

Centennial Jing-Zhang AI Belt · Design Booklet (A3)

THE EMERGENT BELT · JINGZHANG HYPER LINE

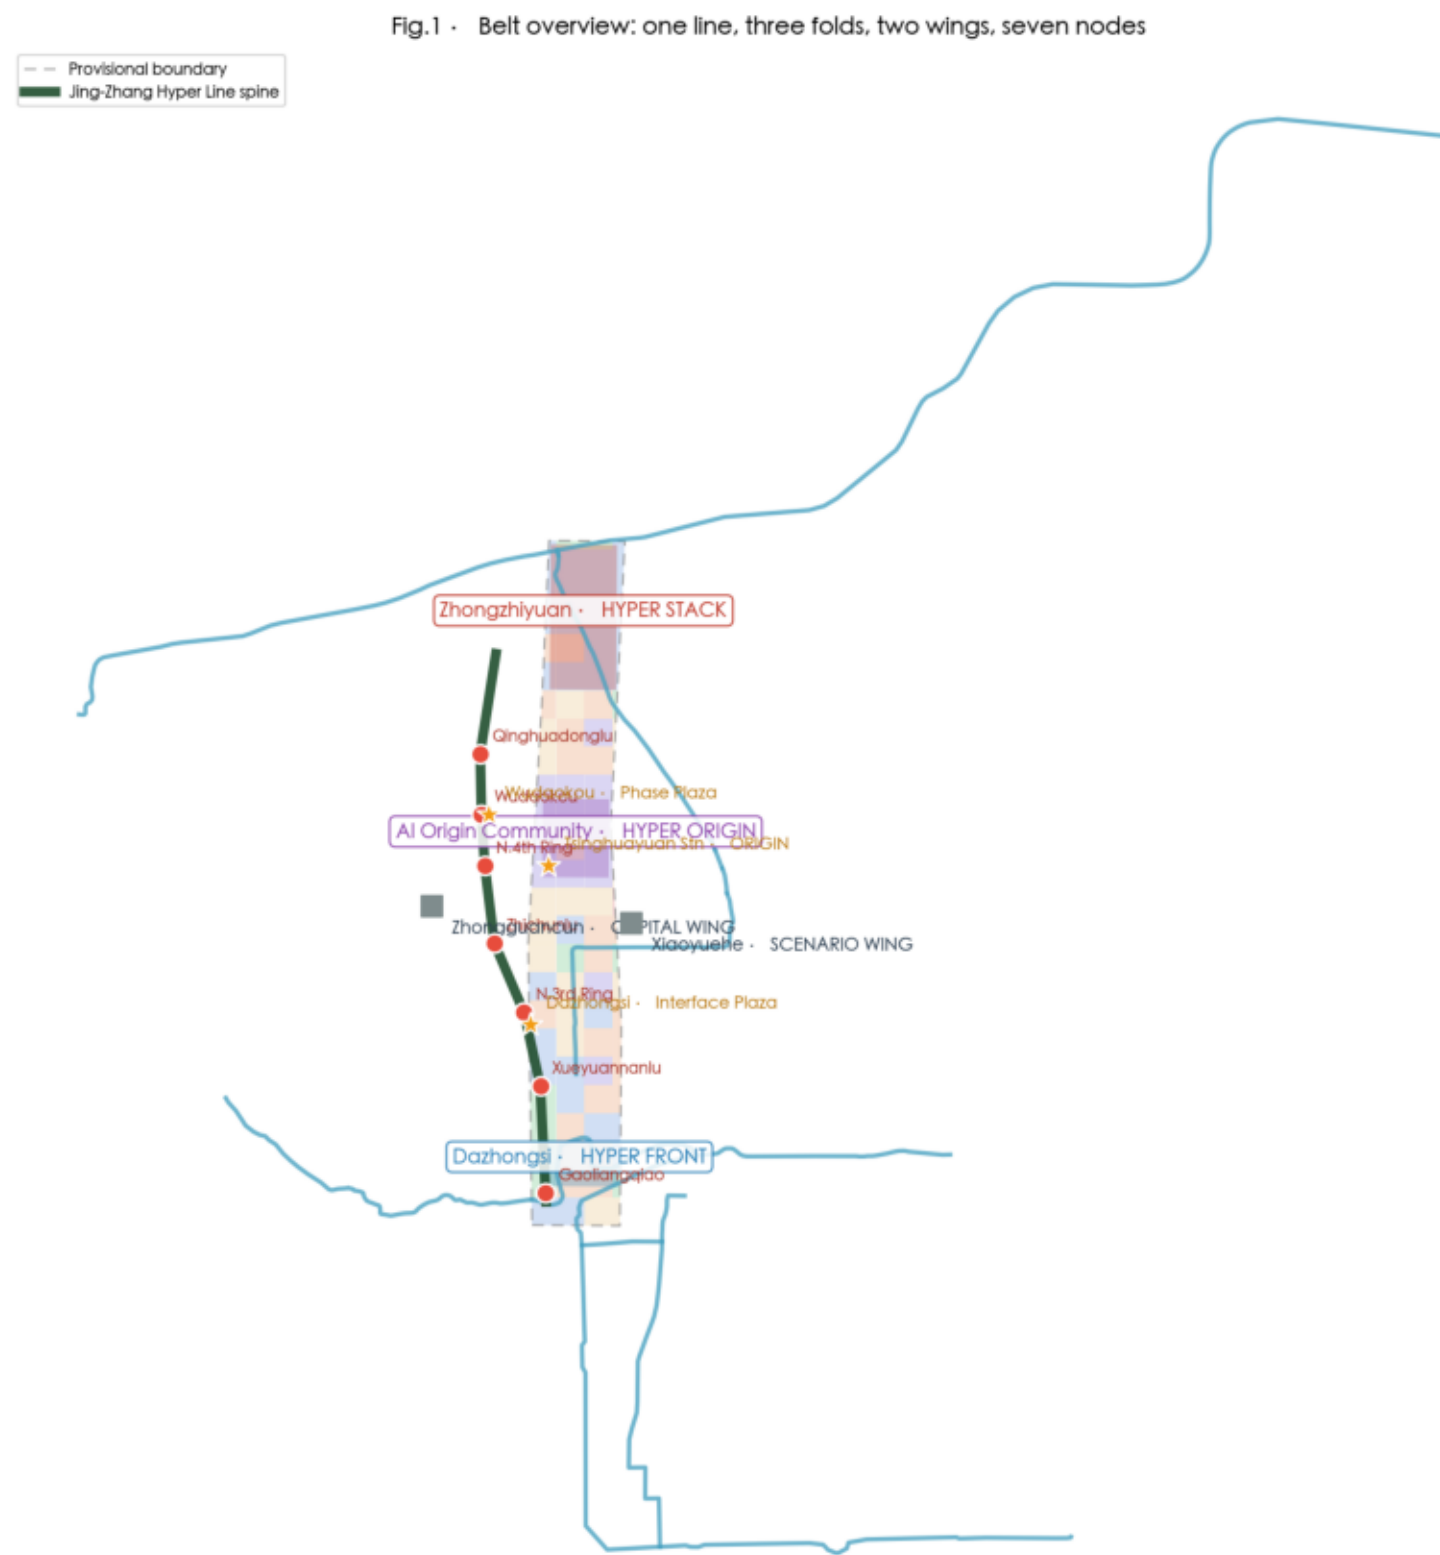

Title: THE EMERGENT BELT — Jing-Zhang Hyper Line

Author: KUN-SAL Spatial Quant Lab (GitHub: Anshengdesign, Xing Xinhua)

Method: CASA complexity urban science × Amap POI 25,476 pts + OSM

Discipline: all numbers computed locally (EPSG:4548), single-source registry

Caveat: provisional boundary for generation/display/self-check only; regulatory indicators pending; conceptual recommendations

Sources: official announcement + OSM + Amap POI [2026-08-15]; provisional boundary dashed only, not an official redline; all conceptual

Fig.1 · Belt overview

Fig.2 · Three-level scope and land-use structure

Fig.2a · Land-use structure & POI-driven zoning (concept)

