01 / SPATIAL RELAY / SITE OVERVIEW

GO · PROVISIONAL · NOT TO SCALE

One continuous civic track, three switchyards, two supply wings

The conceptual north–south relay shows relationships only; the dashed container is no official redline and nodes are no coordinate anchors.

A / CONCEPTUAL RELAY

Conceptual north–south relay

B / READ THE LINES

Read lines before nodes

- Continuous civic track
- Intermittent proof track
- Failure siding

Ordinary state always stands
enter • commute • rest • get help • leave
no registration, QR, or AI required

Truth boundary
not an existing plan, road, or station location
not approval order or construction alignment
recalculate fully when official inputs arrive

GO relationship concept • provisional geometry • north–south is reading order only • proves no redline, coordinate, distance, station anchor, or built condition

02 / FUNCTION + GROUND LEVEL / LAND-USE STRUCTURE

GO · PROVISIONAL · NOT TO SCALE

Thirty-six functional envelopes first serve three public-space duties

Unit colours show conceptual function families; continuous ordinary use, side proof, and exit/recovery determine how the ground level works.

A / 36 FUNCTIONAL ENVELOPES

A continuous functional band, not statutory parcels

131415161718192021222324

252627282930313233343536

Continuous ordinary ground level: entry, movement, rest, staffed help, and exit cannot be cut by a technology overlay; proof can only sit beside it

36/36 means machine-recalculable concept units only
use, ownership, FAR, intensity, and development scale remain unconfirmed

B / THREE GROUND-LEVEL DUTIES

One ground level, three duties

01 ORDINARY

ordinary continuity

screen-free wayfinding + staffed entry
route + maintenance clearance first

02 OPTIONAL

proof beside

voluntary • announced • bounded
no loss of movement or quiet rest

03 EXIT / RESTORE

exit + restore

physical stop + human takeover
restore ordinary use; no automatic restart

GO functional envelopes • 36 concept units frozen • creates no statutory use, precise area, FAR, building height, demolition decision, or implementation conclusion

Thirty-six functional envelopes are no statutory parcels; ordinary routes stand first and proof sits beside.

