

OVERALL URBAN DESIGN • ONE PUBLIC BASELINE, THREE RECEIPT LANDMARKS

OVERALL URBAN DESIGN • AN UNBROKEN PUBLIC BASELINE LINKS THREE RECEIPT LANDM

Open urban fabric is low-contrast context; the spine, stations, wings and six stitches carry the design judgement

THREE SPATIAL TYPES

- ✓ **ONE SPINE**
mobility, blue-green, staffed service
- ✓ **SIX STITCHES**
east-west public interfaces, not redlines
- ✓ **TWO WINGS**
tech service + civic problem exchange

3 OPTIONS • 1 REJECTION

- ALT-A • REJECT**
 - ALT-B • REVISE**
 - ALT-C • ADVANCE**
- geometry audit • not field performance

Map data © OpenStreetMap contributors · ODbL · 2026-08-13 · provisional boundary and design assumptions pending official base, survey and professional review

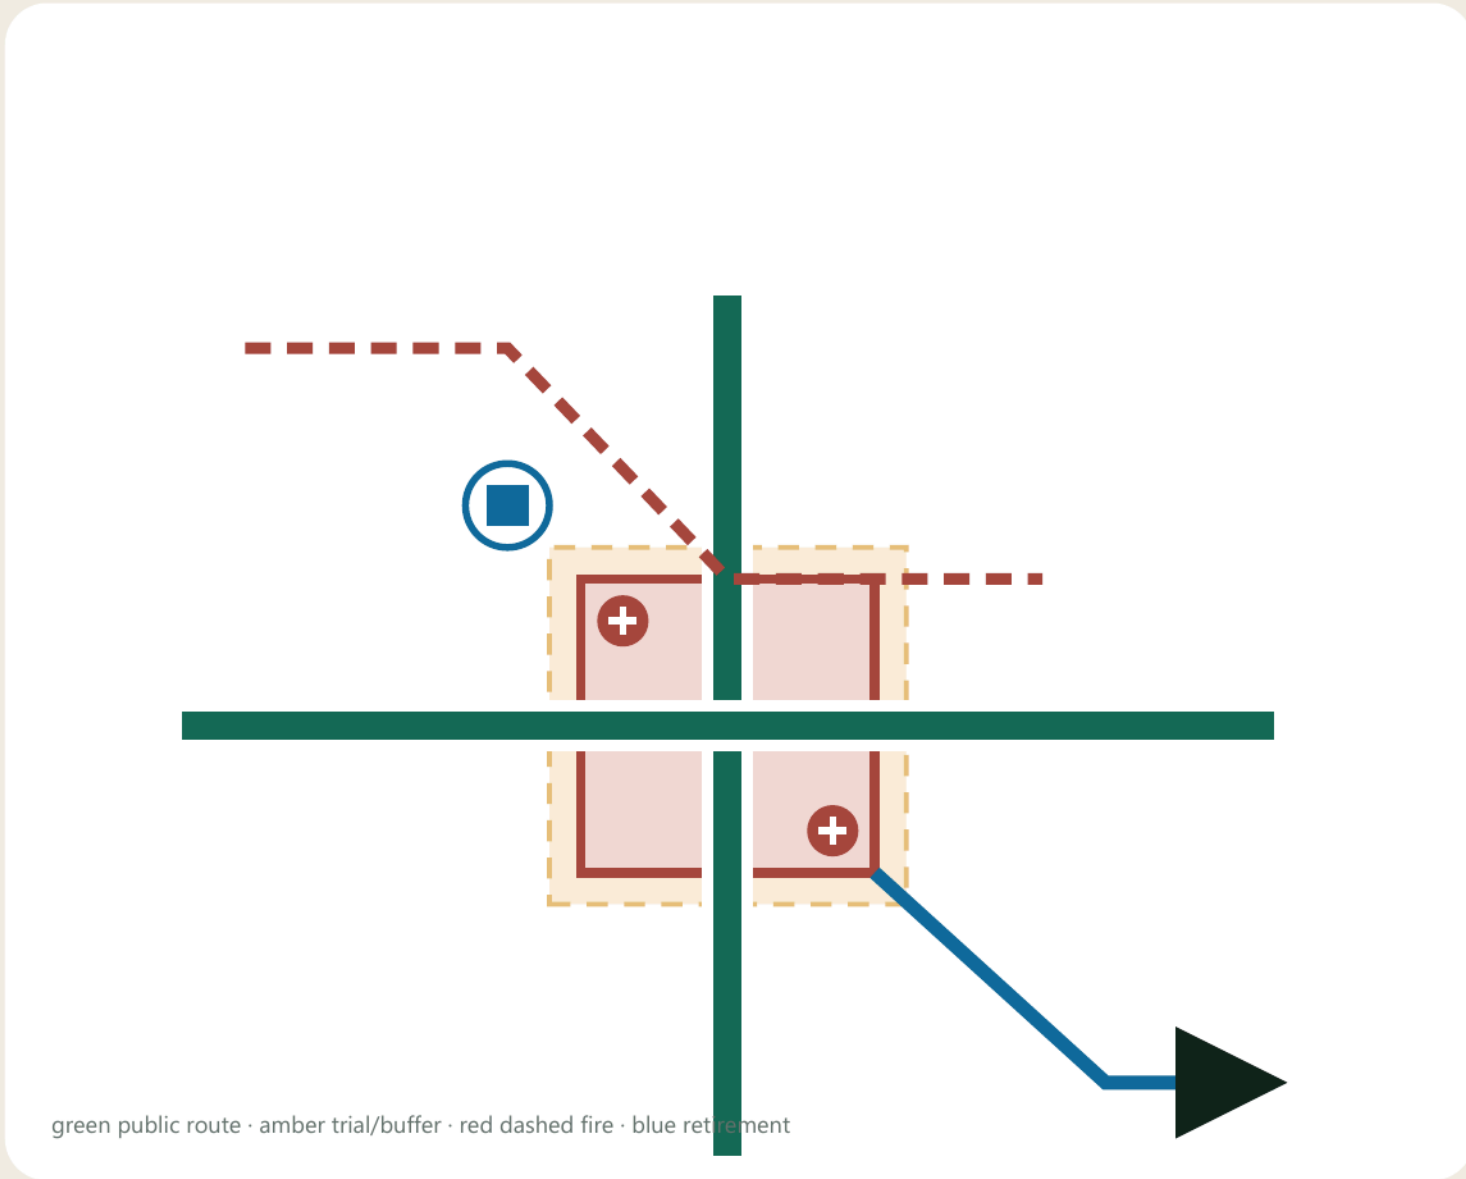

THREE SPATIAL OPTIONS • ONE PUBLIC REJECTION, ONE REVIEWABLE SELECTION

ONE REAL SPATIAL DECISION • SAME TASK, USERS AND SITE; OUTCOME IS NOT PREWRIT

21 hard-gate evaluations test public route, access, fire, retirement and staffed E-stops before occupation and reversibility

