

Civic frontstage: three street-rooms and a seven-interface kit | Protocol backstage: AI City API + civic compact

43.6 km²

Coordinated Research Area

Official approximate figure; no submitted polygon

11.4 km²

Overall Design Area

Official approximate figure

11.413 km²

SITE-001 calculation

Provisional rough boundary; EPSG:4548

THE RETURN TICKET | CIVIC FRONTSTAGE + PROTOCOL BACKSTAGE

01

AI may enter the city only when verifiable capability returns to the city

Provisional overall design extent

TICKET-ISSUING ROOM / BUILD

Capability Contract Court: visible testing + human stop
Return open methods + failure evidence

TICKET-CHECKING ROOM / TEST

Station Zero: staffed window, no-AI route + appeal
Return access repair + rule improvement

RETURN ROOM / LIVE

Commons Ledger: visible migration, maintenance + retirement
Return maintenance capacity + community service

Map preserves submitted GeoJSON proportions. Street-rooms and journeys are district-level concept indexes; red dash is provisional.

1 km

ONE DEPLOYMENT, ONE RETURN TICKET

Before entering BUILD / TEST / LIVE, each AI service registers its civic interfaces and return commitment; outcomes feed LEARN / UPDATE.

FIVE VERIFIABLE RETURNS

- Access repair
- Open method
- Maintenance capacity
- Failure evidence
- Community service

SEVEN-INTERFACE STREET KIT: RIGHTS MADE TANGIBLE

- AI identity plaque
- Data receipt
- Capability-limit marker
- Staffed window / no-AI route
- Appeal portal
- Portability token
- Version / retirement plate

SEVEN-INTERFACE STREET KIT

PROVISIONAL DESIGN BOUNDARY · DESIGN METRICS · NOT STATUTORY / V0.6

Generated locally from geometry/*.geojson + metrics.json; no external basemap or web imagery.

1909

Independent engineering capability into geography

The railway is more than a track metaphor: it localized a global technical system as domestic engineering capability.

2026

Every AI service enters with a Return Ticket

Seven interfaces disclose rights; five returns bring access repair, methods, maintenance, failure evidence or community service back.

DIFFERENCE

Frontstage street-rooms + backstage protocol

Not another City OS slogan: rights become street components, people complete journeys and returns enter a public version record.

The Return Ticket is the public narrative and the Jing-Zhang Protocol its concept governance backstage; neither is law, an official platform, approval or an existing deployment.

3 x 4 PROTOCOL FIELD: BACKSTAGE TOPOLOGY SUPPORTS FRONTSTAGE ROOMS

Twelve closed function cells, three protocol street-rooms, three people journeys and three dependency packages

3x4 PROTOCOL FIELD | BACKSTAGE TOPOLOGY + FRONTSTAGE STREET-ROOMS

02

Twelve shared-edge cells host BUILD—TEST—LIVE; three street-rooms make governance tangible

CONCEPT LAND USE + THREE PROTOCOL STREET-ROOMS

DESIGN LAND-USE COMPOSITION

TOPOLOGY QUALITY

All cells are design proposals, not statutory land use, parcel boundaries, or development controls.

PROVISIONAL DESIGN BOUNDARY · DESIGN METRICS · NOT STATUTORY / V0.6

Generated locally from geometry/land_use.geojson + geometry/site_boundary.geojson + metrics.json; no external basemap or web imagery.

THREE PEOPLE JOURNEYS | HOW RIGHTS MOVE THROUGH REAL SERVICE CHAINS

04

A wheelchair user, shopkeeper and maintainer jointly test all seven interfaces; dashed links show narrative sequence only

CONCEPT NETWORK + PEOPLE JOURNEYS

Journey links are narrative sequences, not roads, accessible routes or engineering alignments. Real routes await road, station and accessibility surveys.

THREE FRONTSTAGE JOURNEYS

PROVISIONAL DESIGN BOUNDARY · DESIGN METRICS · NOT STATUTORY / V0.6

Generated locally from geometry/roads.geojson + green_space.geojson + public_space.geojson + metrics.json; no external basemap or web imagery.

