

JINGZHANG

ENCOUNTER

COMMONS

LET DENSE TALENT CREATE MEANINGFUL CONNECTIONS.

AI MATCHES TASKS, NEVER PEOPLE

PEOPLE DECIDE ENTRY AND EXIT

CONCEPT / STOPPABLE

How to Read This Civic Field Manual

This is not a promised master plan. It is a public-space protocol that can be tested, stopped, handed off, and recomputed.

01 VERSION

v1.2 / feixukeji / Codex

02 BILINGUAL

Chinese and English page counts, figures, metrics, and warnings are isomorphic

03 BOUNDARY

Overall and key-area geometries are provisional rough geometry

04 AUTHORITY

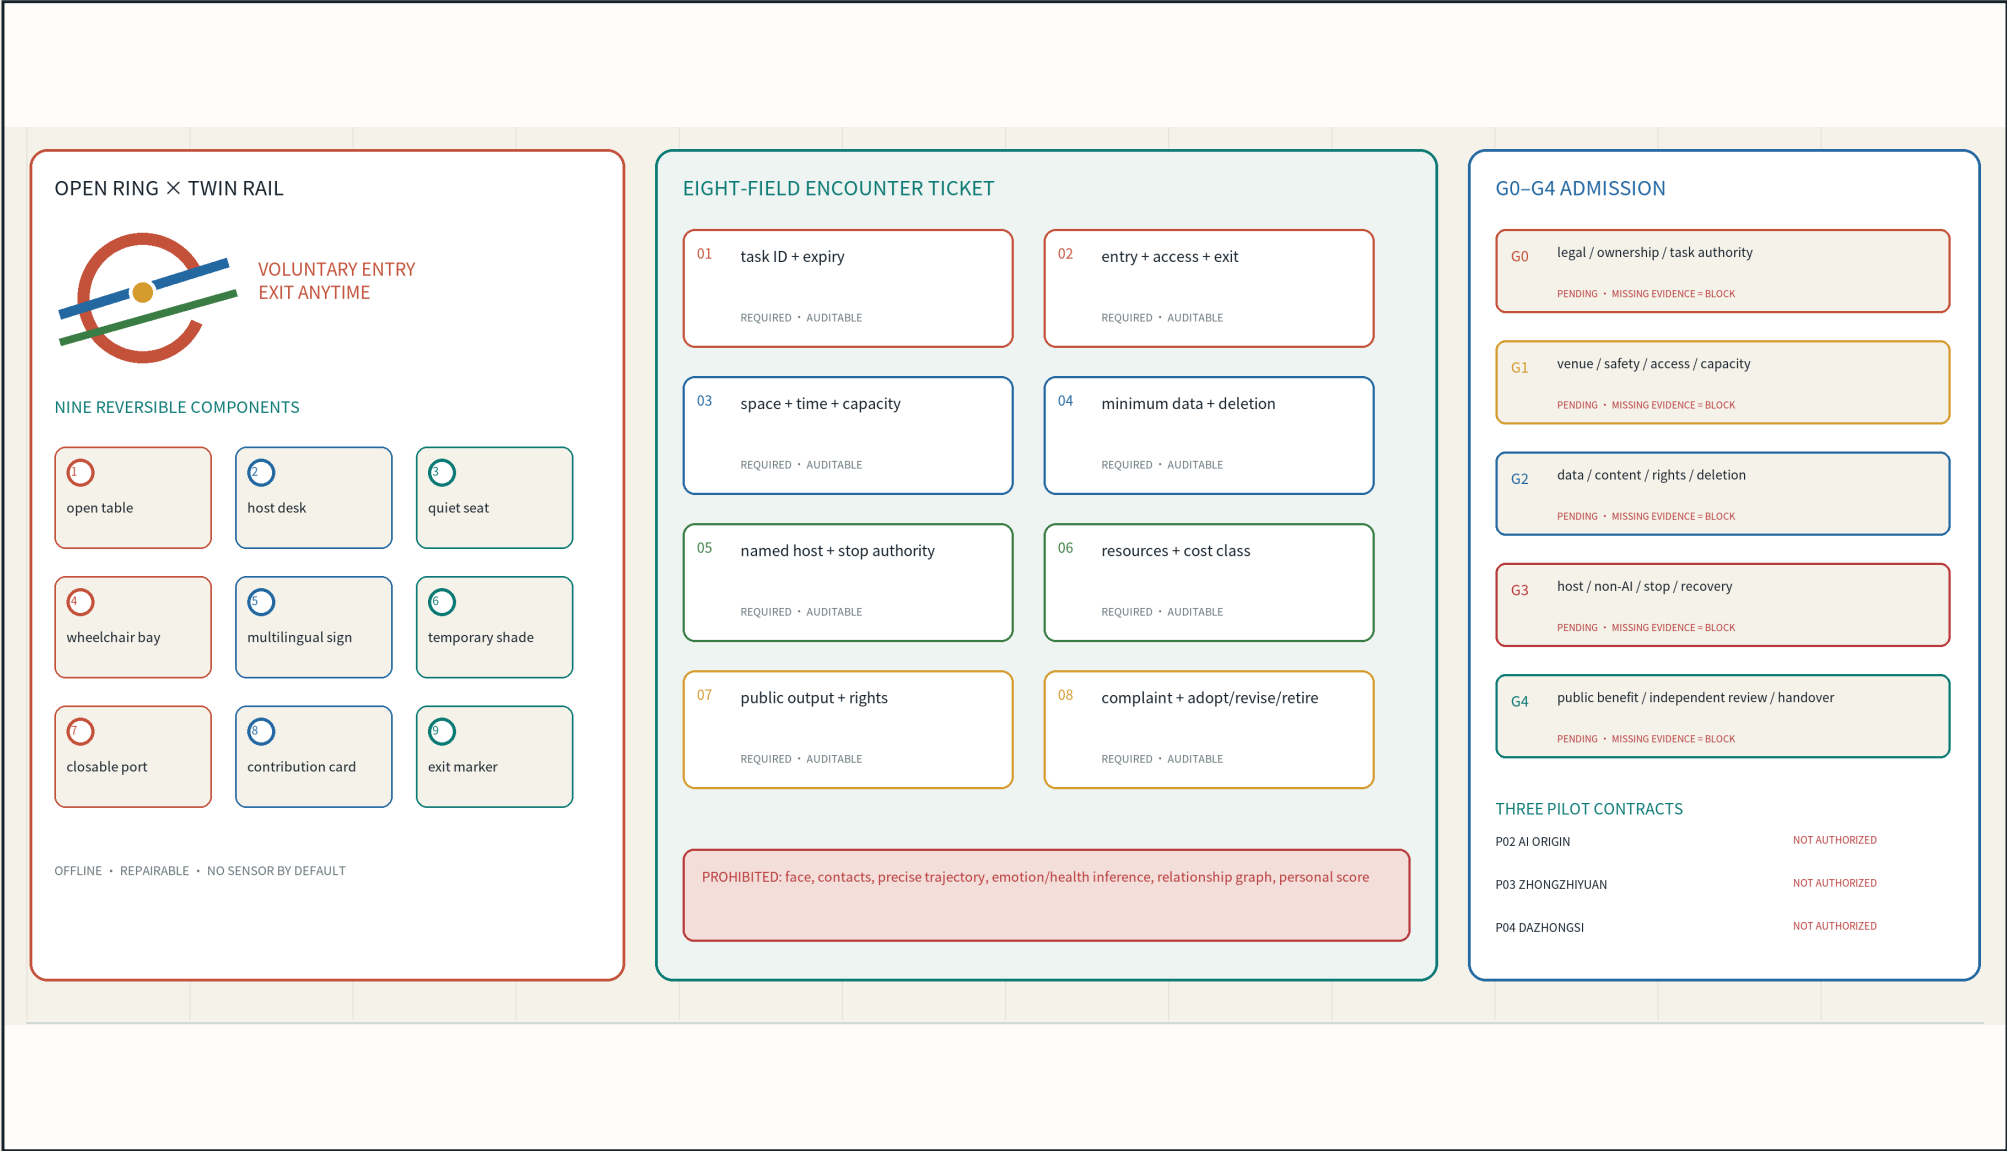

All three pilot contracts are not_authorized with null performance

05 STATUS

Concept advice; not statutory planning, professional design, or government approval

An Intelligent Commons That Does Not Identify People

AI matches public tasks, spaces, times, and authorised resources; people decide whether to enter, travel together, and exit.

