- Dazhongsi Experience
- Scenario nodes
- Provisional boundary
- Greenway centerline

示意非测绘：provisional
EPSG:4326 存储 / 4548 面积
非官方红线

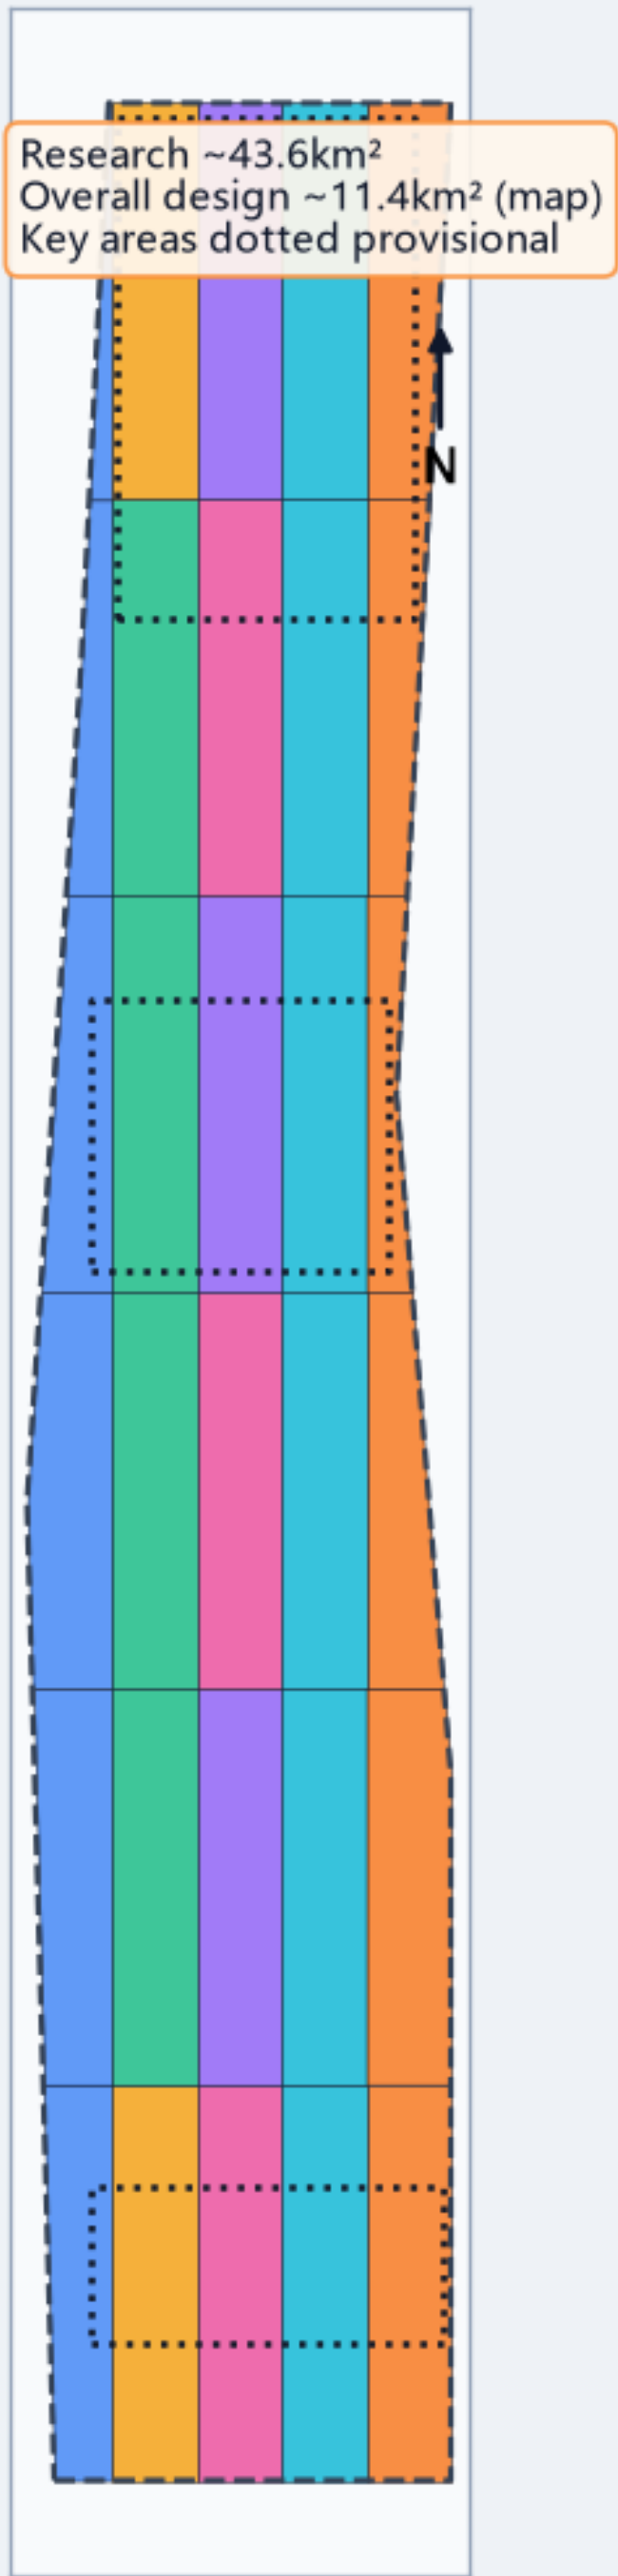

Tip: mechanism: public spine as versioned City API.
Interface: 12 scenario nodes as endpoints; Permission: 4 data grades;
Rollback: pause tests / remove kits; Audit: correctable honor wall + forum court.
Structure: one spine, three cores, dual wings, twelve nodes.
Provisional boundary: areas via EPSG:4548; conceptual reference only.

非官方红线

Land-use densified to block/function units with a central green spine.
Renewal priority: slow mobility + protocol nodes before deep rebuild.
RRD typology only — no plot-level demolition verdicts without ownership data.
Statutory FAR/height/setbacks remain unknown without regulatory plans.

Mobility & blue-green network

Spine continuity · seams · station pockets · reversible robot pilots · severance constraints

