

Jing-Zhang AI: People, City, Shared Endeavor

One action map for the civic spine, three key areas, and three spatial tests.

Three spatial tests

Each test lands on M / A / P on the map.

- M**

Mixed and incremental renewal

M / Fig. 02: shared active edge
- A**

Low-carbon access network

A / Fig. 04: walking and civic service
- P**

Stayable public life

01-03 / Fig. 03: observation nodes

Spatial key

- Key-area number
01 / 02 / 03
- - - Concept linkage fragment
Network review pending
- M / A / P street-responsive fields
OSM morphology proxy
- - - Provisional overall extent (not parcel/redline)

From spatial moves to use decisions

Three figures, three anchors, one reviewable design loop.

- 01**

Mix first

Fig. 02 / M

Bring different uses together at an active public edge.
- 02**

Make it walkable

Fig. 04 / A

Make walking and civic service the precondition for AI.
- 03**

Observe first

Fig. 03 / 01-03

Place observable, adjustable public-life nodes in all three areas.

□□□ / Design quantities

Overall area	Green	Public space	Key areas
11,412,825 m ²	12.3%	7.3%	3
