

Jing-Zhang AI Pilgrimage • Four Original Landmarks and One Interactive Rail

CONCEPT DESIGN BOARD • 概念设计展板

临时概念边界 • 非官方红线 • 官方数据发布后复算 / Provisional concept boundary • NOT an official redline • recompute after official data

SITE OVERVIEW • concept figure

Overall Design Scope Overview (provisional concept)

临时概念边界 • 非官方红线 • 官方数据发布后复算
Provisional concept boundary • NOT an official redline • recompute after official data

LEGEND

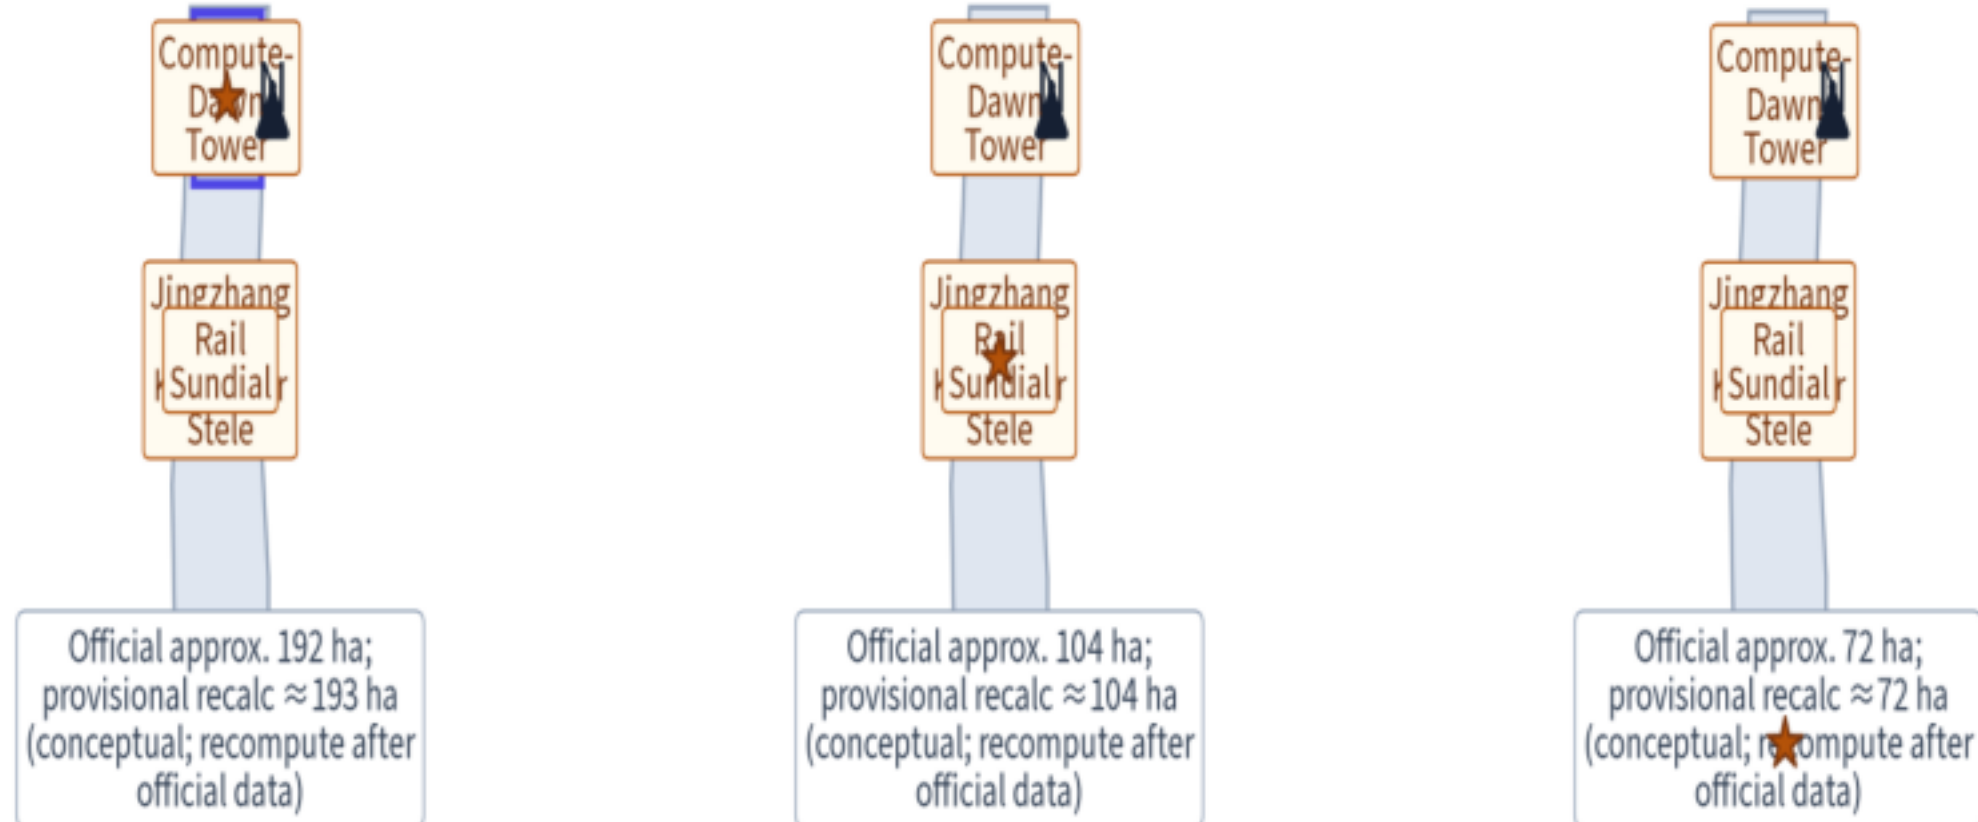

- Green space (concept)
- Water / blue-line focus (concept)
- AI scenario nodes
- Key areas (provisional)
- Building envelopes (concept)
- Greenway spine (rail trail)
- Stitch links (E-W)
- ★ AI landmarks (4)

Official three-tier scopes (announcement): $\approx 43.6 \text{ km}^2$ coordinated study • $\approx 11.4 \text{ km}^2$ overall design • $\approx 368.4 \text{ ha}$ key areas. This figure shows the package's conceptual sub-geometry under the overall-design tier: provisional concept-model geometry only, neither surveyed nor statutory; recompute fully after official data.

KEY AREAS • concept figure

Three Key Areas + Four Pilgrimage Landmark Concepts (provisional)

concept sketches (DATA-SRC-PROVISIONAL-BOUNDARIES), not official boundaries, redlines or surveys; recompute fully
临时概念边界 • 非官方红线 • 官方数据发布后复算
Provisional concept boundary • NOT an official redline • recompute after official data

Four Pilgrimage Landmarks • form & experience concepts (conceptual locations, no commitment)

Jingzhang Zero-Kilometer Stele
Ring sunk in ground; concentric century scales; central 0-stele; reversible steel spine
Experience: Walk around lights the scales; braille + multilingual plates; annual Zero-Km honors.

Compute-Dawn Tower
Low landscape tower (reversible steel-wood); dawn band synced to anonymized compute pulses.
Experience: Dawn moments driven by hash of community code; fully traceable.

Algorithm Carillon
Light open carillon; bell is an acoustic device (not a replica); reversible
Experience: Morning/evening code-hash chimes; human-reviewed sounds; sources at stations.

Rail Sundial
Symbolic rail as gnomon; ground hour-lines map to 'AI milestone era'; engraved scale
Experience: Noon shadow ritual; daily readable time; annual Origin Record plates.

