AI Pulse Belt · Centennial Jing-Zhang AI Innovation Belt

Site Context & Three-Level Planning Scope

01 区位与三级规划范围

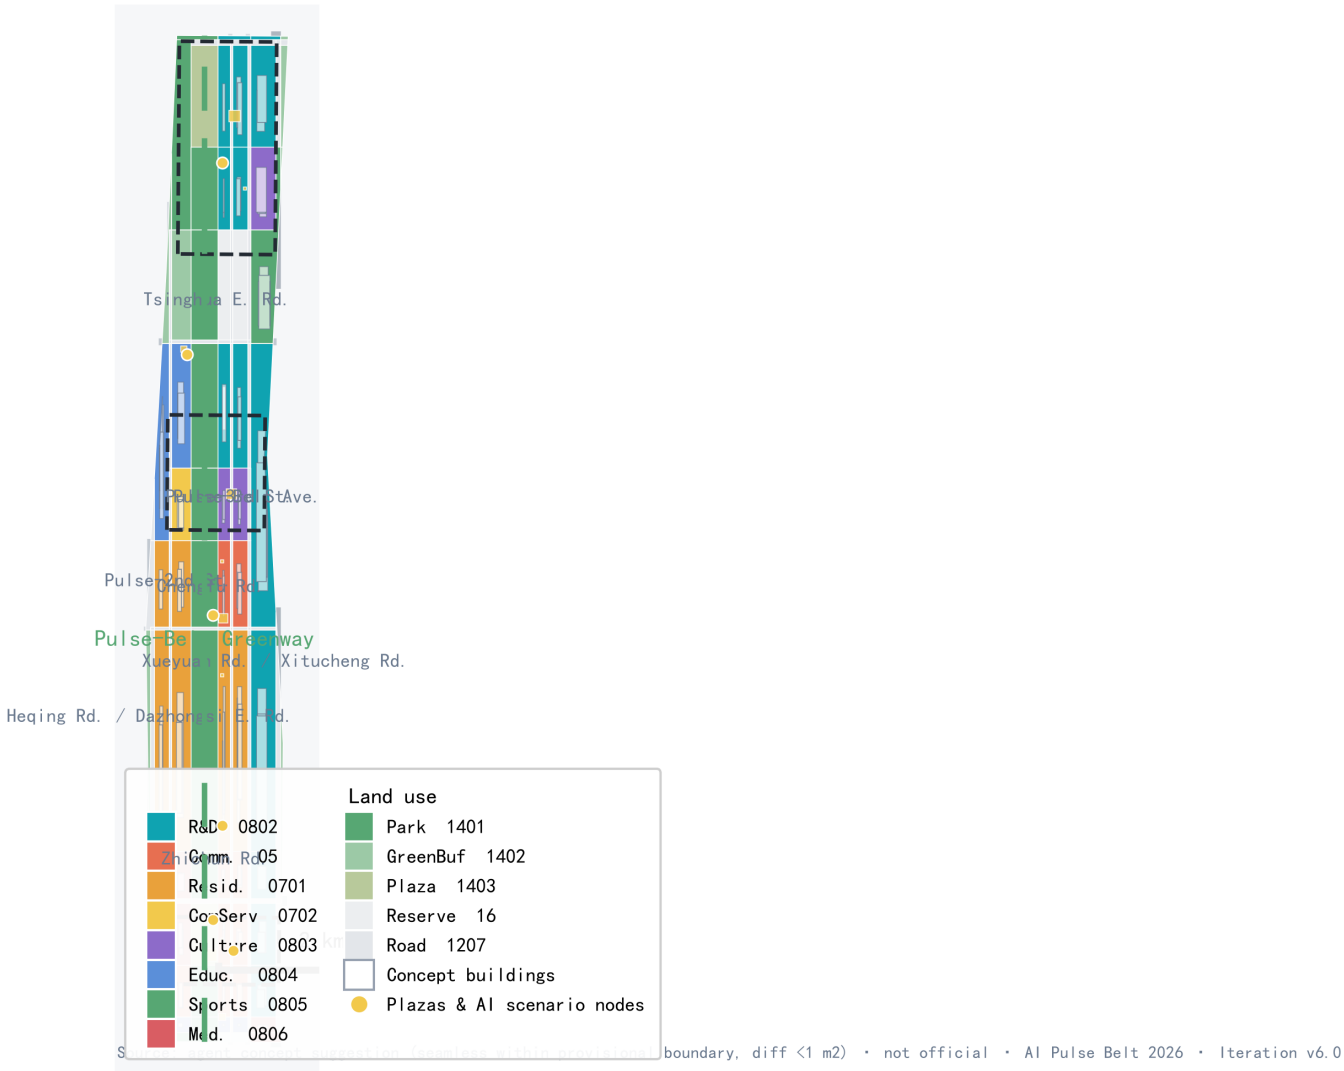

Site Context & Three-Level Planning Scope

Conceptual Land-Use Structure

02 总体设计区用地结构（概念建议）