TWIN-TRACK JING-ZHANG · GO RELATION DIAGRAM · PROVISIONAL · NOT TO SCALE

CONCEPT RELATION ONLY · NOT EXISTING / APPROVED / DELIVERED

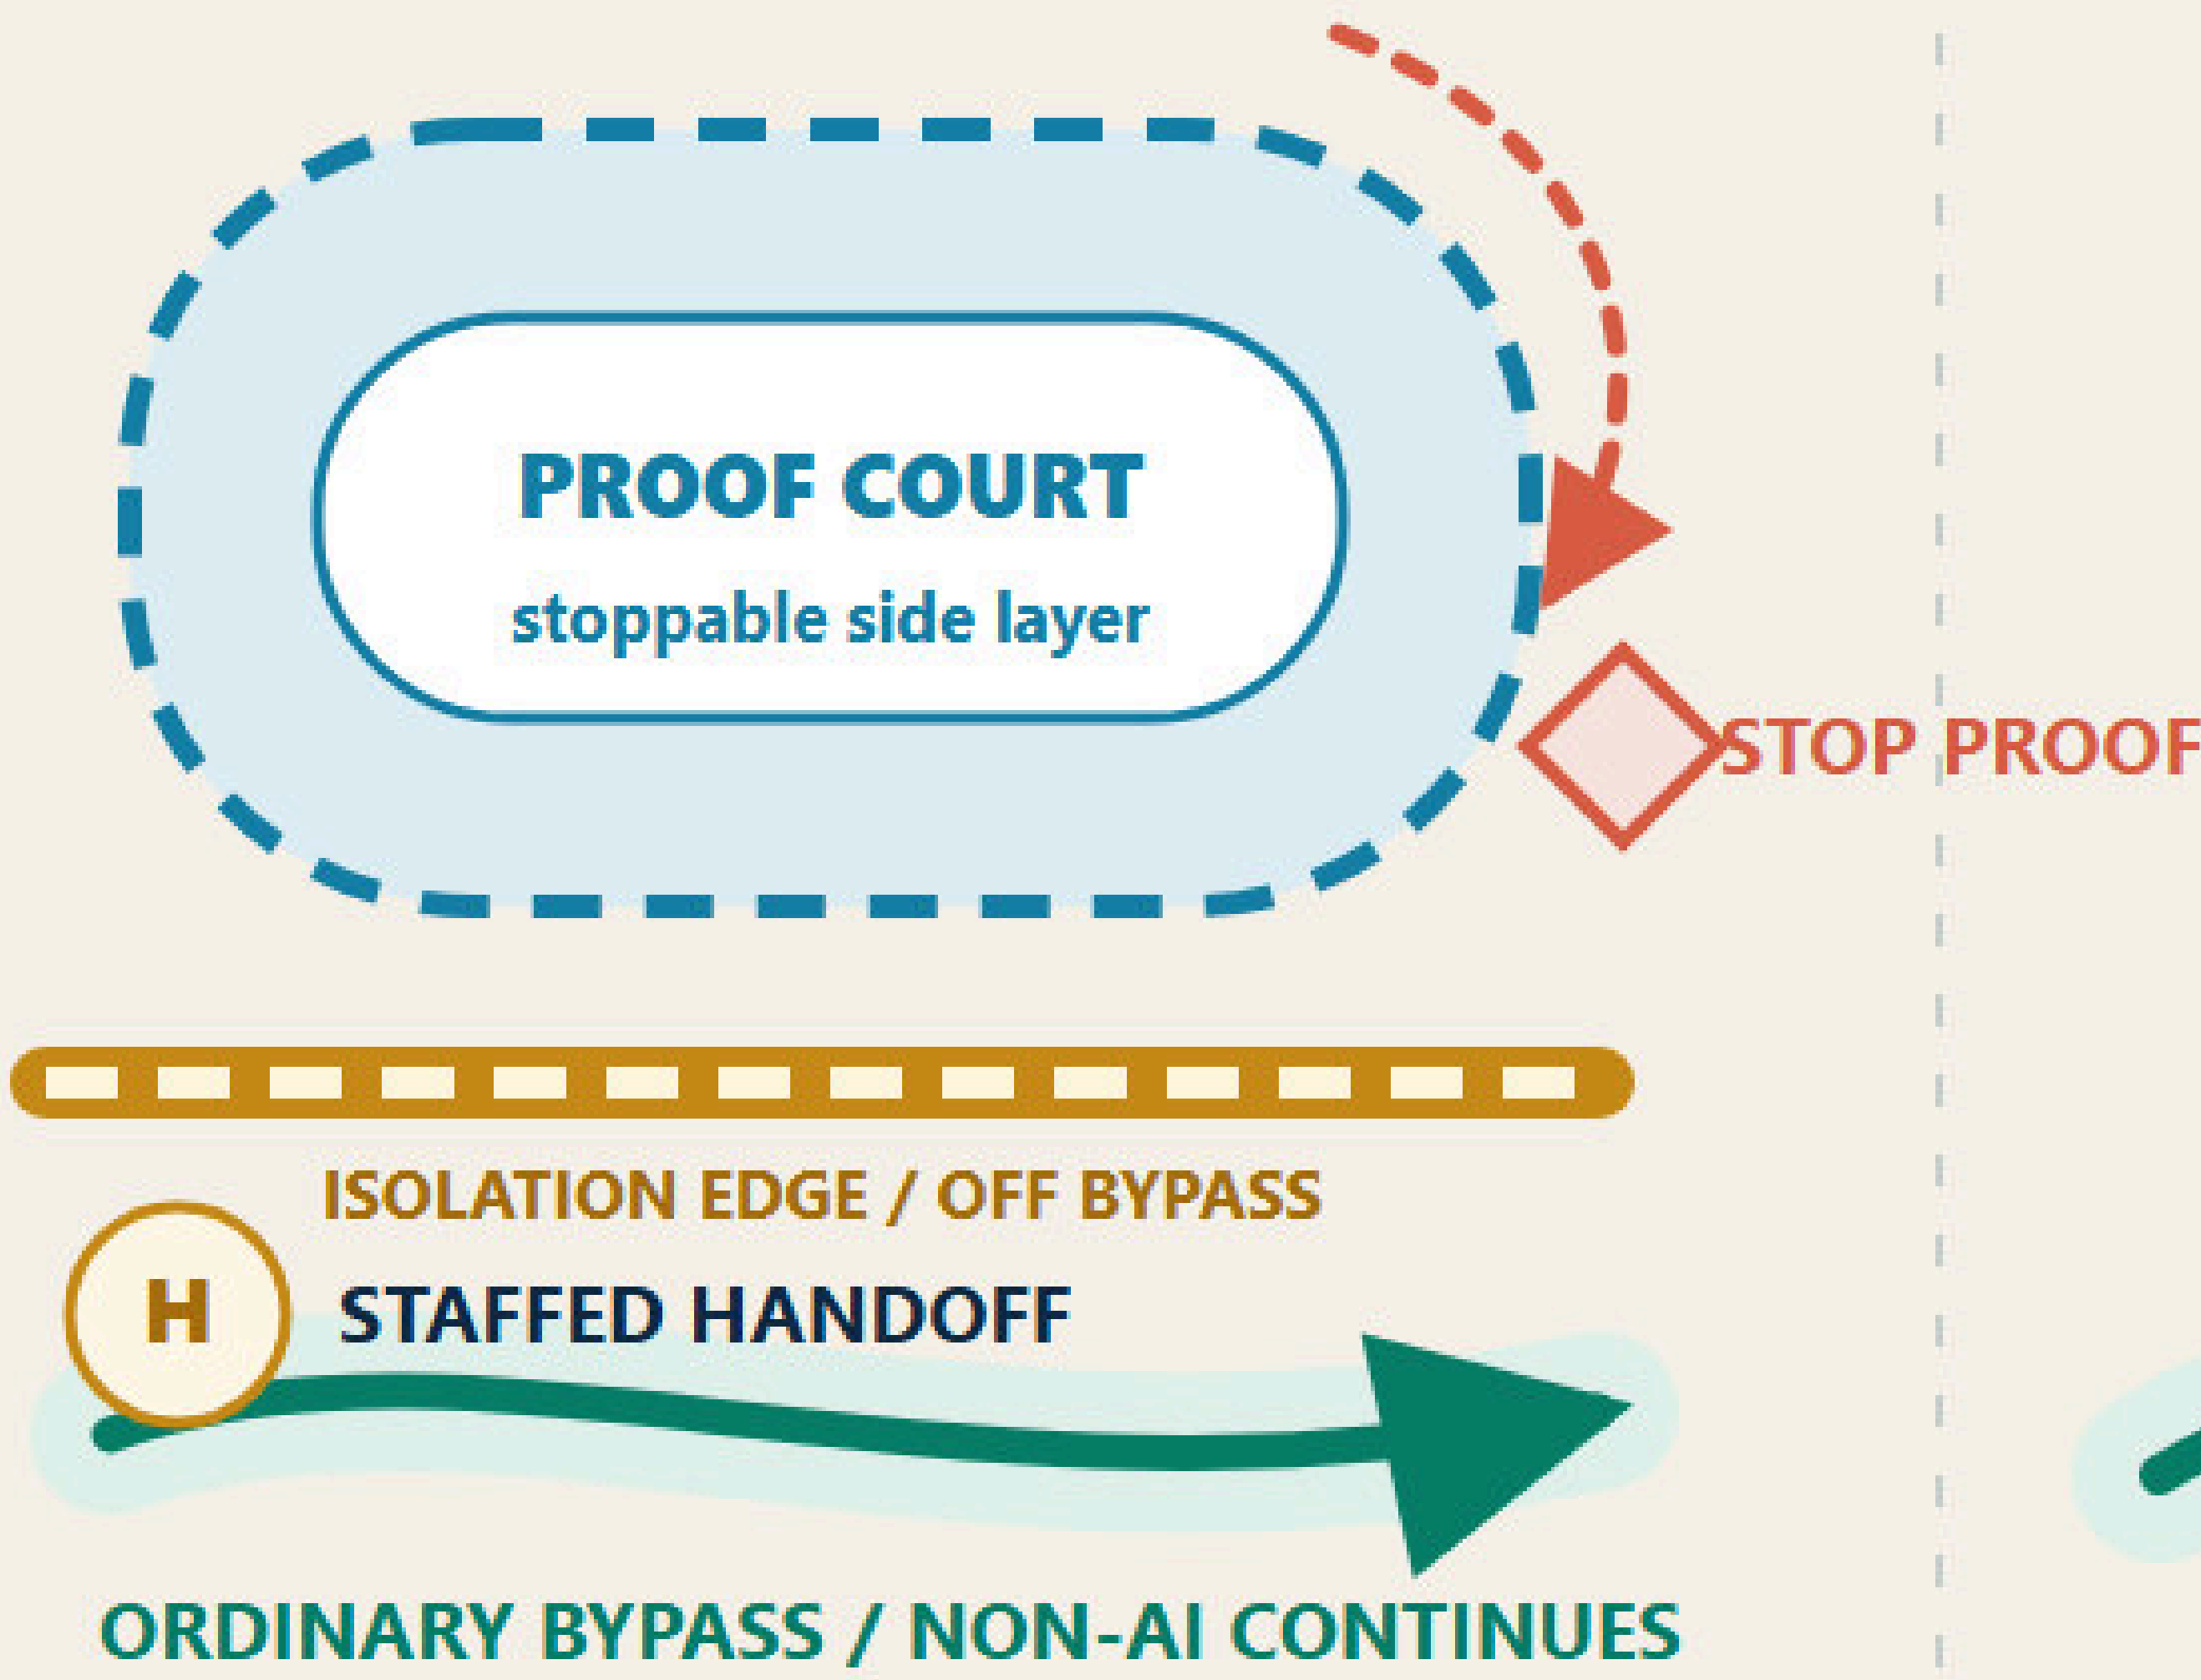

Ordinary paths work first; each place restores a different ordinary space

READ: ordinary first · side proof stops · staffed handoff remains · recovery returns to the named ordinary place.

01 VERIFY · ZHONGZHIYUAN

Parallel bypass / proof court

Proof above; ordinary route below; never crossing.

