Key Metrics Evidence (ratio % vs count panels)

Metric basis: denominator = site_area_sqm (~11.4 km², provisional); all values from metrics.json; recompute when official data is published

Metric	Value	Source	Formula	Confidence
green_ratio	0.232391	metrics.json	$\text{green_space_area_sqm} / \text{site_area_sqm}$	low
public_space_ratio	0.005176	metrics.json	$\text{public_space_area_sqm} / \text{site_area_sqm}$	low
