ONE VERIFICATION LINE | THREE STATE STATIONS | TWO SUPPLY WINGS

CONCEPTUAL INTERVENTION

Starts from a published desk baseline; interfaces and services are conceptual additions.

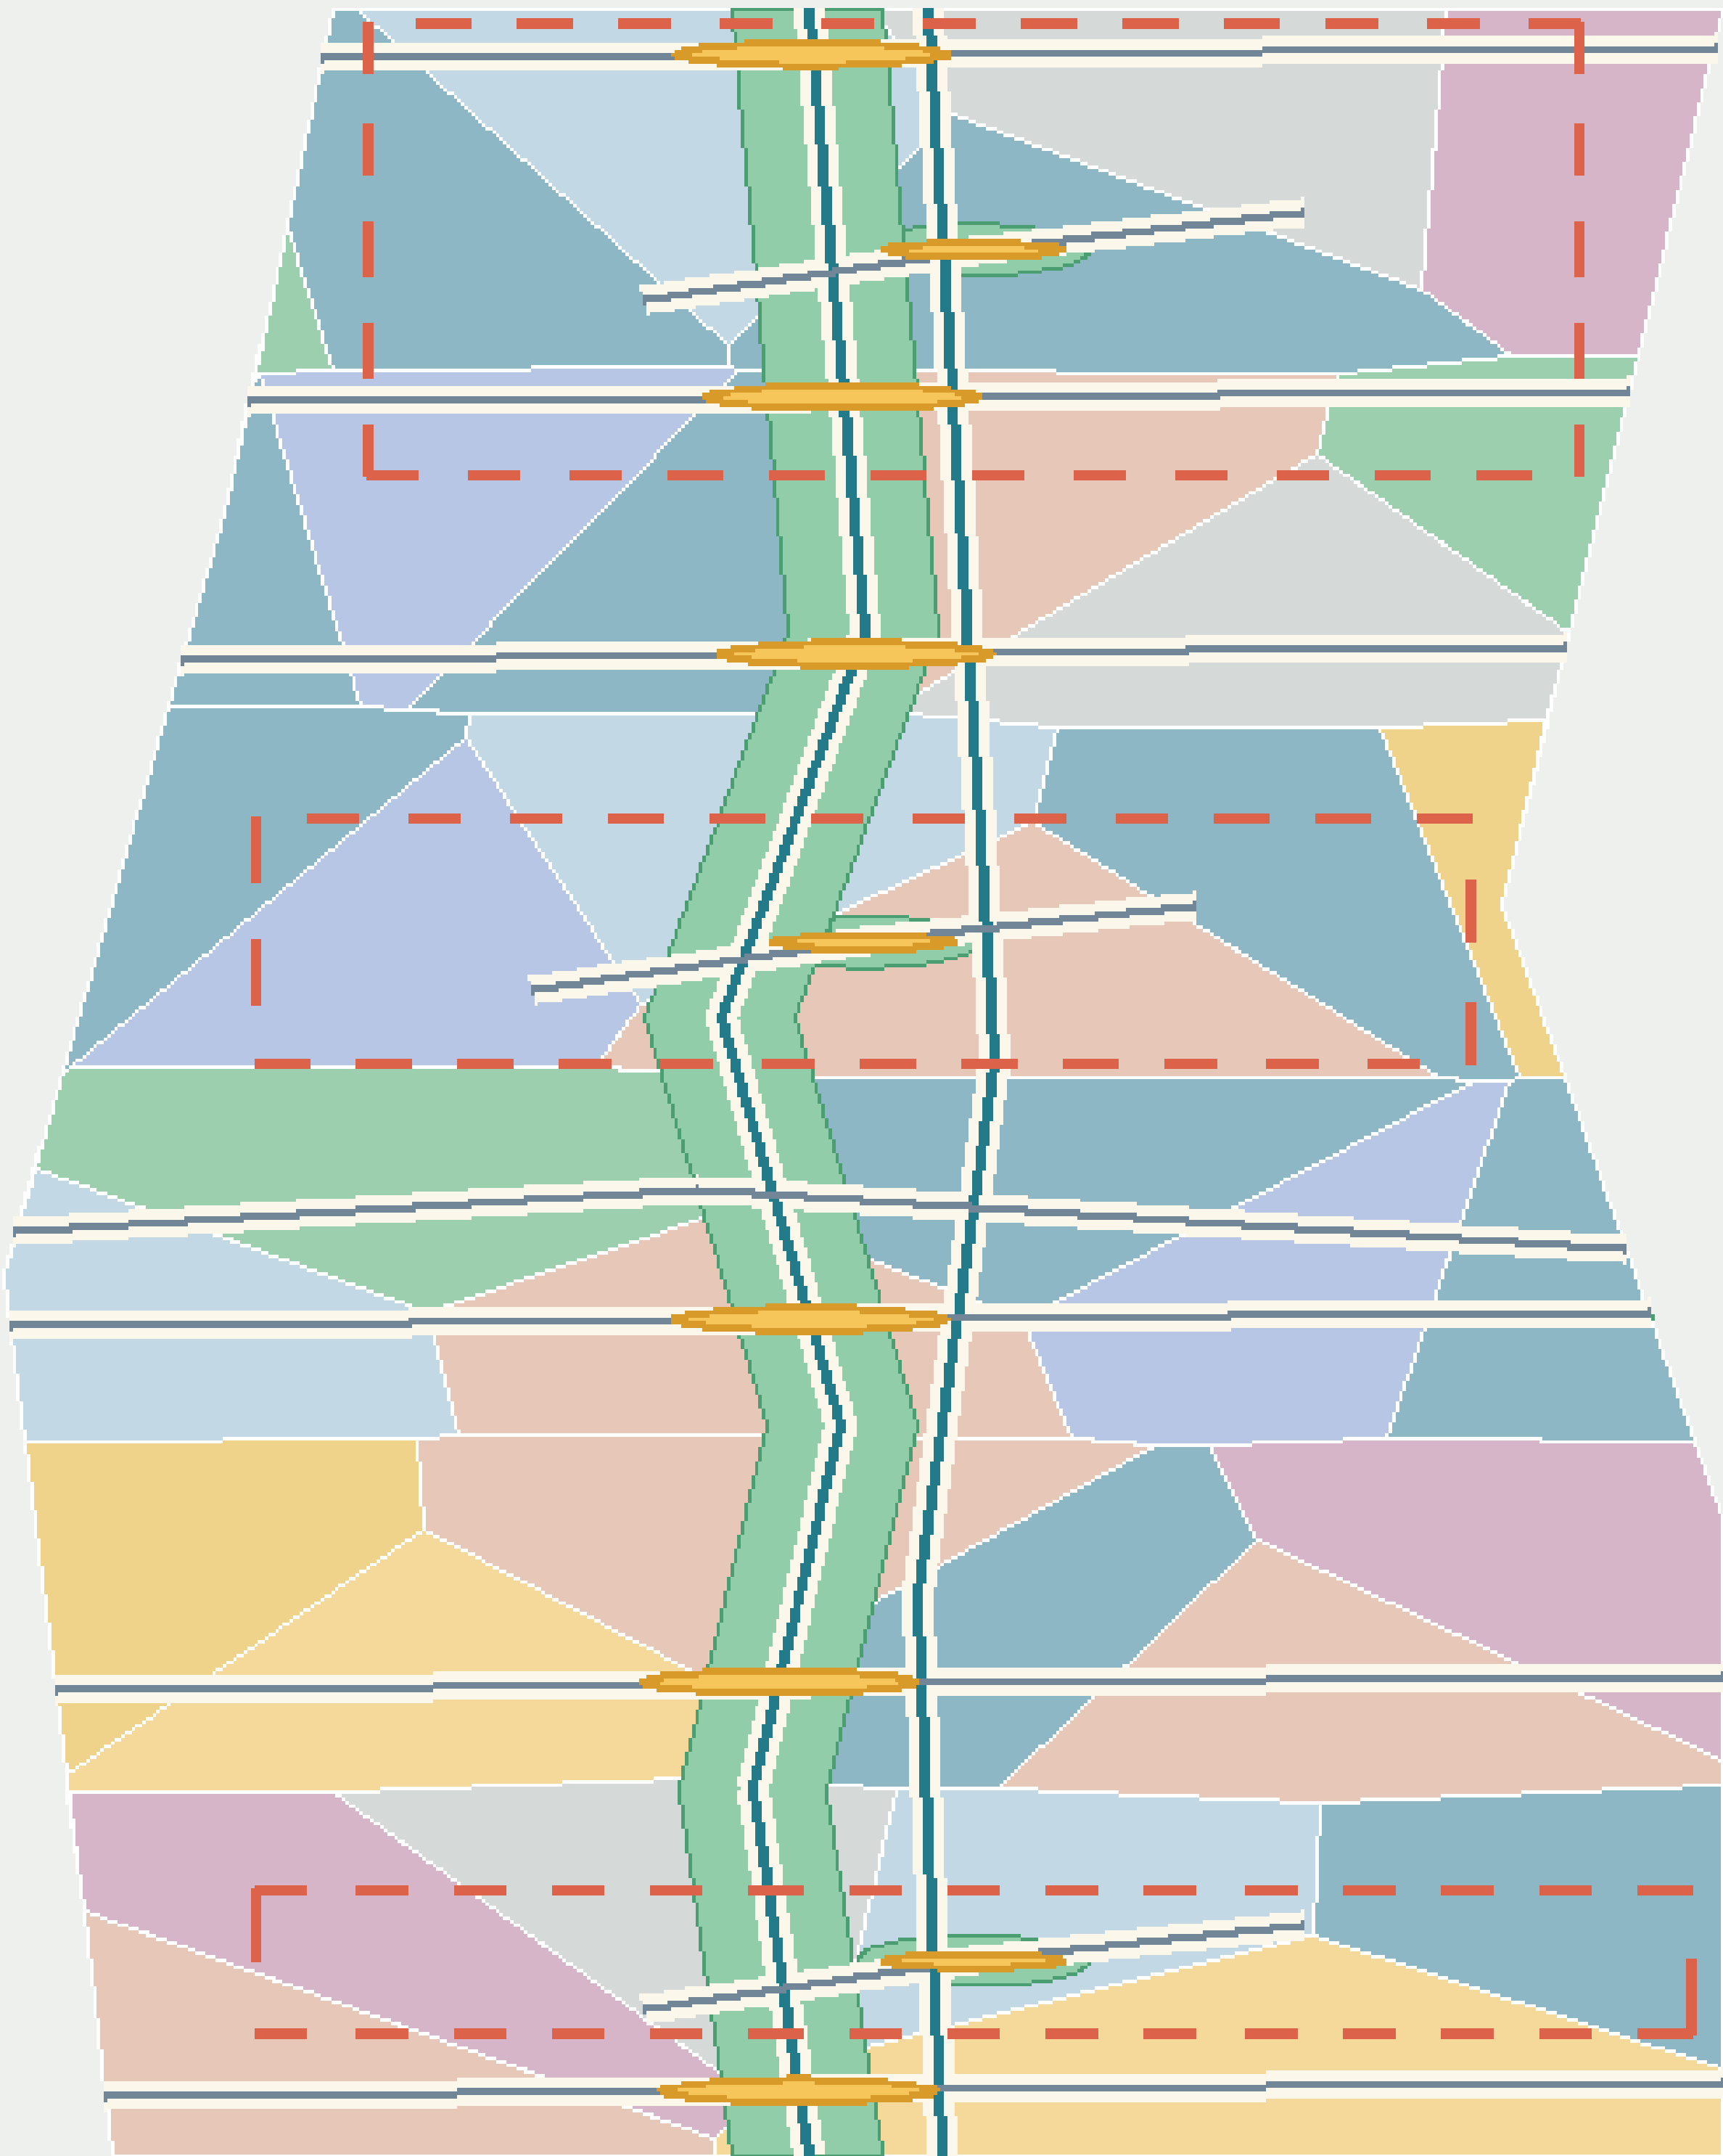

02 / LAND USE

36 CONCEPT UNITS | FUNCTIONAL ENVELOPES, NOT STATUTORY PARCELS

CONCEPTUAL INTERVENTION

Geometry is conceptual organization; categories interpret only existing codes and attributes.

