

Concept Master Plan: One Proving Line, Three Proving Zones

A 9 km heritage-park greenway spine strings the Heavy-Proving, First-Proving and Go-Live zones; five corridors re-stitch east and west

The Proving Line — Centennial Jing-Zhang AI Innovation Belt Open Call

Signal Green = live / greenway Blueprint Blue = proving / R&D Rust Red = heritage / culture

Go-Live Zone

Dazhongsi AI Industry Cluster
approx. 72.0 ha (announced; provisional)
Urban parlor for proven AI-native businesses

First-Proving Zone

Beijing AI Origin Community
approx. 104.3 ha (announced; provisional)
Ecosystem gateway · Zero-Km spiritual origin

Heavy-Proving Zone

Zhongzhiyuan AI Independent Innovation Acceleration Area
approx. 192.1 ha (announced; provisional)
Deep proving base: chips-frameworks-models

Zhongguancun Sci-Tech Service Wing (W)

Go-Live Belt · Dazhongsi

9 km Proving-Line greenway spine (heritage park)

Dazhongsi

Xitucheng

Contributors' Honor Wall

Wudaokou

Zero-Km Marker · Qinghuayuan Stn

Qinghua East Rd

Zhongzhiyuan

Xiaoyue River Scenario Wing (E)

The Proving Cycle (standing rule)

- 1 · Apply**
Scene admission · negative-list screening
- 2 · Prove**
Closed-to-semi-open testing, data logged
- 3 · Open**
Public operation: visible, askable, stoppable
- 4 · Retire**
Red-card fuse or expiry exit; space restored

Every AI scene: prove first, open later, reversible, retriable

1 km (N-S, true scale)

Greenway spine (abstracted LU-100)
E-W stitching corridors x5
Stitch node
AI pilgrimage landmarks x4
Provisional boundary
Wing synergy direction

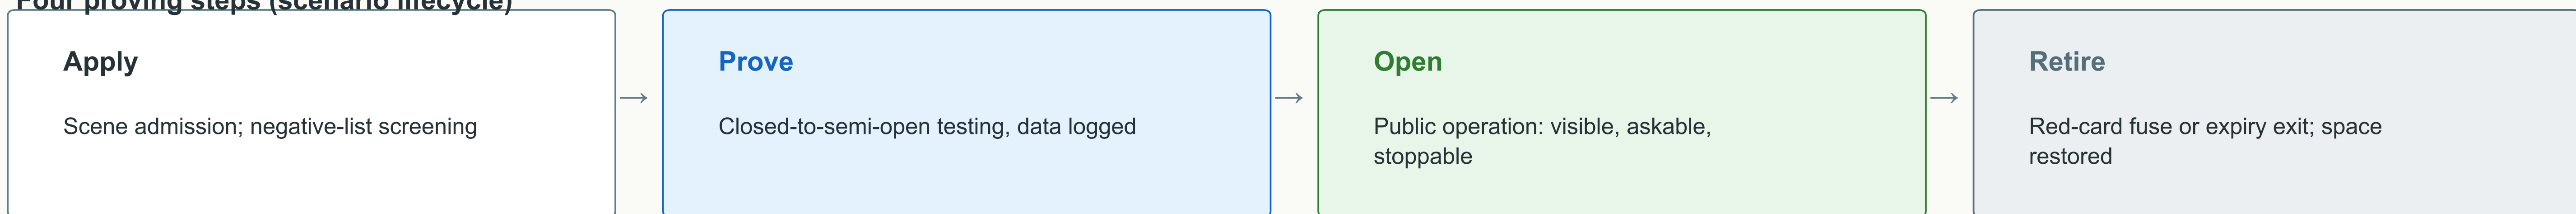

Source: geometry/geojson & metrics.json of this package (recomputed in EPSG:4548) | Status: site & key-area polygons are PROVISIONAL rough boundaries, not official red lines; all land use / buildings / routes are conceptual, not for approval
Composition: site rotated 90° CCW (north points right); E-W width exaggerated ~2.75x for legibility, N-S scale is true (see bar)

FIG 01

- One line: the 9 km proving greenway on the completed park (9 km / c.53 ha / 70 communities / c.450,000 residents)

- Three districts: Heavy-Proving (Zhongzhiyuan, c.192.1 ha) — deep heavy validation; First-Proving (AI Origin Community, c.104.3 ha) — ecosystem gateway; Go-Live (Dazhongsi, c.72.0 ha) — proven AI-native businesses serve the public
- Five stitches: E-W corridors at Dazhongsi, Xitucheng, Wudaokou, Qinghua East Rd and Zhongzhiyuan answering the rail severance
- Two wings: Zhongguancun Technology Services Wing (W) as depot & supply; Xiaoyue River Scenario Enablement Wing (E) as open proving field
- Closed loop: west wing supplies factors — heavy proving — ecosystem incubation — east-wing opening — public go-live — operating data returns to price the factors
- Three positionings: centennial culture belt / urban AI life experience belt / AI innovation belt; naming extends to proving points, milestones, signal masts, platforms; master slogan: The Proving Line — Where AI Earns the City's Trust
- Five functions seated: full-stack innovation in the Heavy-Proving cluster; world-class ecosystem in First-Proving (300+ AI firms, over 70% share, in the Dongsheng core); AI-enabled scenarios on the east wing; a vibrant AI city in Go-Live; AI-governance voice in the proving regime itself — an exportable public product of urban AI governance
- Identity direction (not final; rights clearance required): the herringbone alignment converges into a check mark — 'after the climb comes the pass'; the tricolor semantics mark live / proving / heritage states
- Eight global cases as a mechanism spectrum: Station F (flagship by private capital) / Kendall (inclusionary zoning) / one-north (tiered rents) / King's Cross (rail heritage grows an AI cluster) / Pangyo (land for commitments) / Hetao (data-flow pilot) / Toronto Quayside (trust-collapse caution) / Kashiwa-no-ha (tri-party governance) — each annotated with transferable mechanisms and non-transferable premises

Four proving steps (scenario lifecycle)

One Spine, Two Bands · 21 Exact Parcels

- Greenway spine at centre; research-education west band takes campus spillover; commercial-residential-reserved east band; business-culture south, flexible north
- MNR-guide codes; 21 parcels exactly partition the provisional boundary — no gaps or overlaps; shares recomputable from geometry and metrics.json

