

Rail Memory AI Commons Overview

Rail Memory AI Commons

Memory Link evidence, closure, and maintenance lifecycle + three repositories

Memory Link

evidence + closure/reopen + maintenance covenant

4 honor nodes

12 memory points

3 repositories

2 service wings

Source: submission GeoJSON + metrics.json + proposal text; the provisional boundary supports concept review and self-check only, not an official redline.

Land Use Structure and Scope Transmission

Rail Memory AI Commons

actual provisional topology, not statutory land conversion

0802 R&D commons
09 industry service

1401 green open space
0702 community service

43.6 km² coordinated research

11.4 km² overall design

3 key areas

12 memory points

Source: submission GeoJSON + metrics.json + proposal text; the provisional boundary supports concept review and self-check only, not an official redline.

Three Key Areas: Memory Prototypes

Rail Memory AI Commons

trptych of forge, studio, and public adoption exchange

Stack Memory Forge

model/data/robotics validation

- reviewable scenario entrance
- rights and source ledger
- human steward, maintenance covenant, and closure/reopen gate

AI Origin Open Memory Studio

open-source translation and rights

- reviewable scenario entrance
- rights and source ledger
- human steward, maintenance covenant, and closure/reopen gate

Public Adoption Exchange

public preview and feedback

- reviewable scenario entrance
- rights and source ledger
- human steward, maintenance covenant, and closure/reopen gate

Source: submission GeoJSON + metrics.json + proposal text; the provisional boundary supports concept review and self-check only, not an official redline.

Mobility and Blue-Green Network

Rail Memory AI Commons

conceptual centerlines + green spine + twelve memory points

22.99 km
conceptual network length

12
reviewable memory points

4
honor/pilgrimage nodes

unknown
road redline area

Road redlines, under-bridge space, parking and utilities require official data. Sense assets and environment, not workers.

Source: submission GeoJSON + metrics.json + proposal text; the provisional boundary supports concept review and self-check only, not an official redline.

Core Metrics and Evidence Chain

Rail Memory AI Commons

known, provisional, and unknown states kept visible

site area

11,412,825.386sqm

green ratio

0.123423

ratio

public space ratio

0.073281

ratio

memory points

12

count

industry validation

4

count

Pending operational baseline

closure_confirmation_rate: unknown

maintenance_contract_coverage: unknown

closure/reopen + owner/operator/funding/inspection/retirement/handover

Unknown controls

floor_area_ratio / height_control_m / road_area_sqm / statutory_building_density

Source: submission GeoJSON + metrics.json + proposal text; the provisional boundary supports concept review and self-check only, not an official redline.