Legend

非官方红线

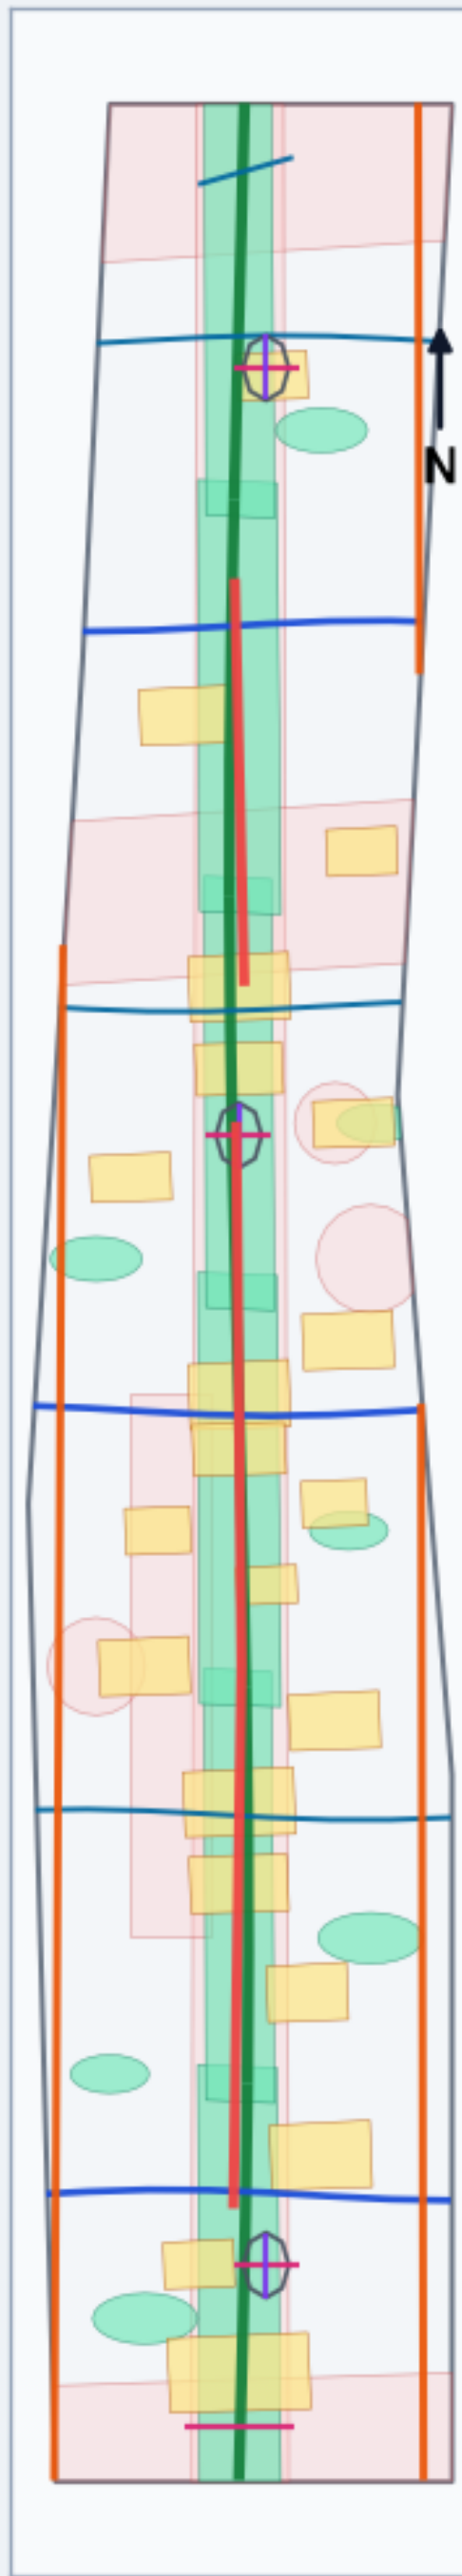

N-S greenway spine with E-W seams linking campus–community–industry.
Centerlines are not road redlines. Station-city pockets before new express links.
Robot pilots only on reversible segments; yield to pedestrians/accessibility.
Edge compute remains non-engineering without utilities evidence.

Concept centerlines, not redlines; robots yield to pedestrians/accessibility

Blue-green network + public courts support interfaces and station pockets.
Three pilgrimage devices: Protocol Sleeper Gallery, Honor Wall, Verification Beacon.
Constraint layer marks severance/heritage/intensity unknowns as pending.