ALT-A • Central mixed bay

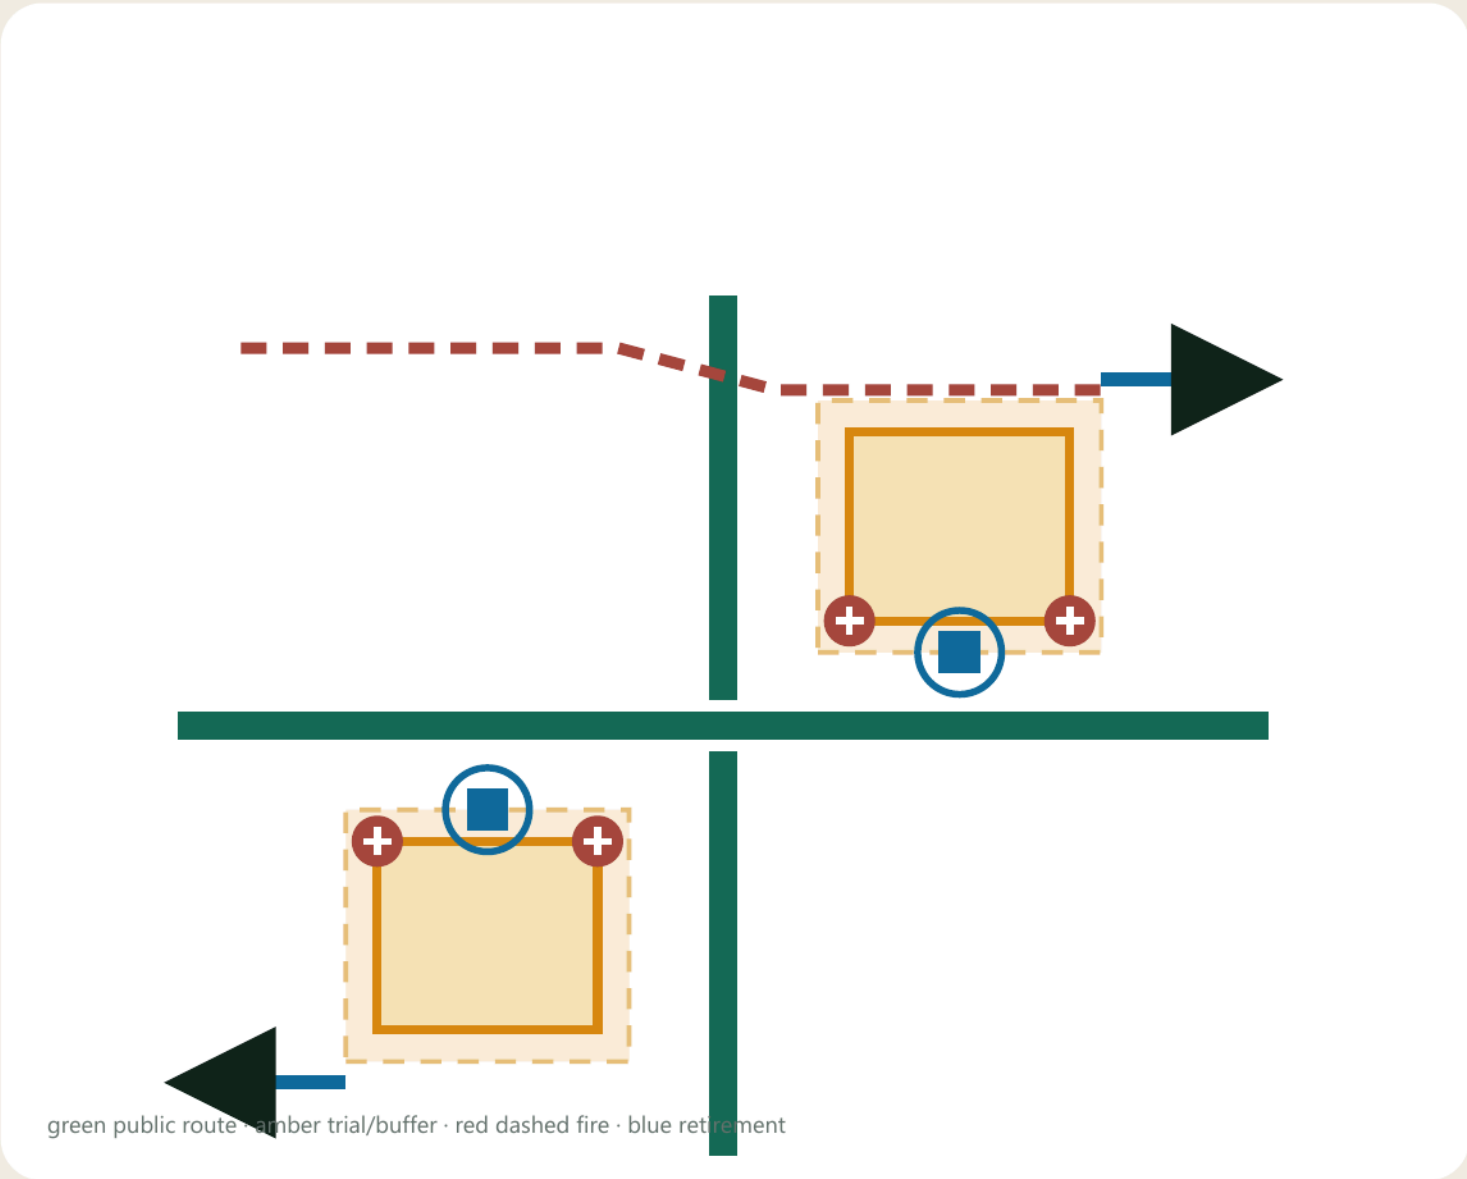

Places the trial in the public-cross centre, shortening equipment runs at the cost of public conflict.

REJECT
Reject: 6 hard gates fail, so the baseline cannot operate independently.