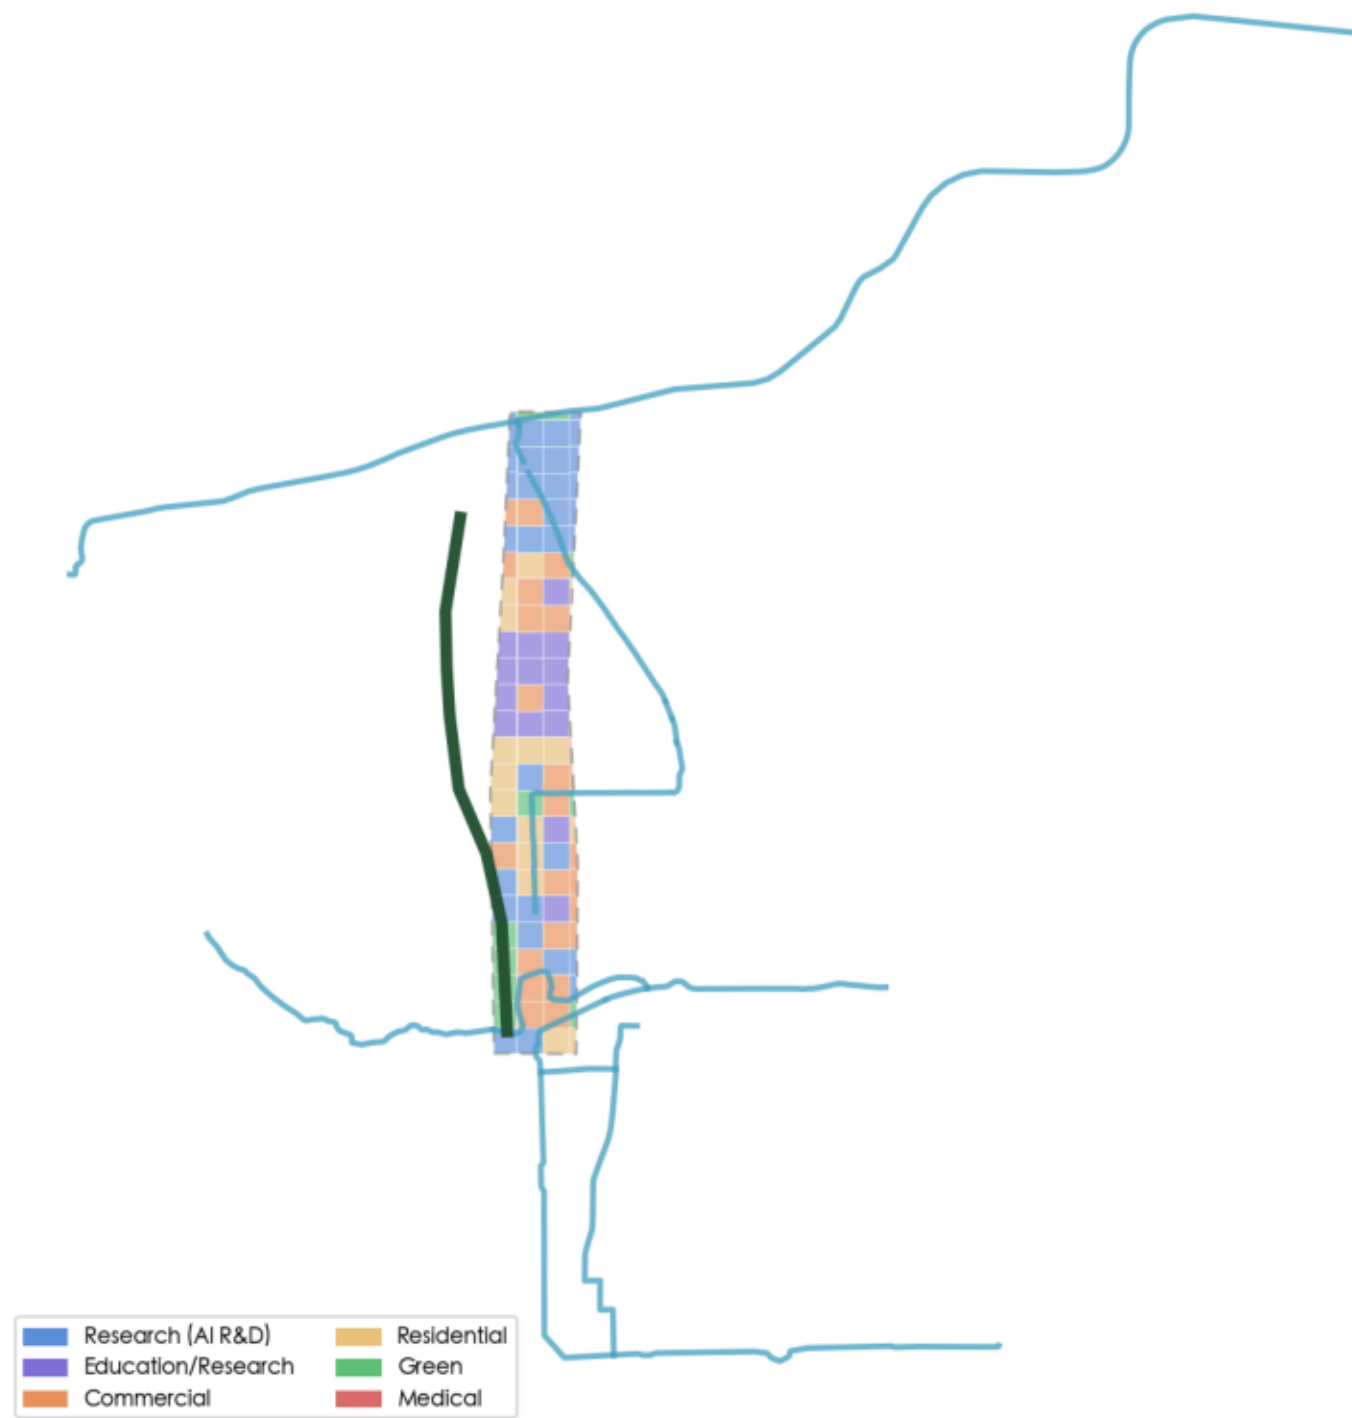

Fig.2b · Land-use mix (10k m², conceptual)