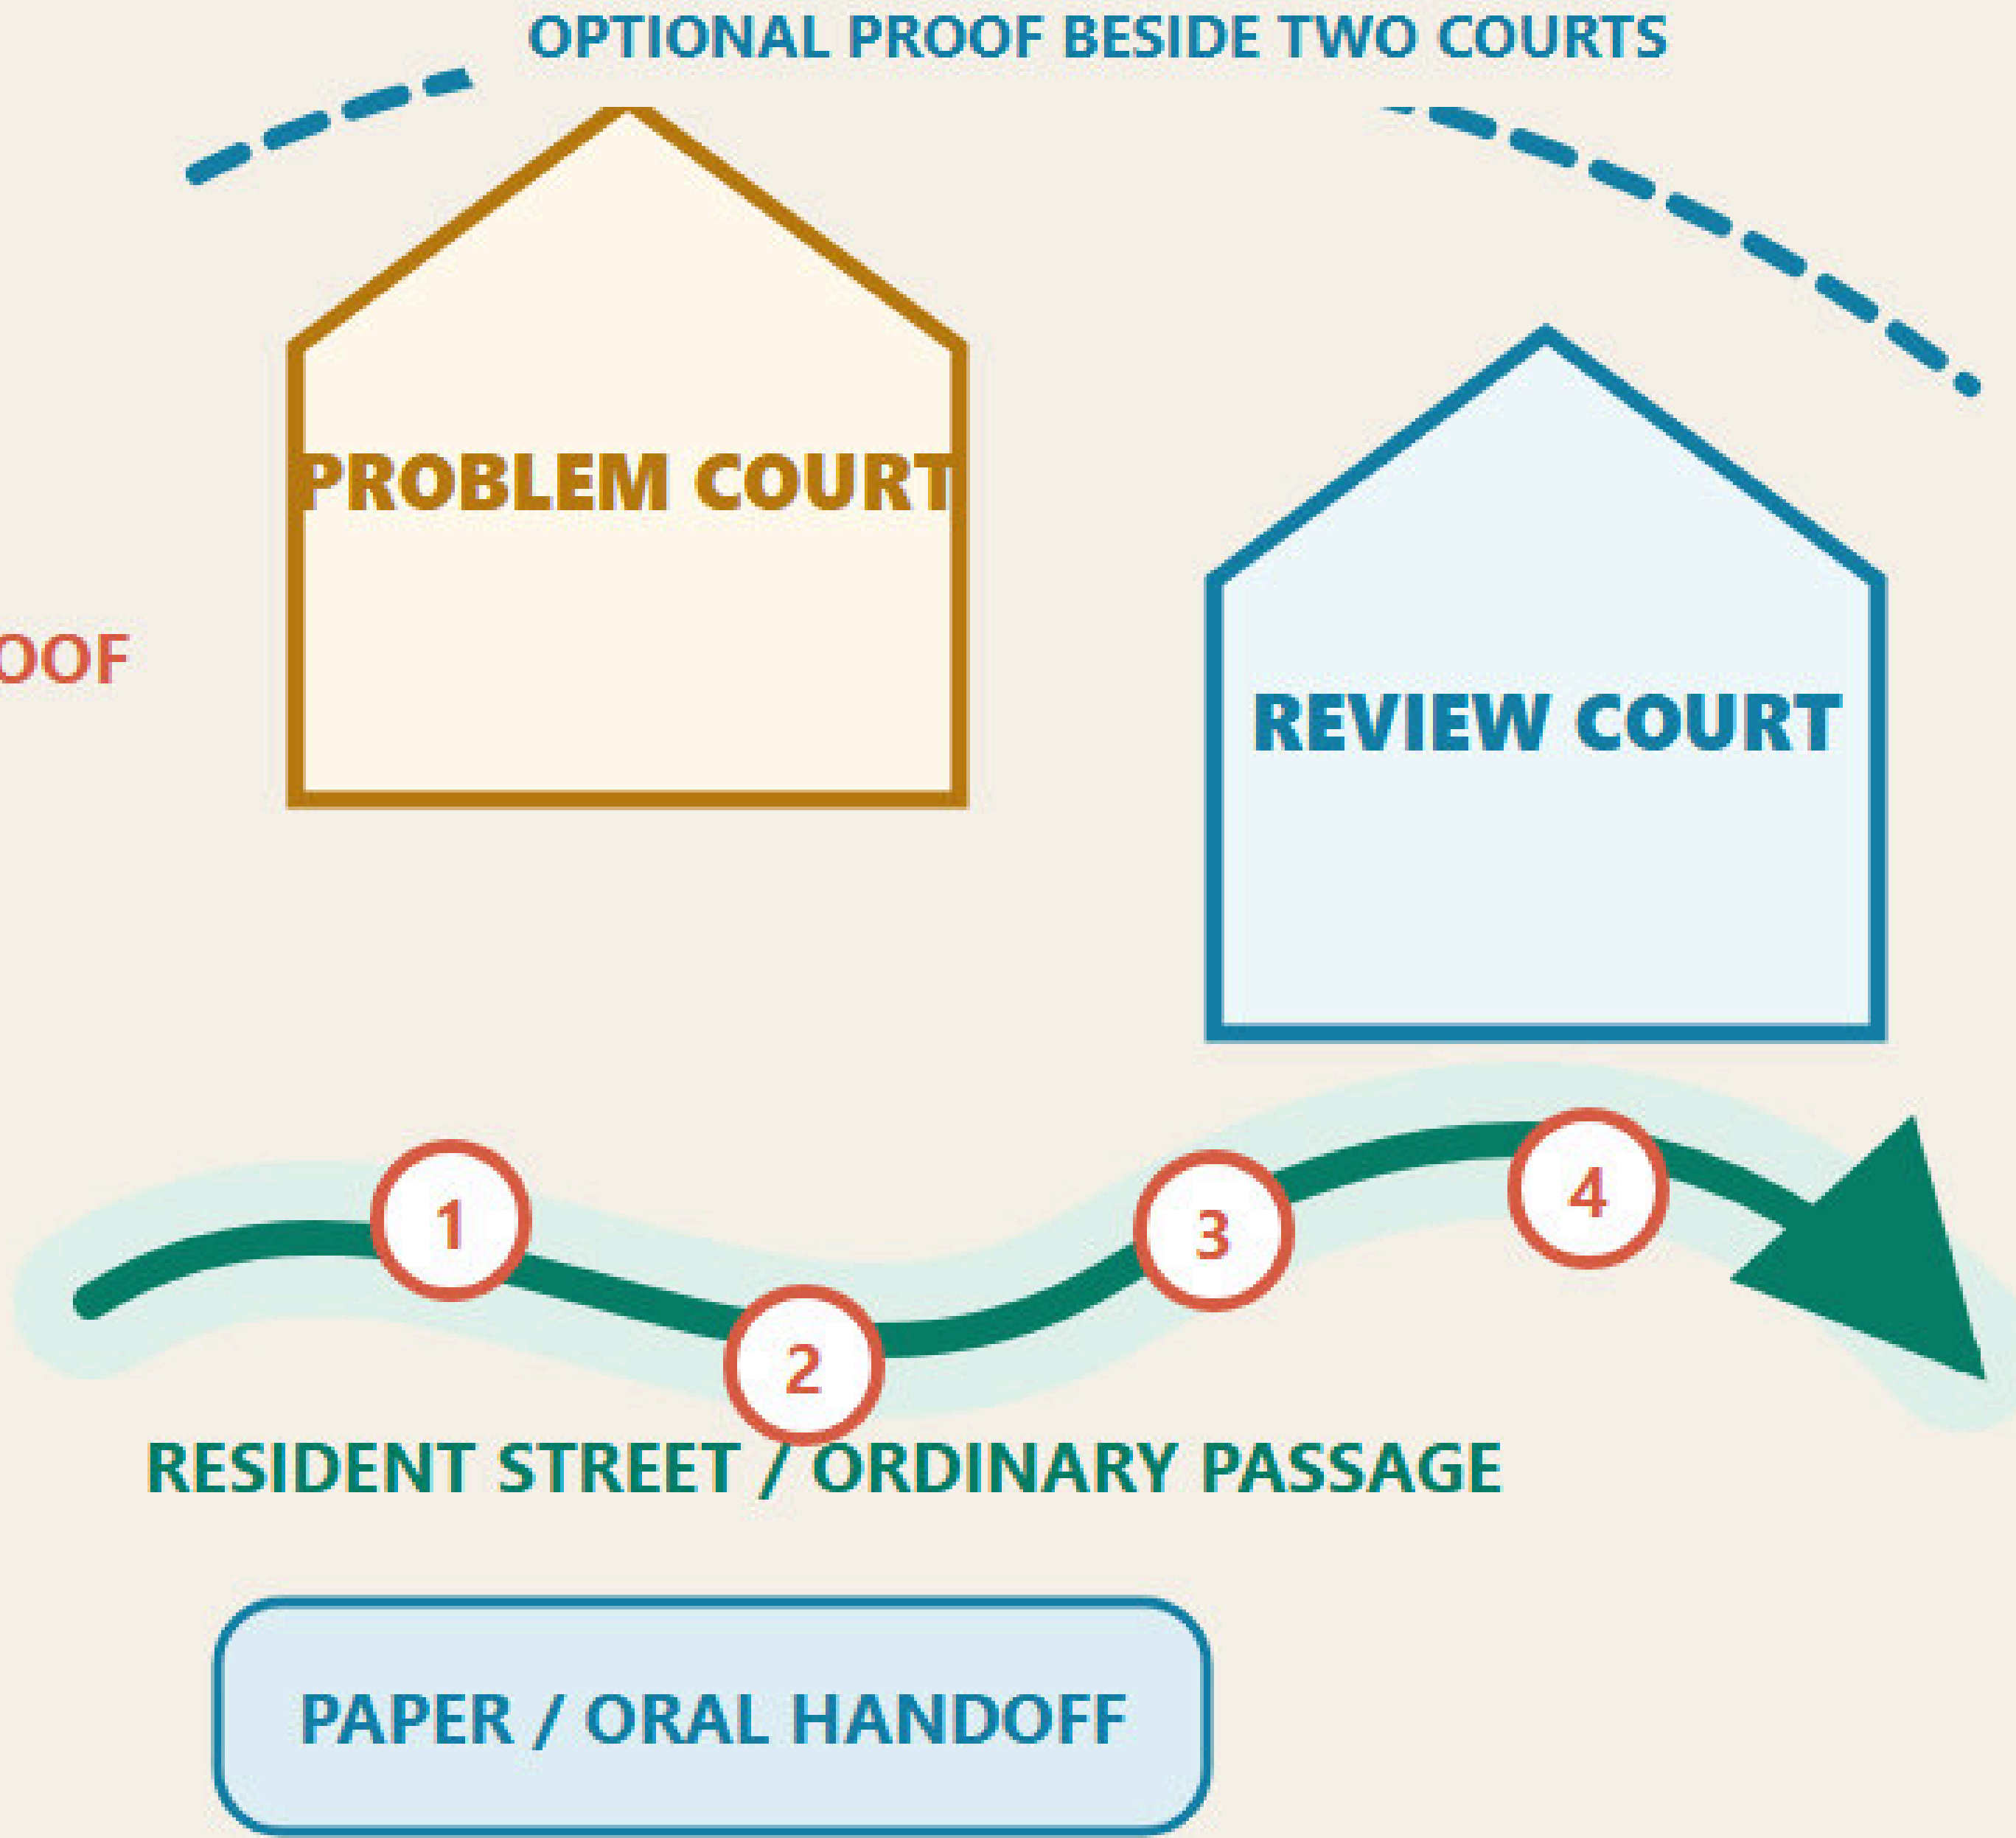

FAILURE: equipment and enclosure leave; the bypass continues.

RECOVERY: recheck court and environment; not authorization or G1.

02 CO-CREATE · ORIGIN COMMUNITY

One street / two courts / four nodes

Withdraw by node; the resident street stays open.