ALT-B • Split trial bays

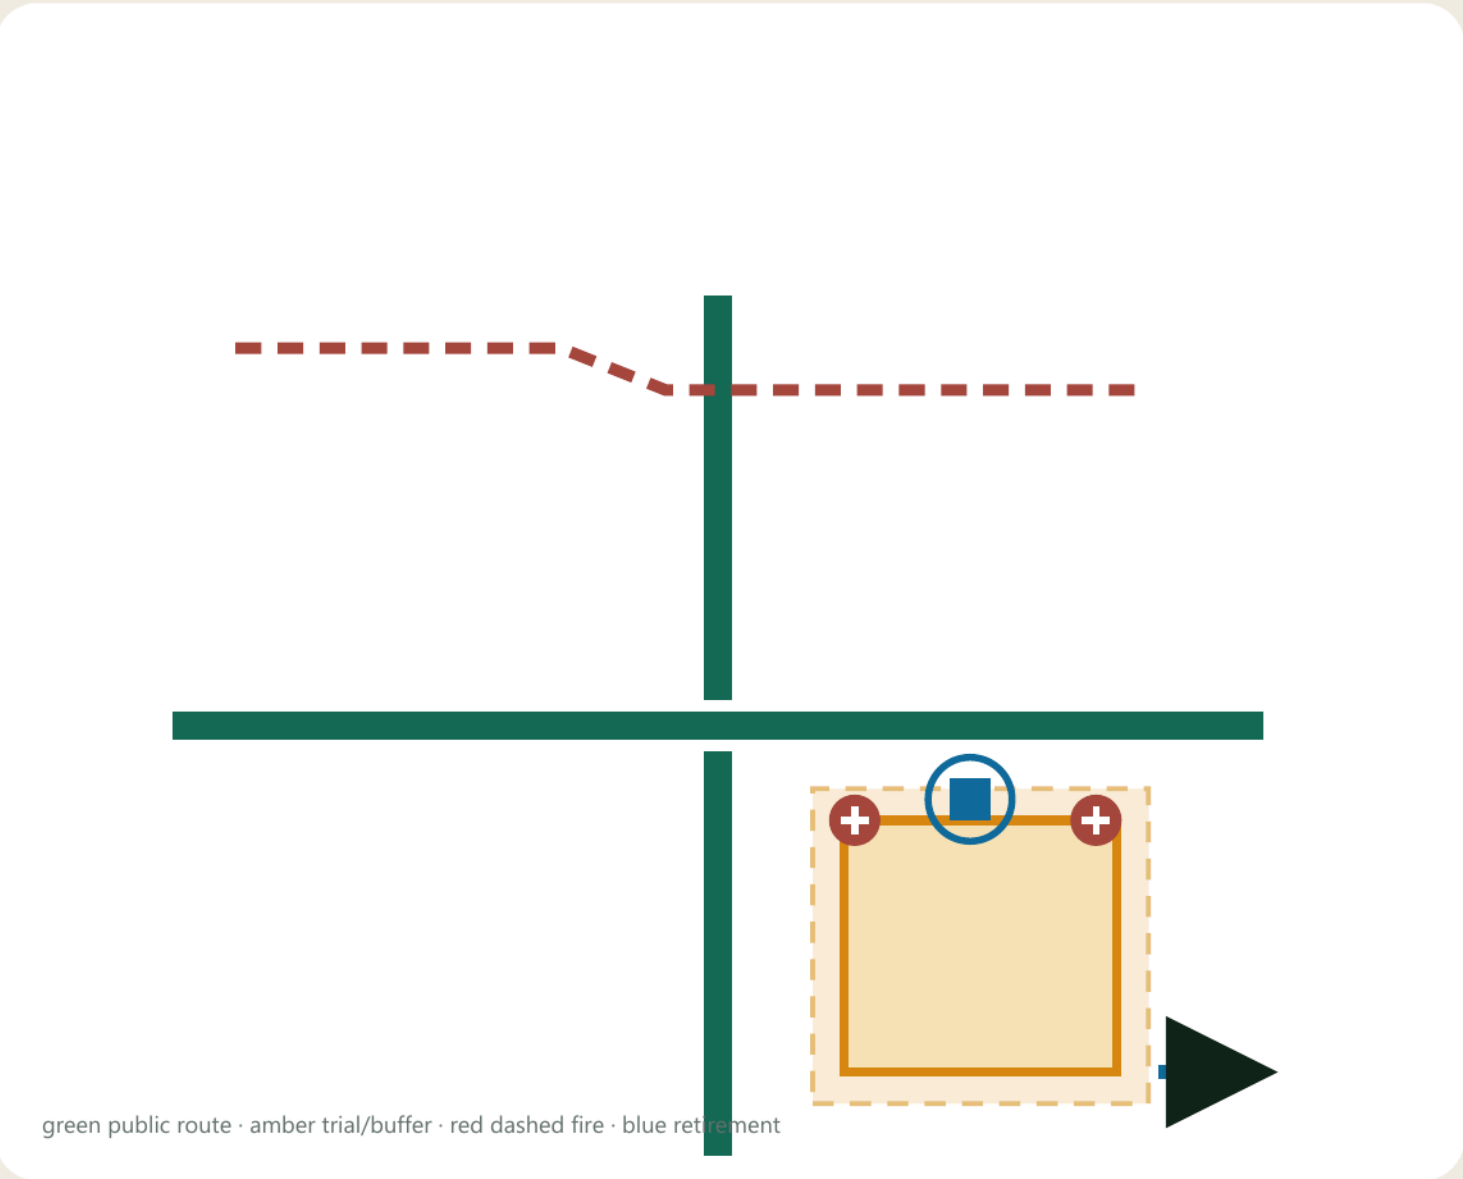

Two bays clear the public cross, but split supervision, fire observation and retirement into two systems.

REVISE
Revise: hard gates pass, but 3 supervision and retirement fragmentation issues remain.