JUDGMENT

No identification and no profiling

Eligibility, participation, and scaling stay human.

MECHANISM

Eight fields + nine components + five gates

Entry, accountability, stop, and output form one audit trail.

BLOCK

No host or equivalent path means stop

Hand off to venue, fire, access, and data owners.

Declare Evidence Status Before Drawing Space

Facts, inferences, and field-check items must not speak with the same graphic voice.

01 PRIMARY

Public announcement, Agent taskbook, repository standards, and Haidian government pages

02 LOCAL BASELINE

Phase I 2.5 km/16.8 ha is open; Phase II plan and construction states are recorded separately

03 MECHANISMS

Six primary cases transfer mechanisms, never authority, scale, or performance

04 GAPS

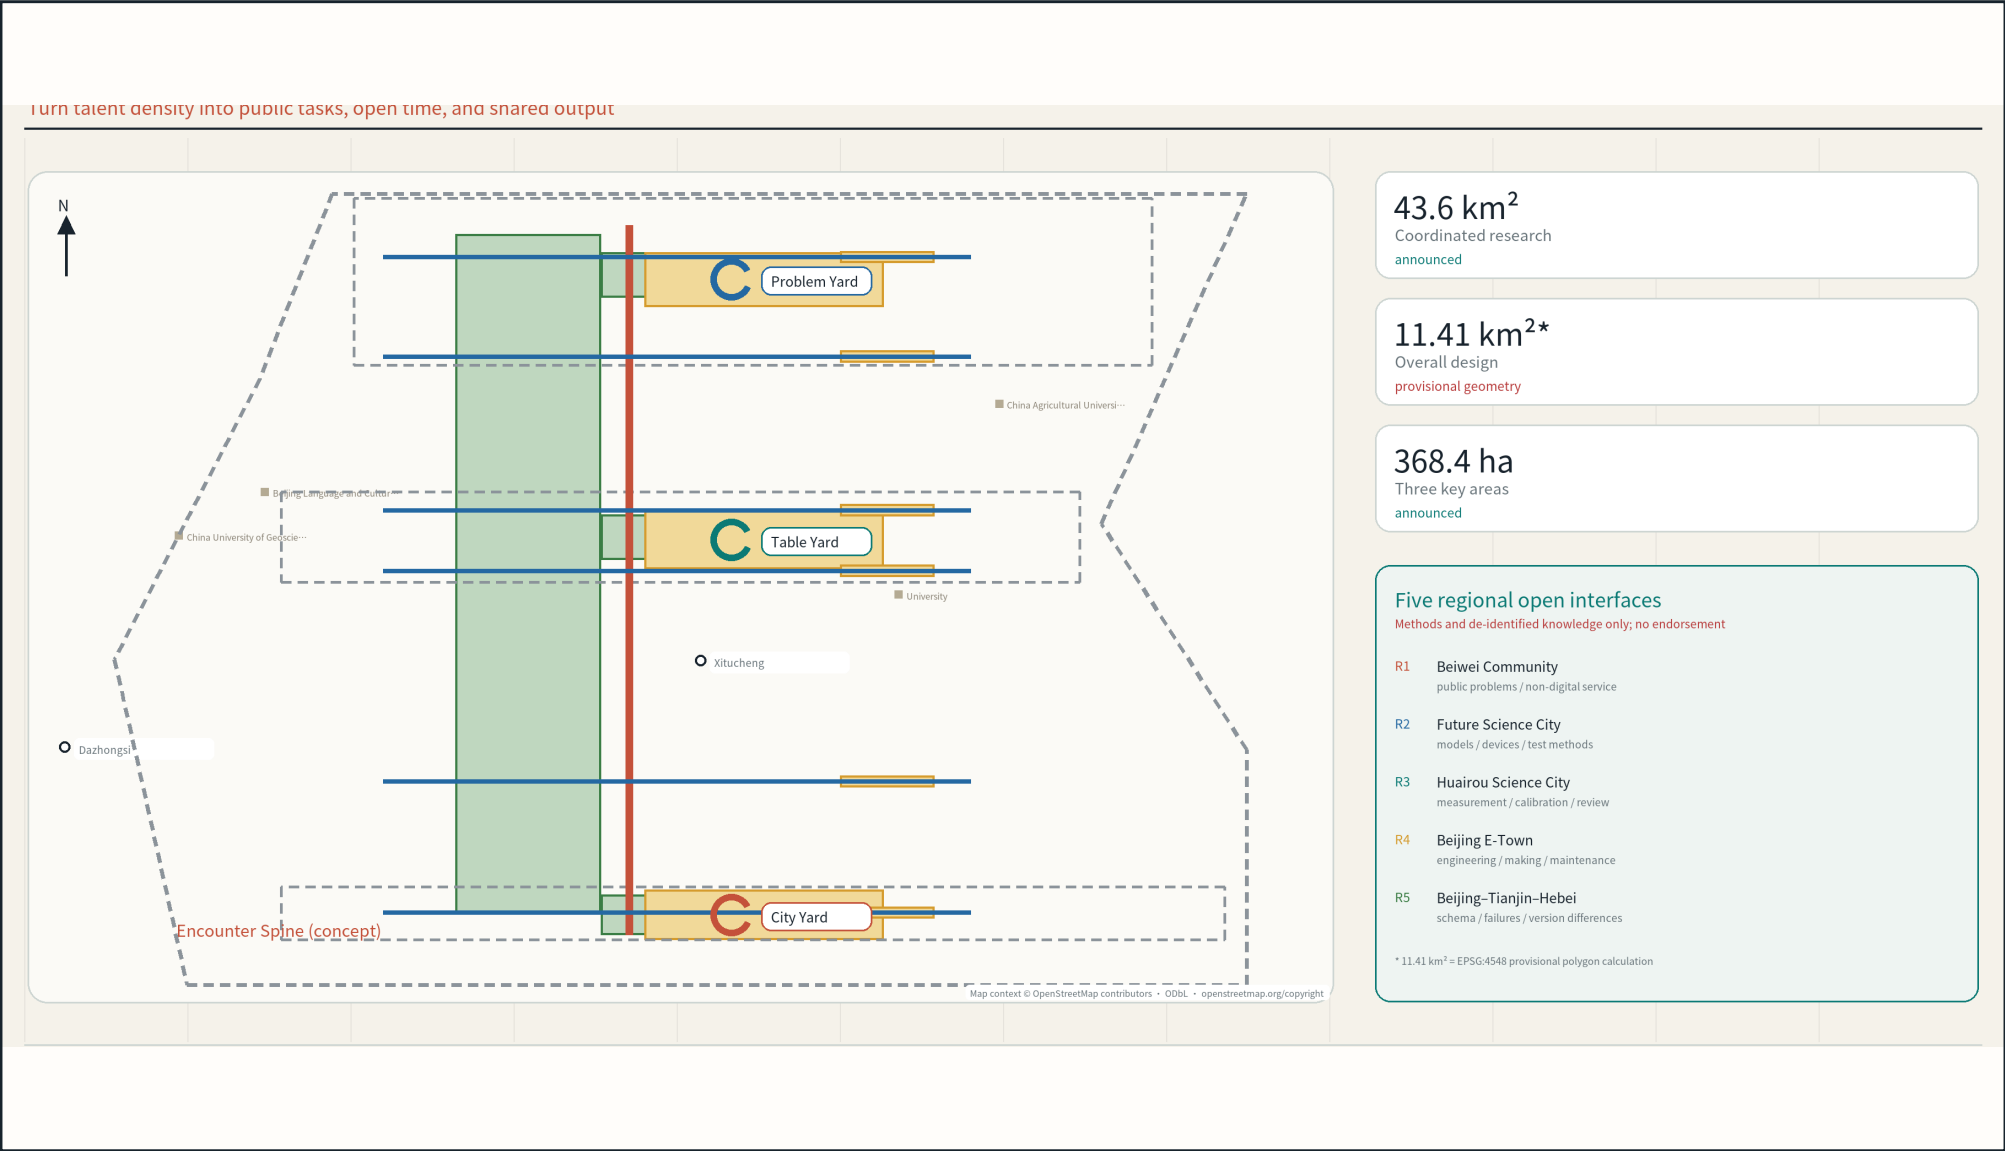

Official polygon, as-built entrances, ownership, heritage, transport, utilities, cost, and operating agreements