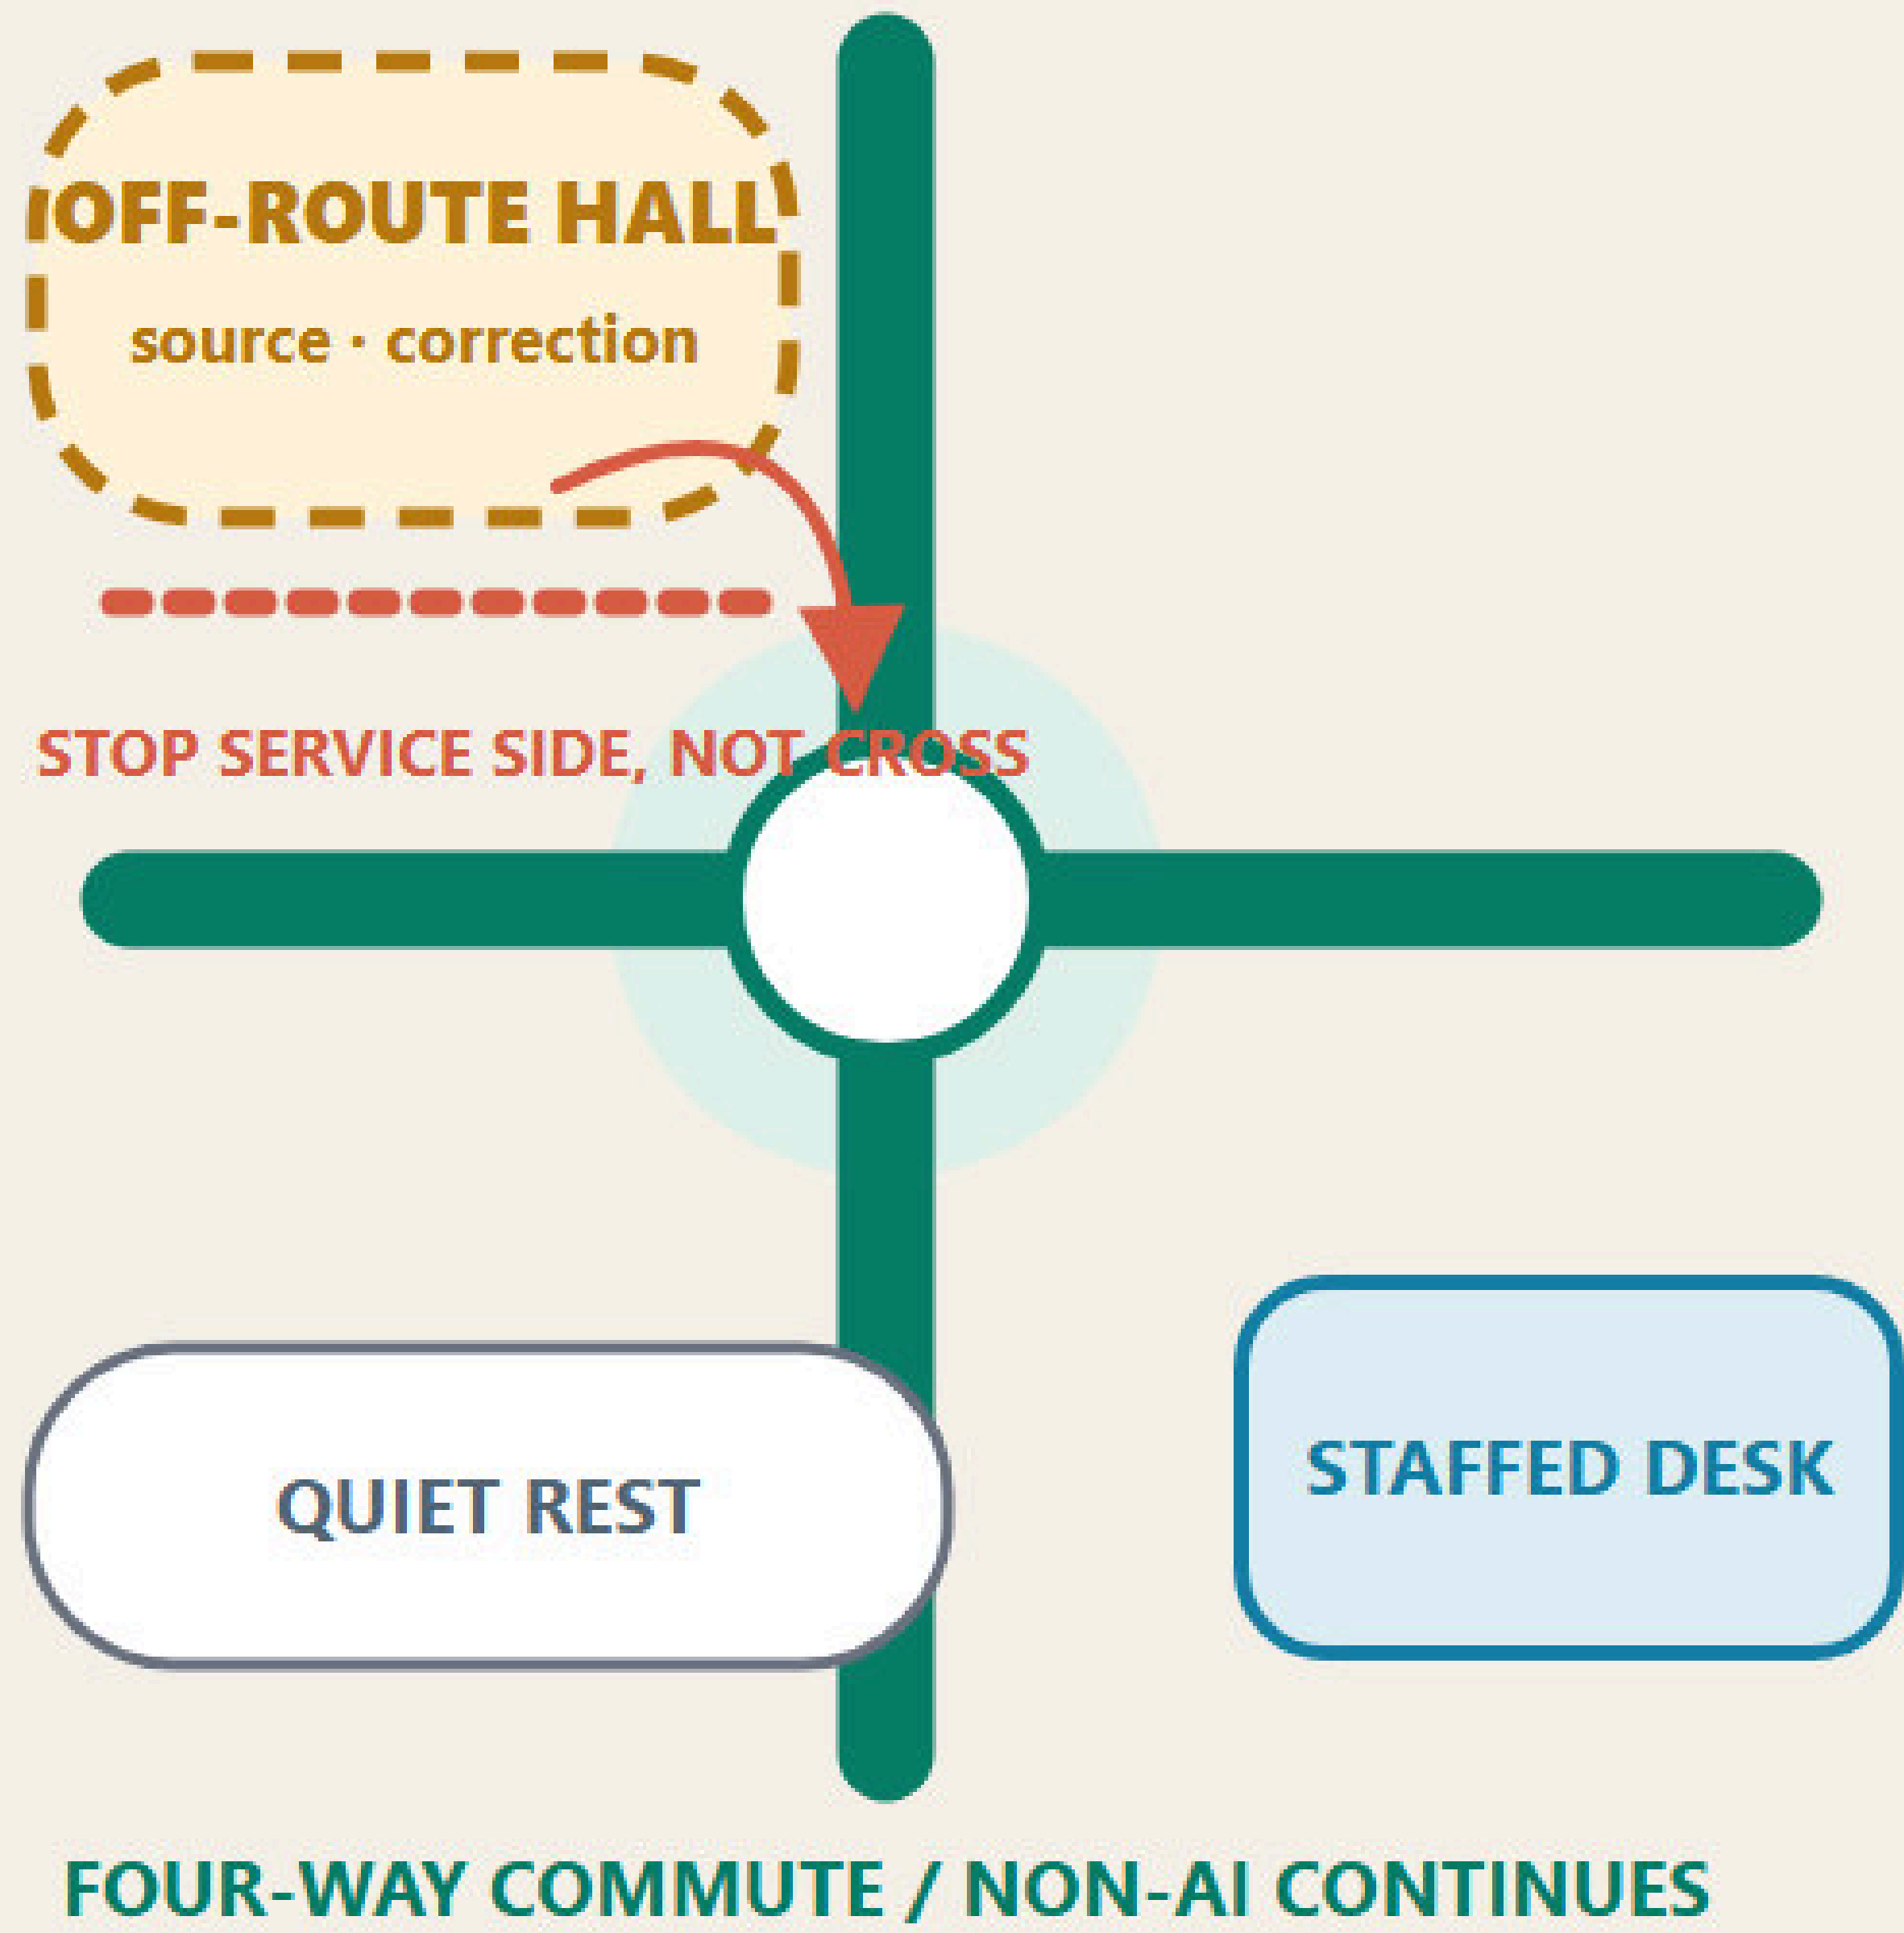

FAILURE: nodes withdraw one by one; street and daily court use remain.

RECOVERY: temporary screens and capture leave; resident use returns first.

03 PUBLISH · DAZHONGSI

Four-way commute / off-route service

Hall, desk and rest stay off the commute route.

FAILURE: source, screens and queue leave; staff keeps a non-AI route.

RECOVERY: correct source and retest; not approval, authorization or G1.

Read ordinary first, then the stoppable overlay. Failure leaves ordinary life running; recovery returns the named ordinary place.

Evidence: PROV-KEY-001—003 · key-area-evidence-matrix · restoration register · non-AI parity contract.

LIMITS: dimensions, materials, connections, anchors, specialist conditions and real recovery duration unknown · FIELD / GO / APPROVAL = 0 · RIGHTS = not_fully_cleared.

Concept relation diagram; it proves no existing condition, delivery, staffing commitment, accessibility result or statutory boundary.