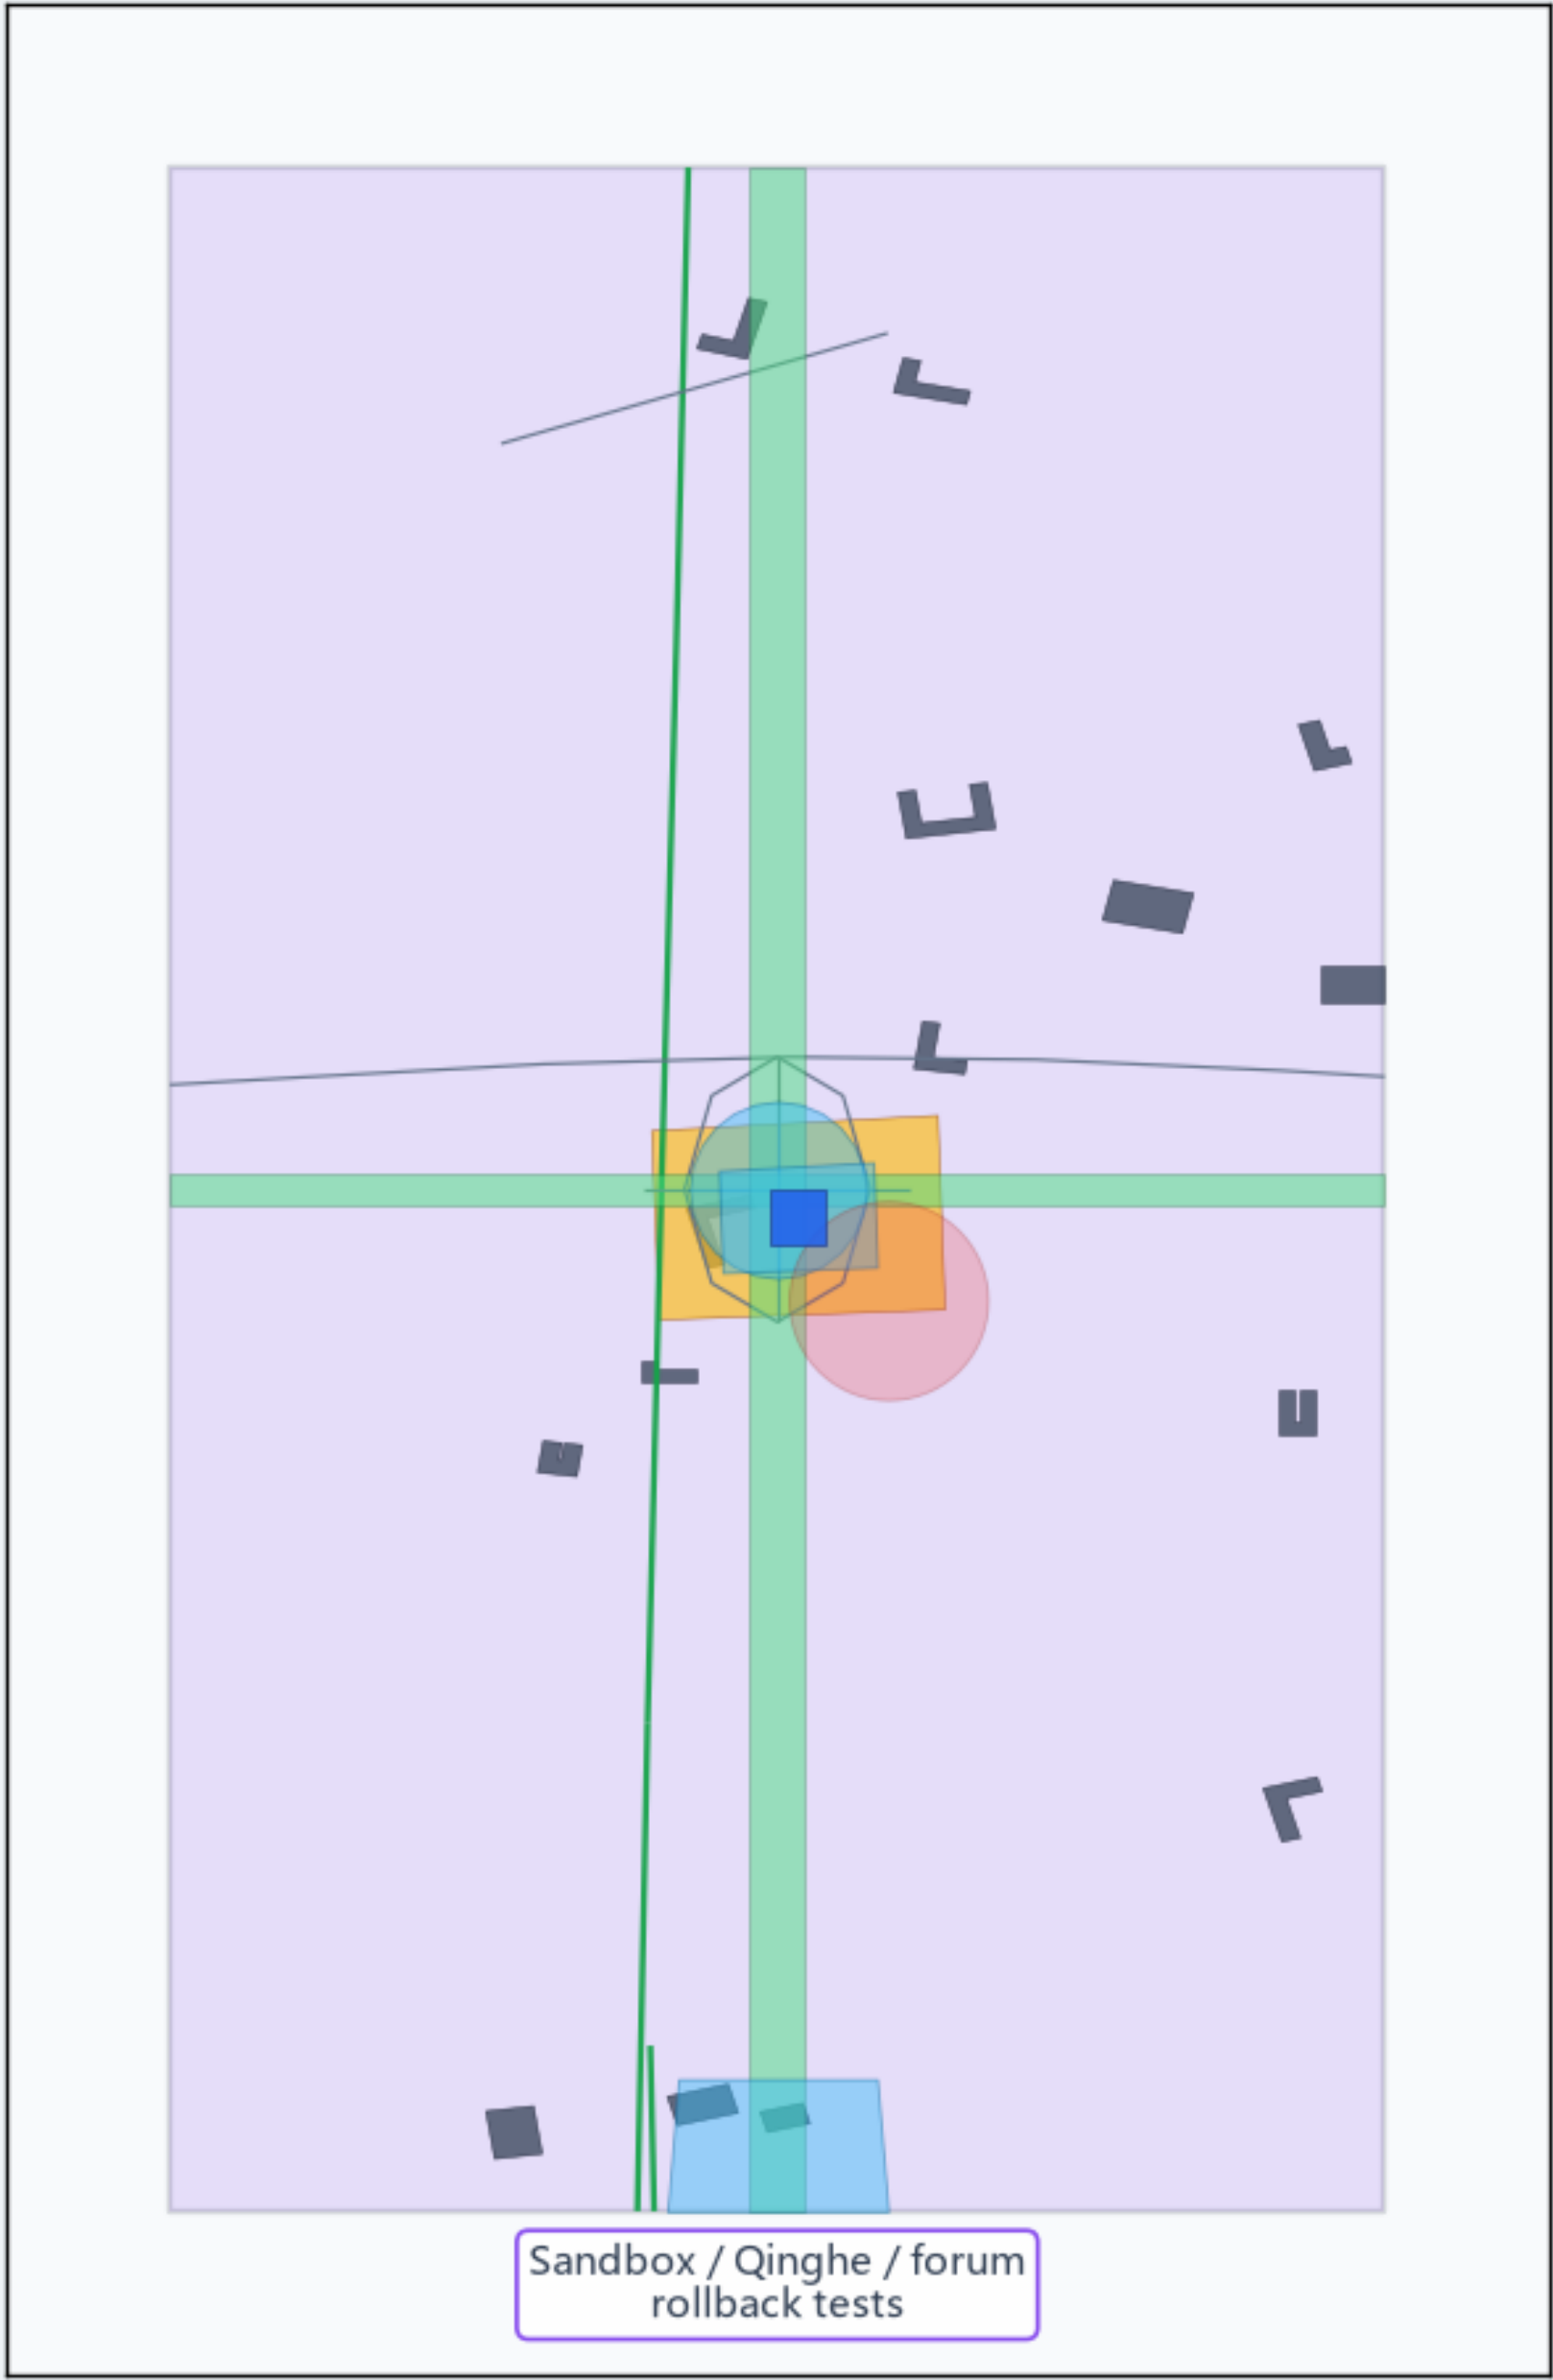

Concept centerlines, not redlines; robots yield to pedestrians/accessibility

Site	Green	Public	Bldgs	Roads

Three key areas — differentiated detail

Verify / Origin / Experience · detail layers + risk overlays

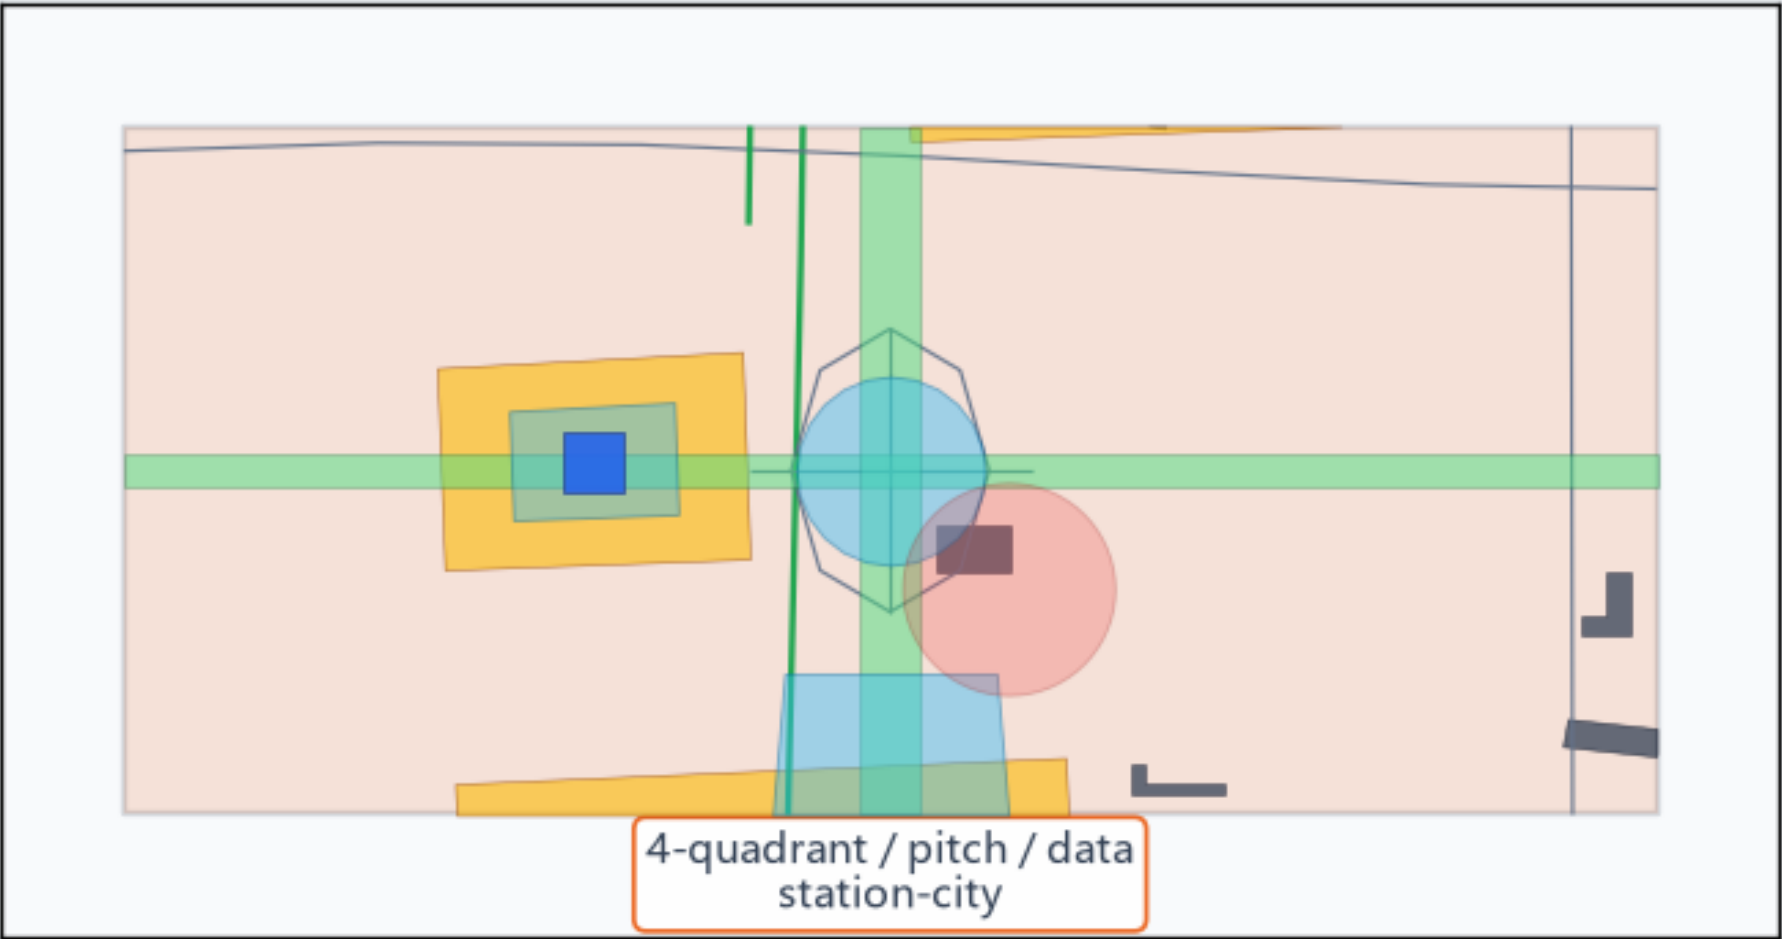

Zhongzhiyuan Verify

Origin Open-source

Dazhongsi Experience

