: 8 / 80

- Continuous, accessible, legible, restful, help available
- Pass rate only after field walk and safety audit

Four-season natural services

- Summer shade and cooling
- Rain/snow safety and water retention
- Habitat, play, healing and railway memory

Space sharing + time sharing

- Schools, campuses and community facilities open by schedule
- 24-hour life support does not mean 24-hour consumption

Works without high technology

- Paper signs, staffed desks, offline service and emergency shutdown

Source: submitted GeoJSON and metrics.json; recalculated in EPSG:4548. Concept diagram, not statutory or engineering evidence.

Metrics, outcomes and red lines

JING-ZHANG FOR LIFE / FIG.05

From Reproducible Evidence to Lived Outcomes

PROVISIONAL / NOT OFFICIAL

A machine PASS is neither excellence nor approval; success is whether people can complete a life here.

6

public AI rights

Status and formula in metrics.json

Seven red lines

No displacement

No privatized public realm

No mandatory digitalization

No tech spectacle

No fake heritage

No ecology sacrifice

No fabricated data

Outcome baselines pending: housing burden, 8/80 routes, service continuity at transitions, caregiver respite, desire to stay.

Source: submitted GeoJSON and metrics.json; recalculated in EPSG:4548. Concept diagram, not statutory or engineering evidence.

A complete life and its transitions

Seven stages

- Childhood, youth, study, family, midlife transition, active aging, advanced care and end of life

Seven transitions

- School entry, graduation, family change, childbirth and care, job loss and reskilling, retirement, disability and end-of-life support

Public AI rights and fourteen scenarios

Six rights

- Know, explanation, choice, offline path, human takeover, correction and exit

Three validations

- Edge models, rehabilitation devices and accessible routes, bounded by place, time, operator and shutdown

Implementation, governance and the ten-year gate

Order

- Life before landmarks; connection before development; validation before scaling

Governance

- Residents define value, professionals protect safety, enterprises provide capability, government guarantees the floor

Gate

- No operator and no ten-year operating budget, no project
