Sections show relationships, not invented dimensions. The continuous non-AI/accessibility-intent path is never occupied by events; reversible components must exit and await future restoration acceptance.

ORDINARY—PROOF—FAILURE—RECOVERY

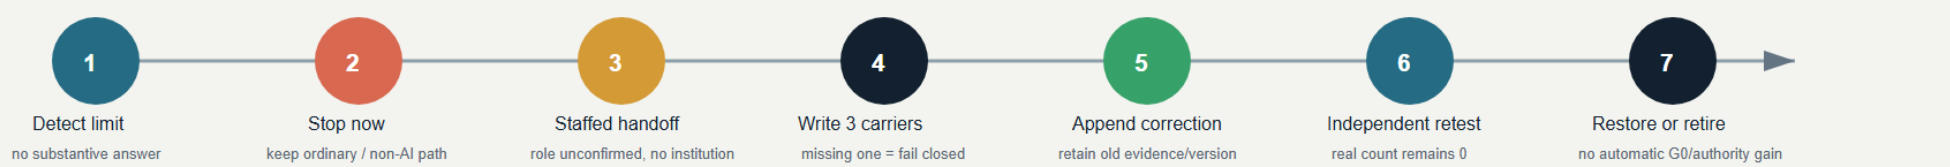

ANTIFRAGILE FAILURE GOVERNANCE | THREE-CARRIER WRITEBACK

Existing JZ-AIOS contract · G0 concept only · NOT TO SCALE · not a real incident, field recovery, or deployment licence

01 | Classify failure before choosing stop intensity

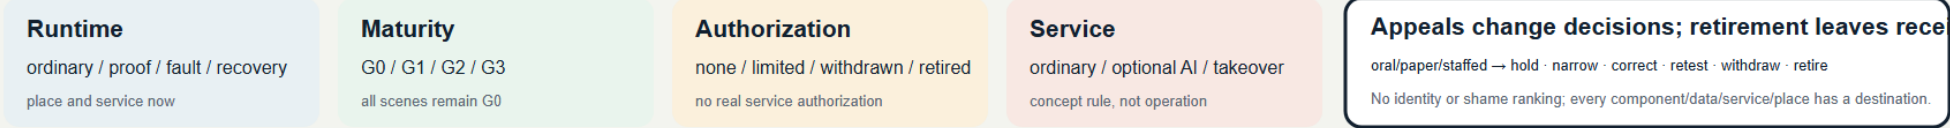

02 | Failure—stop—recover—retest storyboard (synthetic T-02 stale-source example)

03 | One state event, three atomic writebacks

04 | Four separate axes + appeals + active retirement

PERMANENT AUTHORIZATION BOUNDARY | A file check, synthetic replay, machine PASS, retest, or restoration acceptance applies only to its named object and scope.
It authorizes no trial, procurement, construction, deployment, maturity gain, site/professional approval, rights clearance, or real-world outcome claim.

Physical stop precedes interface reassurance.
The ordinary route continues while proof exits;
recovery restores ordinary service first, then
waits for evidence gates and professional
judgement.

YEAR-ROUND ORDINARY USE AND NO-EVENT DAYS

Long-term civic operations: ordinary life stays continuous

Ordinary days first | four conditional seasons | one task through day / night / failure / recovery

G0 · concept calendar · provisional boundary
events 0 · shifts 0 · budgets 0 · partners 0 · results unknown
Not an operating, procurement, works or deployment approval

Legend: green solid=ordinary base | blue dash=conditional validation/expansion | red dot=stop/retire | hatch=quiet/no-event | unknown≠0; 0≠complete
Ten-round audit: Twin-track unchanged · three prototypes not interchangeable · 12 scenes/8 projects/3 areas unchanged · geometry unchanged · all G0/provisional/not_fully_cleared

No-event days are the public-value baseline, not empty slots. Problem, Open-source, City Beta and Proof seasons remain unscheduled and unauthorized.

CULTURAL TIMELINE AND EVIDENCE LEVELS

A Twin-track atlas | railway chronology × AI gates (teaching comparison, not equivalence)

Railway chronology track | historical ticks, each with a source grade

The teaching parallel is limited to verifiable inputs, gated stops and persistent records.
It does not claim equal risk or regulatory treatment; see the in-package G0 contract.