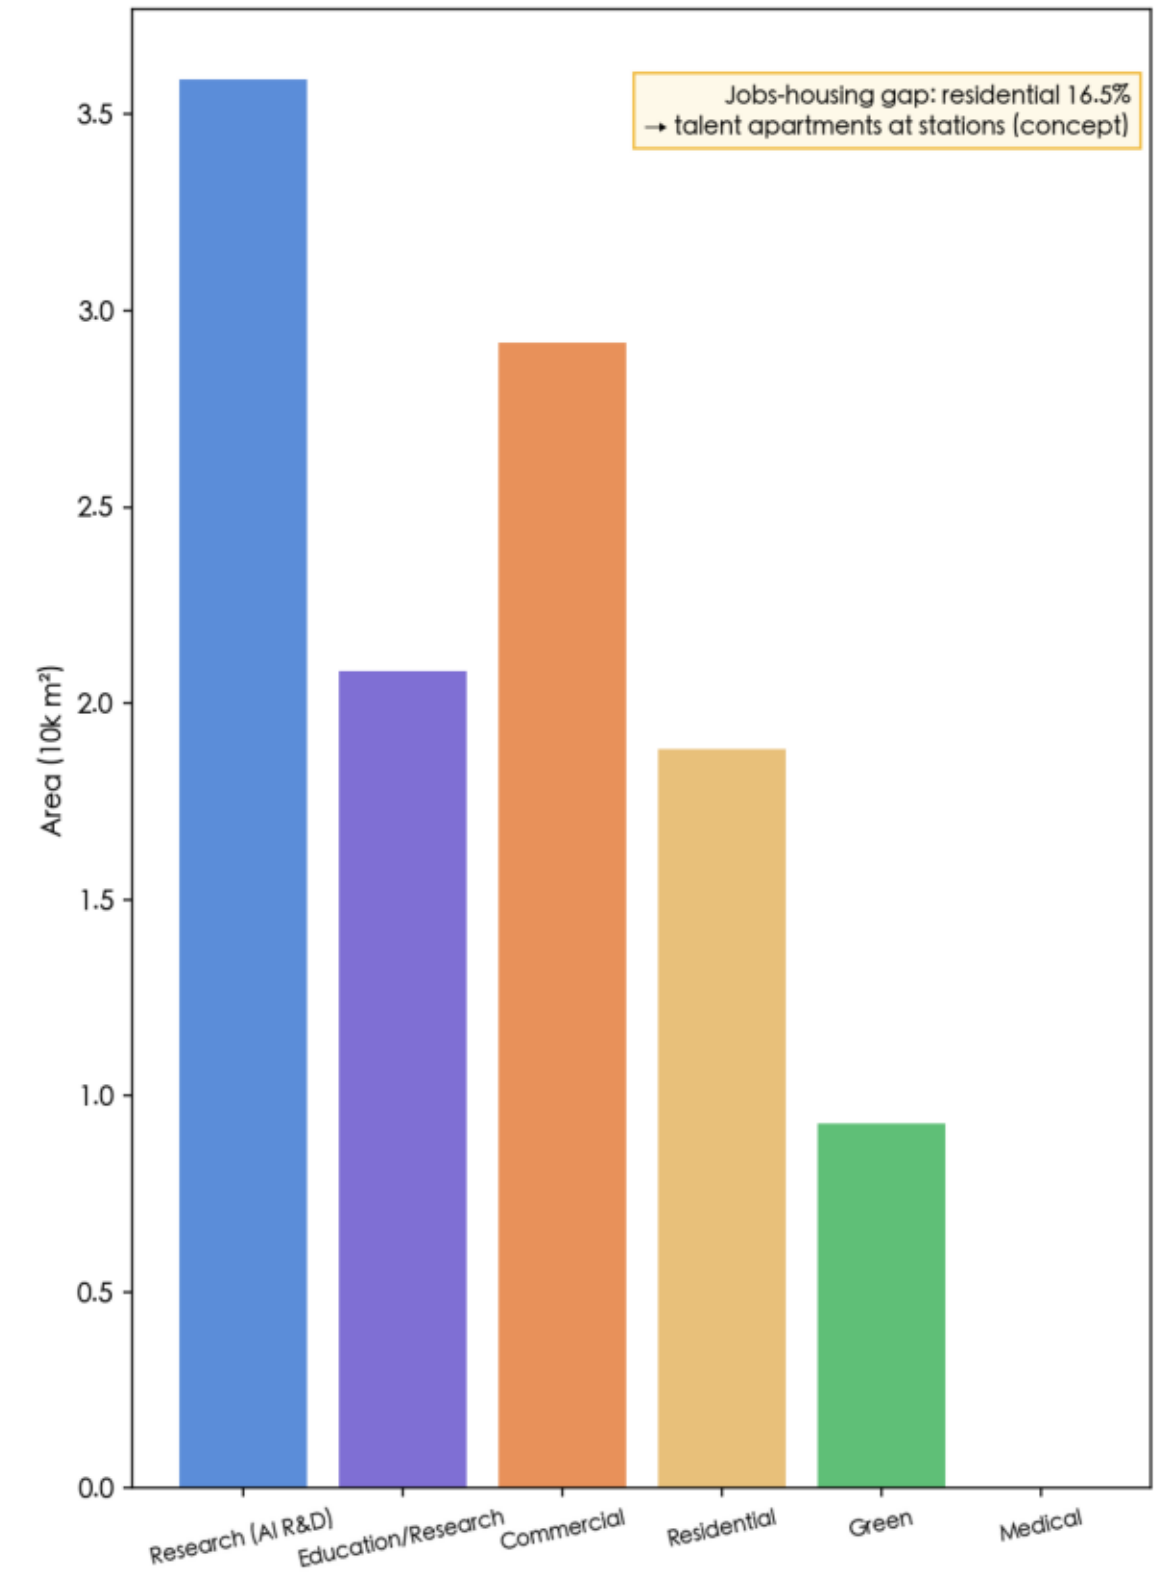

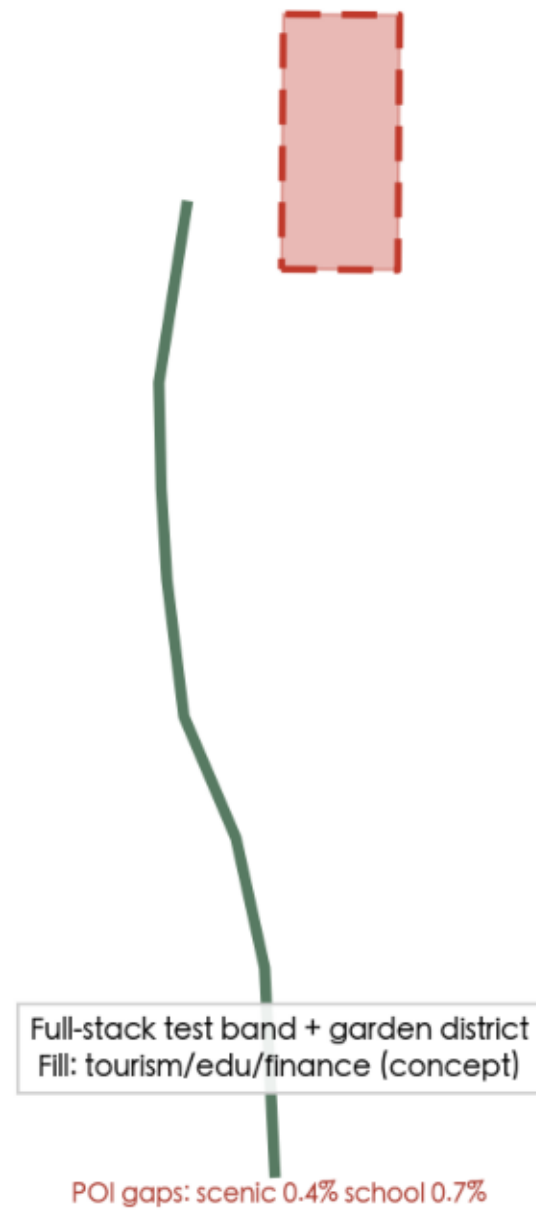

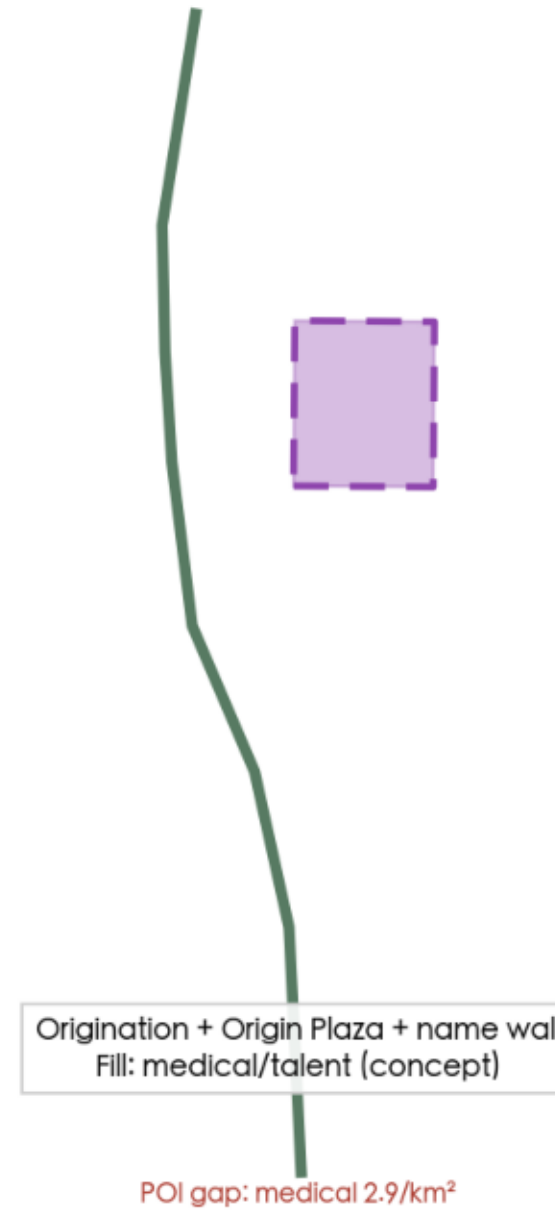

Fig.2 · Land use & POI zoning

Fig.3 · Key-area detailed design positions

Zhongzhiyuan · HYPER STACK

Origin Community · HYPER ORIGIN

Dazhongsi · HYPER FRONT

Fig.3 · Key-area positions (dashed = provisional)