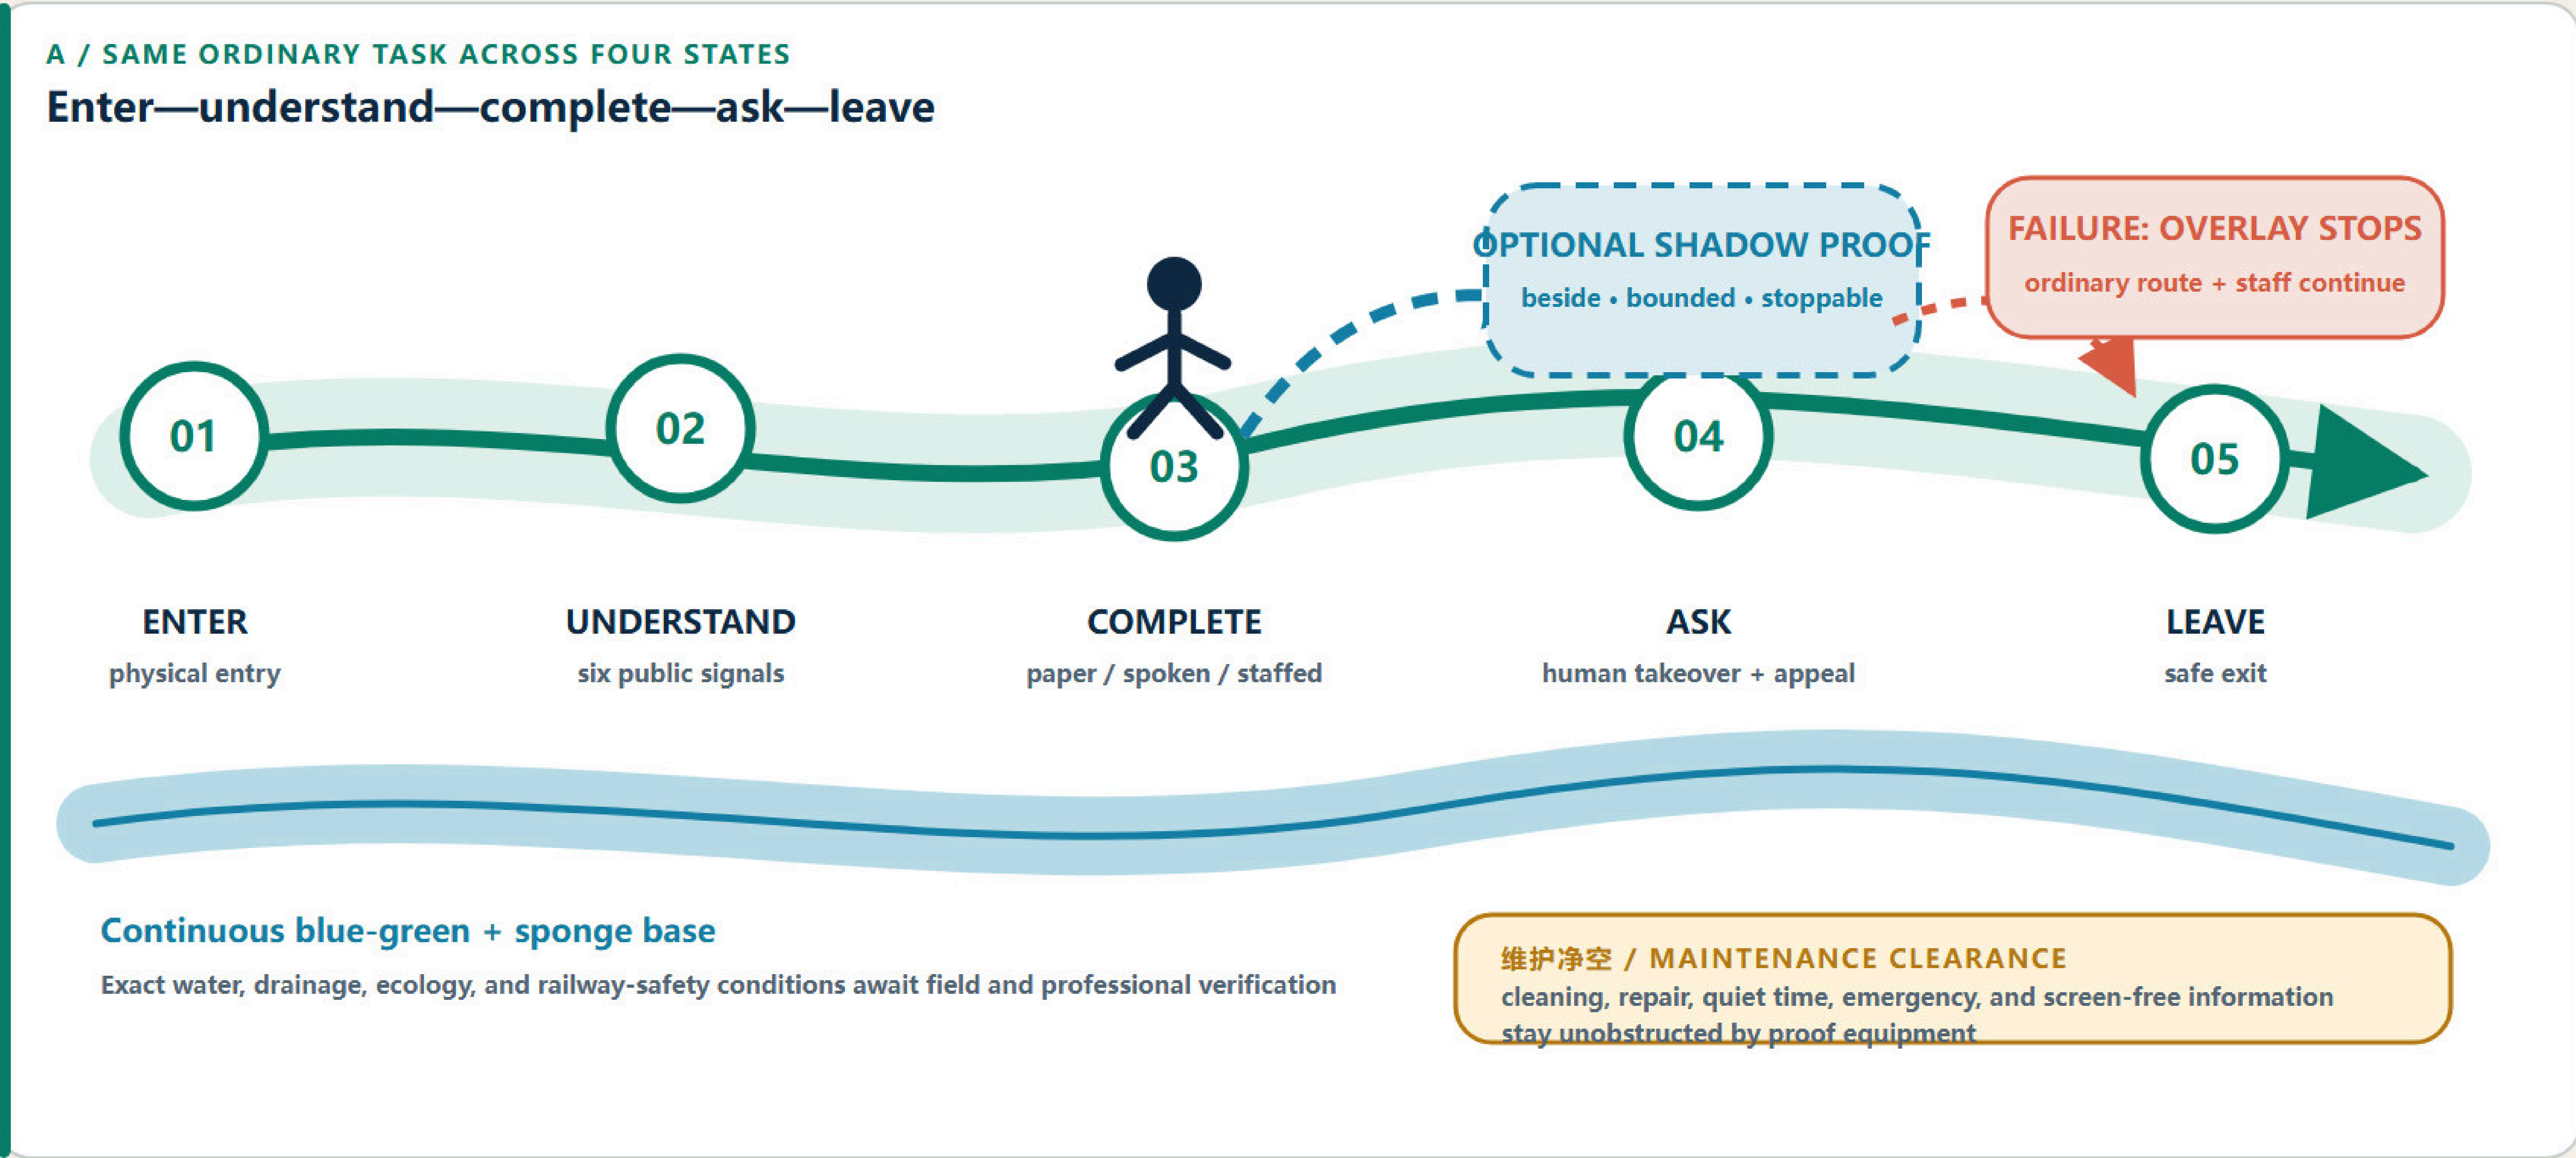

04 / HUMAN JOURNEY / MOBILITY + BLUE-GREEN

GO · PROVISIONAL · NOT TO SCALE

One person completes the ordinary journey first; proof appears off-route only

The blue-green and maintenance base persists throughout; failure isolates proof while staffed handoff and safe exit continue.

