

Jingzhang New Era • Creative AI Time-Track • A3 Booklet

Conceptual design • provisional boundary for discussion only • content reviewable • recomputed after official geometry

1. Core claim

The Time-Track framework (timeline × tracks): horizontal axis is the century narrative (1909 herringbone line → 2026 co-track test line → 2049 human-machine civilization connector); vertical axis stacks three tracks (Track 3 AI tech/infrastructure • Track 2 culture/green ecology • Track 1 city collaboration/developer ecosystem); AI acts as the rendering engine coupling time and tracks into a 'Jingzhang-era masterwork'.

2. Exclusivity (limited claim)

No directly comparable city-scale testbed was found in the reviewed sample: retained rails along a real railway-heritage park open to shared-track testing of autonomous vehicles and robots, answering three dimensions at once (physical entity, machine-verifiable institution, investment in people).

3. Four-dimensional dynamics (time as the primary planning variable)

Industry (S-curve diffusion) / population (tidal rhythms) / economy (time-arbitrage value) / experience (time-sharing scripts) evolve over time.

4. Three scopes and spatial structure

43.6 km² / 11.4 km² / 368.4 ha; 'one rail, one axis, three cores, two wings, multiple corridors' — Zhongzhiyuan accelerator • Beijing AI Origin Community • Dazhongsi AI cluster, plus the Zhongguancun services wing and Xiaoyuehe scenario wing.

5. Method: AI-augmented six-layer mapping

Digitizes and machine-checks methods from Lynch mind maps, Gehl public-life surveys, and Space Syntax into a recomputable research method.

6. Core metrics (EPSG:4548, page 8)

site_area = 11,412,825 m² • green_ratio = 0.228 • public_space_ratio = 0.0100
building_footprint (concept estimate) = 171,764 m² • density = 0.01505

Site Overview

京张0号AI试验场 · 总体总览 Site Overview

Three key areas + land use + rail spine
site_boundary + key_areas + land_use 分区 + 铁路主轴; provisional 边界仅作设计讨论

边界为 provisional 临时多边形，不构成官方红线

Land-Use Structure

Topography safe partition
三层范围与用地分区 Land-Use Structure
统筹研究 43.6km2 / 总体设计 11.4km2 / 重点区 368.4ha；用地分区全覆盖无缝隙

用地分区为设计建议（agent_generated_design），非审定控规

Key Areas

Zhongzhiyuan / Origin / Dazhongsi

三处重点区域详图 Key Areas (众智园 / AI原点社区 / 大钟寺)

交通慢行与蓝绿公共空间 Mobility & Blue-Green
Co-track slow lanes + connectors + park belt
共轨试验线慢行道 + 横向连接线 + 主轴绿带 + 公共空间节点

道路中心线为设计建议，非道路红线

指标复算与证据链 Metrics & Evidence

所有 known 指标在 EPSG:4548 下从 GeoJSON 复算；unknown 指标标待正式数据

数值见 metrics.json；人本指标组(4项)为 design_target 待运营数据校准

Core metrics

Core metrics (EPSG:4548 recompute • single source metrics.json)

site_area_sqm = 11,412,825 m²
land_use distribution (full coverage, no gaps):
park green 1401: 2,489,748 m² (22%)
research 0802: 2,411,197 m² (21%)
residential 0701: 4,361,189 m² (38%)
business 0902: 1,075,112 m² (9%)
commercial 0901: 560,706 m² (5%)
education 0804: 514,890 m² (5%)

green_ratio = 0.228126
public_space_ratio = 0.009973
building_footprint (concept estimate from ~36m POI squares, not survey) = 171,764 m²
building_density = 0.015050
key_area_count = 3

Human-centric indicator group (4, design_target): employment transition rate, skill uplift coverage, community service reach, public participation rate — to be calibrated by operational data.
Time indicator group (4, design_target): time_sharing_ratio, growth_rate, tidal_amplitude, innovation_diffusion_stage.

Compliance

Compliance and self-check

compliance_matrix.json: announcement 1.3/1.4/1.5 + agent.1~agent.6
standard_matrix.json: 6 standards (announcement, taskbook, urban design measures, control detailed planning, land-use classification, architecture depth)
design_depth_matrix.json: 15 depth items

self-check 4 gates: deterministic validation / spatial review / visual packaging / professional evidence (all PASS)

Sources & rights: 17 registrations in sources.json (3 verified policy URLs + 6 asset rights entries + Noto Sans SC under SIL OFL); see report/copyright_statement.md

Boundary: provisional polygons (PROV-SITE-001 / PROV-KEY-001/002/003) for design discussion only; content is reviewable; all metrics recomputed after official geometry. Concept-model estimates (POI square buildings / 16m road buffers) are not survey or statutory basis.