Fig.4 · Seven-node stitching & blue-green

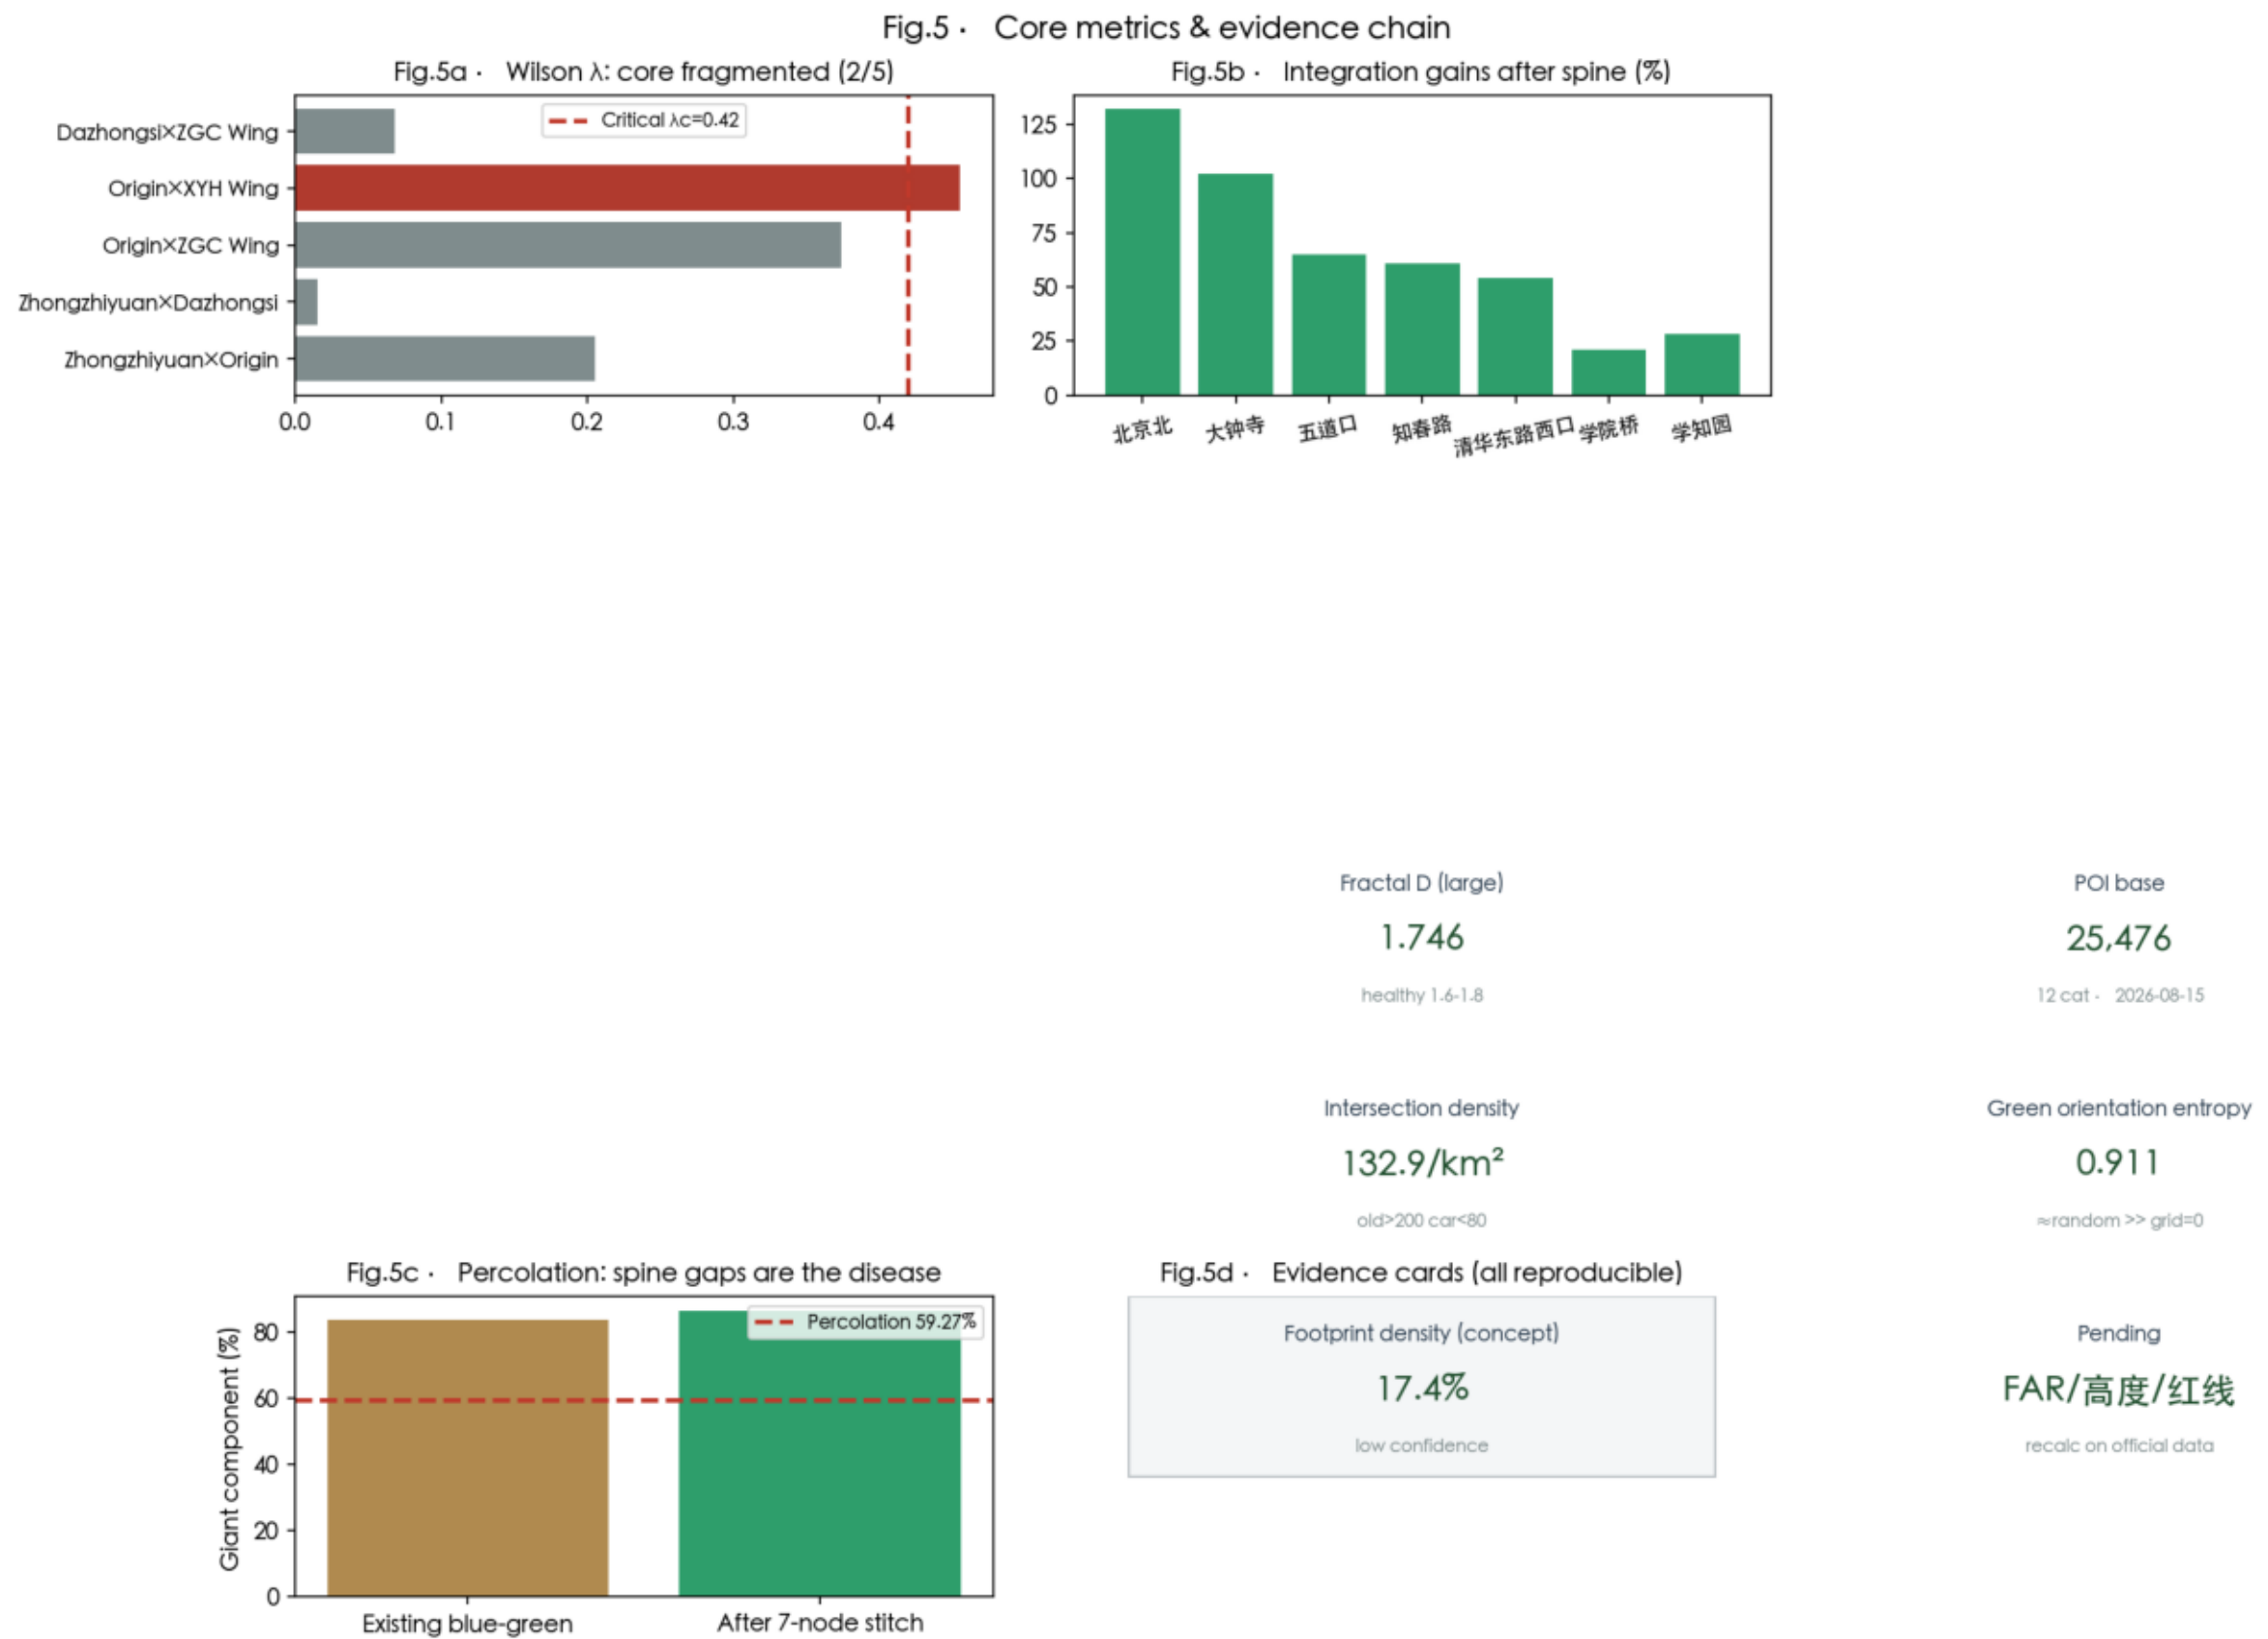

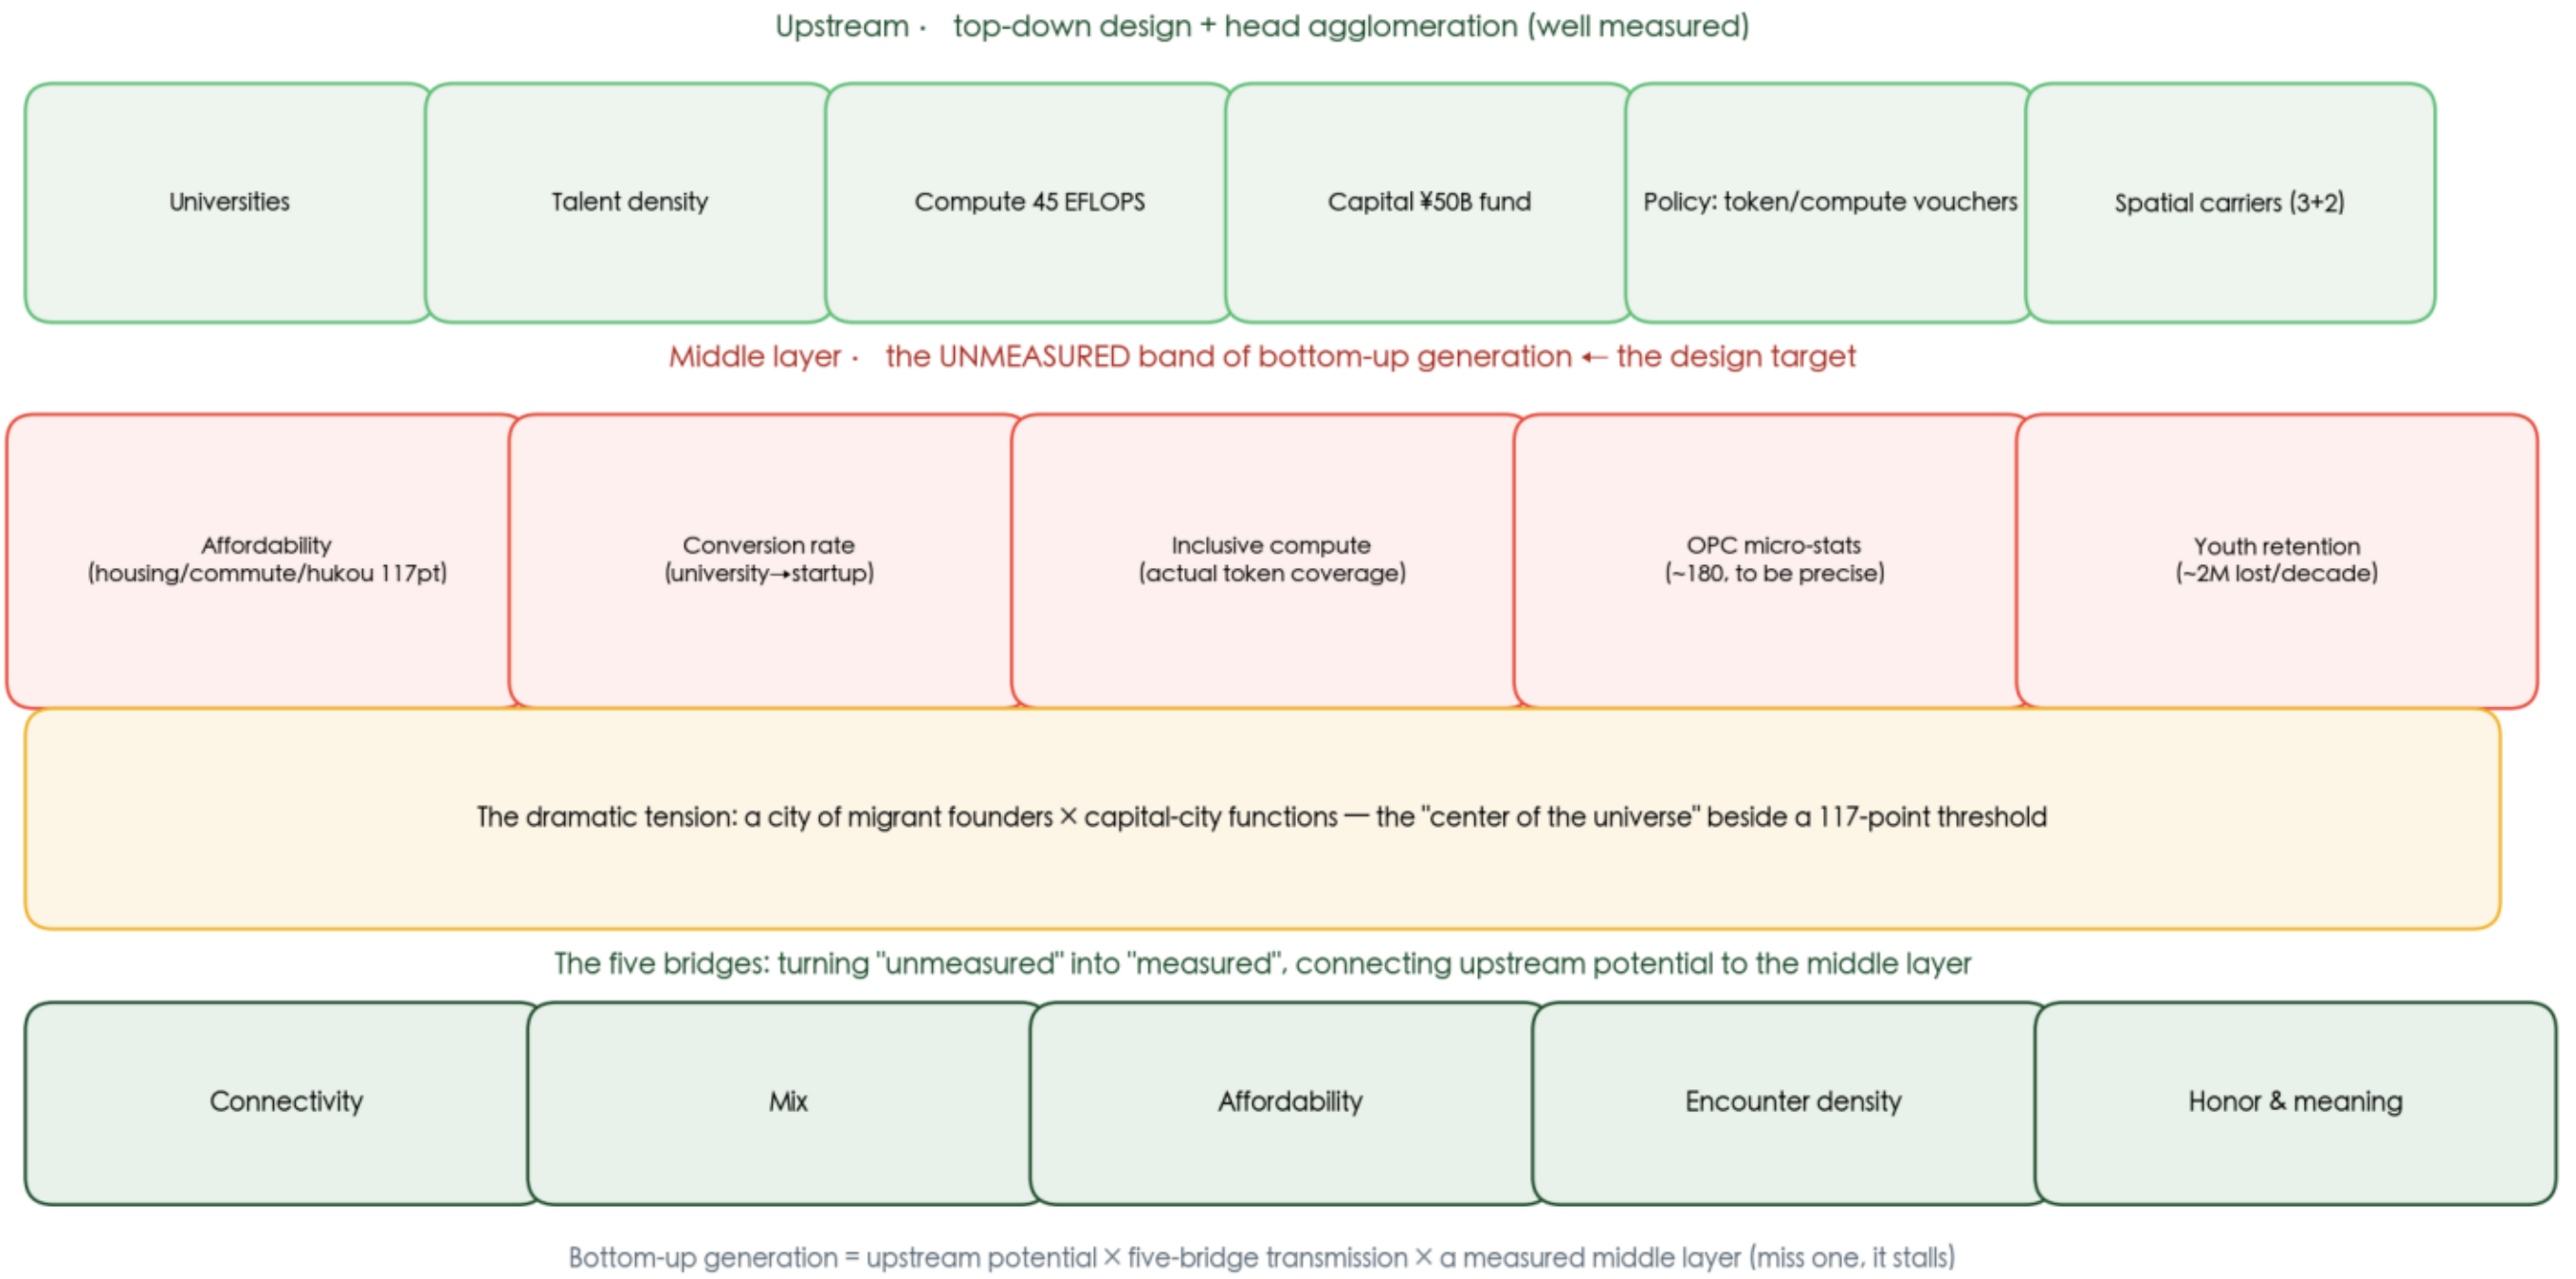

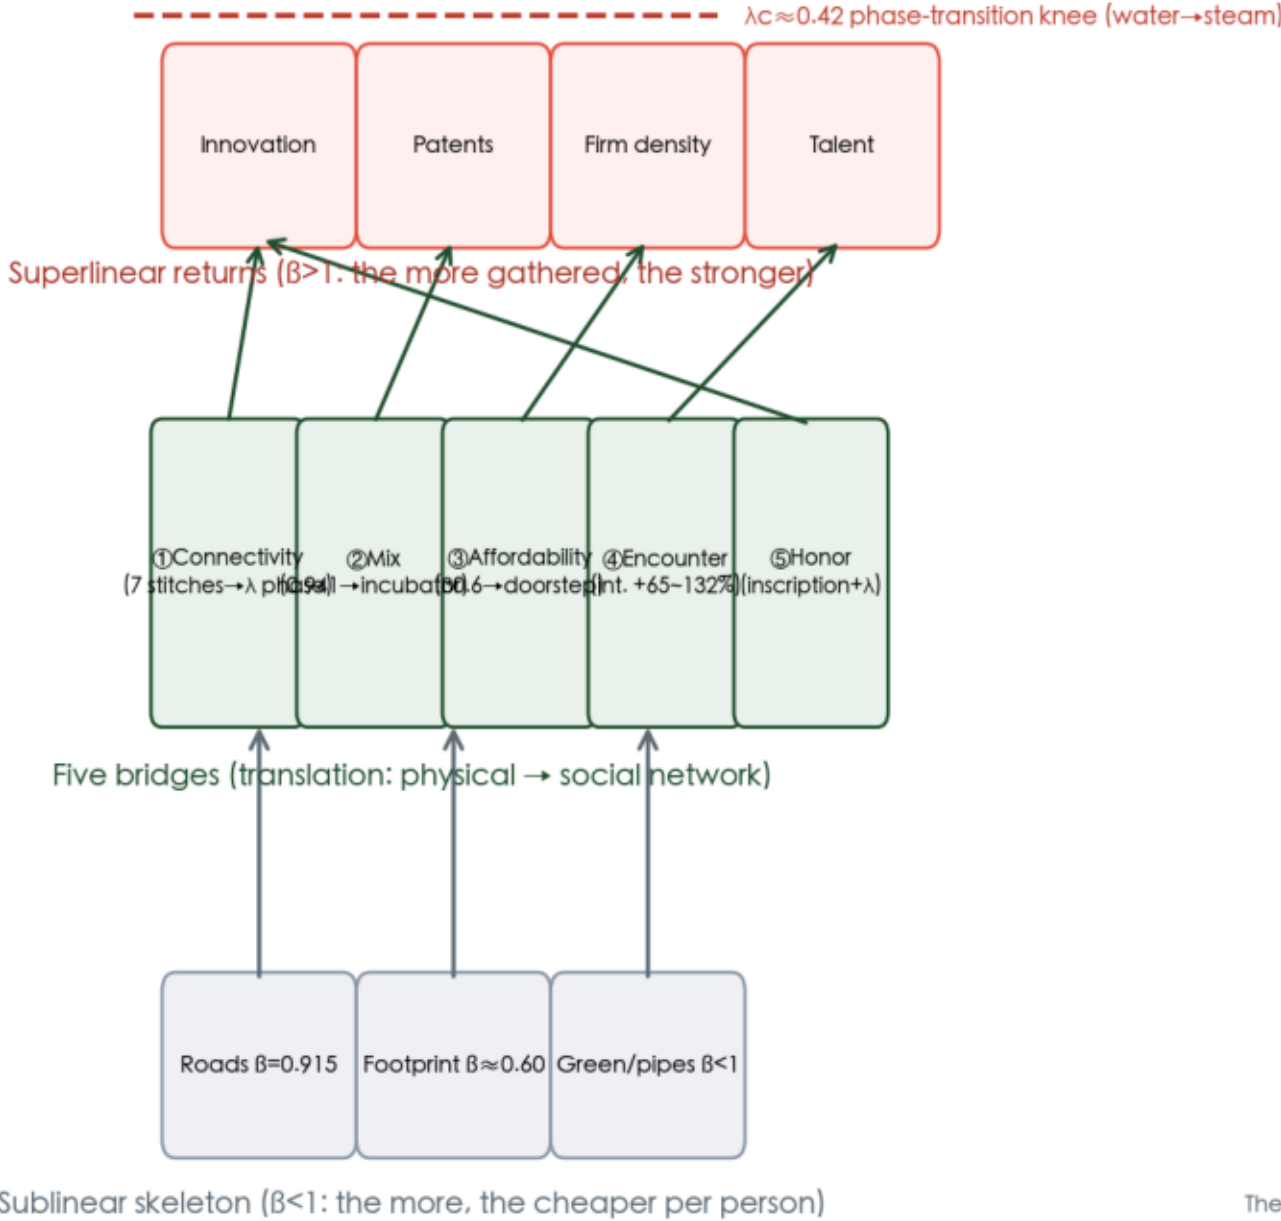