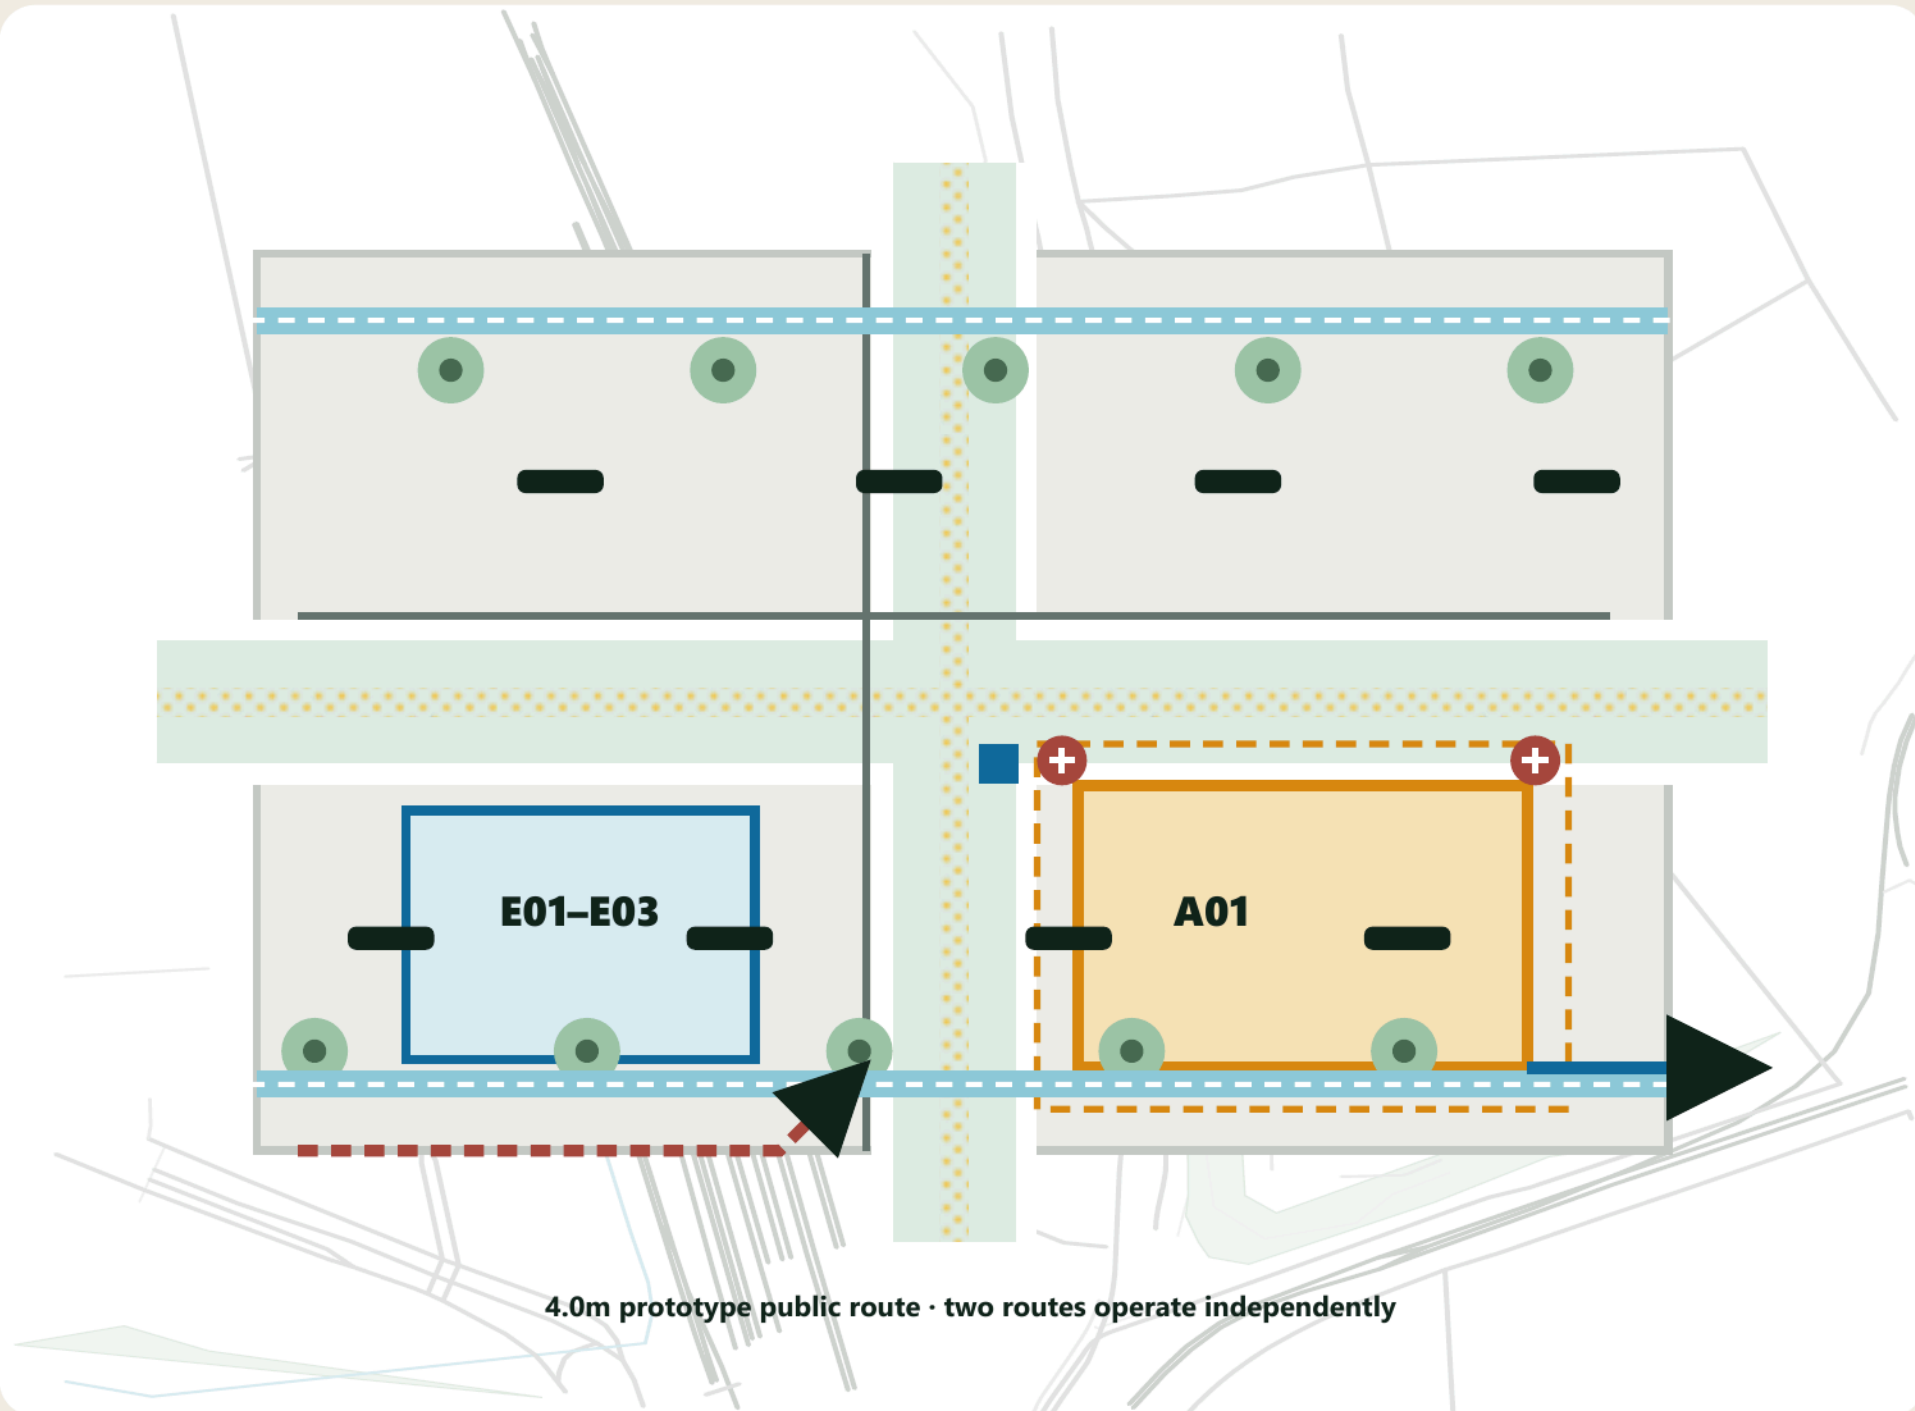

ALT-C • One-sided reversible bay

Keeps the public cross intact and concentrates trial, staff, E-stops and retirement on the south-east side.

