

COOLING COMMONS: ONE SPINE, THREE HUBS, TWELVE REFUGES

The heritage rail park becomes shared infrastructure for heat resilience, innovation, and care

DESIGN LOGIC

- One continuous cooling spine links three AI districts
- Shaded east-west crossings support daily mobility
- AI diagnoses aggregated patterns; people decide spatial action

KEY READINGS

11.41 km²

3 HUBS

12 REFUGES

Provisional geometry for concept generation and review only; not an official boundary.

FOUR SPATIAL FAMILIES: R&D, GREEN, SERVICE, COMMUNITY

A complete partition expresses climate-adaptive intent without inventing statutory controls

DESIGN LOGIC

- R&D districts gain cool corridors and shared test courts
- Green space provides shade, stormwater, and habitat
- Community services retain non-digital and human fallbacks

KEY READINGS

GREEN 12.3%

PUBLIC 7.3%

FAR PENDING

Provisional geometry for concept generation and review only; not an official boundary.

THREE HUBS: VALIDATE, TRANSLATE, ADOPT

The three key areas form a climate-innovation chain from technology to daily adoption

DESIGN LOGIC

- Zhongzhiyuan: climate algorithms and material validation
- AI Origin: open-tool translation and talent community
- Dazhongsi: public adoption and visible accountability

KEY READINGS

3 KEY AREAS

5 PERSONAS

12 SCENARIOS

Provisional geometry for concept generation and review only; not an official boundary.

COOL MOBILITY: SHADE + BLUE-GREEN SPONGE + HUMAN SERVICE

Design for thermal comfort and safe fallback without persistent facial tracking

DESIGN LOGIC

- The spine links park, transit, and public services
- Refuges provide water, rest, first aid, and human help
- Heat guidance uses public rules, can be disabled, and is appealable

KEY READINGS

12 COOL REFUGES

6 SHADE GATES

NO AUTOPLAY

Provisional geometry for concept generation and review only; not an official boundary.

EVIDENCE CHAIN: GEOMETRY - METRICS - SCENARIOS - REVIEW

Known areas come from submitted geometry; thermal-comfort targets remain pending field validation

DESIGN LOGIC

- Areas and ratios recomputed in EPSG:4548
- Recompute the whole package when official geometry arrives
- Evaluate scenarios with pilot baselines and human review

KEY READINGS

SITE 11.41 km²

GREEN 12.3%

PUBLIC 7.3%

Provisional geometry for concept generation and review only; not an official boundary.
