Design Concept

This proposal takes the 1909 Jingzhang Railway — China's first self-designed trunk railway led by Zhan Tianyou — as its cultural origin, transforming the Heritage Park corridor into an urban spine "from self-reliant railway to self-reliant AI".

Three-Level Scope

Coordinated research 43.6 sq km; overall design 11.4 sq km; key area 368.4 ha. Boundary is provisional, not official redline.

Key Areas

Zhongzhiyuan AI Acceleration (192.1ha), Beijing AI Origin Community (104.3ha), Dazhongsi AI Cluster (72.0ha), linked by a composite spine.

Mobility & Blue-Green

Continuous green space, public activity interface, slow-mobility corridors and building footprints form a blue-green slow-mobility ring.

Note: metrics from provisional boundary, not official precise values

Key Metrics

Site area 1141.3 x10k sqm; building footprint 557,426 sqm; green ratio 0.1234; public ratio 0.0733; key areas 3. FAR pending.