ADVANCE
Advance: every hard gate passes and the public cross, fire access and retirement remain independent

ALT-C • 1:500 ASSEMBLABLE PROTOTYPE • PUBLIC CROSS STAYS; AI ENTERS SOUTH-EAST

LOCATABLE WITHOUT LEGEND

- B01 PUBLIC CROSS
- A01 ONE-SIDE BAY
- E02 STAFF + DUAL E-STOP
- FIRE FIRE ACCESS
- RETIRE INDEPENDENT RETIREMENT

AUDIT OUTPUT
ADVANCE

372m • same route length
2,496m² • trial
3,840m² • reversible buffer
24.3m • furthest E-stop—staff

prototype assumptions pending survey

DECISION IS NOT AN AESTHETIC VOTE • DRAWINGS FOLLOW THE CALCULATION

ALT-A

6 hard gates fail

13.9% route detour

ALT-B

0 hard fails, 3 revisions

94.9m supervision span

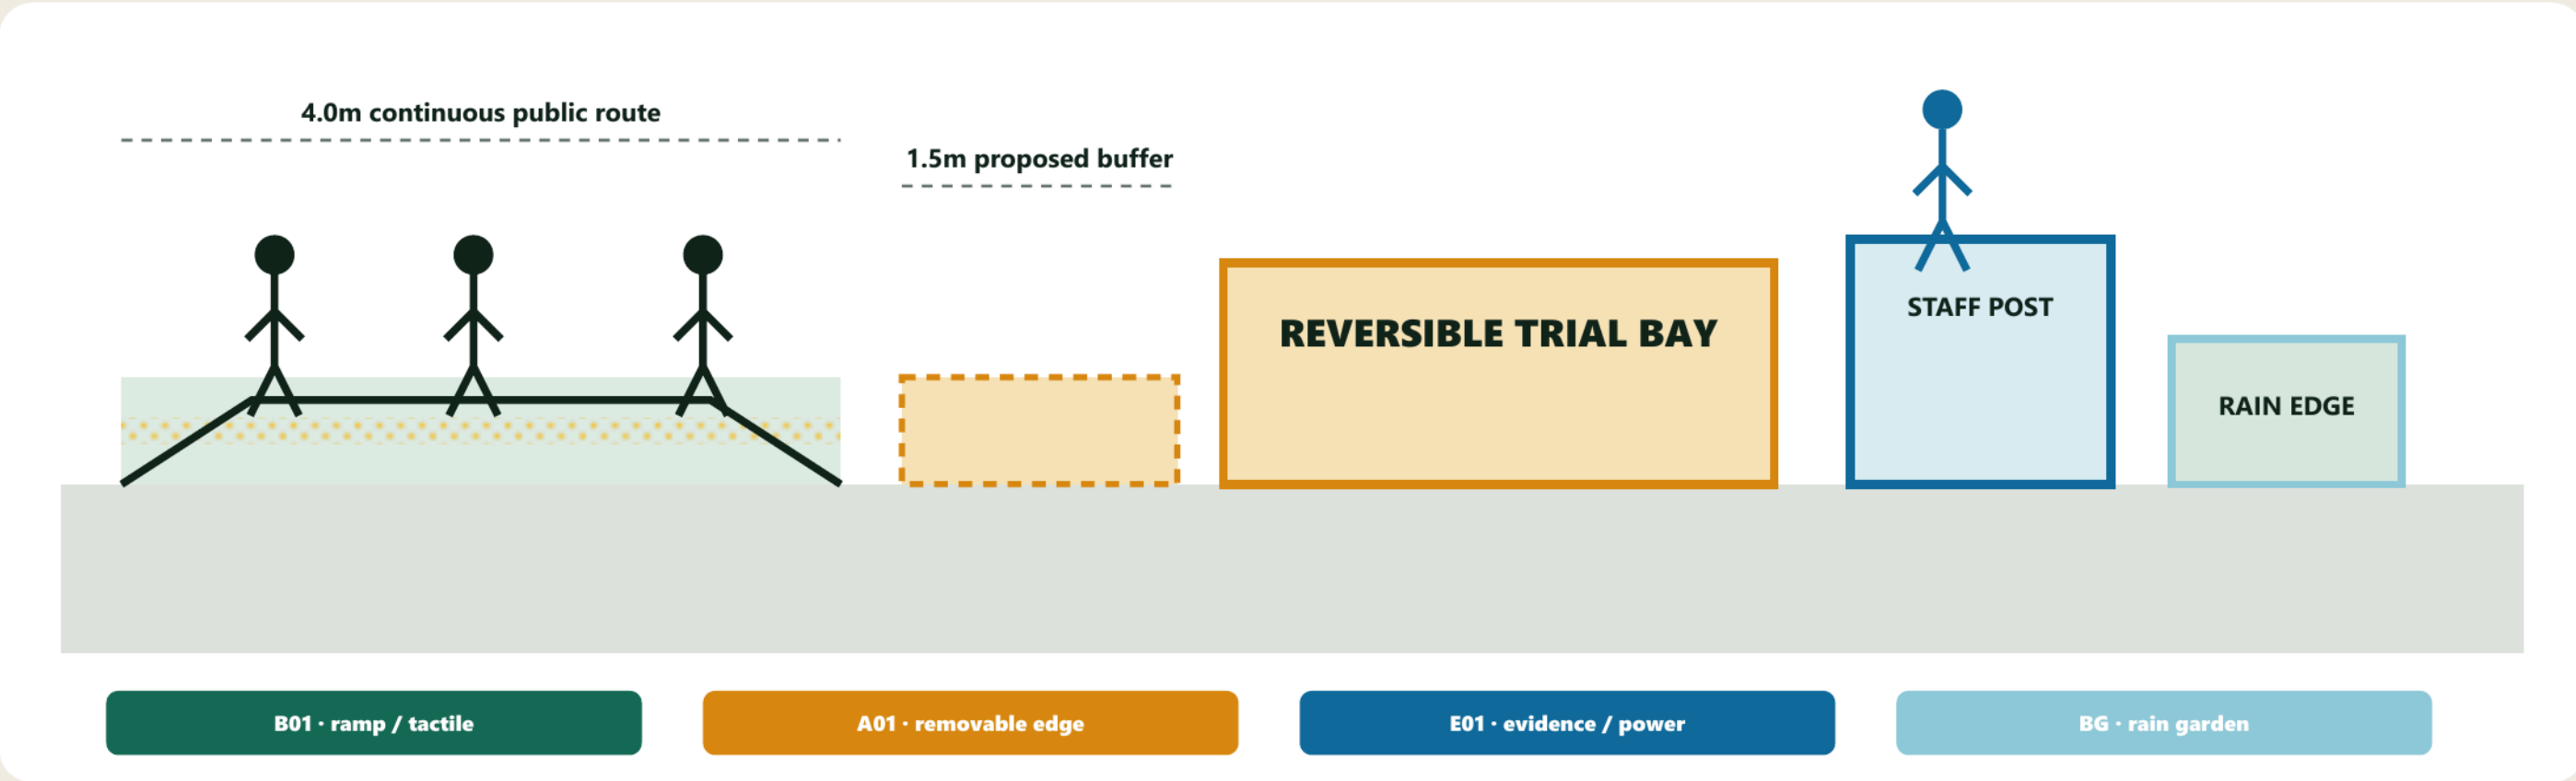

ALT-C

0 hard fails, sole advance

24.3m furthest E-stop—staff

geometry_based_design_audit - LOCAL ENU - input 3c4c466bf8dc2b03... - not proof of field safety, transport or public acceptance

1:200 SECTION + 1:50 NODE • TRIAL EQUIPMENT NEVER NARROWS THE PUBLIC ROUTE

Prototype dimensions, accessibility, fire, utilities and equipment interfaces require professional review against formal survey.

03 / V11 • CIVIC ADOPTION COMPILER

FROM DESIGN DECISION TO CIVIC ADOPTION • PERMIT, DUTY, STOP, RECOVERY

SPATIAL DECISION + CIVIC ADOPTION RECEIPT • DESIGN STATUS AND FIELD DECISION S'

ONE REAL SPATIAL DECISION • SAME TASK, USERS AND SITE; OUTCOME IS NOT PREWRITEN

21 hard-gate evaluations test public route, access, fire, retirement and staffed E-stops before occupation and reversibility

