B | THREE CURRENT FACTS: NO BLANK-SLATE ASSUMPTION

2026-07

Phase-2 support works completed; north section about 30.01 ha with a fishbone walking network

2026-08

Phase 2 opened and joined Phase 1 into about 9 km; this scheme shifts to interface operation

2026-08

Block-level plan approved: about 1,668.2 ha, nine blocks, one belt/axis, two centres and multiple nodes

PLAN RELATION | The approved block structure is statutory; one axis, three cores and two wings is only an industry-service operating overlay.

Z | 众智园

PROBLEM | Public walking/science edges may conflict with tests, loading and emergency routes

EVIDENCE | E3 field verification; no permanent works

ACTION | Count by time and map conflicts first; then use a closable test court and observation edge

FAILURE | Remove temporary works and restore the prior route/service; sunk cost never justifies expansion

O | AI原点

PROBLEM | Night co-creation, family support and residential quiet lack a shared field baseline

EVIDENCE | E3 field verification; no permanent works

ACTION | Interview and log time/noise first; then trial recoverable time-shared rooms

FAILURE | Remove temporary works and restore the prior route/service; sunk cost never justifies expansion

D | 大钟寺

PROBLEM | Transit, daily passage and launch/service flows may overlap

EVIDENCE | E3 field verification; no permanent works

ACTION | Verify exits, passage and egress first; then test open ground floors and booking

FAILURE | Remove temporary works and restore the prior route/service; sunk cost never justifies expansion

Public facts define background only; all three interface problems require field verification. Official drawings, rights, buildings and engineering inputs remain required.

MAP-A3

MASTER PLAN: ONE AXIS, THREE CORES, TWO WINGS, 15 PROJECTS

The heritage axis supports walking, ecology and memory; the cores form verification-incubation-first-order conversion.

Z | Trusted verification

Z1 shared lab; Z2 domestic compute adaptation; Z3 robot test ring; Z4 standards; Z5 public interface.

O | Community incubation

O1 open-source lounge; O2 founder residence; O3 night school; O4 family support; O5 co-creation hall.

D | First-order conversion

D1 scenario orders; D2 enterprise hall; D3 compliance clinic; D4 capital demo; D5 developer exchange.

Six east-west stitches

Prioritise transit, universities, parks, communities and river; dimensions await survey.

Three nested scopes

37 km² coordination fact → provisional design area → three focus areas.

Derived from the official three-zone/two-wing brief and provisional GeoJSON; not statutory planning or title boundary.

PROVISIONAL CONSTRAINT | CONCEPT PLAN | PROFESSIONAL VERIFICATION REQUIRE

X-01

ONE PERSON • THREE NODES • ONE DAY

A developer validates a real problem, forms a team, earns a first order and returns knowledge to the public district

DATA-DERIVED CONCEPT PENDING VERIFICATION

01 | ZHONGZHIYUAN

REAL PROBLEM → BOUNDED TEST

09:00 | Bring a named compatibility problem into a closable test court; a professional signs the safety boundary.

NO-AI | staffed booking + physical barrier + paper log

FAIL | stop, remove equipment and restore passage

02 | AI ORIGIN

TEST RECEIPT → PROJECT TEAM

14:00 | Publish a roadmap at the clinic, match collaborators and residency, residents co-review night use.

NO-AI | resident manager + paper board + offline night school

FAIL | end residency, publish review and restore shared use

03 | DAZHONGSI

TEAM → FIRST ORDER / PUBLIC RETURN

18:00 | Complete demand, test and buy receipts at the first-order desk; compliance staff release the case.

NO-AI | staffed desk + printed checklist + daily bypass

RETURN | open protocol, failure knowledge and affordable hours; no gate, no expansion

This is a concept service blueprint, not a real firm, order or outcome. Every node retains staffed service, anonymous passage and recovery.

D0/D1 | license review + human clinic

HUMAN SERVICES SCN-07-09

Minimum collection | independent exit

CONVERSION/GOV SCN-10-12

Read-only default | compliance + appeal

Triggers: privilege breach / drift / takeover failure / complaint cluster → downgrade, pause or exit