AI lifecycle track | train–validate–fail–correct–retire against JZ-AIOS gates

B Source-grade table | typed evidence anchors

C Dispute-correction flow | five steps + screen-free node chain

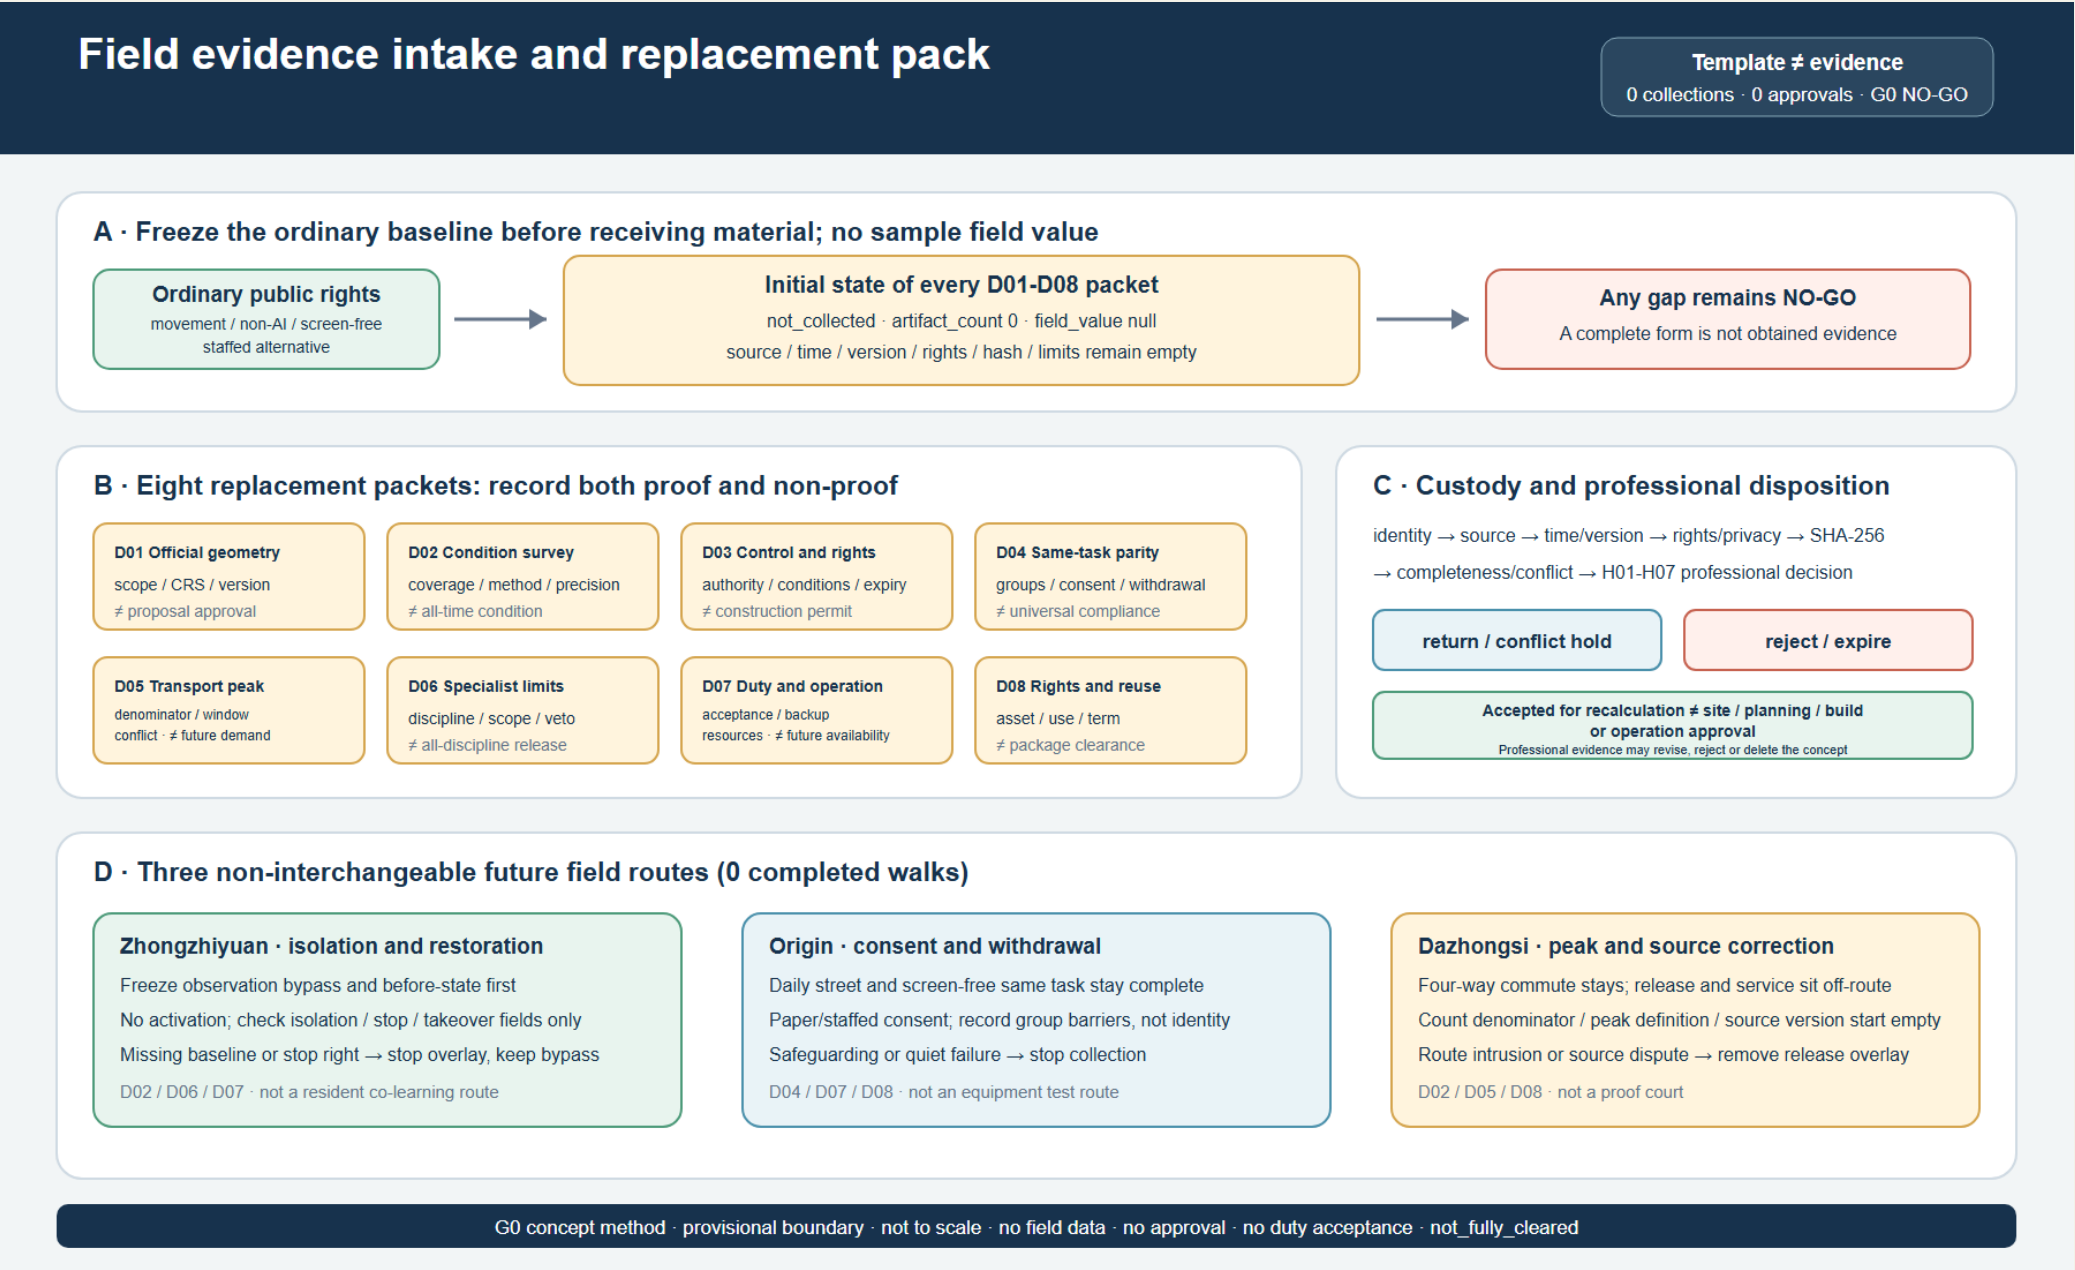

Ordinary–verify–failure–recovery | provisional · conceptual · not-as-built | in-package + archive-pending sources | all scenes G0; no approval, field or operation claim

Heritage narrative separates fact, interpretation, public memory and future hypothesis; unverified content cannot gain maturity through visual authority.

METRICS EVIDENCE AND ZERO STATE

05 / EVIDENCE MATURITY

Move from field coverage to evidence maturity

Blue and green cards are auditable document states. Orange zeros are real-world evidence that does not yet exist.

EVIDENCE LADDER - ONLY THE G0 CONTRACT LAYER EXISTS

BOUNDARY / Coverage proves that a test can be inspected before it starts. It proves no approval, operator, participant, benefit, or safety performance.

Document coverage is separated from real completion: twelve structured nodes are auditable; field collection, GO, approval, failure, recovery and rights clearance remain 0.

References, Evidence Backlinks and Reality Boundary

Review metadata	3 review tracks / 6 official scenario families / 12 structured scene nodes (10 service scenes + 2 governance nodes). Metadata compression deletes, rennumbers and advances no scene.
Core backlinks	proposal.en.md · assumptions.json · compliance_matrix.json · visual/assets/jury-motion-journey.json · visual/assets/readiness-closure-contract.json · visual/assets/implementation-handoff-matrix.json
Geometry and maturity	Key areas and boundaries are provisional diagrams, not an official redline, survey, control plan, title or approval. Every scene remains G0; field results, GO, approval, real failures and recovery acceptance are 0.
Rights and responsibility	Overall rights remain not_fully_cleared. Staffing, rosters, budget, noise, lighting, footfall, partners and operating results remain unknown or 0. Professionals may revise, reject, stop or delete.
Jury conclusion	Twin-Track Jing-Zhang is not a railway logo. The continuous civic track, intermittent proof track, three switchyards, failure siding and civic timetable organize ordinary-life priority and verifiable public innovation as one spatial grammar.