Fig.5 · Core metrics & evidence

Sources: ~60 public records (see sources.json ecosystem entry); red = variables lacking official measurement

Fig.6 · Ecosystem map

Fig. · The sublinear→superlinear transmission map (the scientific heart)

"Bend the curve toward every citizen"

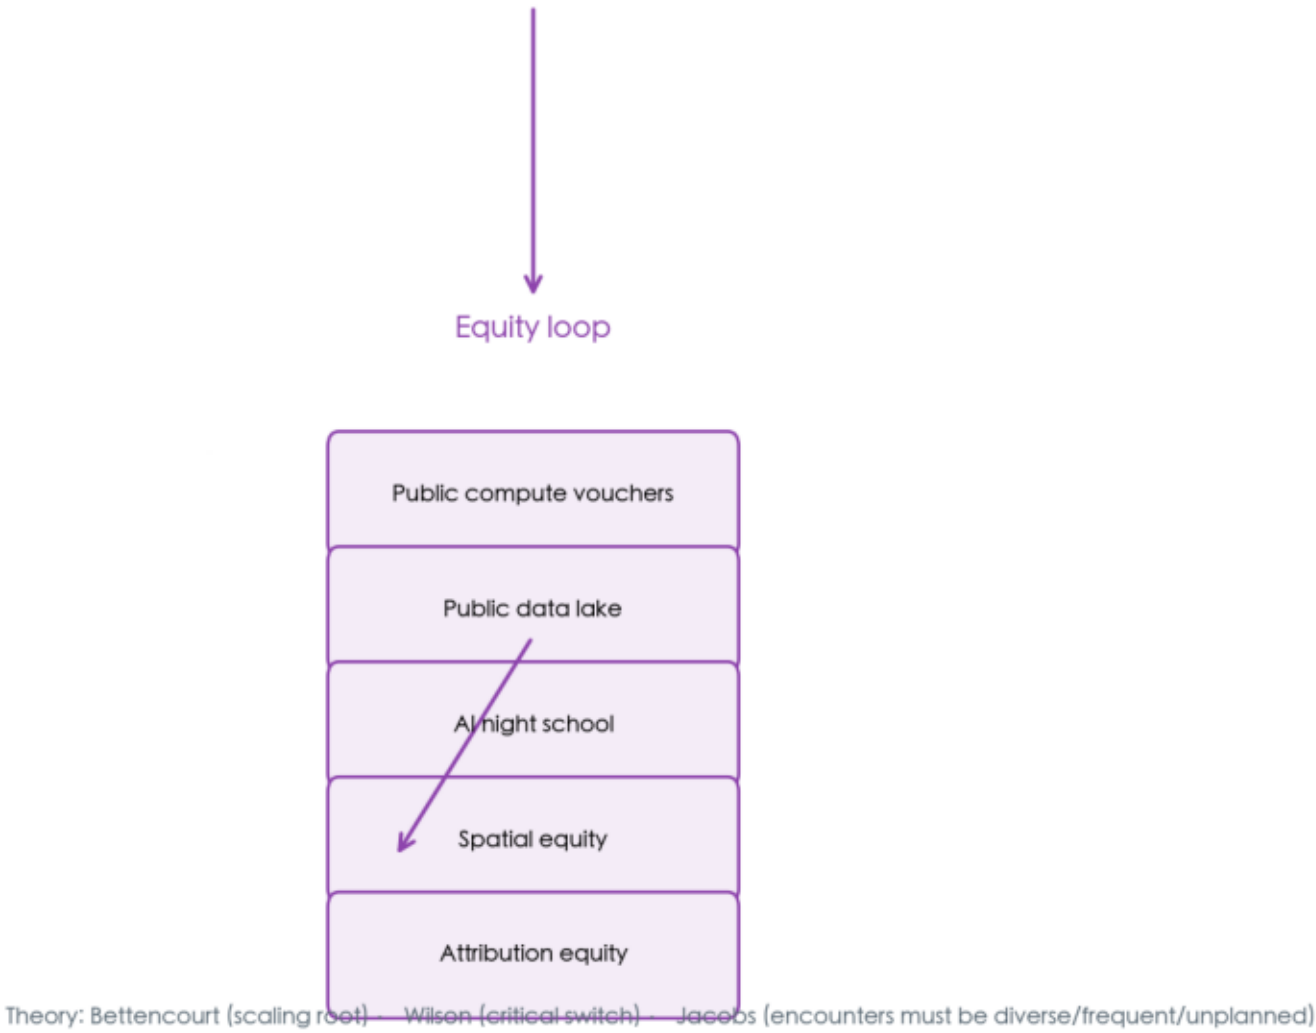

Fig.7 · Transmission map (five bridges + equity loop)

Fig. C8-C10 · Scaling deviation / employment balance / health factor (threshold system)