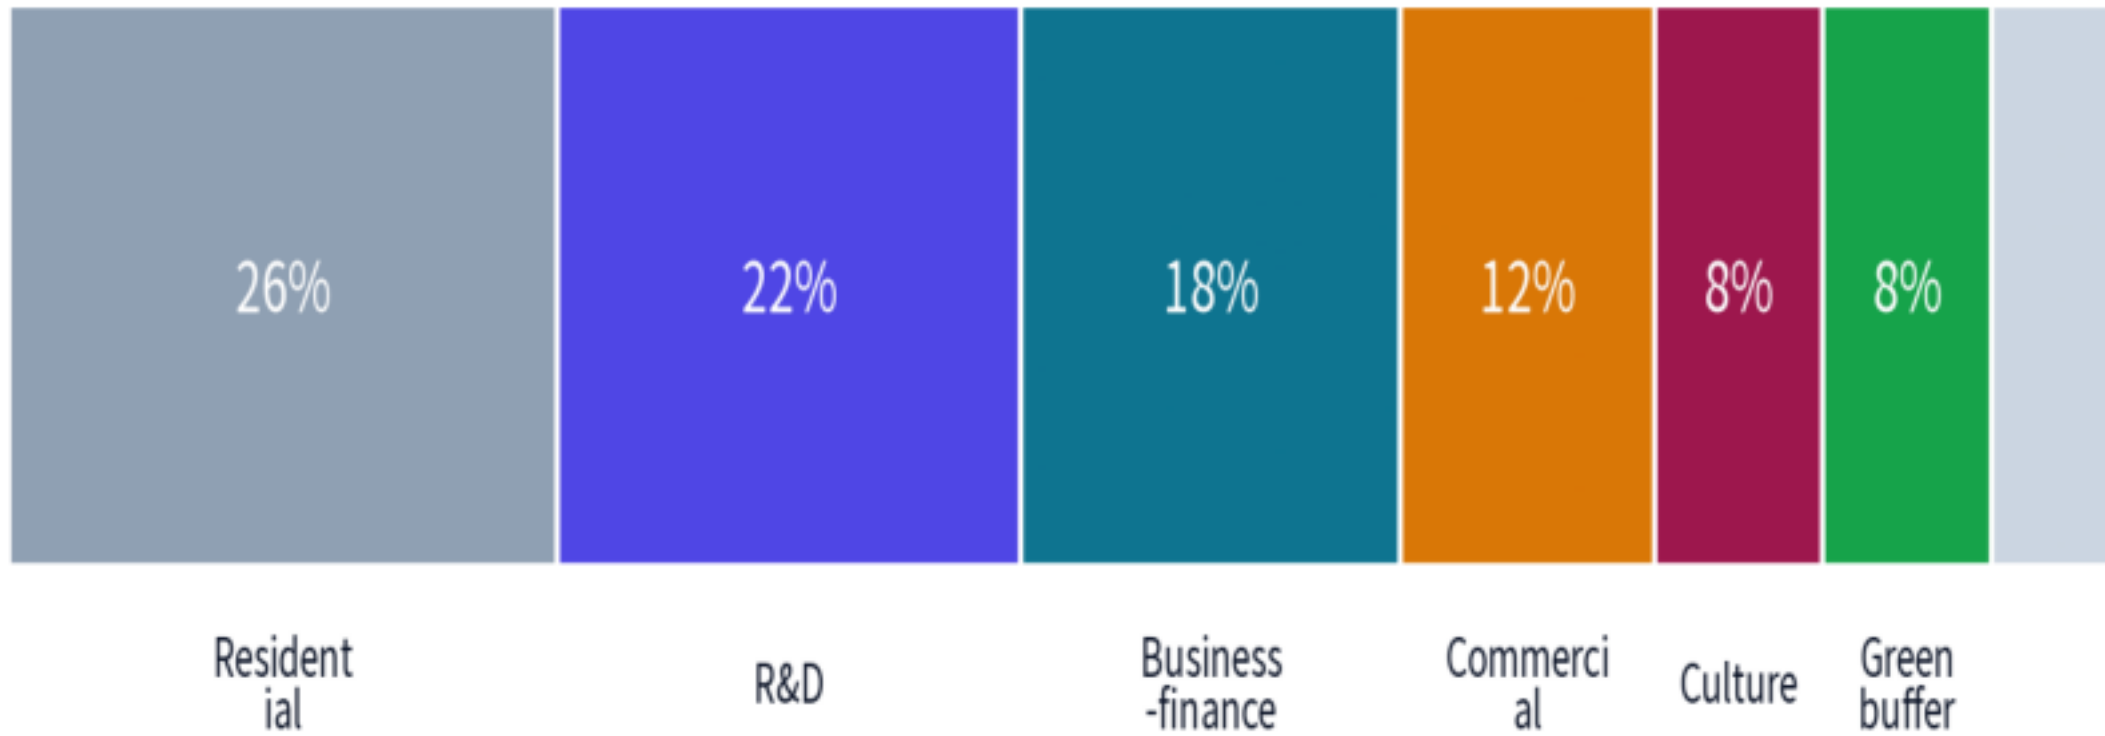

Areas quote the official announcement text and round provisional recalculations (conceptual values, not surveyed or statutory); the four landmark names are original concept codenames registered as internal working codenames (NAME-CLEAR-01; dated search records in sources.json NAME-SEARCH-01).

