

JINGZHANG

Jingzhang Co-Legible Interfaces

Shared Visibility Conditions for a City in Motion

Let the city be understood before it is made intelligent

Three Areas, Two Wings | Shared-Visibility Loop

OSM context supports three pressure windows; the wings are functional links, not statutory boundaries.

Map context © OpenStreetMap contributors, ODbL · provisional design overlay

Provisional geometry | Concept proposal | Recalculate after official data

02 | Global Cases and Eight Factors

6 cases → 8 factors → 3 areas + 2 wings

JINGZHANG CO-LEGIBLE INTERFACES

02 / ECOSYSTEM

Global Cases → Eight Factors → Three Areas and Two Wings

Compare mechanisms; do not transfer scale, policy, investment or reputation. Every factor retains a human gate.

Seoul AI Hub / AI Yangjae Hub

Seoul, Republic of Korea

Public coordination of research, firms and talent.

Punggol Digital District

Singapore

University, industry space and an open district platform.

IPAI Campus

Heilbronn, Germany

Research, enterprise, society, living lab and startups.

Mila

Montréal, Canada

Research network, industry interfaces and talent.

AI Singapore

Singapore

Problem-led projects, engineering platforms and talent.

Hub71+ AI

Abu Dhabi, UAE

Market, capital, corporate and global service interfaces.

PUBLIC TEST CHAIN

SERVICE MATCHING

SERVICE MATCHING

CONDITION → ACTION → EVIDENCE → HUMAN GATE

Provisional geometry | Concept proposal | Recalculate after official data

03 | Three Areas, Three Tests

same mechanism · different pressures

JINGZHANG CO-LEGIBLE INTERFACES

03 / THREE TESTS

Three Areas Are Three Pressure Conditions

One mechanism faces complex co-presence, inclusive daily life and dense interfaces.

Zhongzhiyuan

AI CONCEPT · NOT SITE RECONSTRUCTION

Co-Legible Corner Test

Planting × parking × dusk

Sight triangle | slowdown | pocket

Landmark: Co-Visibility Test Court

AI Origin

AI CONCEPT · NOT SITE RECONSTRUCTION

Inclusive Wayfinding Test

Rain × queues × construction

Entrance frame | route | staff

Landmark: Co-Legible Milestone Gate

Dazhongsi

AI CONCEPT · NOT SITE RECONSTRUCTION

Visual Congestion Test

Station × media × event

Public field | buffer | delivery

Landmark: Urban Interface Theatre

04 | Flagship: Co-Legible Corner

older pedestrian + cycling courier

JINGZHANG CO-LEGIBLE INTERFACES

04 / FLAGSHIP

Flagship Prototype | Plan + Section + Realistic Concept Scene

Older pedestrian + courier; change space before testing AI value. Dimensions are design prompts, not engineering controls.

- 01 SPACE: planting layers, no-stop edge, early slowdown, observation pocket
- 02 AI: alerts on occlusion change; people verify; low confidence falls back
- 03 FAIL: late mutual discovery, broken accessible passage or no rollback

Concept handover depth | Site survey, real-user testing and traffic/accessibility/landscape review are prerequisites

Provisional geometry | Concept proposal | Recalculate after official data

Sixteen Urban Tasks | Four Families

Find

- 01 First Look After Exit
- 02 A Community Entrance That Does Not Hide
- 03 An Accessible Branch Legible in Rain
- 04 A Delivery Bay Found Without Looking Down

Cross

- 01 Co-Legible Corner Test
- 02 A Continuous Footway Through Pickup Peak
- 03 A Visible Crossing of Four Speeds
- 04 A Crossing Signal Not Lost in Advertising Glare

Share

- 01 A Greenway for Stopping, Moving and Passing
- 02 A Continuous Route Beneath the Canopy
- 03 A Protected Visual Field for Public Wayfinding
- 04 Heritage Reading Without Occupying Direction Choice

Adapt

- 01 A Sight Triangle That Accounts for Growth
- 02 Changing Hoardings, Continuous Direction
- 03 Decision Margin During Crowd Surges
- 04 The City Still Explains Itself with AI Off

06 | Validation, AI Contract and Annual Operation

visible ≠ legible ≠ timely

JINGZHANG CO-LEGIBLE INTERFACES

05 / EVIDENCE

Three Questions × AI Contract × Four-Season Iteration

Record failures separately; AI compares and alerts; people decide; retest AI-off; no composite score.

Structure checks pass; field tests, operator, thresholds, budget and permits remain UNKNOWN

Provisional geometry | Concept proposal | Recalculate after official data

Six Task Responses | Output + Boundary + Handover Gate

Packaged concept responses are not site, policy, operator or engineering confirmation

agent.1

Overall Concept and Functional Coordination

OUTPUT

Three positions, five functions and a three-area/two-wing coordination loop

HANDOVER GATE

Wing extents, ownership and quantitative flows remain unverified.

agent.2

Global AI Innovation Ecosystems and Jingzhang Mechanisms

OUTPUT

Six global cases and an eight-factor land-to-scenario mechanism

HANDOVER GATE

Actors, funding, compute, policy tools and attraction results are unconfirmed.

agent.3

Xiaoyue River Public Experience Chain and Scenario Operation

OUTPUT

Sixteen scenarios, personas, Xiaoyue River chain and test protocols

HANDOVER GATE

The Xiaoyue River alignment and field results remain unverified.

agent.4

AI Public Space, Native Scenarios, Landmarks and Component Library

OUTPUT

Heritage-park public space, cross-axis links, Dazhongsi scenarios, three landmarks and six components

HANDOVER GATE

Routes, carriers, ownership, heritage and engineering remain pending.

agent.5

Historical-Cultural Resource System and International Narrative

OUTPUT

Four cultural-resource classes, storyline, signage and international copy

HANDOVER GATE

Specific heritage assets, facts and rights require official verification.

agent.6

Annual Events, Brand IP, Developer Community and Conversion

OUTPUT

Four-season events, City Co-Legibility Challenge IP, developer operations and conversion path

HANDOVER GATE

Brand rights, dates, budget, operators, partners and results are unconfirmed.

Package: narrative + five figures + 16 scenarios + 3 tests + AI contract + provenance/matrices | Next: survey, professional review, operator confirmation