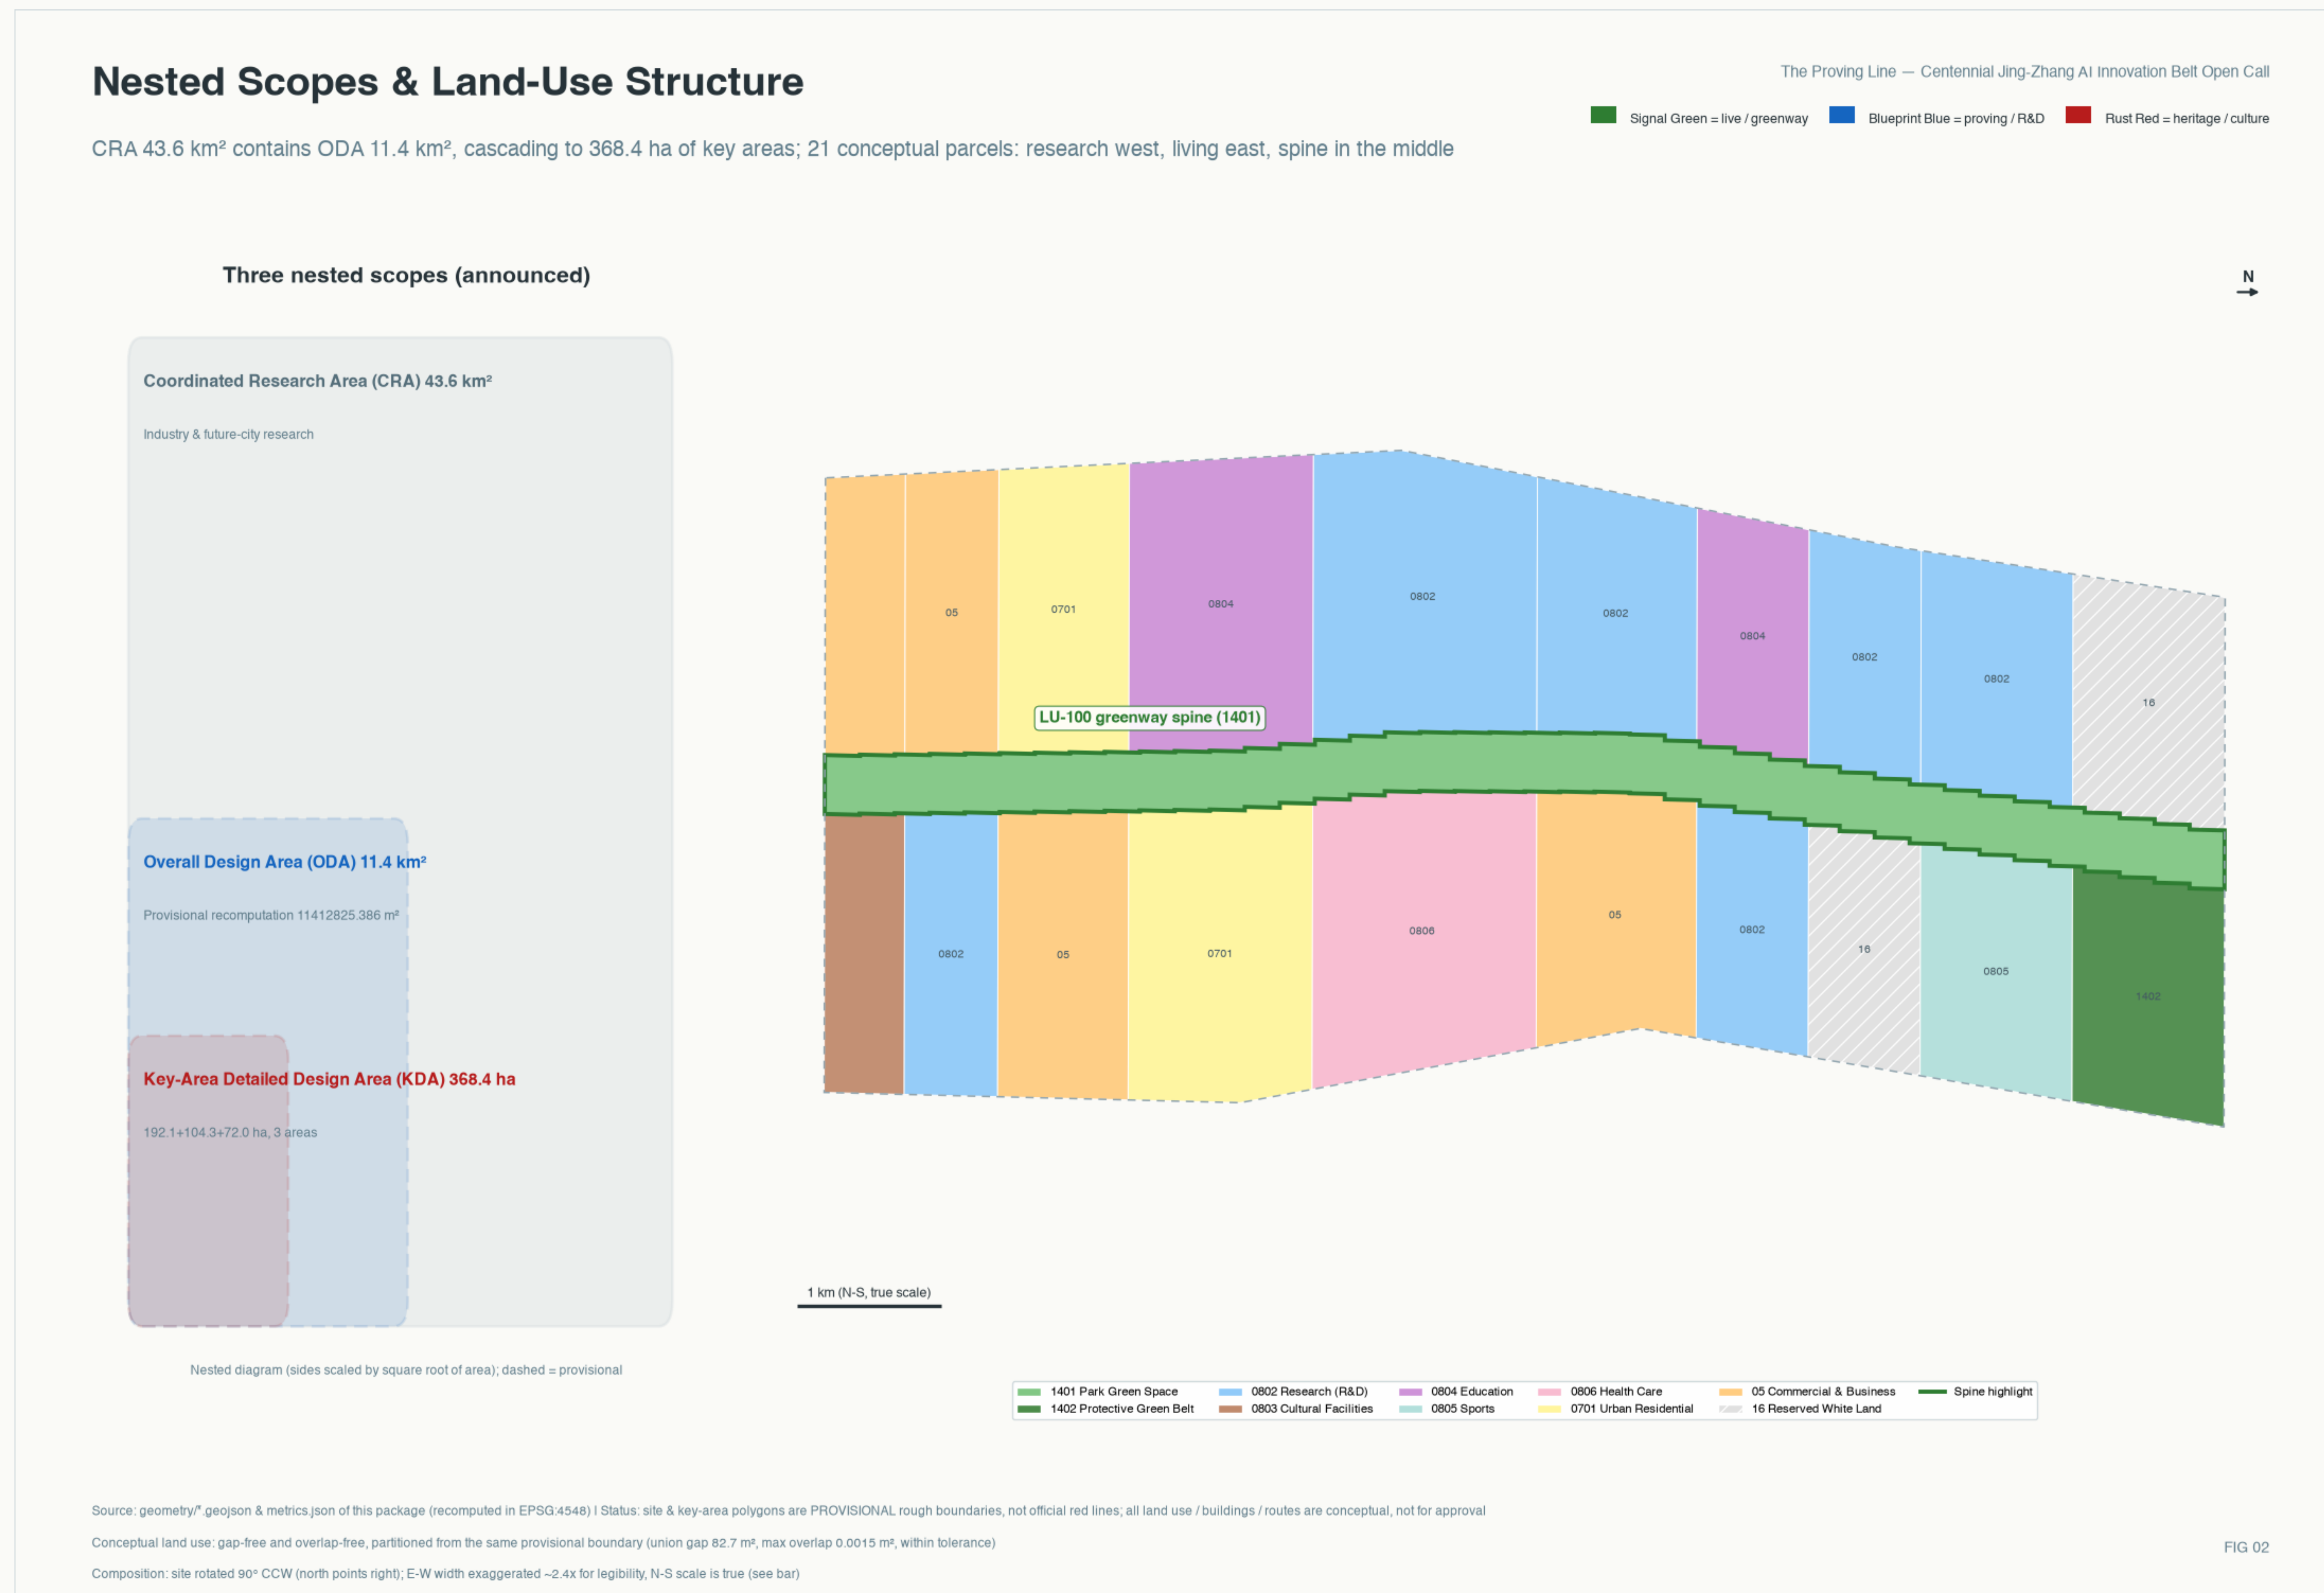

Retain-Renovate-Demolish & Renewal (conceptual)

- Retain: heritage assets (incl. Qinghuayuan Station), the completed park, sound research & housing stock
- Renovate: retail stock (Dazhongsi closing since 2025 → AI-native carrier), campus walls along the five corridors, aged office carriers
- Demolish: only professionally confirmed unsafe or inefficient stock — no target named; along the park, operations over construction

No official controls yet: FAR stays unknown; only formulas and assignment triggers are given — no invented numbers. Total floor area = retained + renewed + new; the 15 indicative footprints (58245.632 m2 combined) express layout intent only — any total before official data would be unverifiable pseudo-precision.

Supply strategy: after Kendall Square, study an inclusionary 'innovation space by ratio' tool for renewal projects (conceptual, to be studied).

Proved first, then opened, with rollback and retirement — the proving line before AI enters the real city (all content conceptual)

Rail & Station-City Integration

- Line 13 split advancing; Line 18 (Malianwa-Tiantongyuan East) in trial operation since 2025-12-27; Changping extension through since Dec 2024
- Reinforced connectors and TSI studies at Dazhongsi, Zhichunlu, Wudaokou; the Dazhongsi hub as the Go-Live gateway (no alignment or bridge/tunnel conclusions)