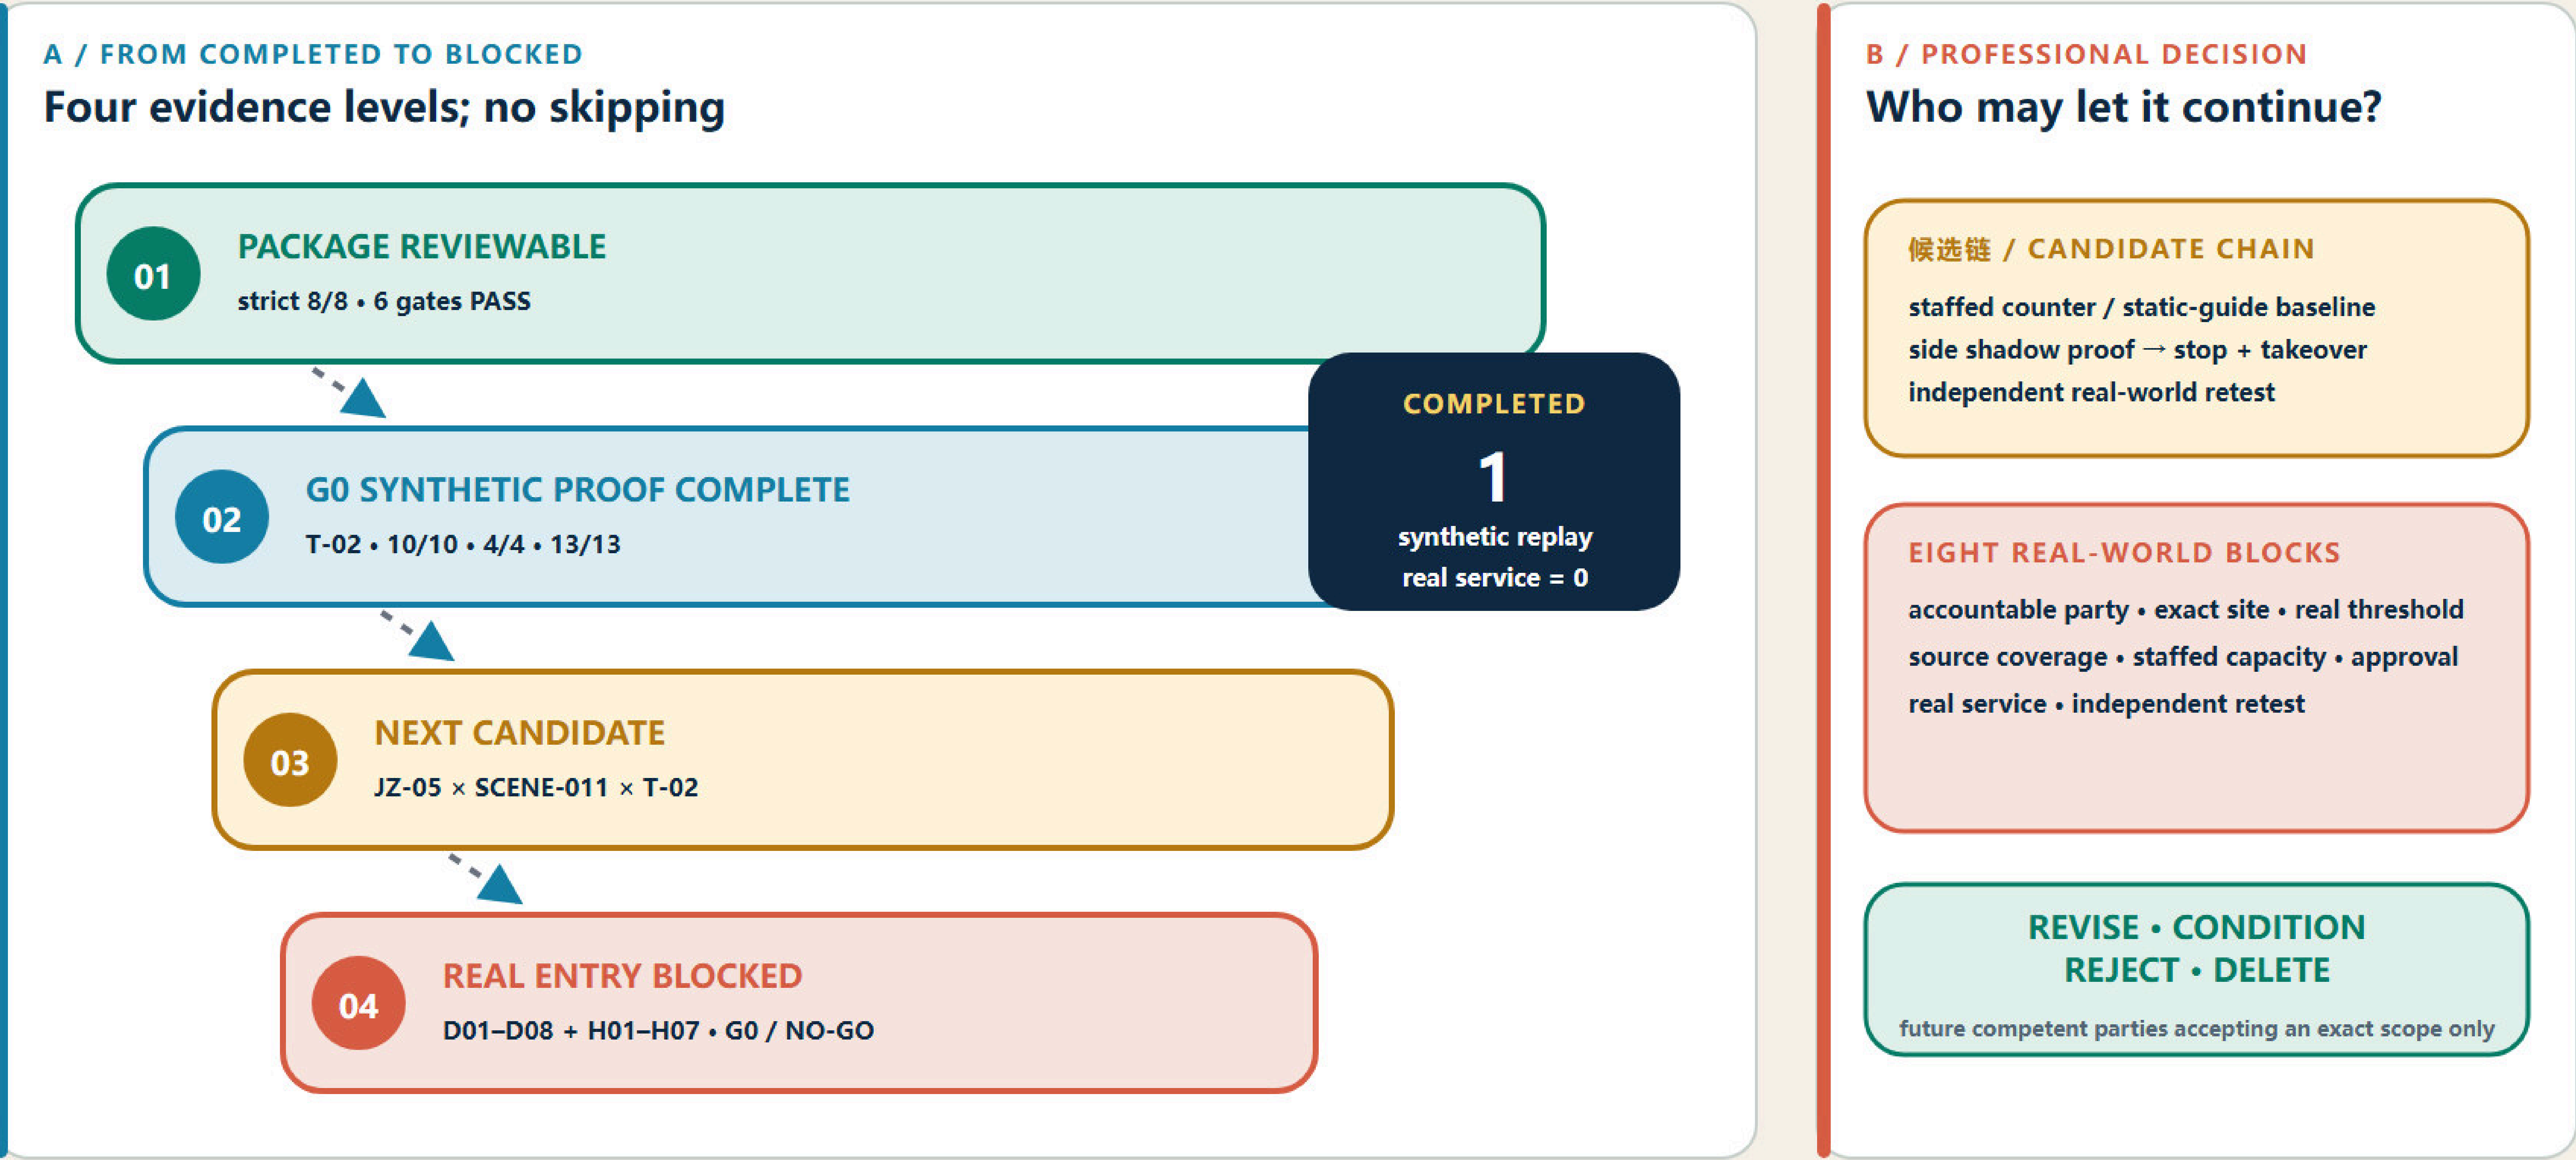

Continuous non-AI path is a design intent, not an accessibility result • roads, water, station, dimensions, materials, slopes, lighting, and recovery time remain unknown

Failure stops proof only; complete non-AI routes, human takeover, and safe exit continue.

One G0 proof is complete; the next candidate remains blocked by real-evidence gates

Separate package reviewability, reproducible synthesis, real entry, and professional sign-off so PASS cannot skip a level.

Machine PASS is not content quality, field evidence, rights clearance, professional duty, or approval • restoring ordinary use is not restart, authorization, or G1

T-02 10/10, 4/4, and 13/13 are complete; real service, approval, and retest remain 0.