05 HARD RULE

A critical unknown blocks launch, publication, and scaling

Three Scope Levels Answer Three Different Questions

The strategic level links resources, the system level organises services, and key areas test prototypes; they are not one statutory boundary.

COORDINATE

43.6 km2

Announced regional coordination study area.

SYSTEM

Approx. 11.4 km2

Provisional geometry computes 11.41 km2; not an official polygon.

PROTOTYPE

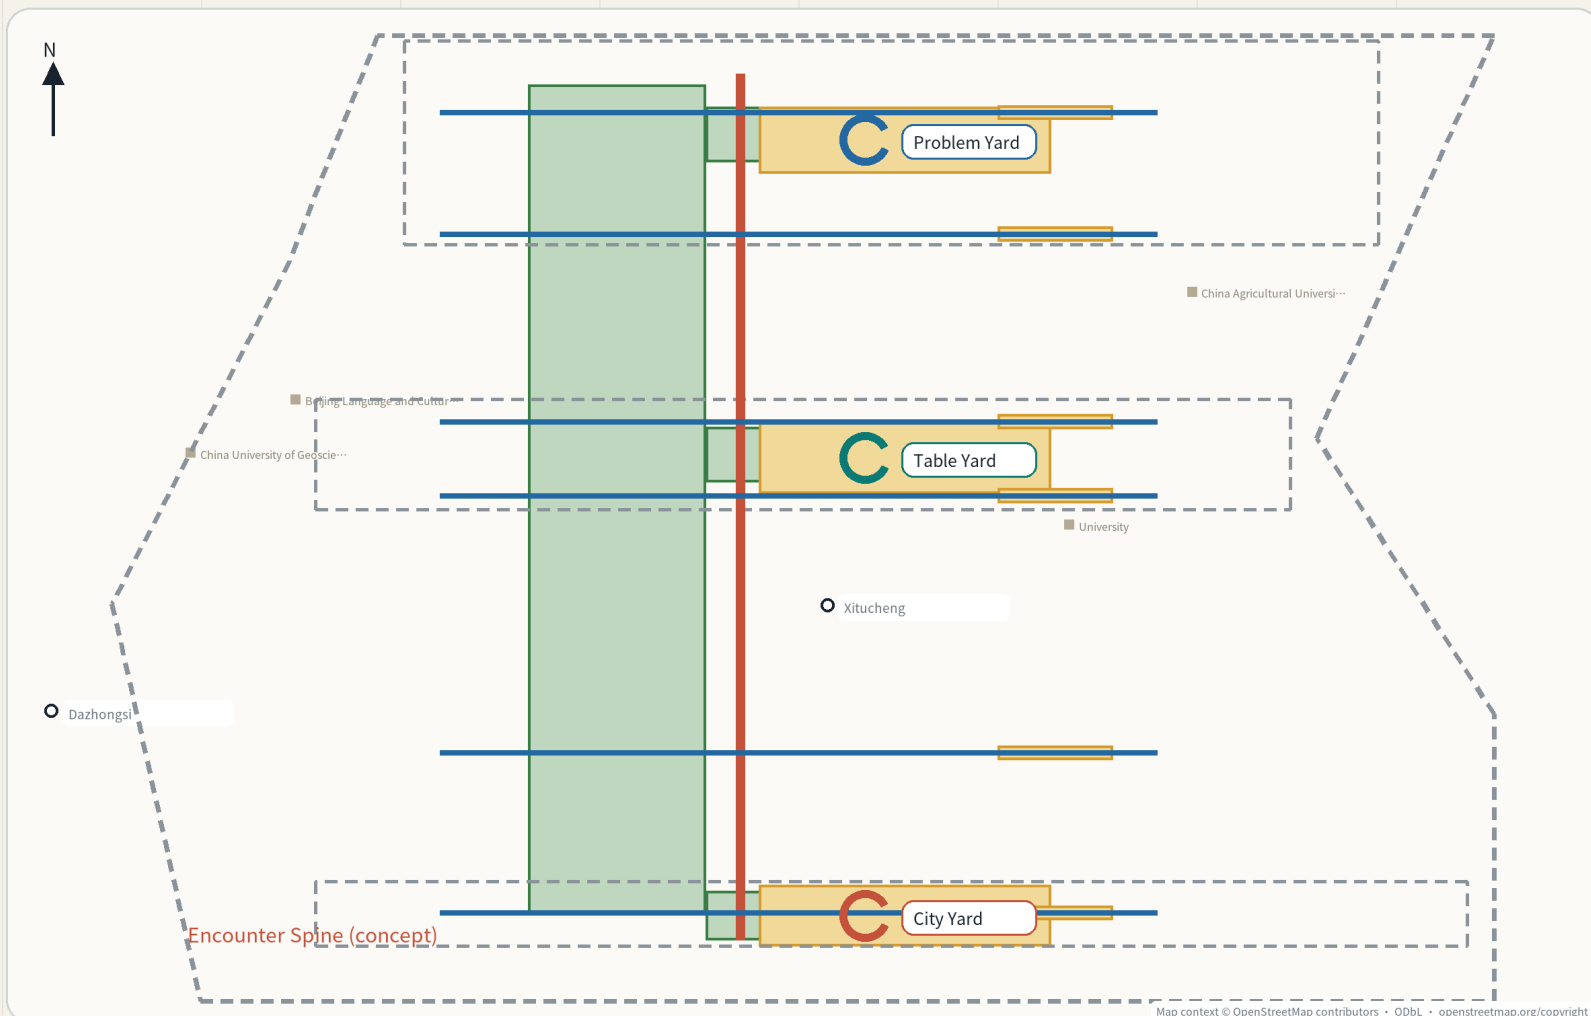

368.4 ha

Three announced areas; locations await official data.

One Spine, Three Commons, Two Wings, Six Seams

The Encounter Spine is a service and programme sequence, not a new road; six seams are field-audit questions.

Turn talent density into public tasks, open time, and shared output

43.6 km²
Coordinated rese
announced

11.41 km
Overall design
provisional geometry

368.4 ha
Three key areas
announced

Five regional

- R5** Beijing-Tianj
schema / failures

* 11.41 km² = EPSG:4548 pr

SPINE

Public space + service + programme

Organised by time and
authority, never as an
engineering reserve.

COMMONS

Verify / co-create / exchange

Three distinct entry, threshold,
core, and exit sequences.