ALT-A • Central mixed bay

Places the trial in the public-cross centre, shortening equipment runs at the cost of public conflict.

REJECT

Reject: 6 hard gates fail, so the baseline cannot operate independently.

ALT-B • Split trial bays

Two bays clear the public cross, but split supervision, fire observation and retirement into two systems.

REVISE

Revise: hard gates pass, but 3 supervision and retirement fragmentation issues remain.

ALT-C • One-sided reversible bay

Keeps the public cross intact and concentrates trial, staff, E-stops and retirement on the south-east side.

ADVANCE

Advance: every hard gate passes and the public cross, fire access and retirement remain independent.

DECISION IS NOT AN AESTHETIC VOTE • DRAWINGS FOLLOW THE CALCULATION		
ALT-A	ALT-B	ALT-C
6 hard gates fail	0 hard fails, 3 revisions	0 hard fails, sole advance
13.9%	94.9m	24.3m
route detour	supervision span	furthest E-stop—staff

ALT-C • ADVANCE DESIGN

not ADOPT; field performance remains unknown

DAY 0–30

Build only public route, waiting, shade, staffed service and evidence porch.

DAY 31–45

Record seven consecutive ordinary-service days.

DAY 46–75

Timed trial starts only after eight permits and four duty roles close.

DAY 76–90

Stop drill, equipment retirement, spatial restoration and public review.

RACI

Separate asset, venue, service, safety, data and public-representative duties.

FIELD UNKNOWN

Footfall, safety, efficiency, acceptance, cost and recovery time await field evidence.