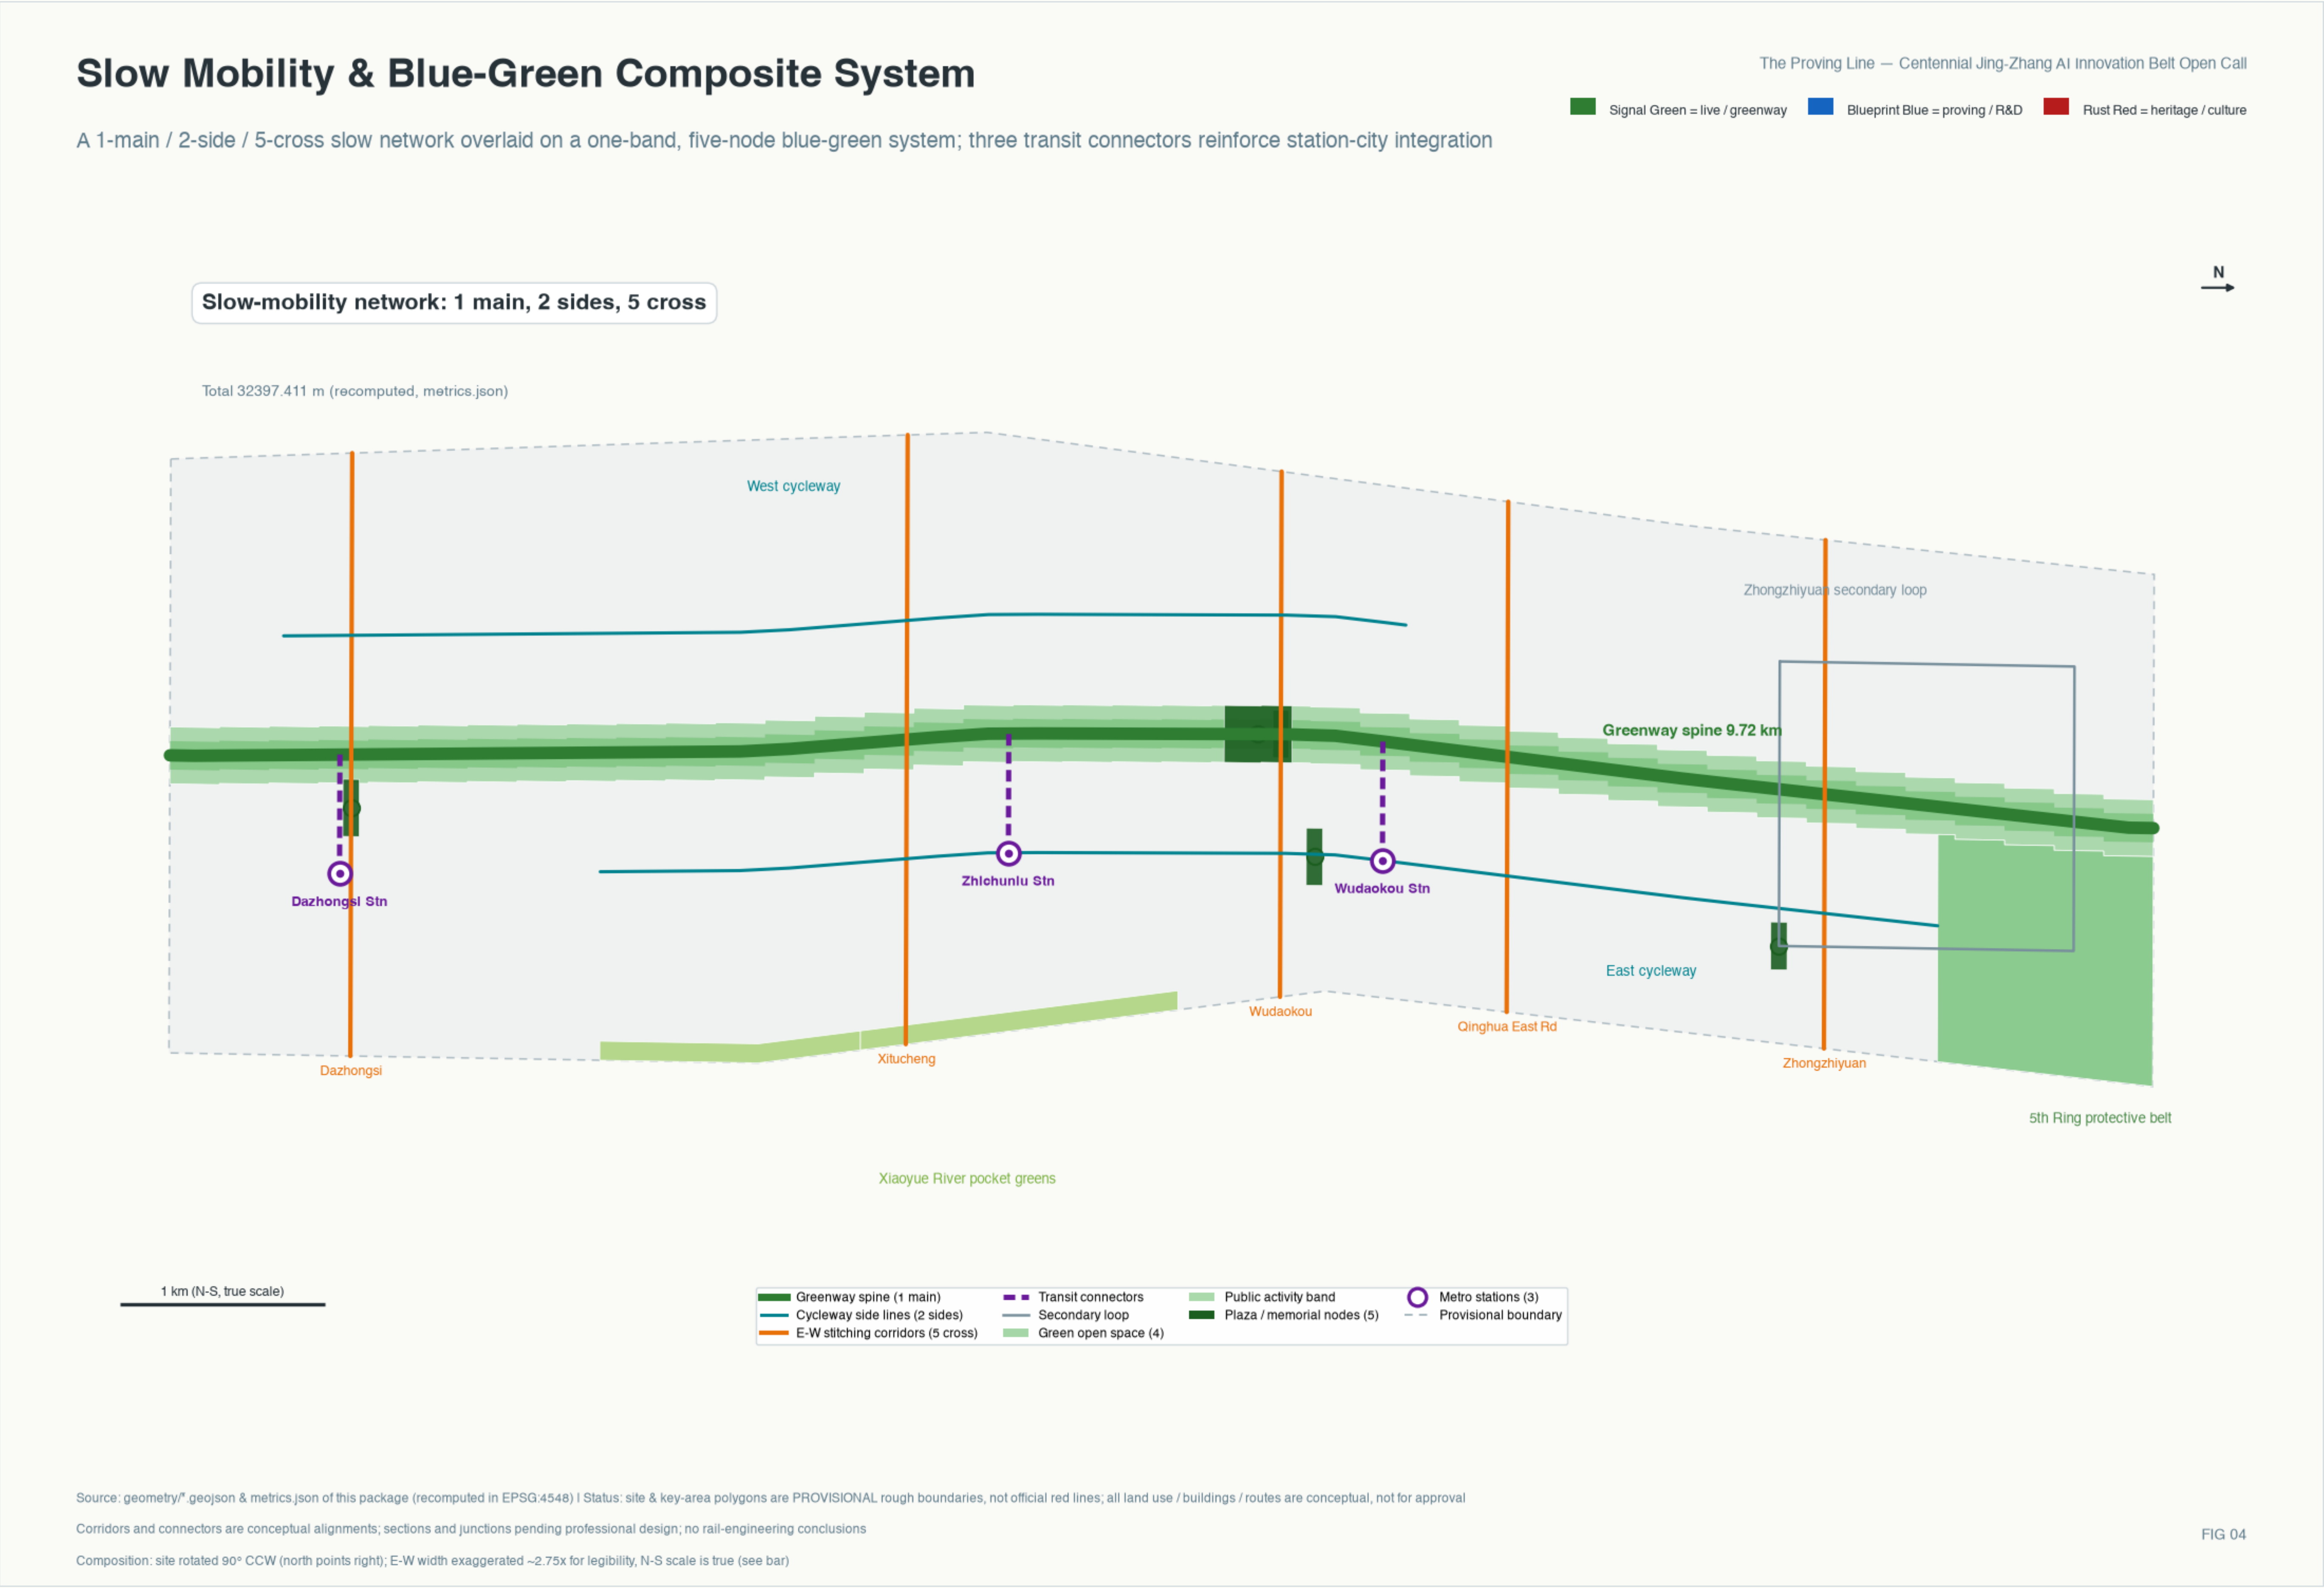

Slow Mobility: 1+2+5 · 32397.411 m

- Atop the completed three-path base: the spine, two cycle side lines, five stitching corridors — fixing rail and campus-wall crossings first; alignments conceptual
- Parking: transit-first; proving scenarios self-provisioned (in principle)
- Connectors, the secondary loop, the greenway spine and cycle side lines total 32397.411 m, recomputable from the layers

Municipal & New Infrastructure (conceptual)

- Edge-compute nodes and charging along the line; district micro-grid and compute co-dispatch pilots after Kashiwa-no-ha (background only); no utility or capacity conclusions
- Public services: health kiosks (Xueyuan Rd), youth third place (Wudaokou), plazas as community grounds; capacities pending (450,000 residents as the public-interest base)

Boundary discipline: all mobility content is a conceptual organization scheme without road engineering, section or junction conclusions; municipal content carries no relocation or capacity conclusions — professional calculation follows official baselines.