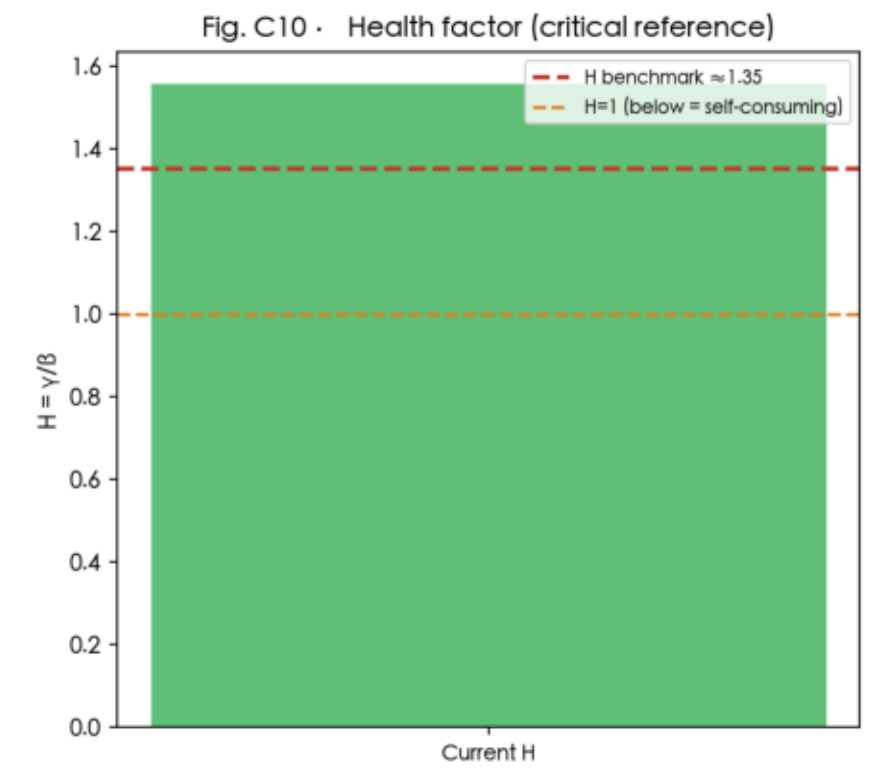

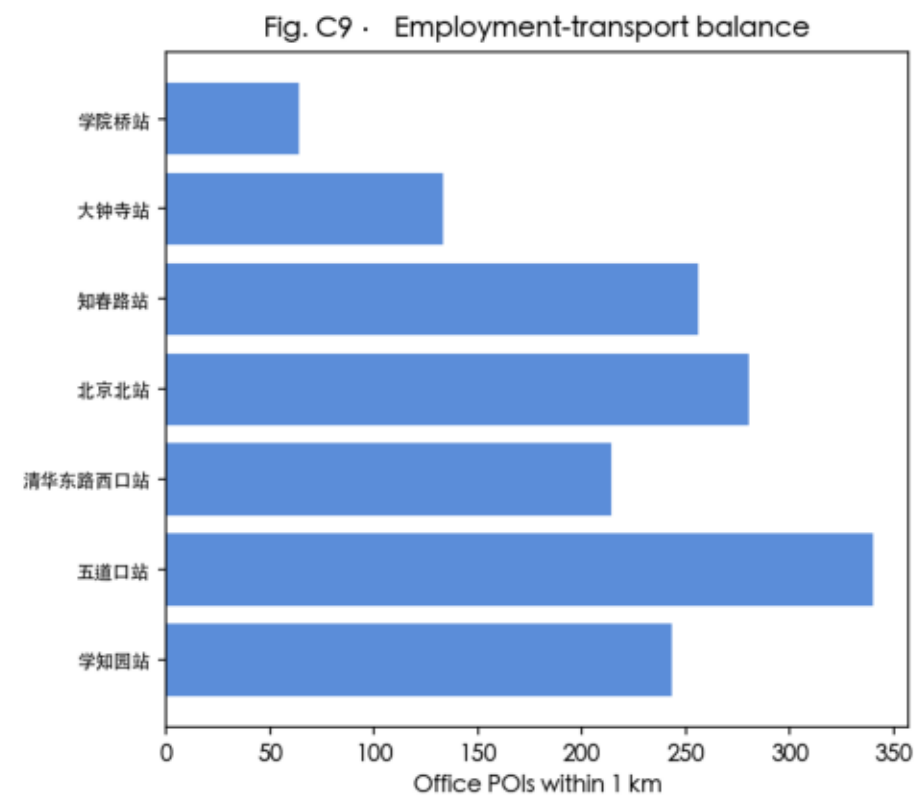

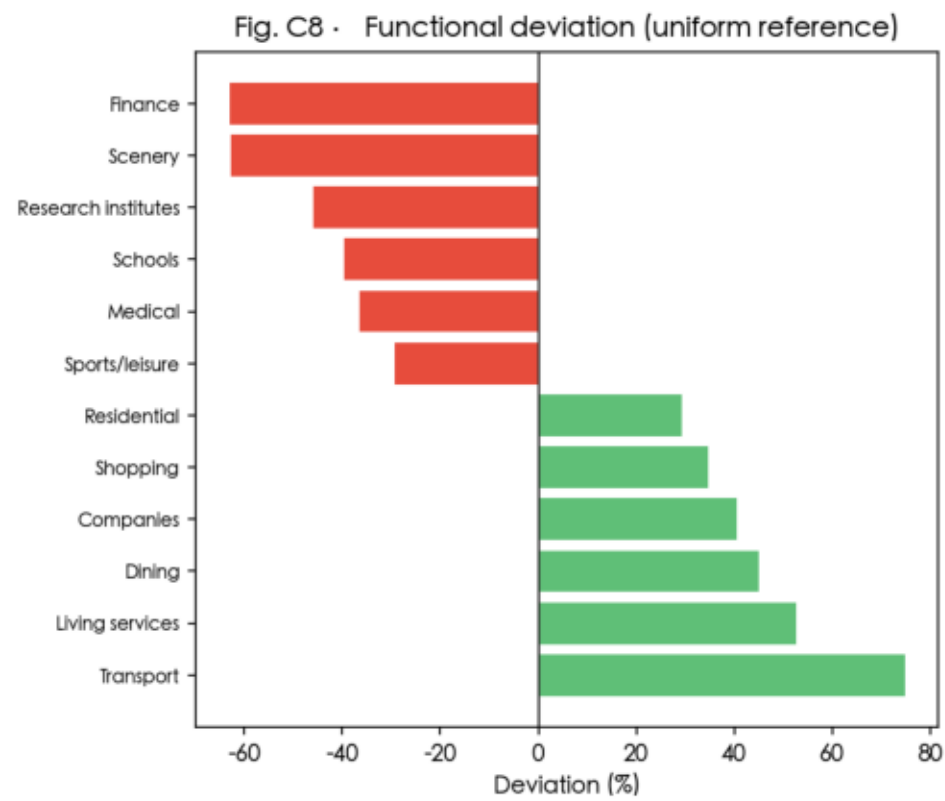

Fig.8 · Deviation / employment balance / health factor

Design task responses

THE EMERGENT BELT · JINGZHANG HYPER LINE

- agent.1 Naming/logo: THE EMERGENT BELT; HYPER STACK/ORIGIN/FRONT; logo = the superlinear line
- agent.2 Ecosystem cases (7): King's Cross / Kendall Sq / Stanford / Yuehai / Shibuya / Cambridge / Rothschild
- agent.3 10 scenario cards (4 industrial tests) + 5 personas
- agent.4 Three pilgrimage landmarks: Origin / Phase Plaza / Interface Plaza
- agent.5 Narrative: 1909 Y-switch self-built railway → 2026 superlinear AI agglomeration
- agent.6 Operations: dev festival / phase forum / open test seasons / honor wall (conceptual)

Quantified diagnosis & design targets

THE EMERGENT BELT · JINGZHANG HYPER LINE

- Wilson λ : core 2/5 connected; Zhongzhiyuan×Dazhongsi $\lambda=0.015$ deeply subcritical
- 7 spine gaps → stitching = phase transition
- Space syntax: +132% Beijing North, +102% Dazhongsi, +65% Wudaokou
- Fractal $D=1.746$ (healthy 1.6–1.8); intersections 132.9/km²; POI 25,476
- Jobs-housing gap: residential 16.5% → talent apartments (concept)
- POI gaps: Zhongzhiyuan tourism/edu/finance; Origin medical; Dazhongsi research/edu

Phasing & risk (conceptual)

THE EMERGENT BELT · JINGZHANG HYPER LINE

- Near (1–3y): spine stitching + Dazhongsi; mid (3–5y): Origin; long (5–10y): Zhongzhiyuan
- Pending: official redlines/regulatory/heritage/inventory/pipelines → full recalculation
- Rights: locally generated; naming needs trademark/font clearance; no PII or unauthorized assets
- Boundary: does not replace formal planning; no confirmed government arrangements
