

MAKE THE CITY WORK FIRST

First make arrival, human help, and a paper result work. Only then decide whether AI helps. The Three Works are not showrooms; they are three working states of one public task.

JING-ZHANG WORKS

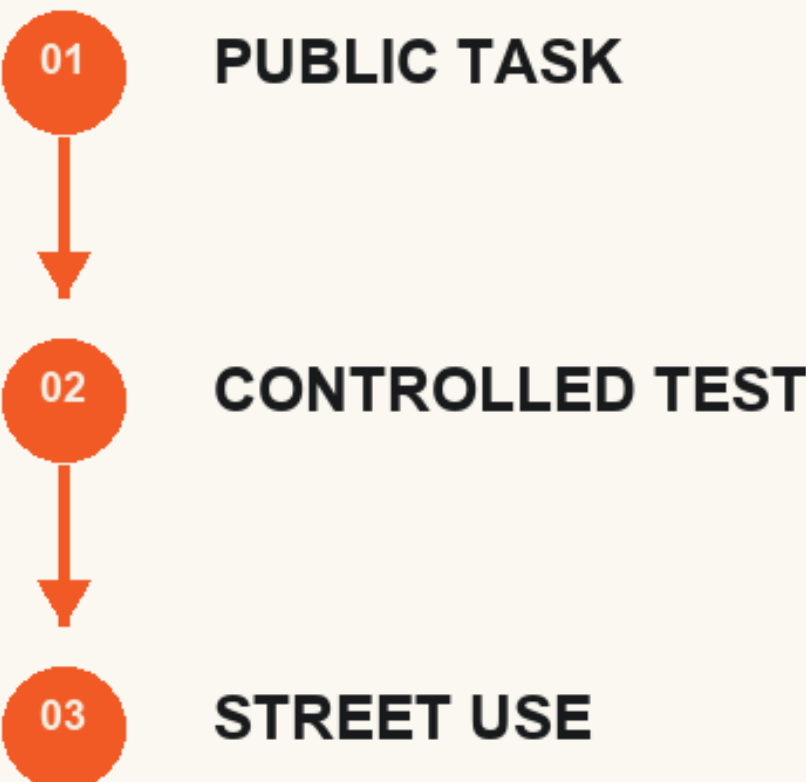

HOW ONE TASK GETS DONE

A problem moves through Prototype, Learning, and Everyday Works; failure returns through the second service chain

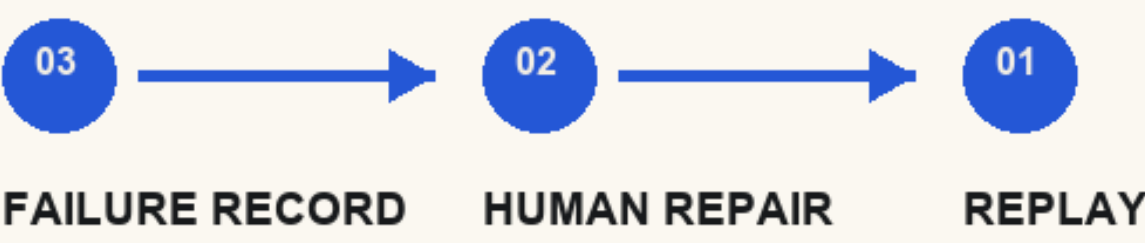

TWO SERVICE CHAINS

LAB TO STREET

PROBLEM TO CHANGE

ANY FAILED STEP REACHES A PERSON AND PAPER

THREE WORKS, THREE REAL JOBS

Lab to Street controls release. Problem to Change controls maintenance, suspension, and retirement. Technology must be able to return when it fails.

PROTOTYPE WORKS: CONTAIN FAILURE FIRST

An observation foyer, accessible test lane, isolated test pocket, physical stop, and failure review make a controlled section. A robot that fails here never reaches the public street.