SEAMS

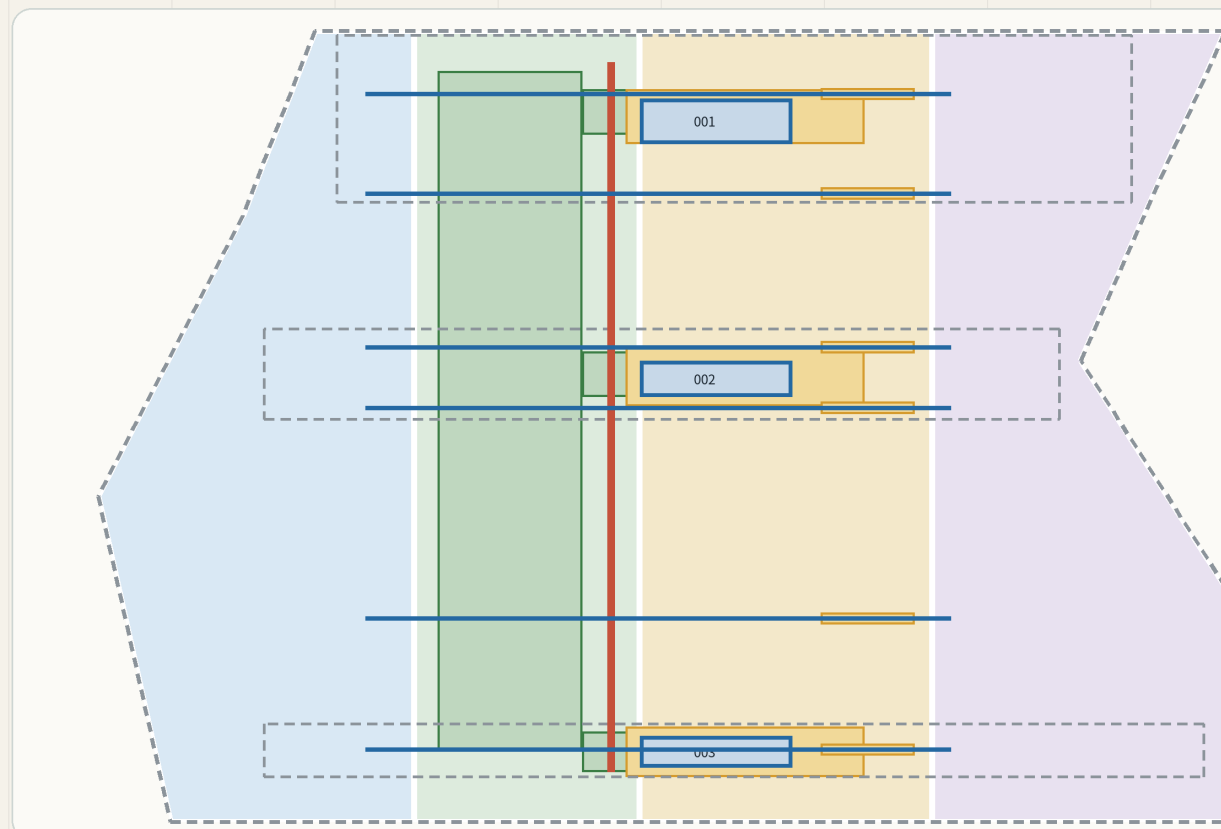

Arrive - cross - enter - stay - exit

Any safety-critical unknown
withdraws the connectivity
claim.

Open Protocol First, Permanent Works Later

Land-use overlays and building envelopes screen carriers; they are not surveys, statutory land use, or retain-alter-remove decisions.

Complete coverage for topology checks; not existing, ownership, or statutory land use

Functional research overlay

0802 R&D + open collaboration

1401 Park + shared open space

05 Industry + professional services

0702 Community + youth services

Carrier decision gate

01 Ownership + current use

02 Structure / fire / MEP

03 Heritage / access / noise

04 Operator + maintenance funding

Remain unknown

FAR, height, total floor area, parking, demolition, underground works

Decide only after professional evidence

ORDER

Protocol -> reversible kit -> professional works

Each step requires fresh venue, fire, and ownership evidence.

LIMIT

Four overlays + three carrier types

Used only for topology and functional coordination.

