

Jing-Zhang CoMind Loop: Translating Lab Capability into Choice-Preserving Urban Services

01 / 07 Design proposition

AI capability becomes a public service only when people can understand it, choose it, question it and leave it.

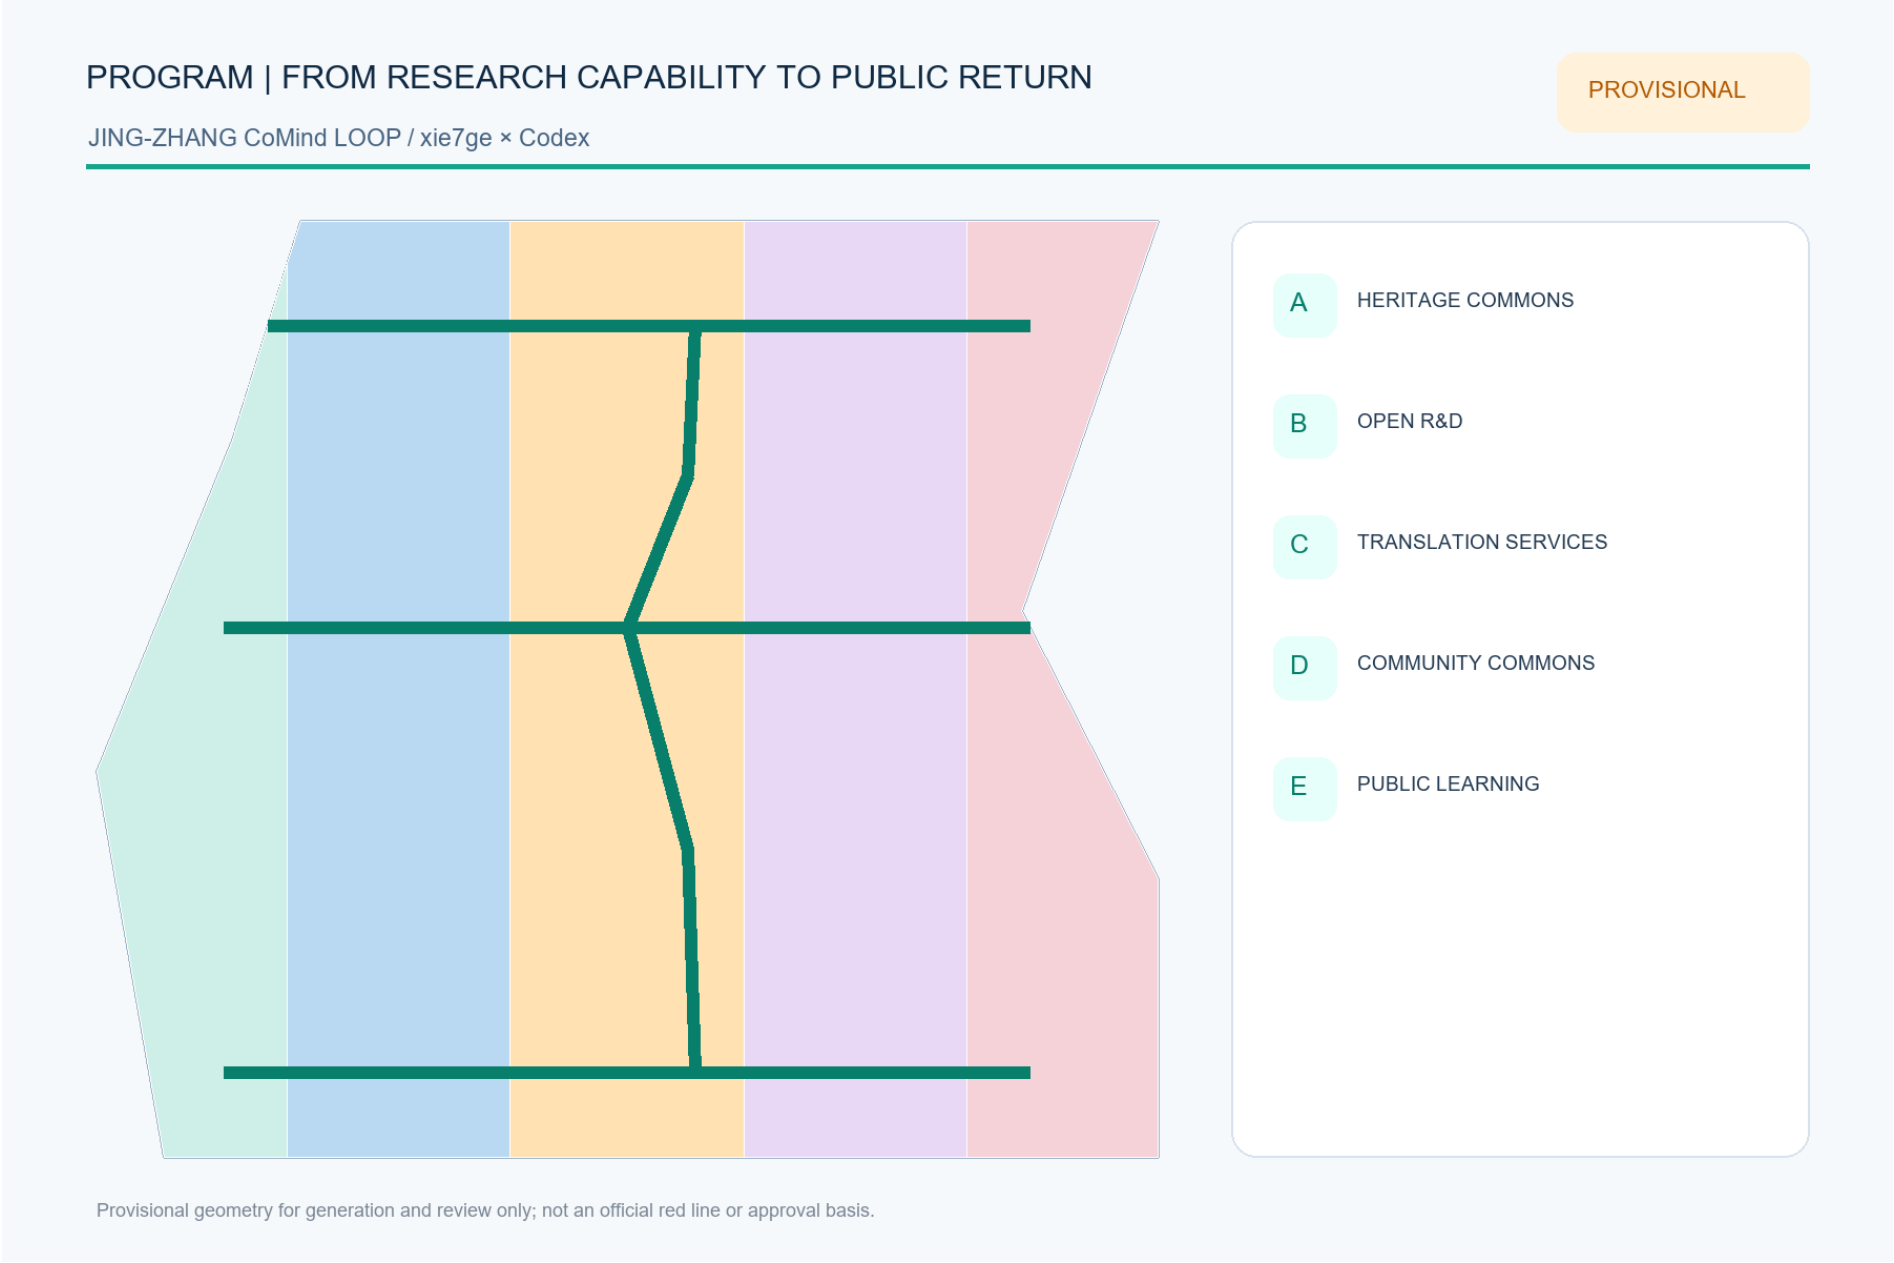

PROVISIONAL — not an official red line or approval basis

Jing-Zhang CoMind Loop: Translating Lab Capability into Choice-Preserving Urban Services

02 / 07 Three-level framework

One spine, three translation stations, two wings and twelve interfaces; provisional polygons remain low-contrast constraints.