THREE EVIDENCE-GATED PACKAGES

P1 / P2 / P3 express first-intervention and dependency order, not fixed years, investment or construction commitments.

METRICS + EVIDENCE | FROM PROVISIONAL GEOMETRY TO VERIFIABLE RETURN TICKETS

05

The planning base and V0.6 civic mechanisms share sources, formulas, confidence and scope limits

PROVISIONAL DESIGN BOUNDARY · DESIGN METRICS · NOT STATUTORY / V0.6

Generated locally from metrics.json + referenced GeoJSON source_files; no external basemap or web imagery.

PENDING OFFICIAL EVIDENCE

Total floor area, FAR, statutory building coverage, height, setbacks, road area/ratio; verified road, rail, water, ownership, buildings, heritage, utilities and fire evidence.

The seven-interface kit keeps one rights contract; twelve applications bind human review, fallback, appeal and civic return

THREE PROTOCOL STREET-ROOMS | THE SEVEN INTERFACES MADE TANGIBLE

One public frontstage per key area; maps are district-level concept indexes and sections are reusable prototypes

03

Colour: proposed land use | White blocks: concept buildings | Amber dots: AI scenarios | Dash: provisional key area

Exact extents, ownership, building scale, heritage interface and engineering feasibility await official evidence.

PROVISIONAL DESIGN BOUNDARY · DESIGN METRICS · NOT STATUTORY / V0.6

Generated locally from geometry/key_areas.geojson + design layers + metrics.json; no external basemap or web imagery.

PROTOCOL TICKET-ISSUING ROOM / CAPABILITY CONTRACT COURT

BUILD

Observation walk; human-stop desk; failure-return cabinet.
The public sees test limits; operators return open methods and failure evidence.

S01 S02 S10

PROTOCOL TICKET-CHECKING ROOM / STATION ZERO

TEST

No-AI route; staffed window; appeal desk.
People understand, refuse and contest; services return access repair and rule improvement.

S03 S04 S05 S07 > S08

PROTOCOL RETURN ROOM / COMMONS LEDGER

LIVE

Version wall; migration desk; retirement plate.
Consumers identify alternatives; operators return maintenance capacity and community service.

S09 S11 S12

12/12 application scenarios have spatial and package hosts | 12/12 have human review, non-AI fallback and civic returns | 3 validations | 3 people journeys

S01 Model and Agent Safety Sandbox

VALIDATION

BUILD / TEST | Zhongzhiyuan

Red-team, audit and human stop rules; a pass is not regulatory approval.

S02 Embodied AI Street Lab

VALIDATION

BUILD / TEST | Bounded test yard

Geofencing, on-site steward, incident logs and emergency stop.

S03 Urban Multimodal Evaluation Lab

VALIDATION

TEST | AI Origin

Co-evaluate bias, accessibility and failure modes in a public evaluation card.

S04 AI City API Gateway

TEST / LEARN | Civic interfaces

Register purpose, capability, human review, appeal, rollback and version.

S05 Public-Service Navigation Copilot

TEST / LIVE | Service points

Navigation only; retain staffed and non-digital service routes.

S06 Inclusive Mobility Copilot

TEST / LIVE | Park and station links

Minimize sensing; no commercial profiling of residents.

S07 Learning and Career Studio

TEST / LIVE | AI Origin

Explainable matching; no automated admission or employment eligibility.

S08 Health-Service Wayfinding Assistant

TEST / LIVE | Community and mobility nodes

No autonomous diagnosis; escalate high-risk cases to professionals.

S09 Jing-Zhang Living Heritage Trail

LIVE / LEARN | Railway heritage spine

Sourced interpretation, multilingual access and public correction.

S10 Low-Carbon Compute and Energy Observatory

BUILD / LEARN | Zhongzhiyuan

Publish measured indicators and uncertainty; no invented capacity or savings.

S11 AI-Native Commerce and Creative Market

LIVE | Dazhongsi

Disclose generated content and provenance; retain human service and rights clearance.

S12 Civic Deliberation and Evidence Observatory

LEARN / UPDATE | Public forums

Publish evidence, incidents, appeals and versions; support pause or retirement.