05 / EVIDENCE MATURITY

Move from field coverage to evidence maturity

Blue and green cards are auditable document states. Orange zeros are real-world evidence that does not yet exist.

EVIDENCE LADDER - ONLY THE G0 CONTRACT LAYER EXISTS

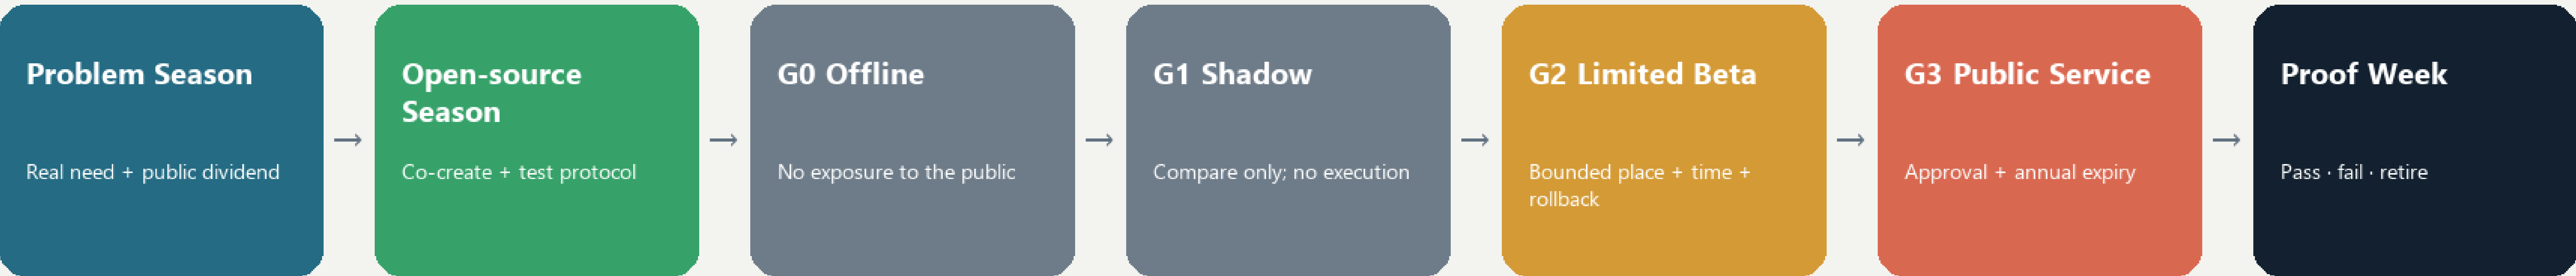

BOUNDARY / Coverage proves that a test can be inspected before it starts. It proves no approval, operator, participant, benefit, or safety performance.

06 / JZ-AIOS

A Verifiable Scenario Operating System · Four Gates

An urban problem must pass an auditable state machine; it cannot jump from a demo to public operation.

Mandatory fields in every scenario passport

Version · accountable role · risk tier	Minimum data · place and time boundary	Public-value gate · harmed-group check
Human takeover · appeal · non-AI option	Pass threshold · stop threshold · retest pack	Expiry review · active retirement · failure log

Graduation cube

technical maturity × public-value maturity × governance maturity

12 passport nodes · 3 service zones · passport completeness 100% · manual fallback 100%

EVIDENCE LIMIT Any failed dimension pauses, corrects, or retires the scenario; G3 still requires competent approval.

07 / G1 PREREGISTRATION

Write failure conditions before requesting a site test

Executable does not mean executed: the comparator, metric, stop, recovery, and retest are locked first.

FIRST THREE HANDOFF-READY TEST PACKETS - ALL UNEXECUTED

T-03 / SCENE-009

ACCESSIBLE ROUTE

Metric: successful tasks by group / consented tasks

STOP: critical barrier, stale route, or unavailable non-AI path

T-02 / SCENE-011

ENTERPRISE SERVICE

Metric: sourced bounded answers / frozen questions

STOP: unsourced claim, prohibited data, or no human takeover

T-01 / SCENE-001

LOW-SPEED DELIVERY

Metric: safe completed tasks / all started controlled tasks

STOP: collision, boundary breach, failed e-stop, or broken takeover