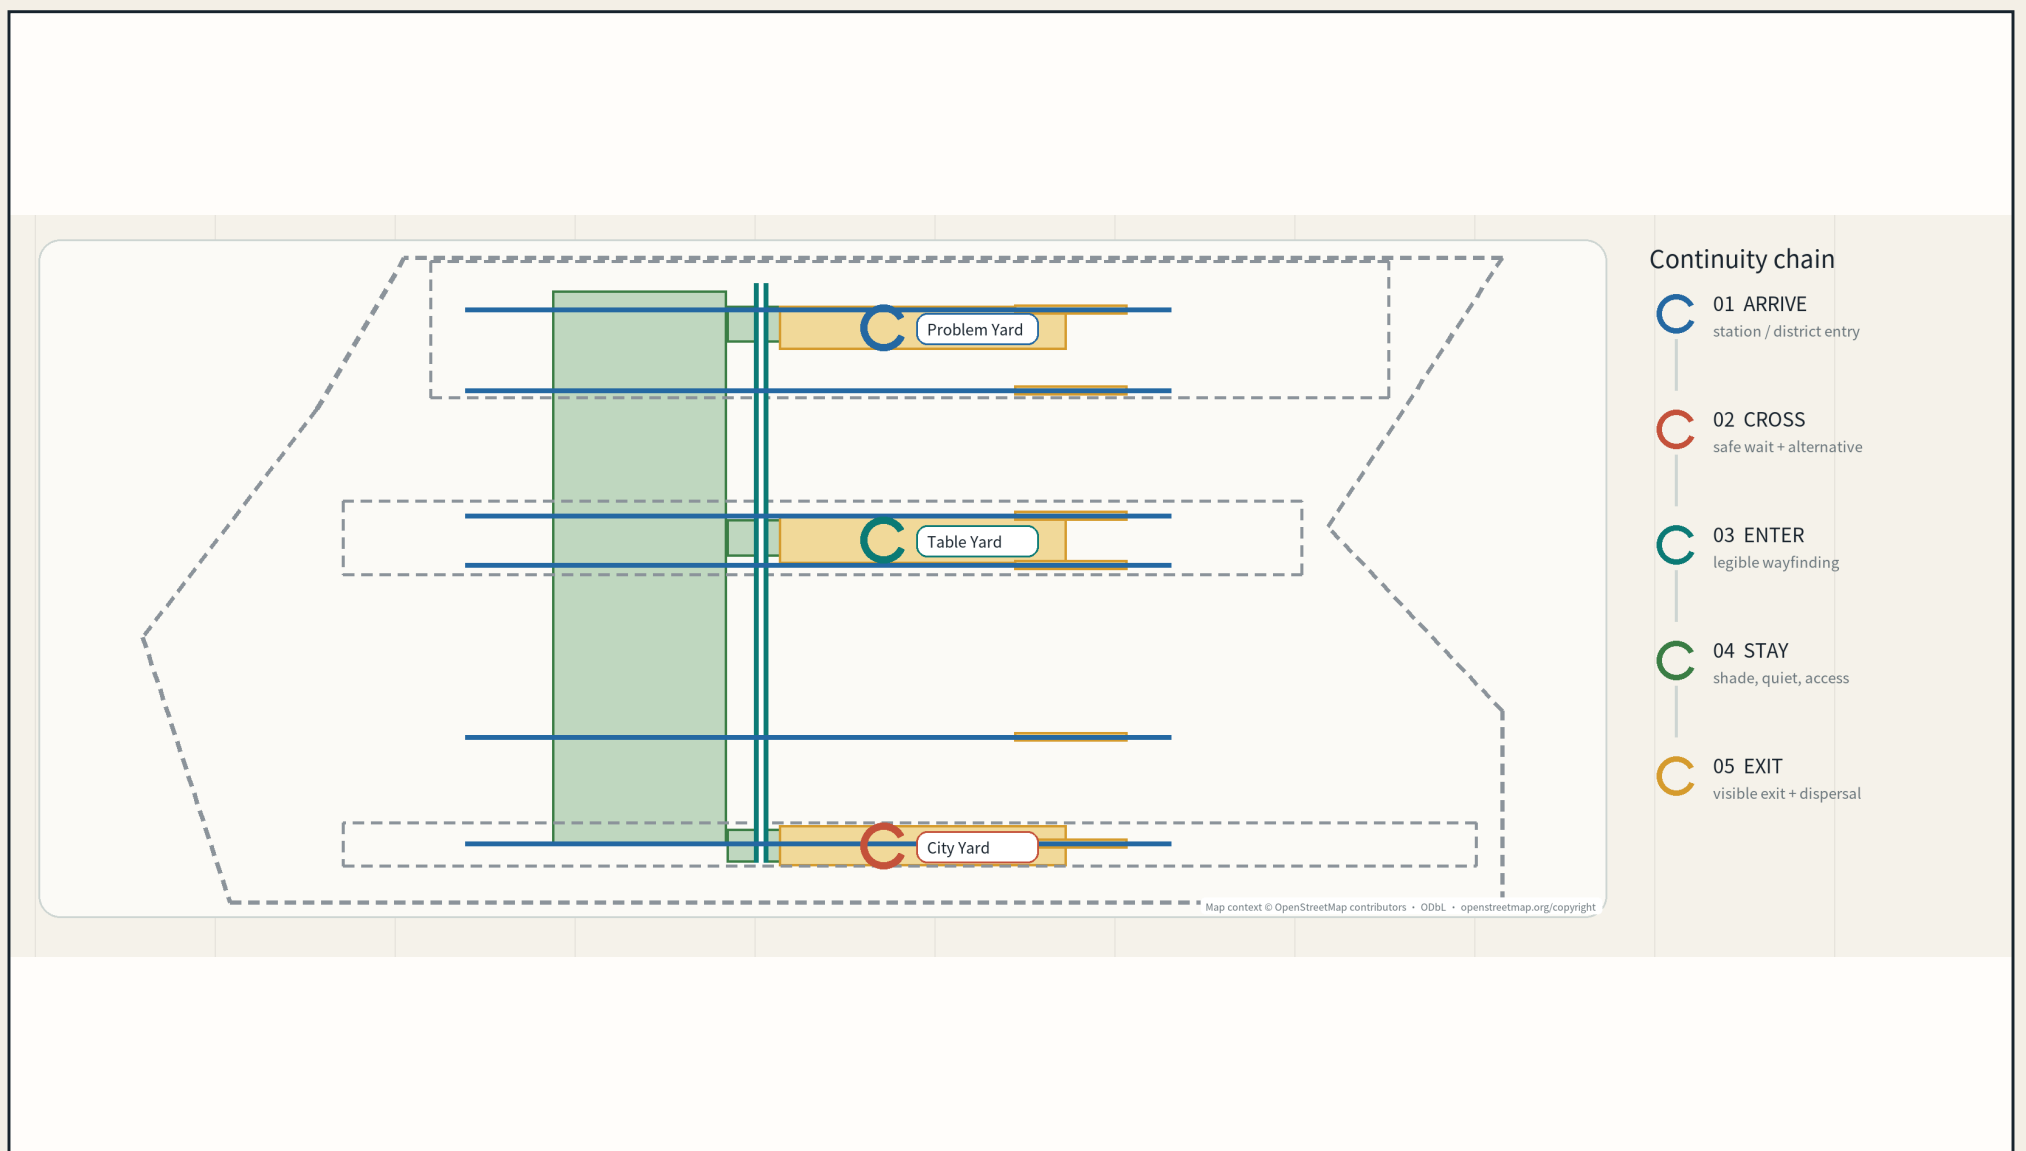

UNKNOWN

FAR / height / parking / removal

Remain unknown without official evidence.

Nine Kilometres Is a Plan Baseline, Not an Operating Promise

Release a route only after obtaining as-built boundaries and entrance registers and verifying access point by point.

KNOWN

**9 km / approx. 70 ha
/ 46 entrances / 9
links**

2024 public plan; 2026 reports
main works in implementable
areas.

INFERENCE

**Six seams are
representative
audits**

They are not the nine planned
links and not new roads.