Proved first, then opened, with rollback and retirement — the proving line before AI enters the real city (all content conceptual)

Four AI Pilgrimage Landmarks (conceptual)

Zero-Km Marker

Qinghuayuan Station forecourt: century-old acceptance origin overlaps the AI go-live origin

Contributors' Honor Wall

Engraves proven schemes and their human & agent contributors, linked to this open call's memorial system

Go-Live Bell

Dazhongsi Go-Live Plaza: each proven scenario rings the bell, echoing Juesheng Temple's bell culture

Developers' Platform

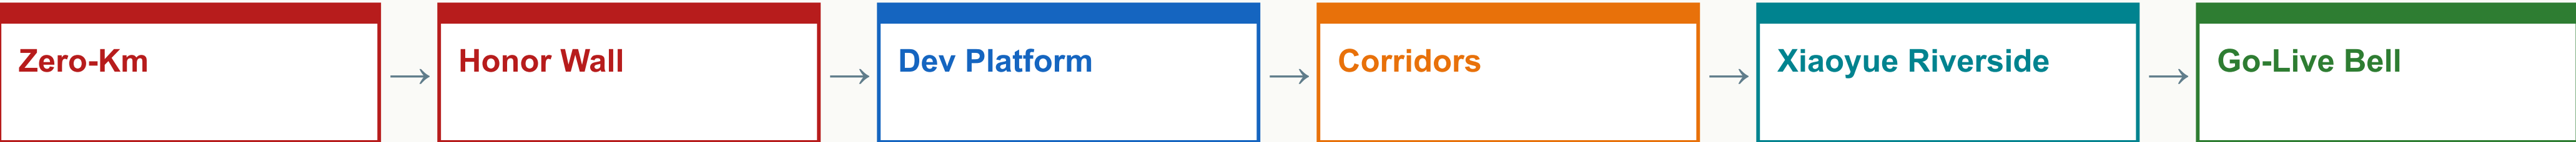

Wudaokou: youth gathering place shaped by platform & herringbone canopy imagery

Ten Standardized, Replicable Components

Proving milestone	Signal mast	Scenario status post	Privacy notice	Rail-spike bench
Rail planter	Station-sign wayfinding	Check-mark strip	Reserved-frame device	Mobile pod

Three honor tiers: wall (permanent) / milestone columns (annual) / digital twin (real-time); mileposts carry dual 1909 and 2026 scales; station wayfinding follows railway signboard form (a cultural layer kept separate from the belt logo system).

