

B1 — Structure Overview

JINGZHANG ON TIME · Urban Operating Diagram | v5.0 | 2026-08-15 | Diagram status: registered

Narrative

The heritage park becomes the operating-diagram main line (9.5 km spine), forming a three-tier spatial control system and the One-Diagram-Nine-Stations-One-Spine grammar (three major stations + six Intermediate Stops at ~1.3 km intervals). The Urban Operating Diagram is the governance core: every AI public service runs like a train on a published timetable.

Scope

- Regional study 43.6 km²: southern Haidian innovation corridor
- Overall design 11.41 km²: 1–2 km around the heritage park
- Key areas 368.4 ha: Zhongzhi 192.1 + Origin 104.3 + Dazhongsi 72.0
- 6 Intermediate Stops MS-01~06: light stops along the spine (timetable point/signal post/traveler rest/ staffed window)

Key Indicators

11.41 km²	368.4 ha	9.5 km	8	6
Overall design	Key areas	Main line	Scenario cards	Diagram KPIs

Details

B2 — Diagram Governance

JINGZHANG ON TIME · Urban Operating Diagram | v5.0 | 2026-08-15 | Diagram status: registered

Narrative

The Urban Operating Diagram is a public spatio-temporal contract: machine-readable schema v1.0 with a zero-dependency checker (10 fixtures: 3 accepted, 7 rejected). Three-signal display; weekly window; gates G0–G4.

Scope

- Gates G0-G4: registration → baseline → trial → punctuality → release/suspend
- Three-signal: green=on time / amber=delayed / red=suspended
- Weekly window: Tue 06:00-12:00 line-wide maintenance

Key Indicators

v1.0	10 fixtures	8	5 parties	5 funds
Schema	3/7	Triggers	Community	Firewall

Details

Note: A3 draft. Final PDF A3 full (420×297mm). Drawings generated on provisional constraint boundaries; not statutory red lines. v2.0 | 2026-08-14

Diagram Plaza: operating-diagram lines as public surface

B3 — Key Areas: Three Stations

JINGZHANG ON TIME · Urban Operating Diagram | v5.0 | 2026-08-15 | Diagram status: registered

Narrative

Three stations carry the verify-translate-adopt chain in railway departure semantics. Each key area provides a 100-metre window with four-state sections; the five-band order is fixed and unchanged when AI is off.

Scope

- ZJ-01 Departure Yard (192.1 ha): marshalling + paired testing
- ZJ-02 Zero-Kilometre (104.3 ha): Qinghuayuan reuse = Timetable Hall
- ZJ-03 Arrival-Transfer (72.0 ha): plaza kit + yearbook hall

Key Indicators

192.1 ha	104.3 ha	72.0 ha	3	4 states
ZJ-01	ZJ-02	ZJ-03	Windows	Sections

Details

Note: A3 draft. Final PDF A3 full (420×297mm). Drawings generated on provisional constraint boundaries; not statutory red lines. v2.0 | 2026-08-14

Departure Yard plan | Zero-Km 100m window section

B4 — AI Scenarios and Implementation

JINGZHANG ON TIME · Urban Operating Diagram | v5.0 | 2026-08-15 | Diagram status: registered

Narrative

Eight scenario cards serve the operating-diagram loop only. The 90-day first service is the minimal implementation unit; suspension is a qualified outcome (falsify-first).

Scope

- T-01 Registration: no timetable, no departure
- T-03 Window Plaza: weekly fixed maintenance window
- T-05 Compensation: delay opens compensation channels
- T-07 Pilot Cabin: full 90-day first-service loop

Key Indicators

8	7	90 days	405-820k	6
Cards	Profiles	Pilot	Cost (BOM)	Projects

Details

Note: A3 draft. Final PDF A3 full (420×297mm). Drawings generated on provisional constraint boundaries; not statutory red lines. v2.0 | 2026-08-14

90-day First Service

D0-30 registration and samples → D31-60 trial (paired testing + first window) → D61-90 punctuality assessment and G3 decision. Resource release tied to gates (10/25/25/25/15%); cost estimate 405-820k RMB (BOM basis, not a budget commitment).

B5 — Mobility, Transit and Blue-Green

JINGZHANG ON TIME · Urban Operating Diagram | v5.0 | 2026-08-15 | Diagram status: registered

Narrative

TOD stitching at three stations plus the five-band spine and 15 gap-stitching units. One axis, two rivers: heritage spine plus Qinghe/Xiaoyuehe; green patches 10 units, 3.55 km².

Scope

- TOD 500m union 20.6% (synthetic); five-band slow mobility
- Transfer protocol: human-signed receipts (KPI-5)
- Edge micro-stations (reversible plug-rails)
- 9.5 km wind corridor (est. 0.8-1.5° C, synthetic)

Key Indicators

20.6%	85.6%	15	5 bands	pending
TOD 500m	Green 300m	Gaps	Spine	Density

Details

Note: A3 draft. Final PDF A3 full (420×297mm). Drawings generated on provisional constraint boundaries; not statutory red lines. v2.0 | 2026-08-14

Spine five-band section and signal posts

B6 — Indicators and Compliance

JINGZHANG ON TIME · Urban Operating Diagram | v5.0 | 2026-08-15 | Diagram status: registered

Narrative

Six diagram KPIs source from the diagram log; three-way separation with no disguise before the pilot. Standard coverage 9/9; compliance separation.

Scope

- KPI-1 Punctuality: on-time / total
- KPI-4 Window execution; KPI-6 Compensation fulfilment
- Compliance: GenAI Art. 14/15, Barrier-Free Art. 39, 2020-45
- 10 risks + 8 hard-stop triggers

Key Indicators

6	9/9	3	10	8
KPIs	Standards	Statutes	Risks	Triggers

Details

Note: A3 draft. Final PDF A3 full (420×297mm). Drawings generated on provisional constraint boundaries; not statutory red lines. v2.0 | 2026-08-14

Compliance Separation

Statutory minimums (GenAI Art. 14/15, Barrier-Free Art. 39, 2020-45) are never waived by design recommendation; self-set standards are labelled (self-set); each row states its spatial-operational consequence.

B7 — Risk, Copyright and Boundaries

JINGZHANG ON TIME · Urban Operating Diagram | v5.0 | 2026-08-15 | Diagram status: registered

Narrative

All claims are reversible: provisional boundaries trigger whole-package recalculation; census/controls/network stay unknown; pilots require tabletop acceptance + authorization + five-step rollback.

Scope

- 10 risks registered
- 8 hard-stop triggers; rollback pack of nine
- COMMUNITY-DISPLAY-ONLY; no administrative conclusions

Key Indicators

provisional	unknown	CDO	1.64
All marked	No disguise	Licence	en/zh

Details
