One Line • Park Track

Research	Park green (track)
Education	Key area (station)
Commercial	Overall design area (provisional boundary)
Residential	

Sources: provisional boundaries + agent-generated design geometry; areas recalculated in EPSG:4548. Spatial content is conceptual, not official.

Master concept: heritage-park belt = track, three key areas = stations, Zhongguancun/Xiaoyue River = signal/scenic line.

Three-Level Scope and Land-Use Structure

Research 43.6km² · Overall 11.4km² · Key areas 368.4ha

Three-Level Scope and Land-Use Structure

Three-Level Scope and Land-Use Structure

Detailed Design of Three Key Areas

Zhongzhiyuan · Departure / AI Origin · Platform / Dazhongsi · Hub

Detailed Design of Three Key Areas: Position + Structure + Scenario + Implementation

① Zhongzhiyuan · Departure Stn
Innovation Locomotive Depot

② AI Origin · Departure Platform
World First-Departure Stn

③ Dazhongsi · Transfer Hub
Smart Hub

Full-stack AI innovation
R&D + pilot + validation

World-class AI ecosystem
Qinghuayuan memorial

Native-smart new business
Station-city southern gateway

Each station develops position + structure + building + transport + public space + scenario + risk.

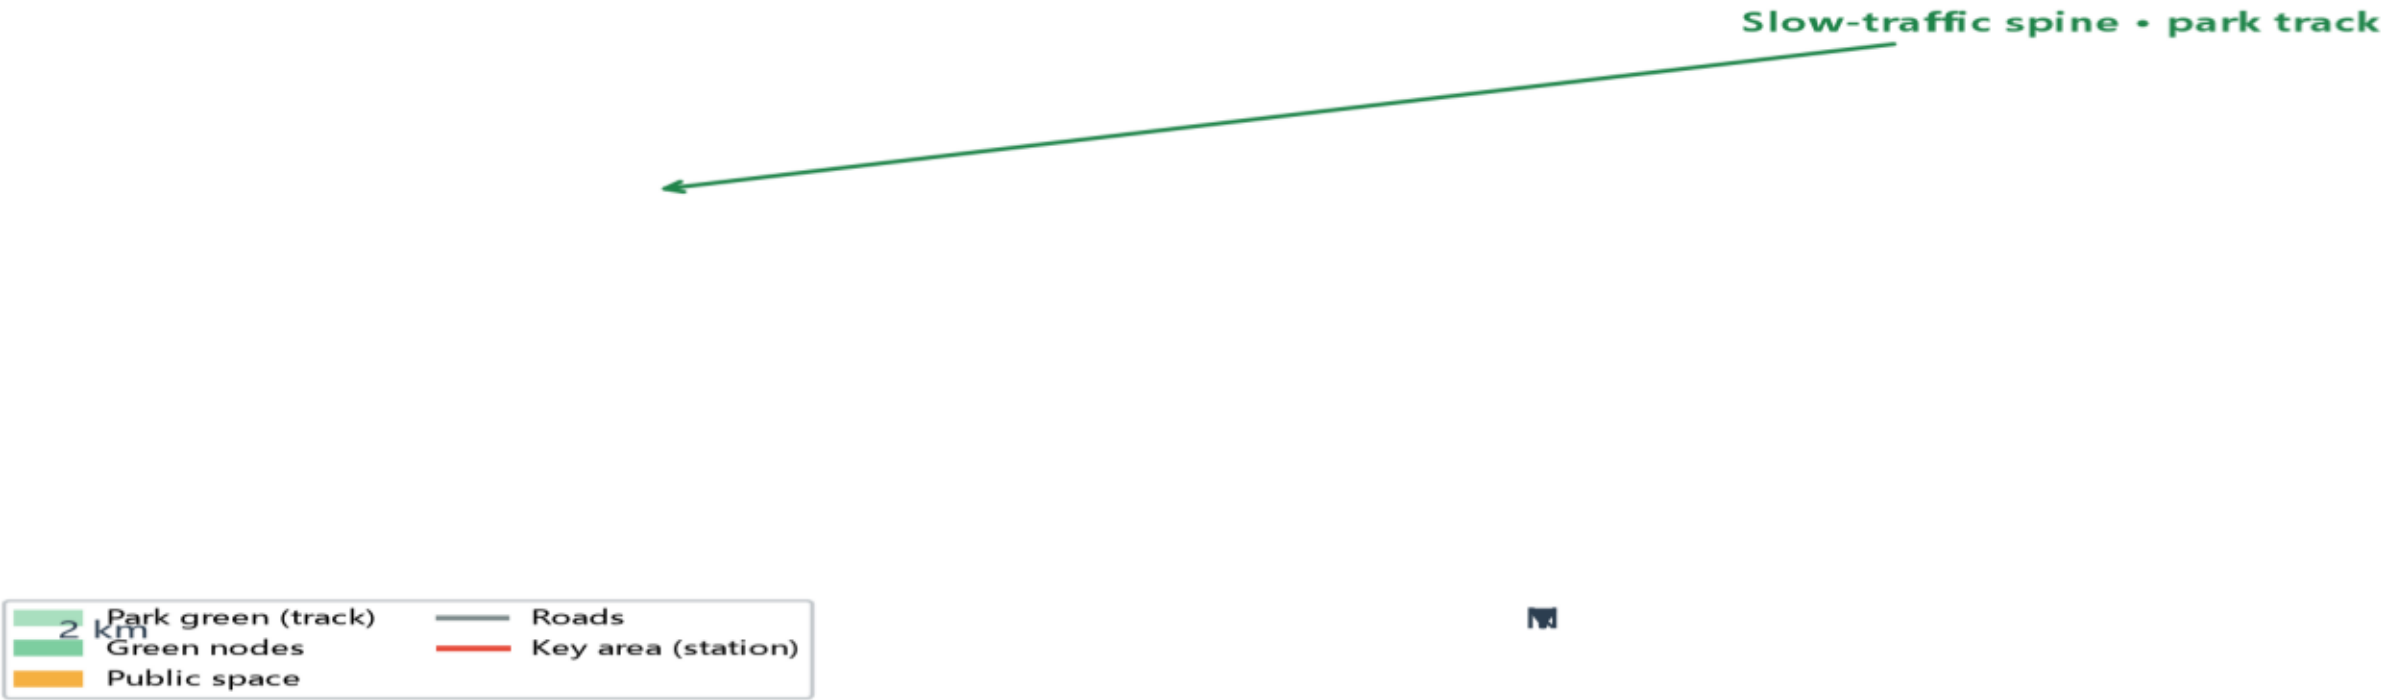

Mobility & Blue-Green Composite System

Two spines + cross links + rail · One track, many pearls

Mobility and Blue-Green Public-Space Composite System

Mobility and Blue-Green Public-Space Composite System Two spines + cross links + rail · One track, many pearls

© 2024 Beijing Urban Planning Institute

Sources: provisional boundaries + agent-generated design geometry; areas recalculated in EPSG:4548. Spatial content is conceptual, not official.

Two arterial spines and 14 cross links re-suture east-west; slow-traffic spine runs through the park track.

Core Metrics Recalculated

from geometry/*.geojson in EPSG:4548

Core Metrics Recalculated from geometry/*.geojson (EPSG:4548)

Overall design area

11.41

km²

Announced 11.4 km² · recalculated

Green ratio

21.2%

green/site

Park track + green nodes

Public space ratio

1.6%

public/site

3 station plazas + nodes

Estimated FAR

1.65

GFA/site

Concept estimate, not statutory

Building density

15.1%

footprint/site

Representative footprints

Road length

37.0

km

2 spines + 14 cross links