'Proving-Line Day' Visitor Route (with AI guide)

Blue-Green: One Spine, One Belt, Many Points

- The greenway spine; the 5th-Ring protective belt (N); two pocket belts along the Xiaoyue River (E); the river locked as-is — no water-side engineering
- Green & open space 1778616.443 m2 (ratio 0.155844, proposed); public space 628073.744 m2 (ratio 0.055032, union basis)
- One activity band plus five nodal plazas; Wudaokou and Dazhongsi are first-order stitches (station + plaza)

Public Space: One Band, Five Nodes

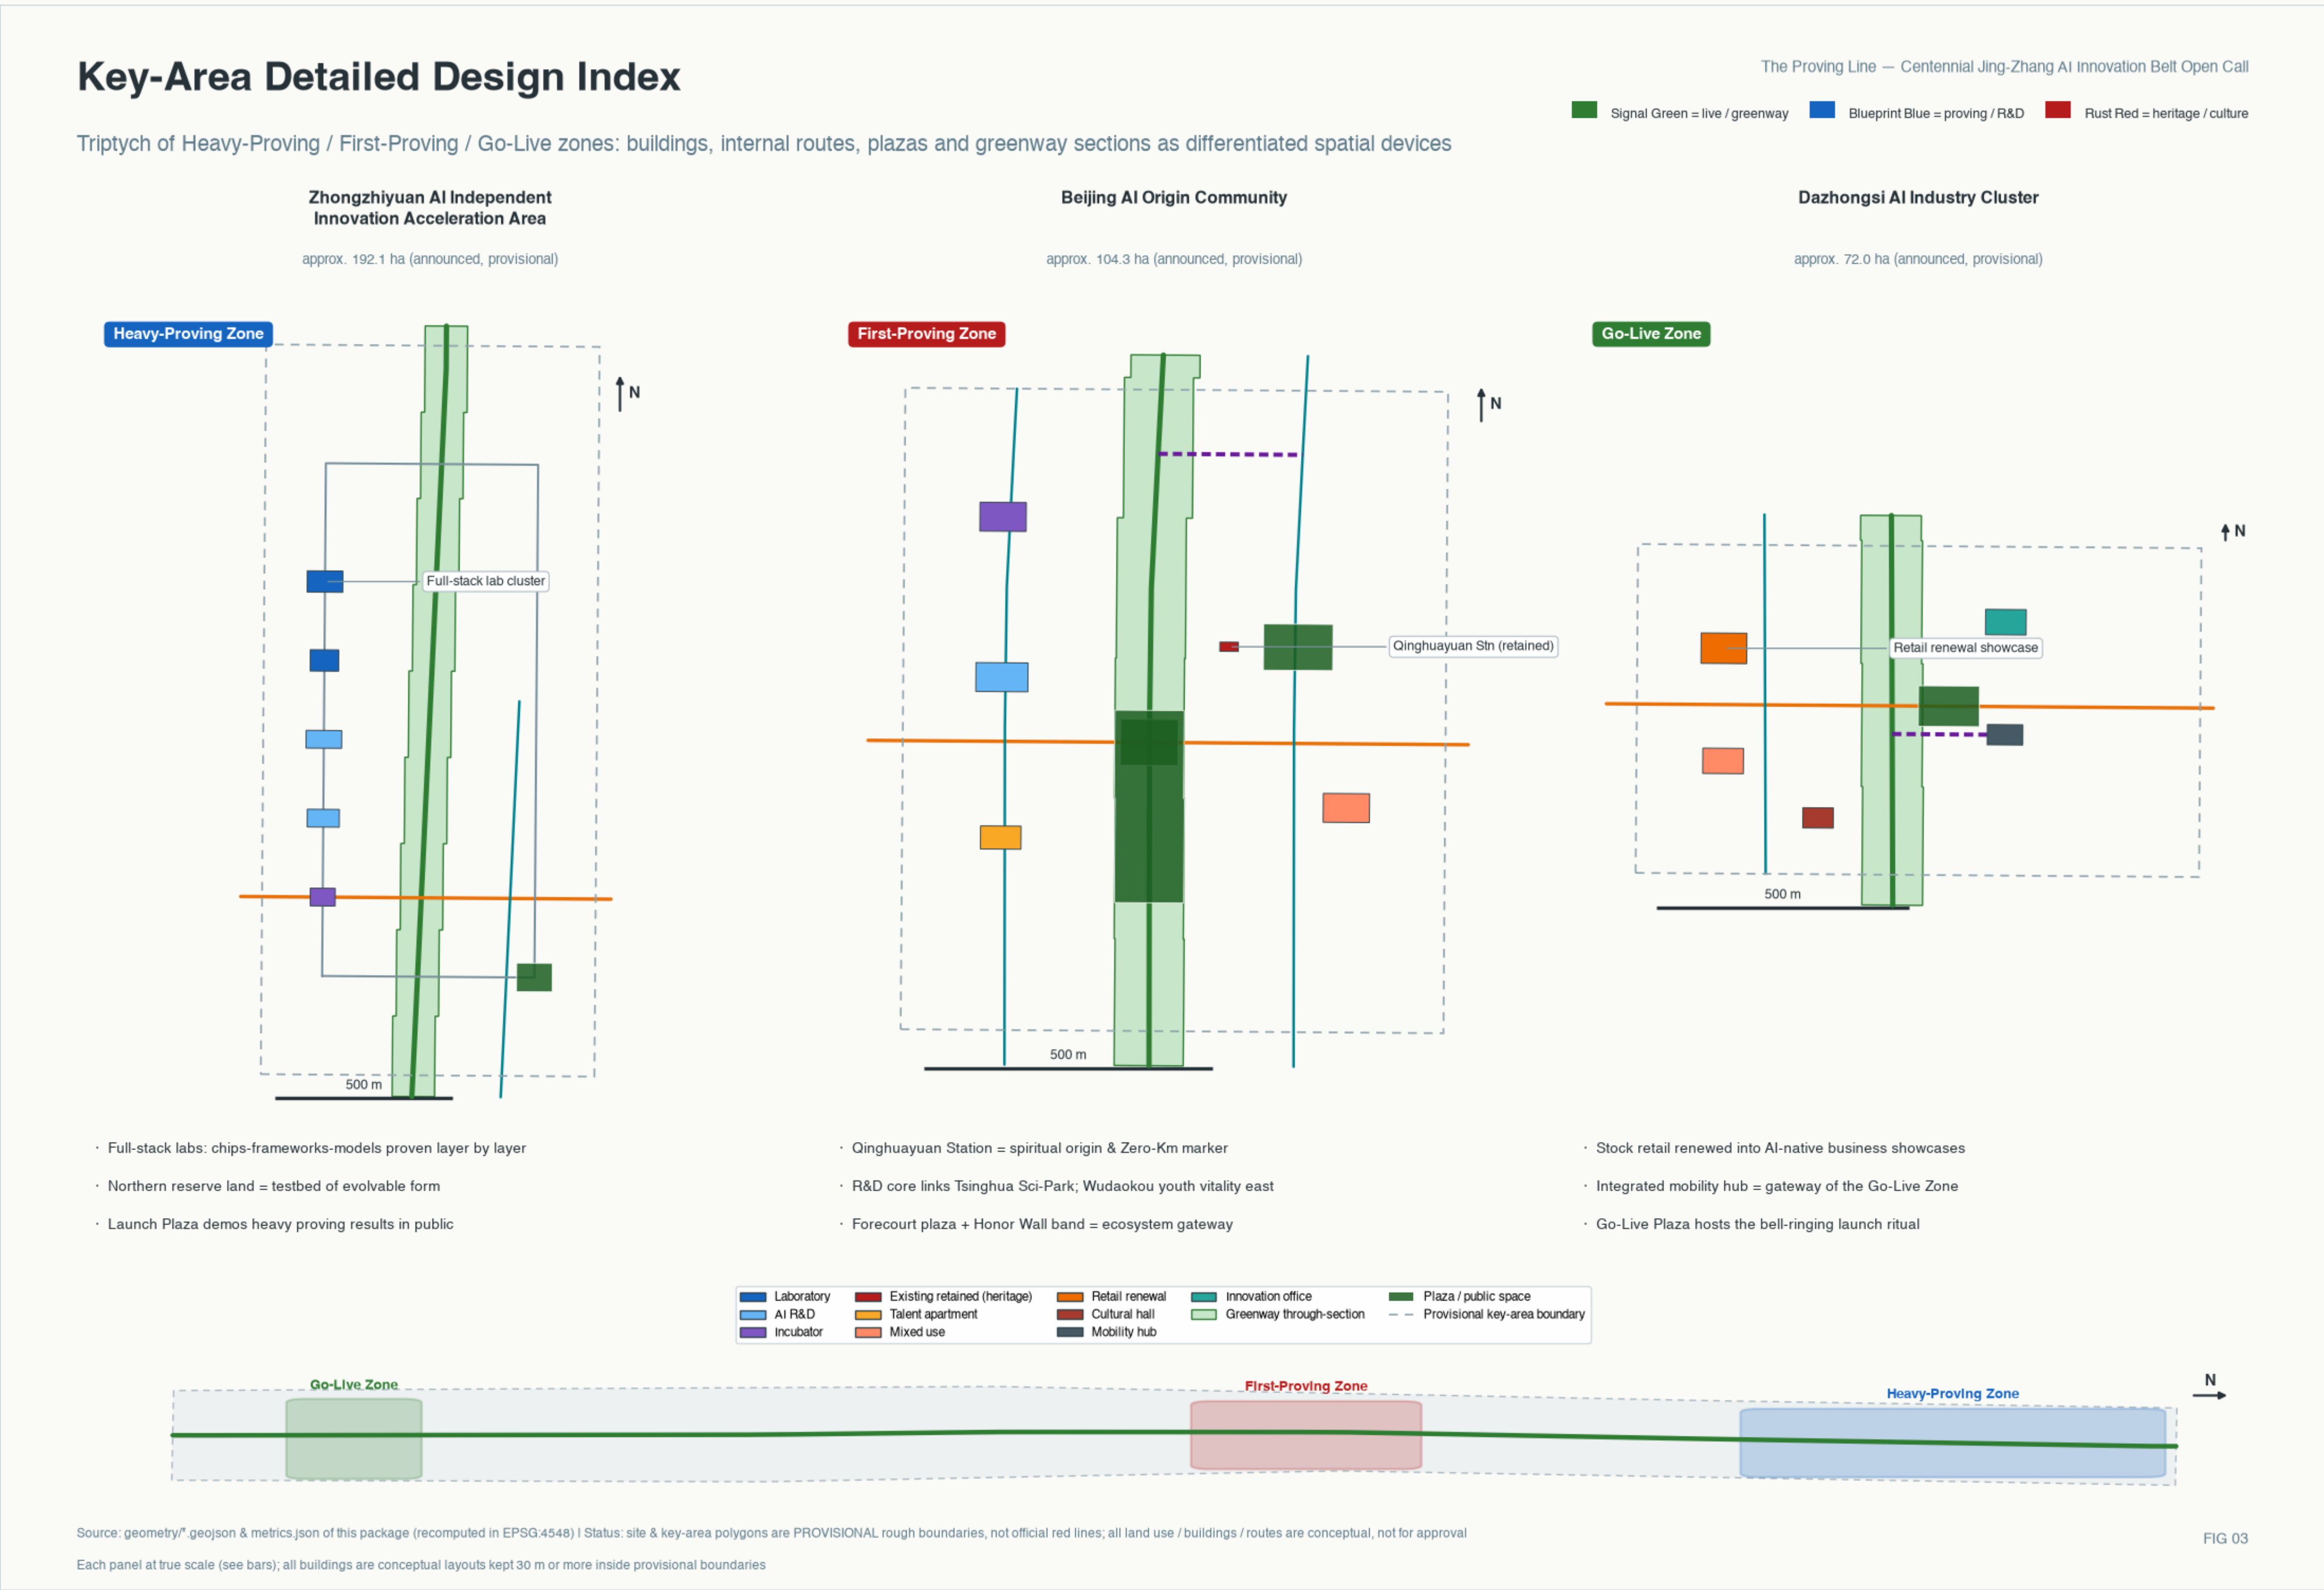

- Qinghuayuan Station forecourt — seat of the Zero-Km Marker
- Wudaokou Proving Plaza — Developers' Platform (youth third place)
- Dazhongsi Go-Live Plaza — the Bell and its go-live ceremony
- Zhongzhiyuan Launch Plaza — public demos of heavy proving results
- Honor-wall band — contributor attribution & open-call memorial

Cultural Narrative: Three Strata

- Centennial Jing-Zhang: China's first self-designed trunk railway (1905-1909, Zhan Tianyou); the herringbone alignment and acceptance regime are a dual legacy (the alignment itself lies in Changping-Yanqing as national heritage — honored by narrative, not occupation)
- Zhongguancun innovation culture: from Electronics Street to the AI highland, with campuses as living carriers
- The new AI culture of proof before opening — AI translated into services citizens can see, ask and stop
- International storyline: engineers earned respect through acceptance a century ago; global AI earns the city's trust through proof today — anchored by this very agent-driven open call
- Character keynote: a modest background city with a legible proving foreground; industrial-memory elements only at greenway nodes

Proved first, then opened, with rollback and retirement — the proving line before AI enters the real city (all content conceptual)

Each area forms a complete sub-scheme — positioning, structure, renewal, mobility, public space, AI scenarios, risks — all on provisional boundaries as directional detailed design (conceptual).

