Status–action puts existing facts, conditional action and exit relations into one readable field.

provisional geometry is not a statutory redline

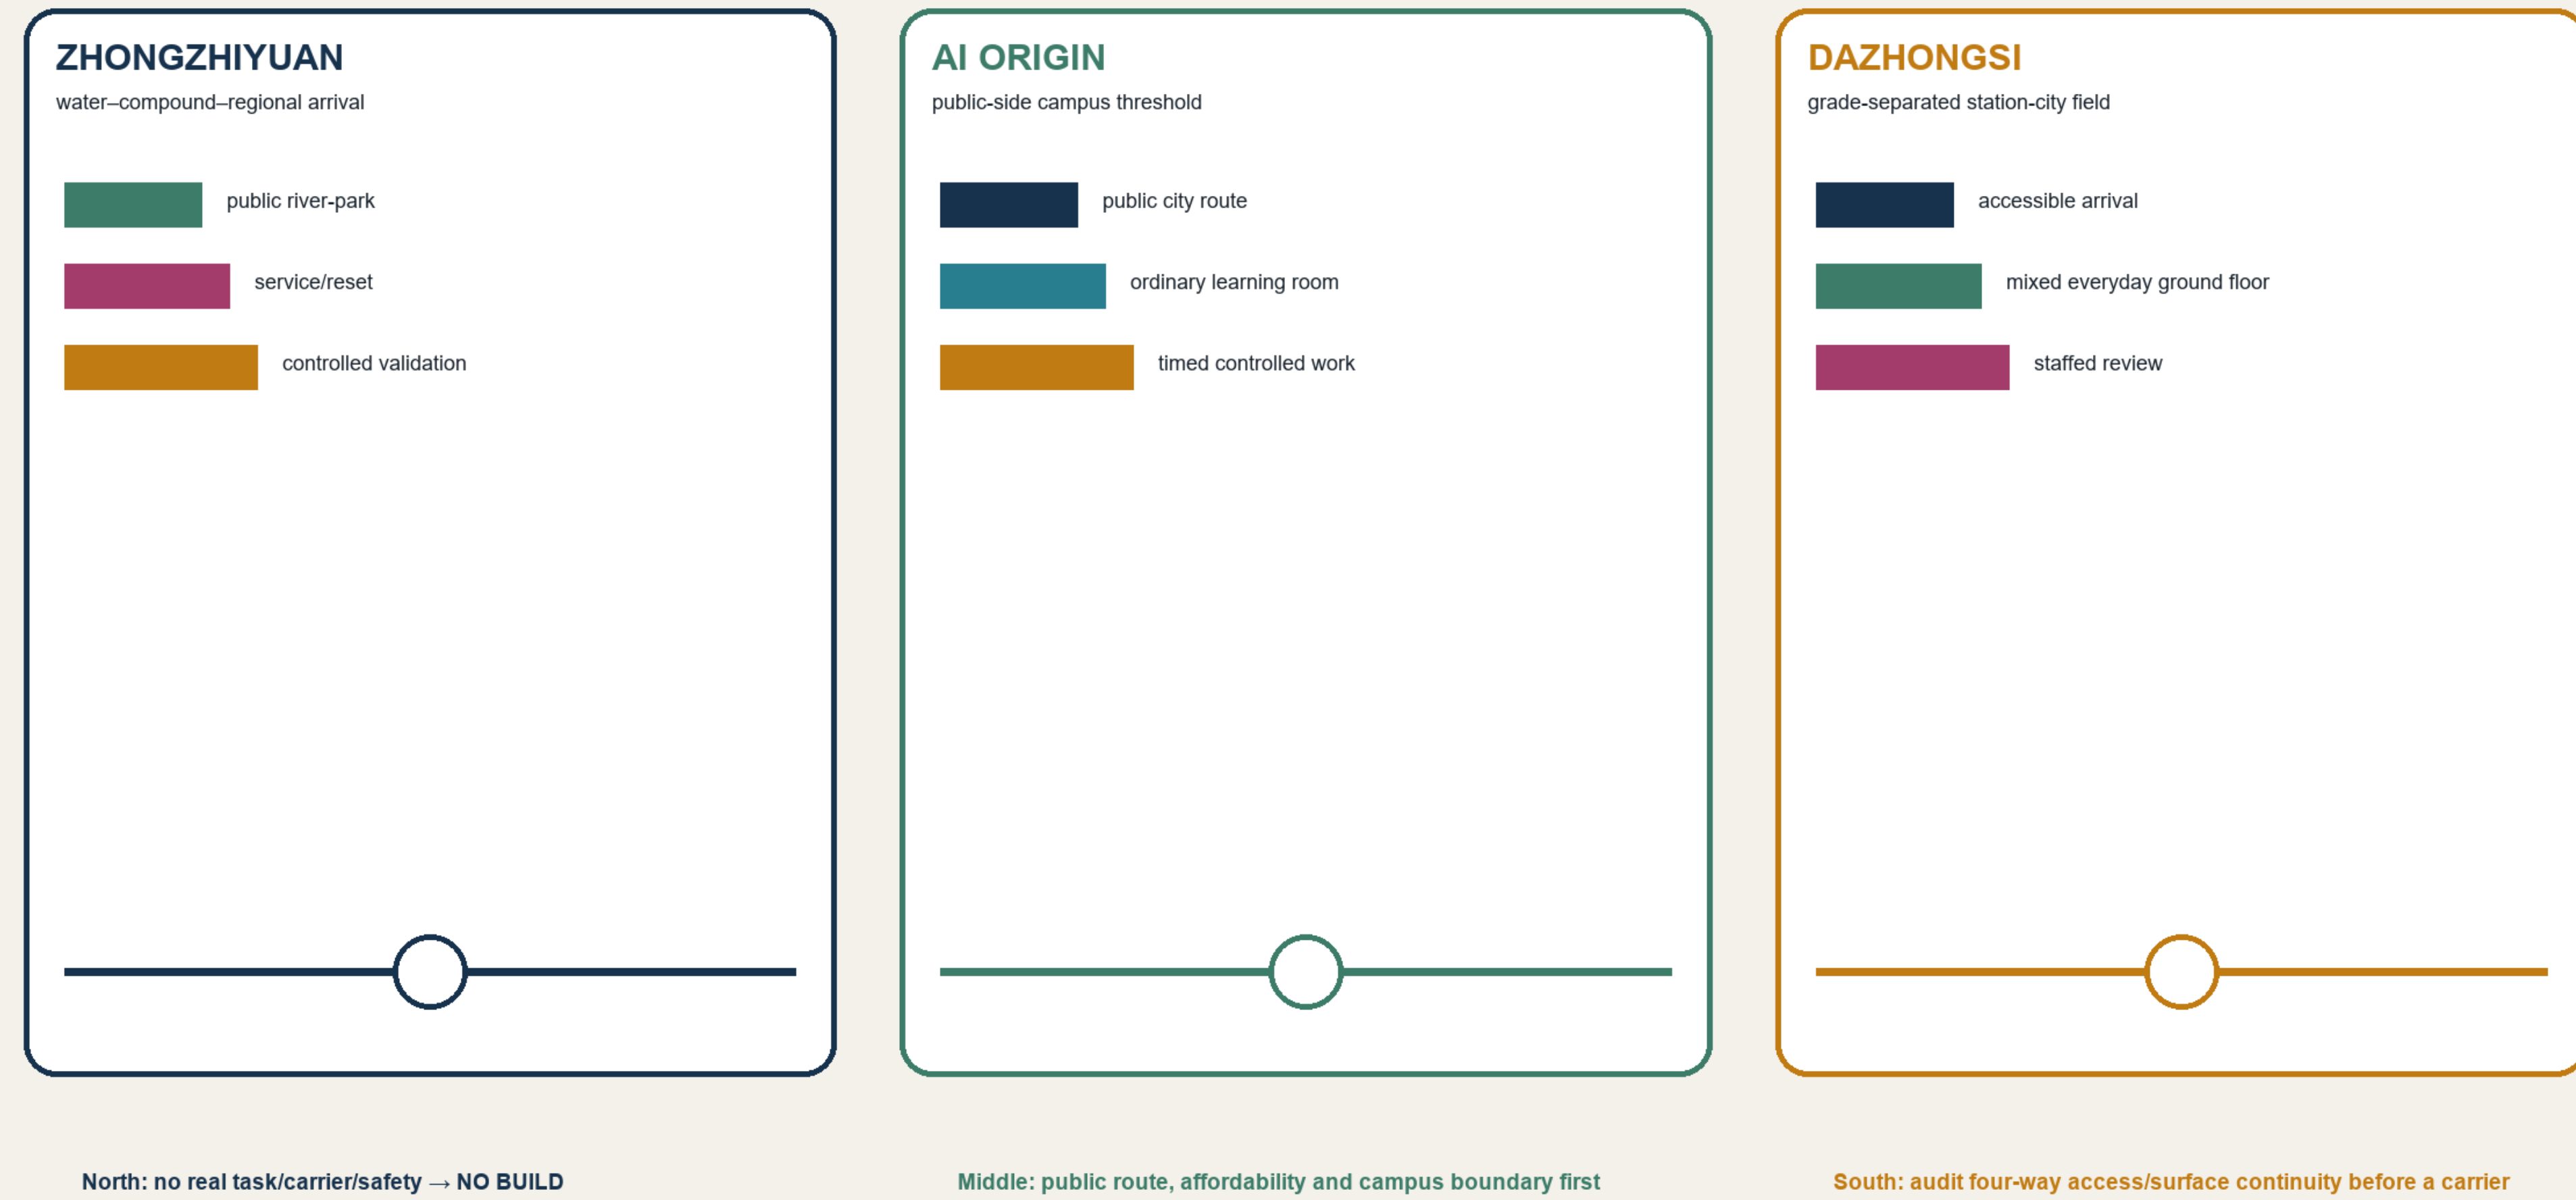

replacement is not a default action

every later action has an earlier evidence gate

The areas are not three identical AI landmarks: they are water-compound-arrival, public-side threshold and grade-separated station-city problems.

AI changes controlled state only through three task packets; the ordinary city comes first and metrics/unknowns remain recalculable.