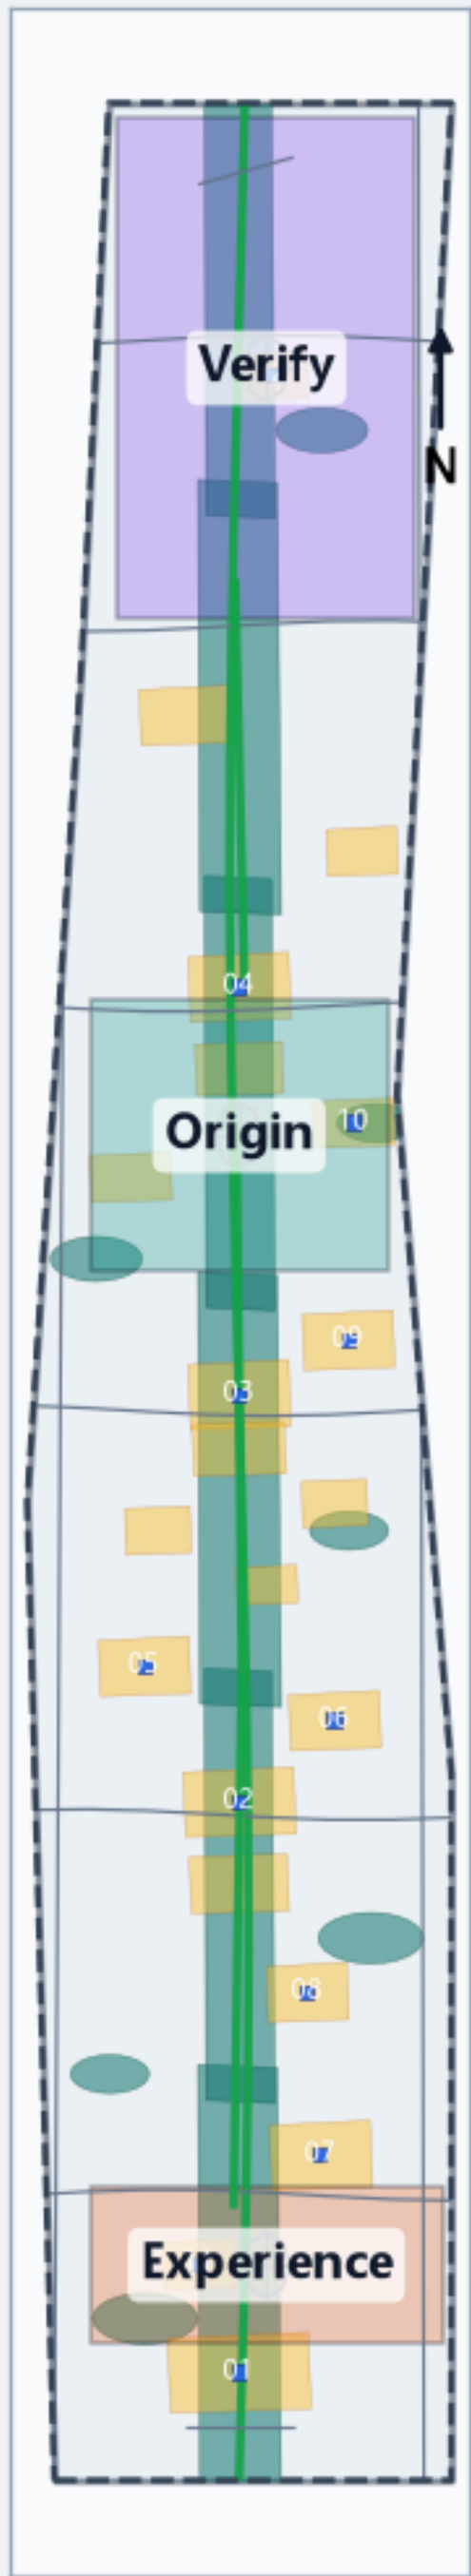

Each area: entry · spine · cross-seam · court · scenario anchors · risk overlay (pending) | conceptual

Zhongzhiyuan: waterfront sandbox + governance court (SCN-02/04/12).
Origin: release-transfer-honor sequence (SCN-01/06/11).
Dazhongsi: four-quadrant station-city + pitch + data parlor (SCN-05/07/10).
KEY_AREA polygons remain provisional directional concepts.

Each scenario card binds place id, personas, minimization, human review, rollback, KPI.
≥3 validation tests: safety sandbox, edge station, data parlor.
Seasonal ops calendar is conceptual. Data grades enforced. No approval substitution.

Core metrics recalculation & evidence chain

EPSG:4548 · known/unknown · four gates · provisional medium confidence

Geometry evidence base

Metrics table (= metrics.json)

Site area m²	11,412,825.386	known · medium
Green ratio	0.2235	known · medium
Public ratio	0.1162	known · medium
Buildings	87	known · medium
Road segs	28	known · medium
Land units	30	known · medium
Footprint dens.	0.0110	known · medium
FAR	unknown	unknown · low

Chain: EPSG:4548 area → sum(layer) → ratio
Gates: deterministic / spatial / visual / professional
Statutory FAR remains unknown

medium confidence matches provisional boundaries; figures are not approval areas

Storage EPSG:4326 → area EPSG:4548 → metrics.json; confidence medium.
Matrices navigate tasks/standards/depth evidence.
All content is conceptual reference for professional deepening — not statutory planning.