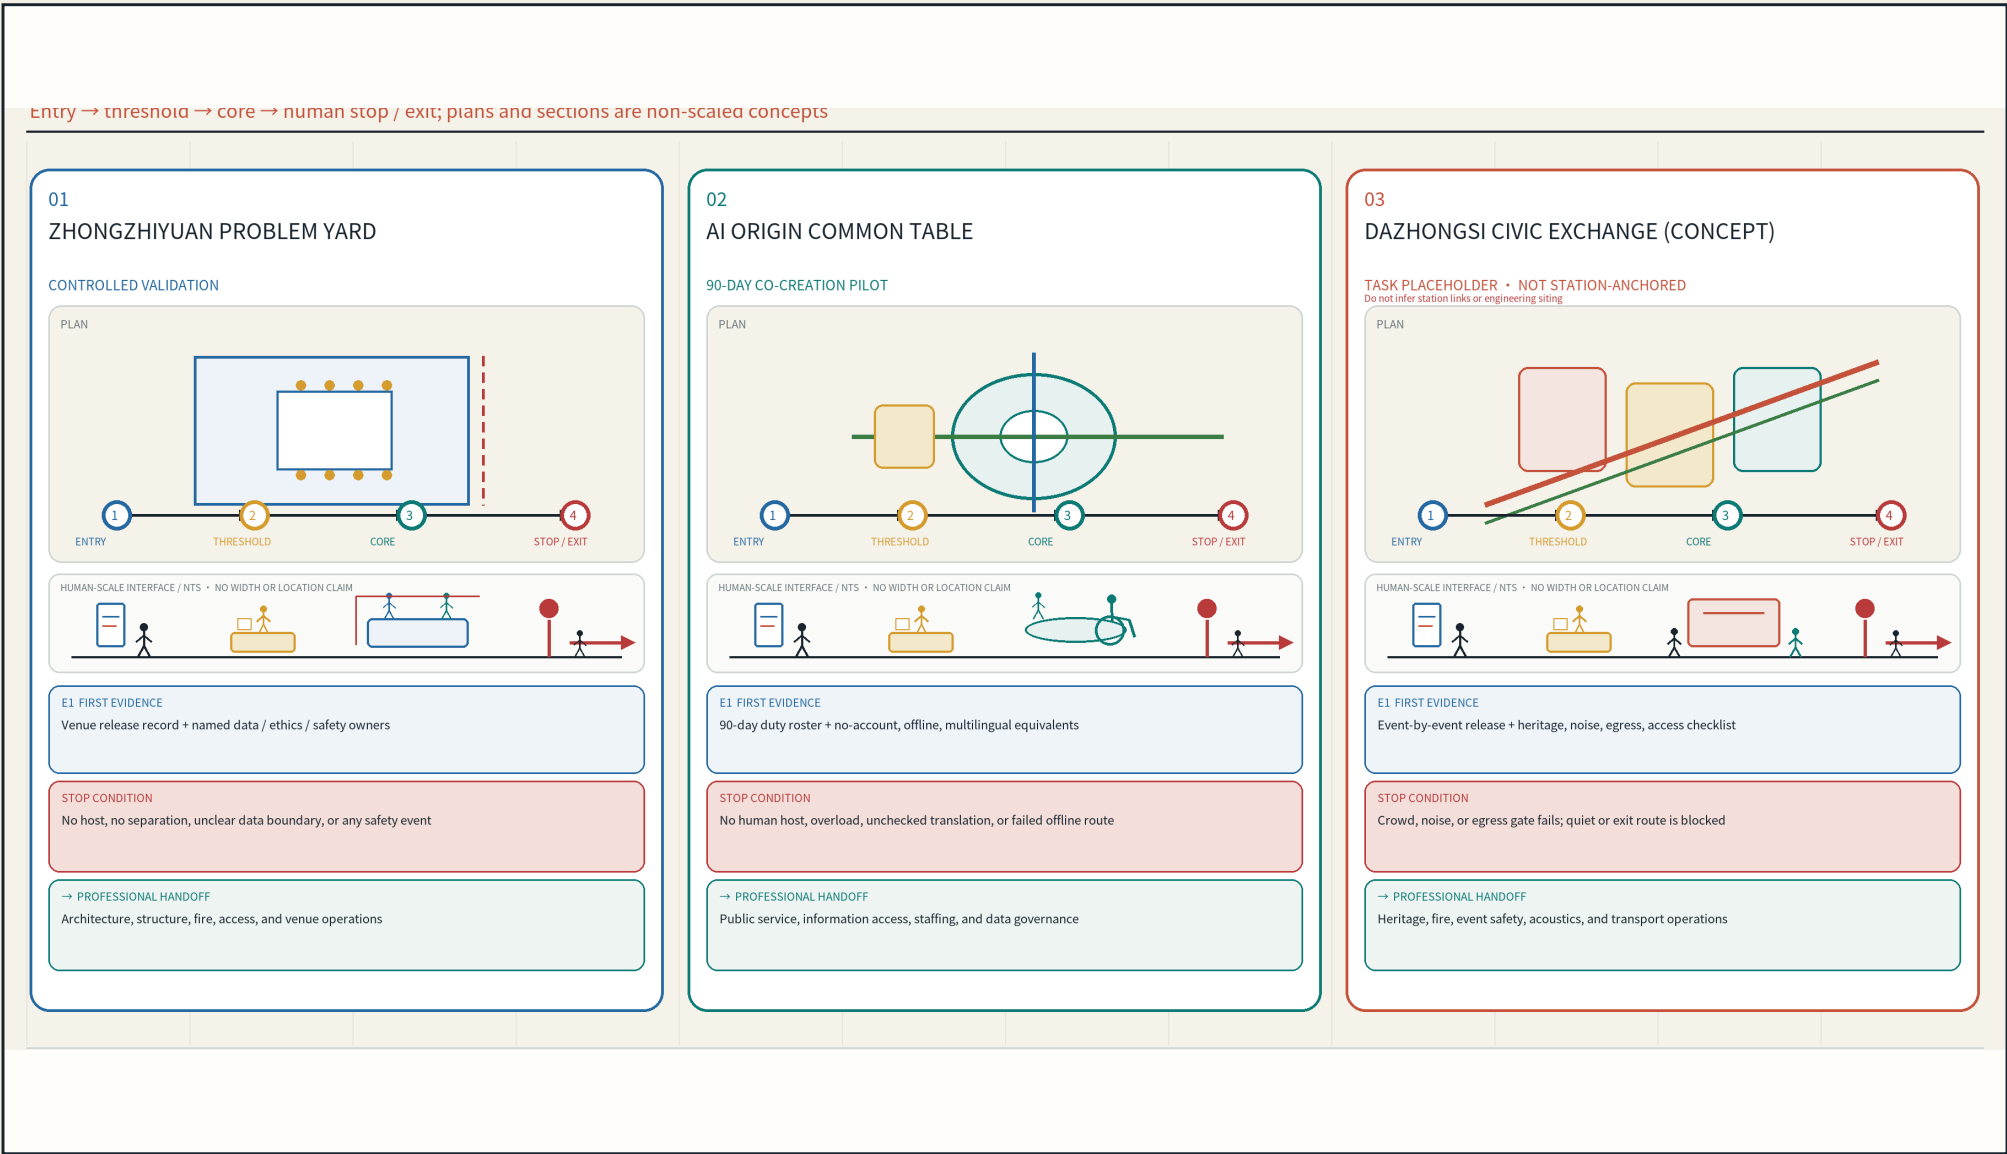

FIELD RELEASE

**As-built register ->
point audit ->
release**

Hours, crossings, width/slope,
lighting, noise, and egress all
matter.