Proved first, then opened, with rollback and retirement — the proving line before AI enters the real city (all content conceptual)

Thirteen AI Scenario Cards (* = industrial testing & validation)

#	Scenario	Seat	Operator type	Red-card condition
1	* Low-speed robot delivery segment	South service lane + Dazhongsi corridor	Licensed logistics + sub-district oversight	Any collision, or 3 days of complaints over threshold -> pause
2	* Autonomous low-speed shuttle loop	Zhongzhiyuan secondary loop	District platform entity	Beyond safety-operator takeover -> stop
3	* AI health-service navigation kiosk	Xueyuan Rd health-service area	Community health institution	Any clinical misdirection -> offline & fix
4	* Urban-agent adversarial test field	Zhongzhiyuan full-stack lab zone	Professional evaluation body	Real personal data on site -> end batch
5	AI cultural guide	Qinghuayuan Station + full line	Park operator + heritage bodies	Verified factual error -> content offline
6	AI-assisted walkability assessment	Five corridors + Xiaoyue riverside	Transport institute + sub-district	Re-identifiable trajectories -> rectify
7	Enterprise-service copilot	First-Proving R&D core	Park service platform	Reply taken as admin promise -> rectify
8	Public-safety operations review	Temporary command during large events	Local administrative authority	Any automated disposition -> deactivate
9	Developers' Platform (3rd place)	Wudaokou Proving Plaza	Social operator	Encroach public hours -> rectify
10	AI-native retail demonstration	Dazhongsi renewed retail carrier	Commercial operator	Forced biometrics / no cash -> rectify
11	Honor wall & contributor memorial	Honor-wall memorial band	Belt operating agency	Unauthorized attribution -> remove
12	Digital-twin public display	Three proving-district plazas	Belt agency + district platform co.	Data stale > 2 weeks -> offline
13	AI expo & proving-showcase hall (AI-native business)	Dazhongsi east renewal carrier	Commercial operator + belt agency (admin-committee liaison)	False publicity or unauthorized data display -> rectify

Uniform privacy floor: anonymous by default, minimal collection, public-sector data governance, accountable human review — the one-vote veto distilled from Toronto Quayside's failure

Industrial testing: cards 1-4

Closed to semi-open, in the Heavy-Proving zone & service lanes

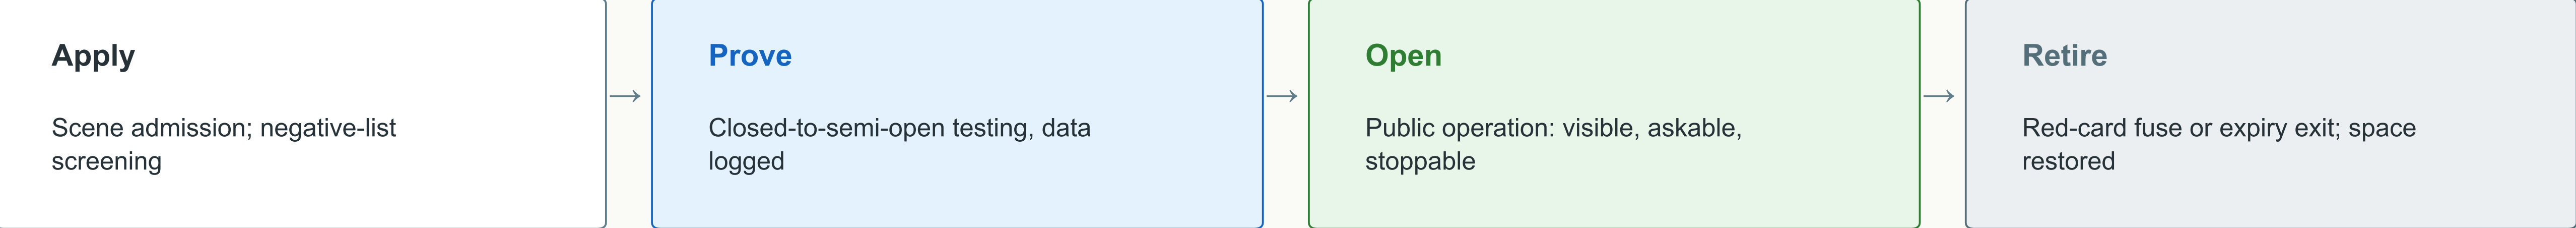

Public-service augmentation: cards 5-7

Along the line, the corridors and the east wing

Public space & operations: cards 8-13

Anchored to plazas, honor band and Go-Live carriers

The Four-Step Proving Rule (standing)

Renewal Projects & Conceptual Phasing (13)

- Near term 2026-2027 (Phase 1): (1) operations hub & digital-twin display (2) station forecourt & Zero-Km Marker (3) Wudaokou plaza & Developers' Platform (4) honor-wall band I (5) corridor demo sections (Wudaokou, Qinghua East Rd)
- Mid term 2027-2029 (Phase 2): (6) Dazhongsi renewal carrier (7) Go-Live Plaza & Bell (8) station hub study & delivery (9) southern corridors (Dazhongsi, Xitucheng) (13) Xiaoyue east-bank scenario belt phase I (east wing, sub-district-led suggestion)
- Long term 2029-2031 (Phase 3): (10) full-stack lab cluster (11) Launch Plaza & adversarial field (12) flexible start of the northern reserve

Policy Toolkit (all to-be-studied)

- Innovation-space inclusion: renewal projects reserve low-cost proving space by ratio (after Kendall zoning; to be studied)
- Tiered SOE rents: proving-period scenarios pay industrial-grade rents (after one-north; to be studied)
- Challenge-posting: industry posts real proving needs, global teams take the challenge (after Hetao)
- Standing tri-party platform: a Proving Line Urban Design Center for government, universities and operators (after Kashiwa-no-ha)
- Private capital operates flagship carriers (after Station F)

Annual Programme

- Spring · Line-Entry Day: proving applications open
- Summer · Go-Live Festival: bell ceremony & public open week at Dazhongsi
- Autumn · Global Agent Urban-Design Open: annualized continuation of this call (conceptual)
- Winter · Proving Review: public replay of the year's operating data

Long-term operations: open-source style collaboration — proving records, review comments and operating data all logged and queryable, contributions credited to the honor system; a 'Proving-Line Day' route (Zero-Km — Honor Wall — Developers' Platform — corridors — Xiaoyue riverside — Go-Live Bell) with AI guides; the 'proved in Haidian, mass-produced in Yizhuang' division hypothesis (conceptual).

Proved first, then opened, with rollback and retirement — the proving line before AI enters the real city (all content conceptual)