LAND USE STRUCTURE • concept figure

Conceptual Land-Use Structure (7-class shares, concept)

临时概念边界 • 非官方红线 • 官方数据发布后复算
Provisional concept boundary • NOT an official redline • recompute after official data

concept shares of the provisional land-use model (metrics.json land_use_zone_count=18, geometry elements=21)

Rounded to nearest whole percent by confidence; land-use classes follow the current national classification terms (MNR 2023 guide); no statutory land-use adjustment is proposed; official land data will trigger recomputation.

Percentages are rounded provisional concept-model values (nearest whole percent), neither surveyed nor statutory; exact recomputable zone counts and shares live in metrics.json and geometry/land_use.geojson.

临时概念边界 • 非官方红线 • 官方数据发布后复算 / Provisional concept boundary • NOT an official redline • recompute after official data

MOBILITY BLUEGREEN • concept figure

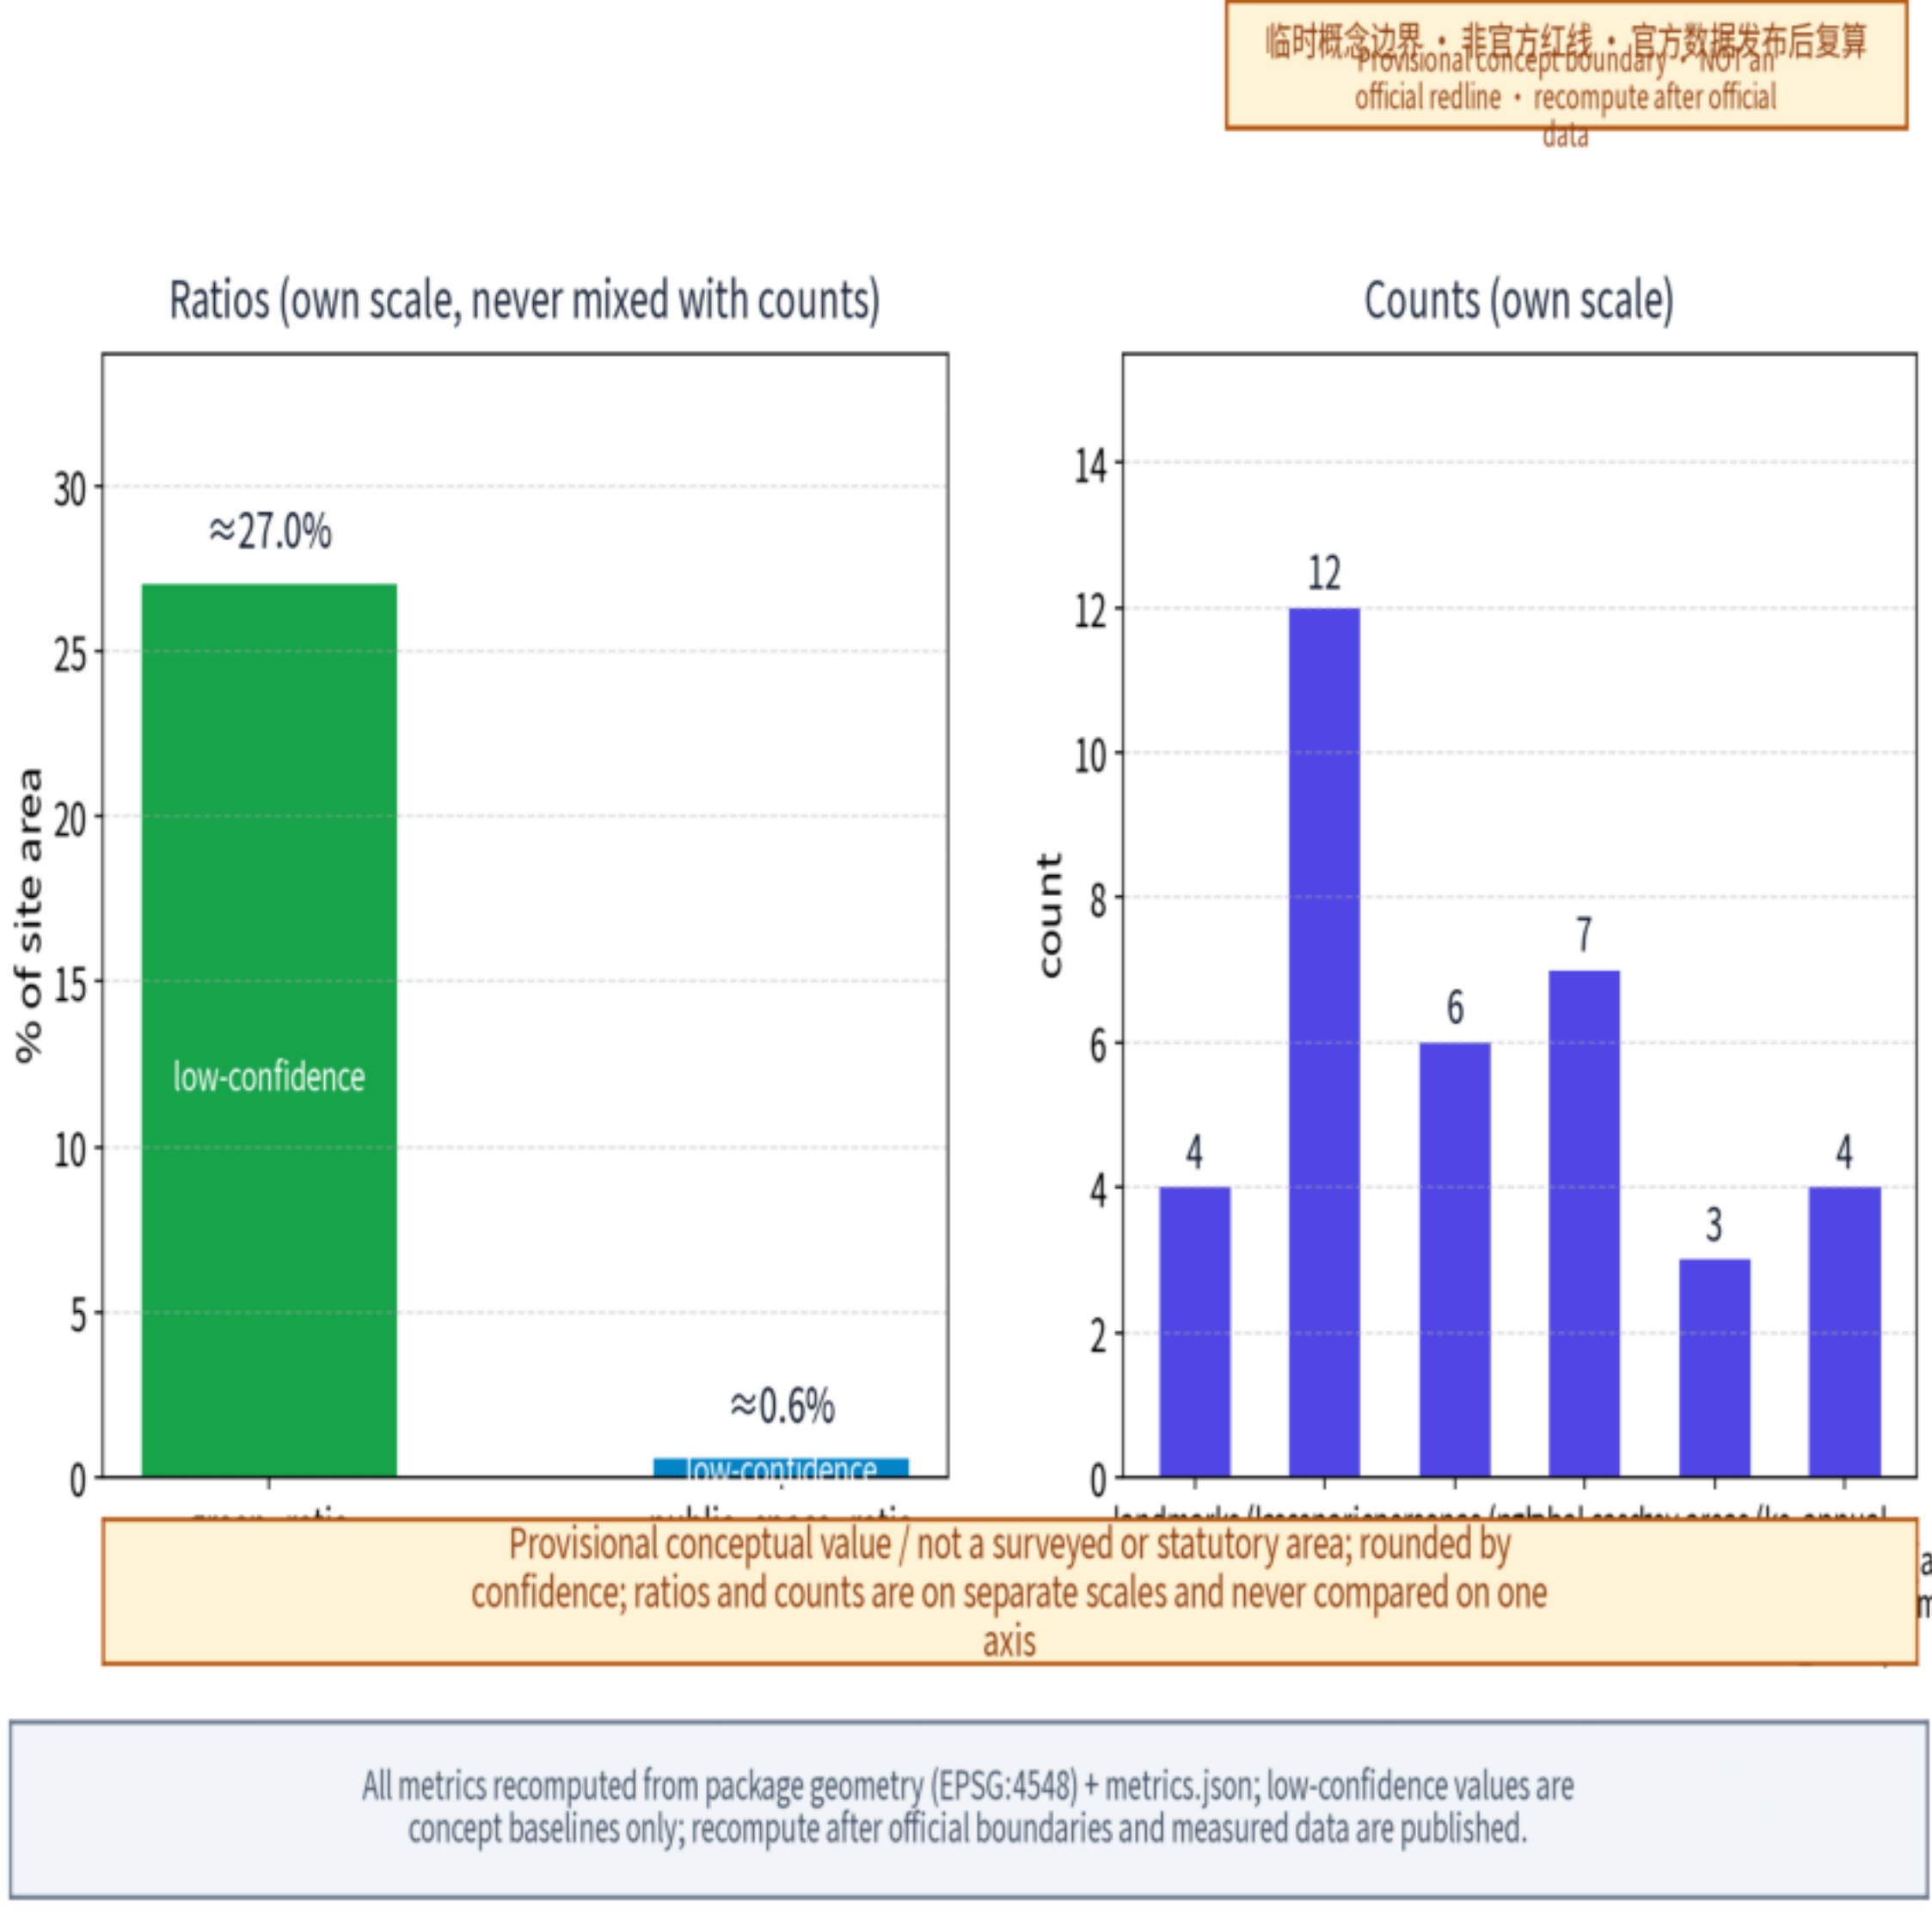

Mobility & Blue-Green Public-Space System (provisional)

One spine (heritage park), two wings (Xiaoyuehe/Qinghe waterfront), many knots (station pocket parks); interactions are anonymized on-device and can be switched off; all geometry is provisional concept-model value, neither surveyed nor statutory; recompute after official data.

METRICS EVIDENCE • concept figure

Core Metric Recalculation Evidence (rounded)

MVP NODE DIAGRAM • concept figure

MVP Node-Level Diagram (Origin Field × Rail Trail)