Three Commons, Not One Template Copied Three Times

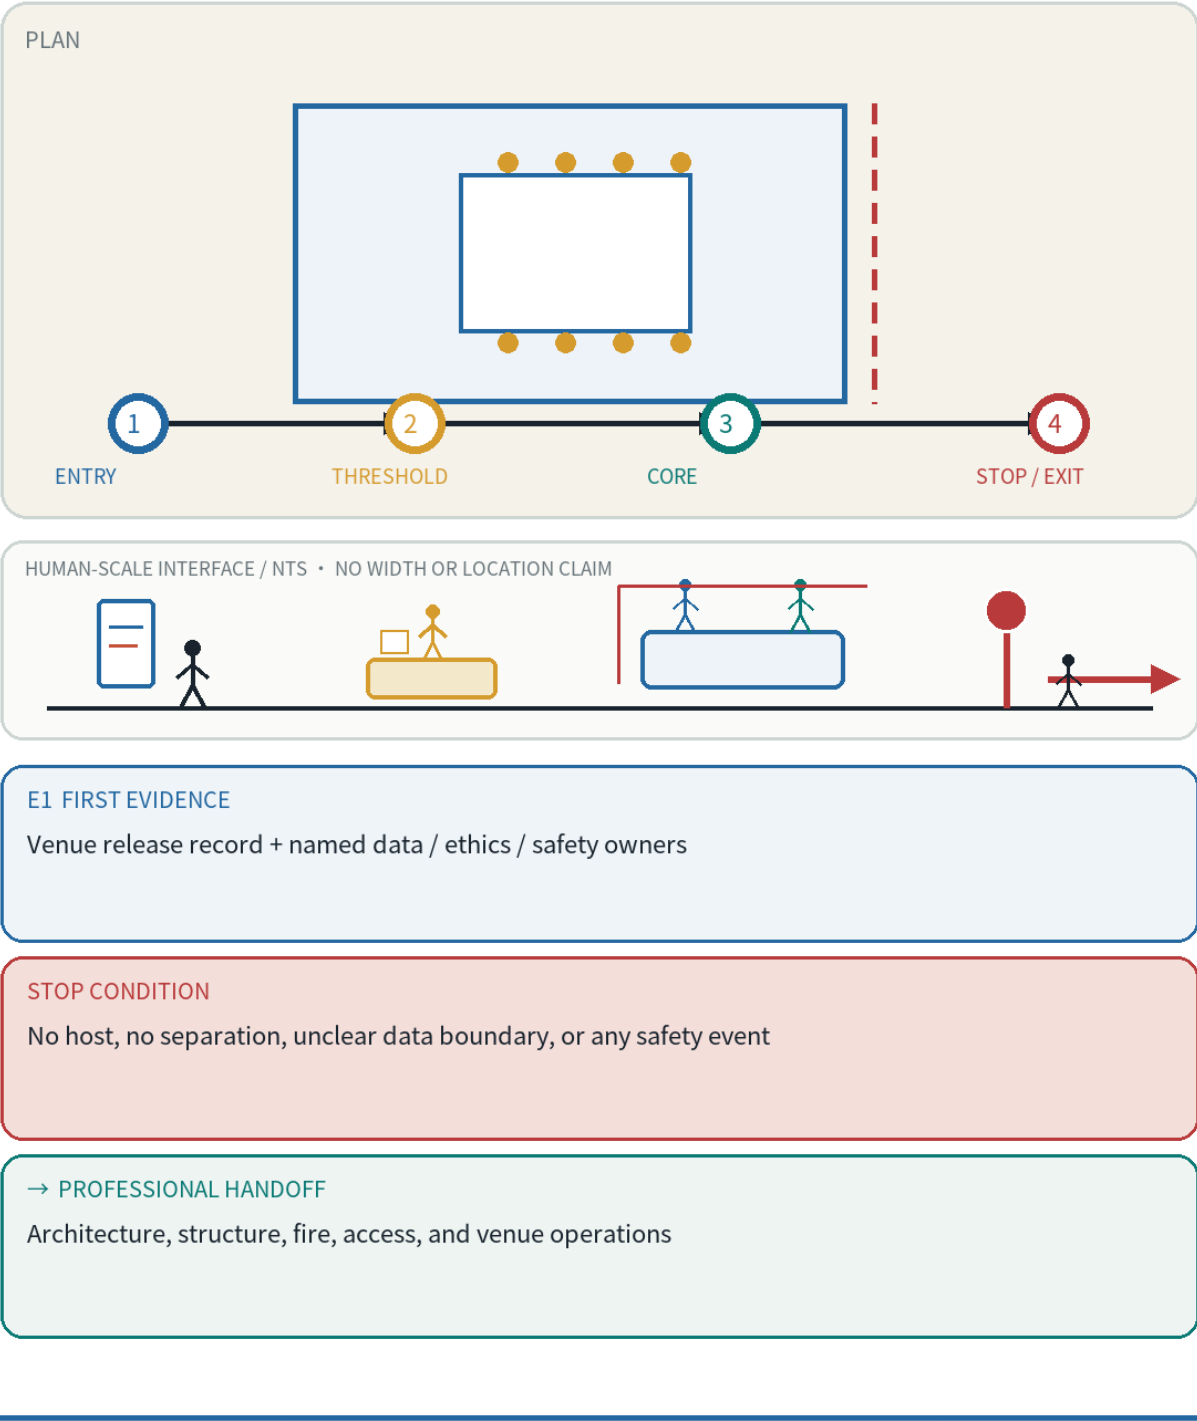

Zhongzhiyuan verifies, AI Origin co-creates, and Dazhongsi exchanges; each has a physical entry, human threshold, stop, and visible exit.

Zhongzhiyuan Common Problem Yard

01 ZHONGZHIYUAN PROBLEM YARD

CONTROLLED VALIDATION

ROUTE

Public entry -> problem threshold -> controlled-test core -> physical stop / exit

FIRST EVIDENCE

Venue release; named data, ethics, and safety owners.

STOP

No duty holder, no separation, unclear data boundary, or any safety event.

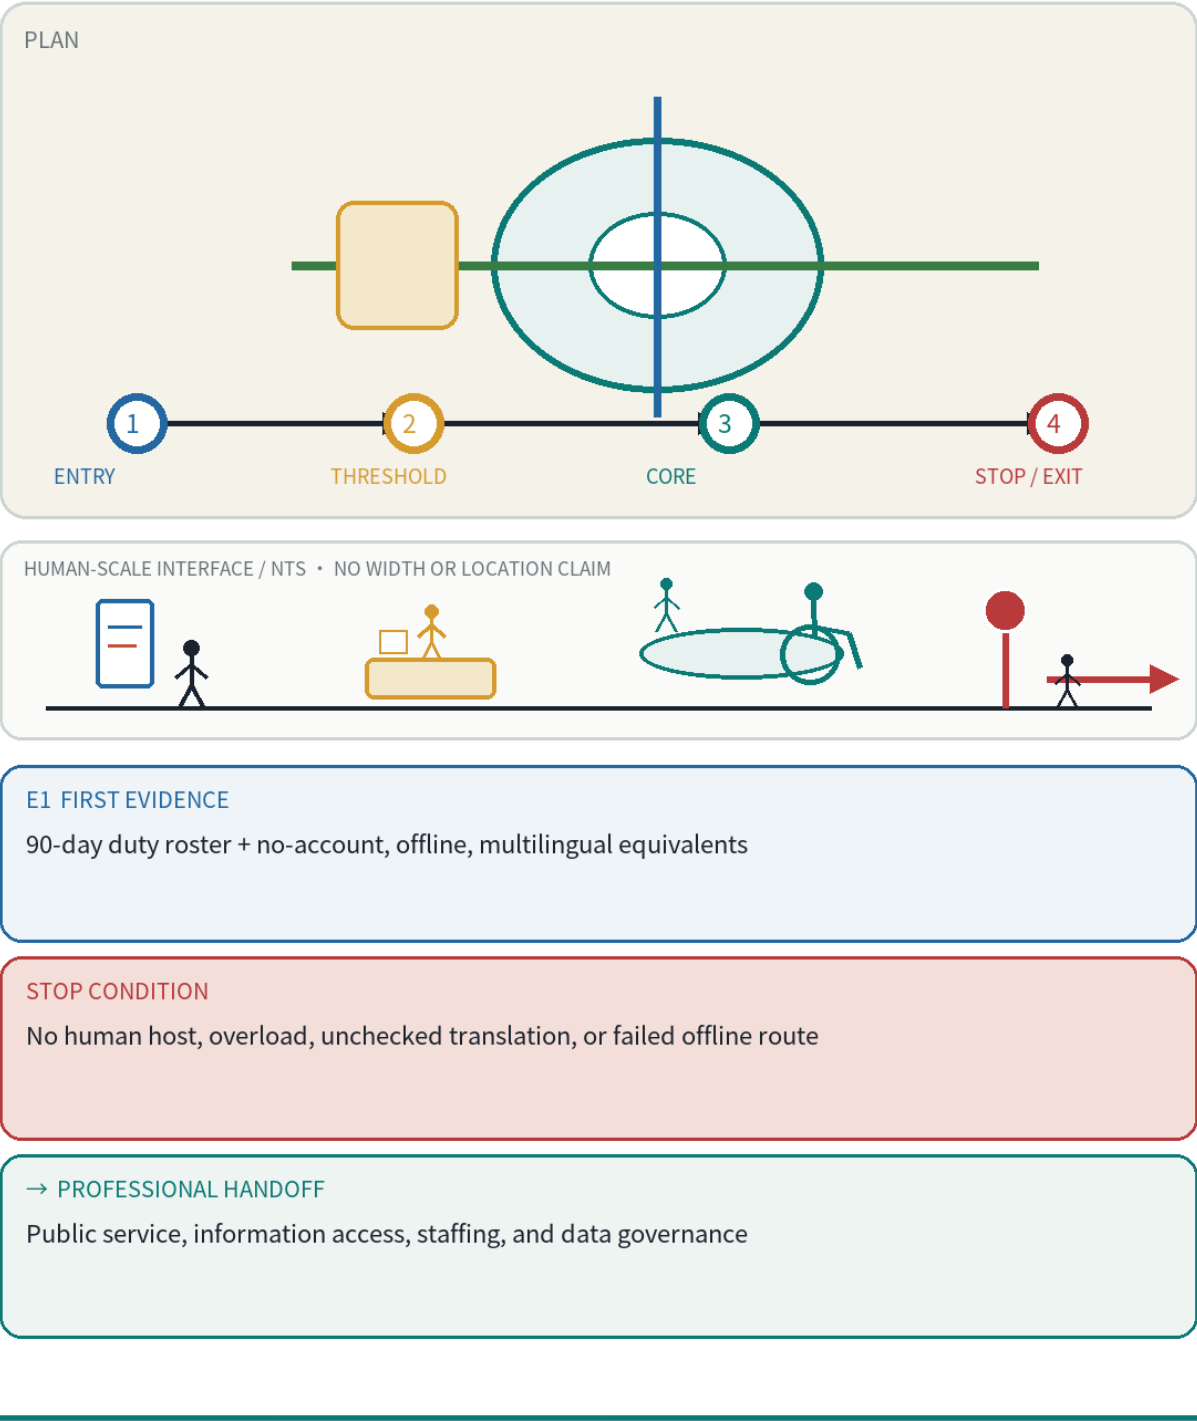

HANDOFF

Architecture, structure, fire, access, and venue operations.

AI Origin Common Table Yard

02 AI ORIGIN COMMON TABLE

90-DAY CO-CREATION PILOT

ROUTE

No-local-account entry -> human-host threshold -> co-creation core -> offline-equivalent exit

FIRST EVIDENCE

Ninety-day roster; no-account, offline, and multilingual equivalents.