LEARNING WORKS: MAKE THE NEXT STEP CLEAR

Public arrival, Ask First, a shared table, paper material, and human sign-off form a service-and-learning section. A visitor without a smartphone still knows whom to ask.

EVERYDAY WORKS: SURVIVE AN ORDINARY EVENING

A shaded entry, quiet rest, human takeover, and public change record form an everyday section. Dazhongsi siting remains unverified, so every component stays movable.

COMPONENT
C04 accessible test lane

OWNER
Test lead and site safety

RESOURCE
M-class movable kit

COMPONENT
C01 Ask First + C05 marker

OWNER
Service desk and venue

RESOURCE
S-class map, signs, staff

COMPONENT
C02 Takeover + C03 Change Log

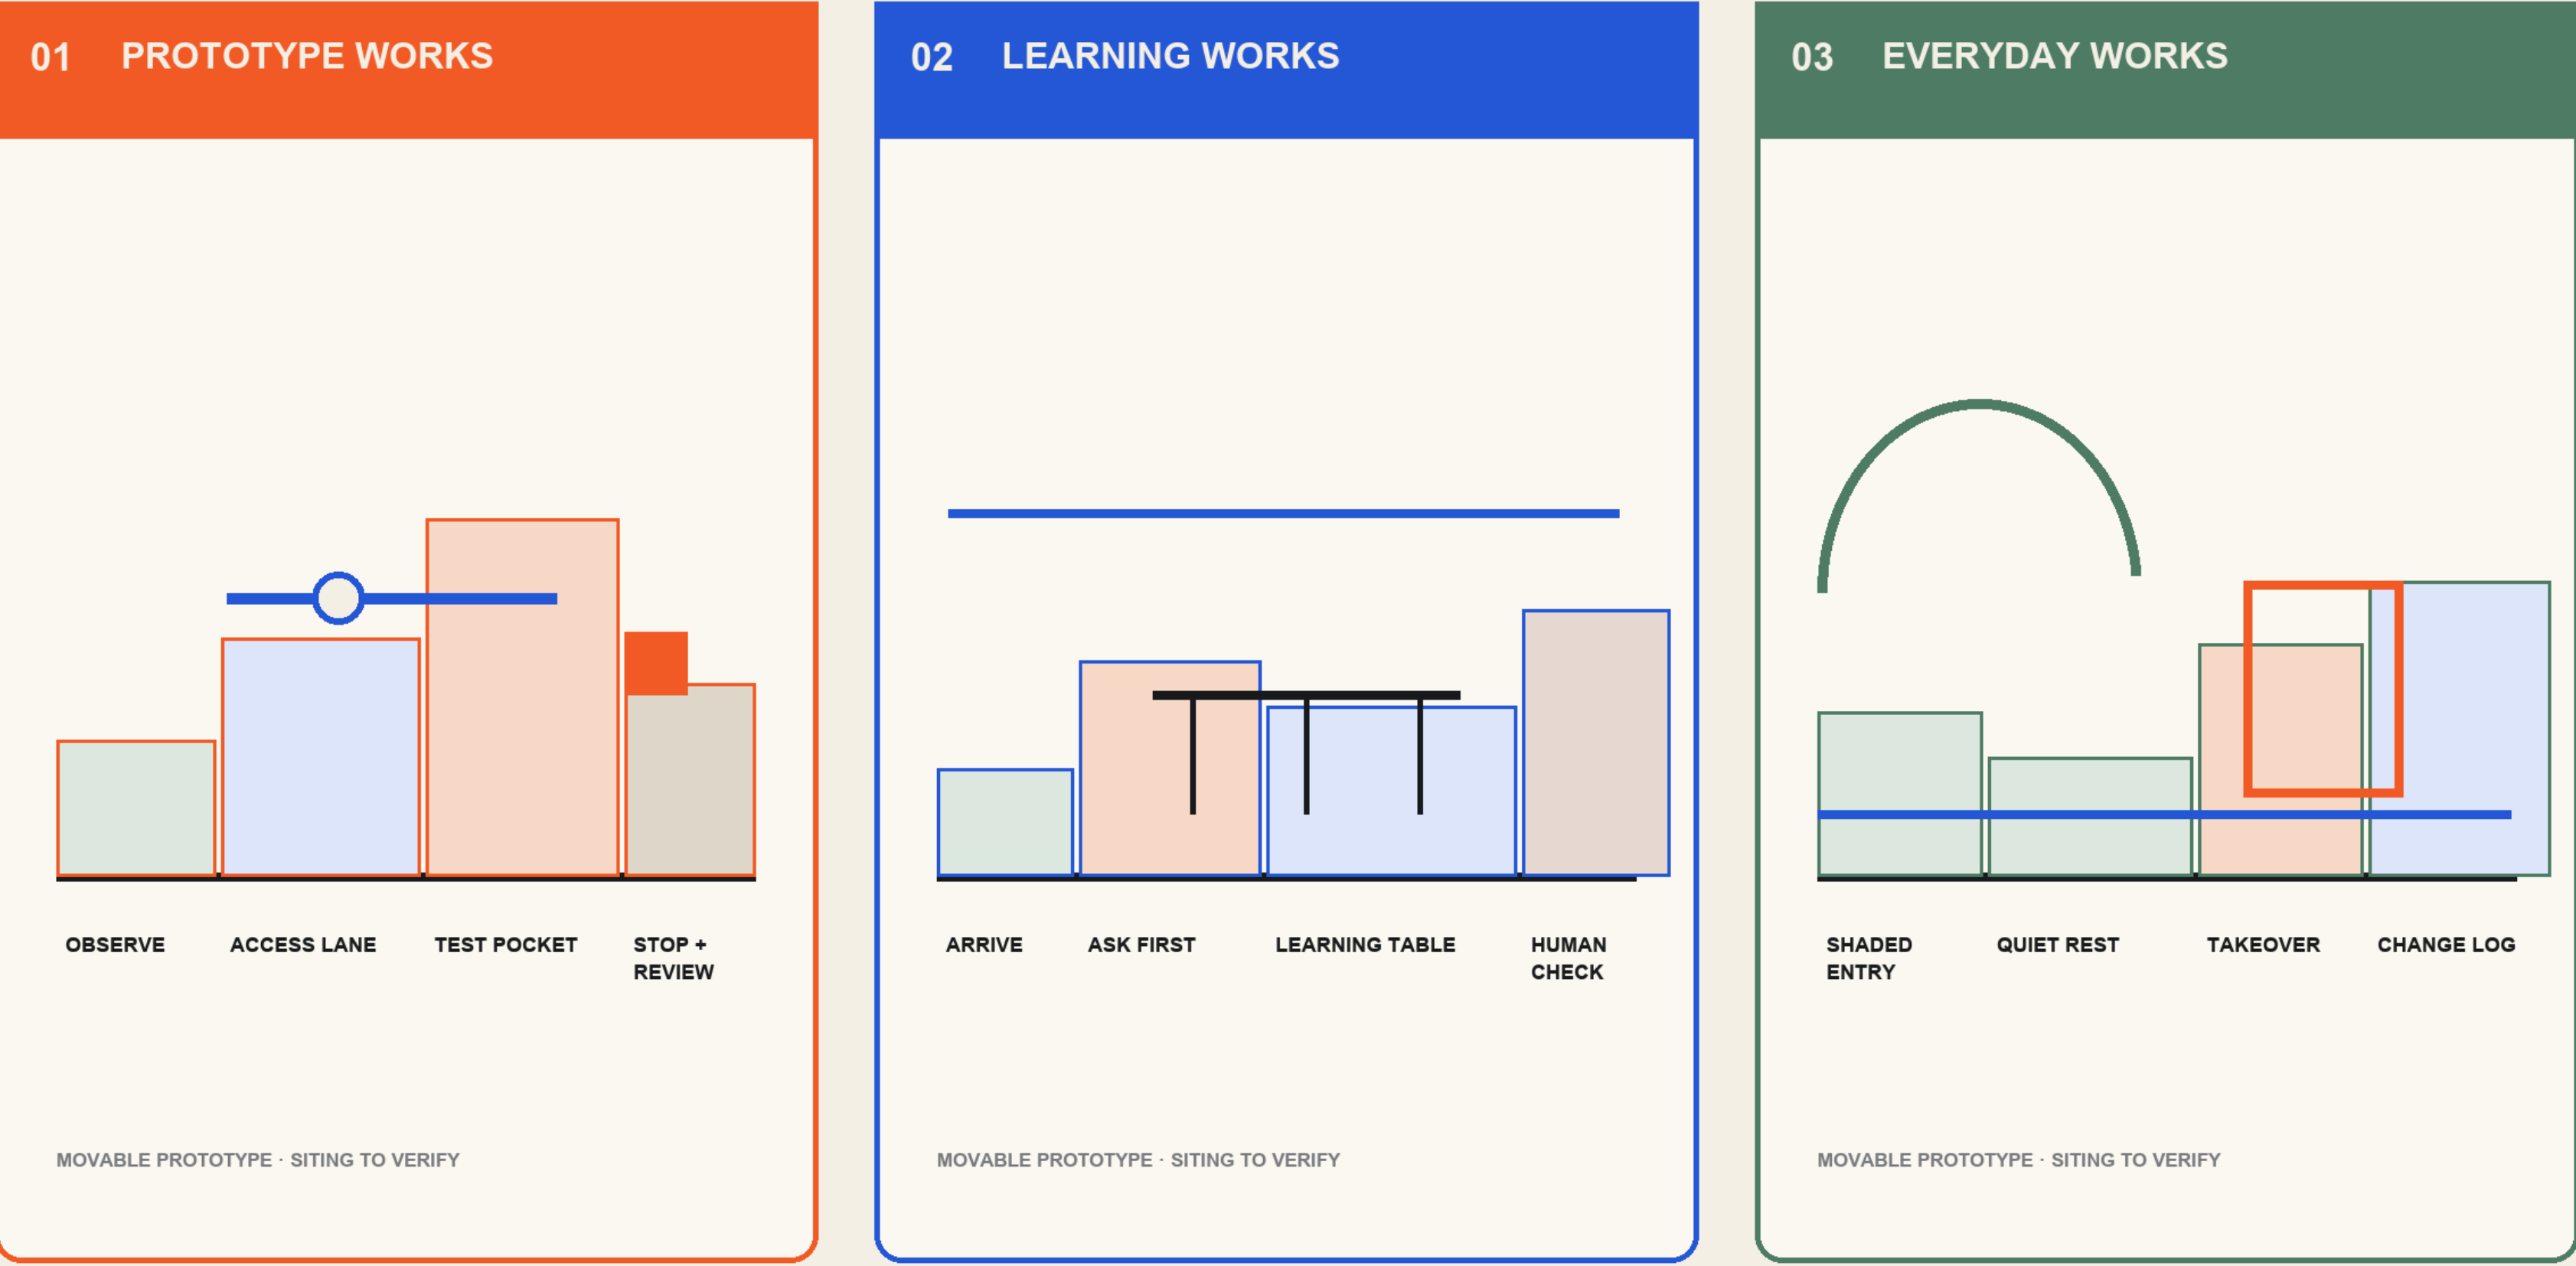

OWNER
Safety lead and service owner

RESOURCE
S/M movable kit

ONE TASK COUNTS ONLY WHEN COMPLETE

U05-A is not a result photograph. It is an unexecuted receipt: arrive, Ask First, read the checklist, obtain human sign-off, recheck quietly, and leave with paper. Field completion remains zero.