STOP

No host, overload, unchecked mistranslation, or failed offline route.

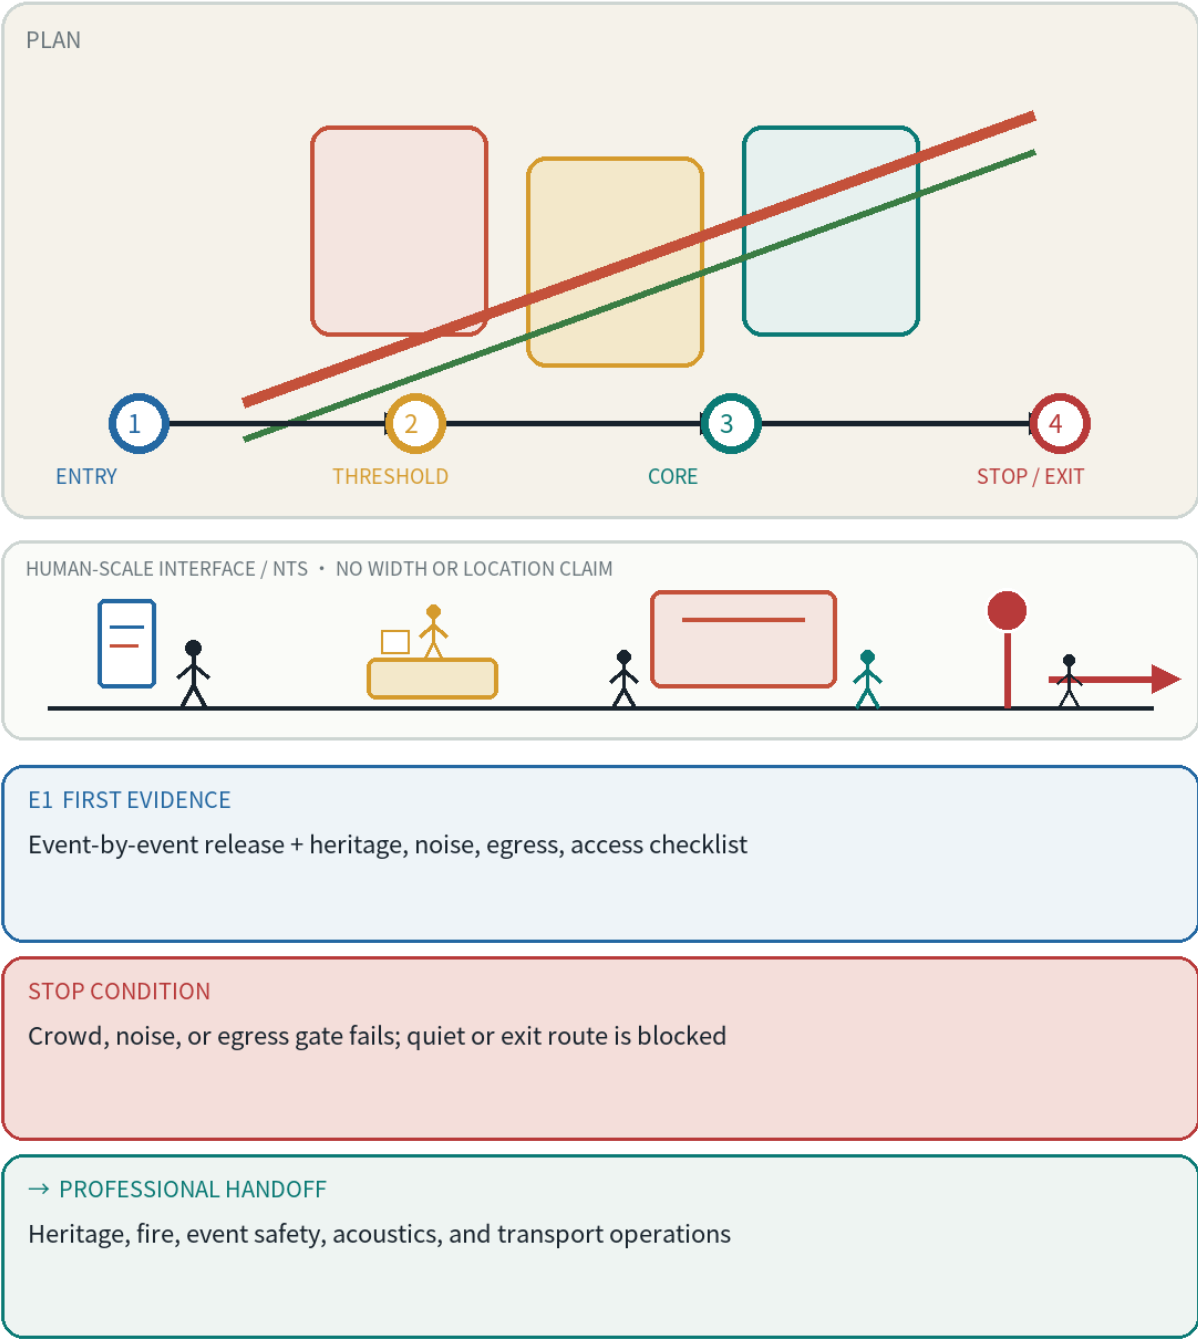

HANDOFF

Public service, information access, staffing, and data governance.

Dazhongsi Common City Yard

03 DAZHONGSI CIVIC EXCHANGE (CONCEPT)

TASK PLACEHOLDER • NOT STATION-ANCHORED
Do not infer station links or engineering siting

ROUTE

Urban entry -> event-release threshold ->
first-use / culture core -> quiet egress

FIRST EVIDENCE

Obtain official scope and a real candidate site,
then check heritage, noise, egress, and access.

STOP

Crowd, noise, or egress limit fails; quiet or exit
route is blocked.

HANDOFF

Planning, transport, heritage, fire, acoustics,
event safety, and community.

One Ordinary Person, Not a User Profile

A first-time international newcomer with limited Chinese, no local account, and an empty phone battery. Ninety minutes is a script to test, not observed performance.

STOP / No host, critical mistranslation or missing source, failed no-account equivalent, blocked accessible exit, or unavailable complaint/deletion.

Twelve Scenarios, Three Offline Replays

S01-S03 are synthetic validation, not field performance; S04-S12 remain pending authorisation.

TEST	S01 Orchestration interoperability		S02 Grounded multilingual service		S03 Accessible event sandbox					
	Fixed fixture / evidence JSON / rollback		Dated sources / refusal / human transfer		Synthetic route-load / stop / restore					
SERVICE	S04 Cross-campus clinic		S05 Mentor hour		S06 OPC compliance clinic		S07 Talent and health navigation			
	Public topic / human release / expiry		No chat retention / mentor confirms / exit		Public policy / professional explanation / not legal advice		No diagnosis / links only / no health record			
COMMONS	S08 Public test partners		S09 Community AI co-design		S10 Cultural guide co-edit		S11 Evening open demo		S12 Annual Encounter Week	
	Ethics and safety first / no approval, no launch		Preserve dissent / delete raw text		Traceable sources / specialist sign-off / withdraw		Time-noise limits / human host / stop		Fresh authority / output index / review	

Advance by Evidence, Never by Calendar Alone

It Is Not Open Unless People Can Exit

The endpoint is not launch. It is the ability to understand, refuse, complain, delete, leave, and leave a verifiable restoration record.

01 PRIVACY

No face, contacts, precise trajectory, emotion/health inference, relationship graph, or personal score

02 SPACE

All boundaries are provisional; recompute when official data arrive

03 OPERATIONS

Named A/R, non-AI equivalent, physical stop, restoration, and retirement are mandatory

04 RIGHTS

Sources, ODbL orientation context, Noto OFL, and original figures are registered

05 NEXT

Real entrance/access walk -> operator verification -> controlled ninety-day pilot