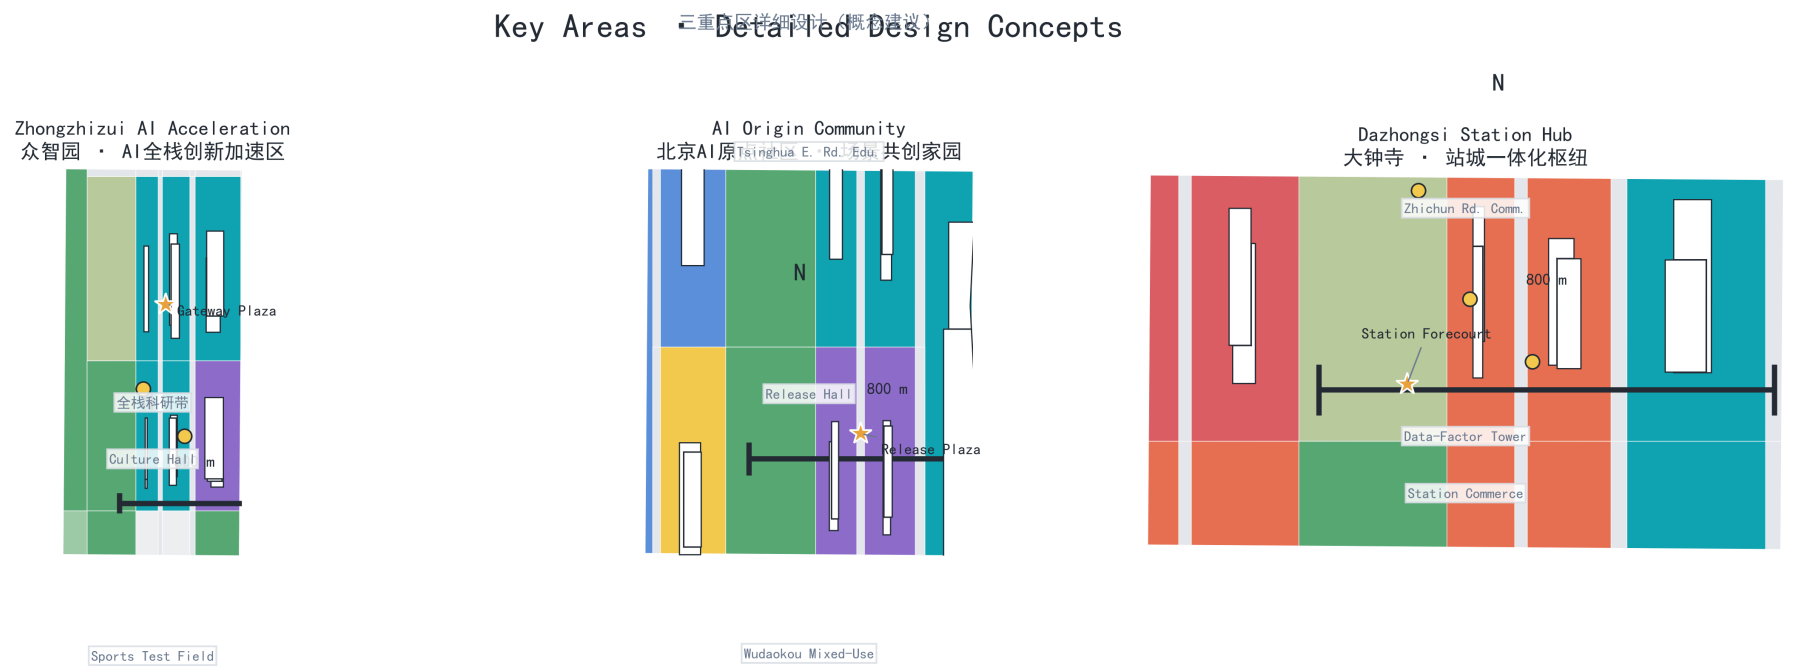

Conceptual Land-Use Structure of the Overall Design Area

Land use is organized along the central 260 m-wide Pulse-Belt greenway: research-led (0802) with commercial (05), cultural and educational support

Key Areas ▪ Detailed Design Concepts

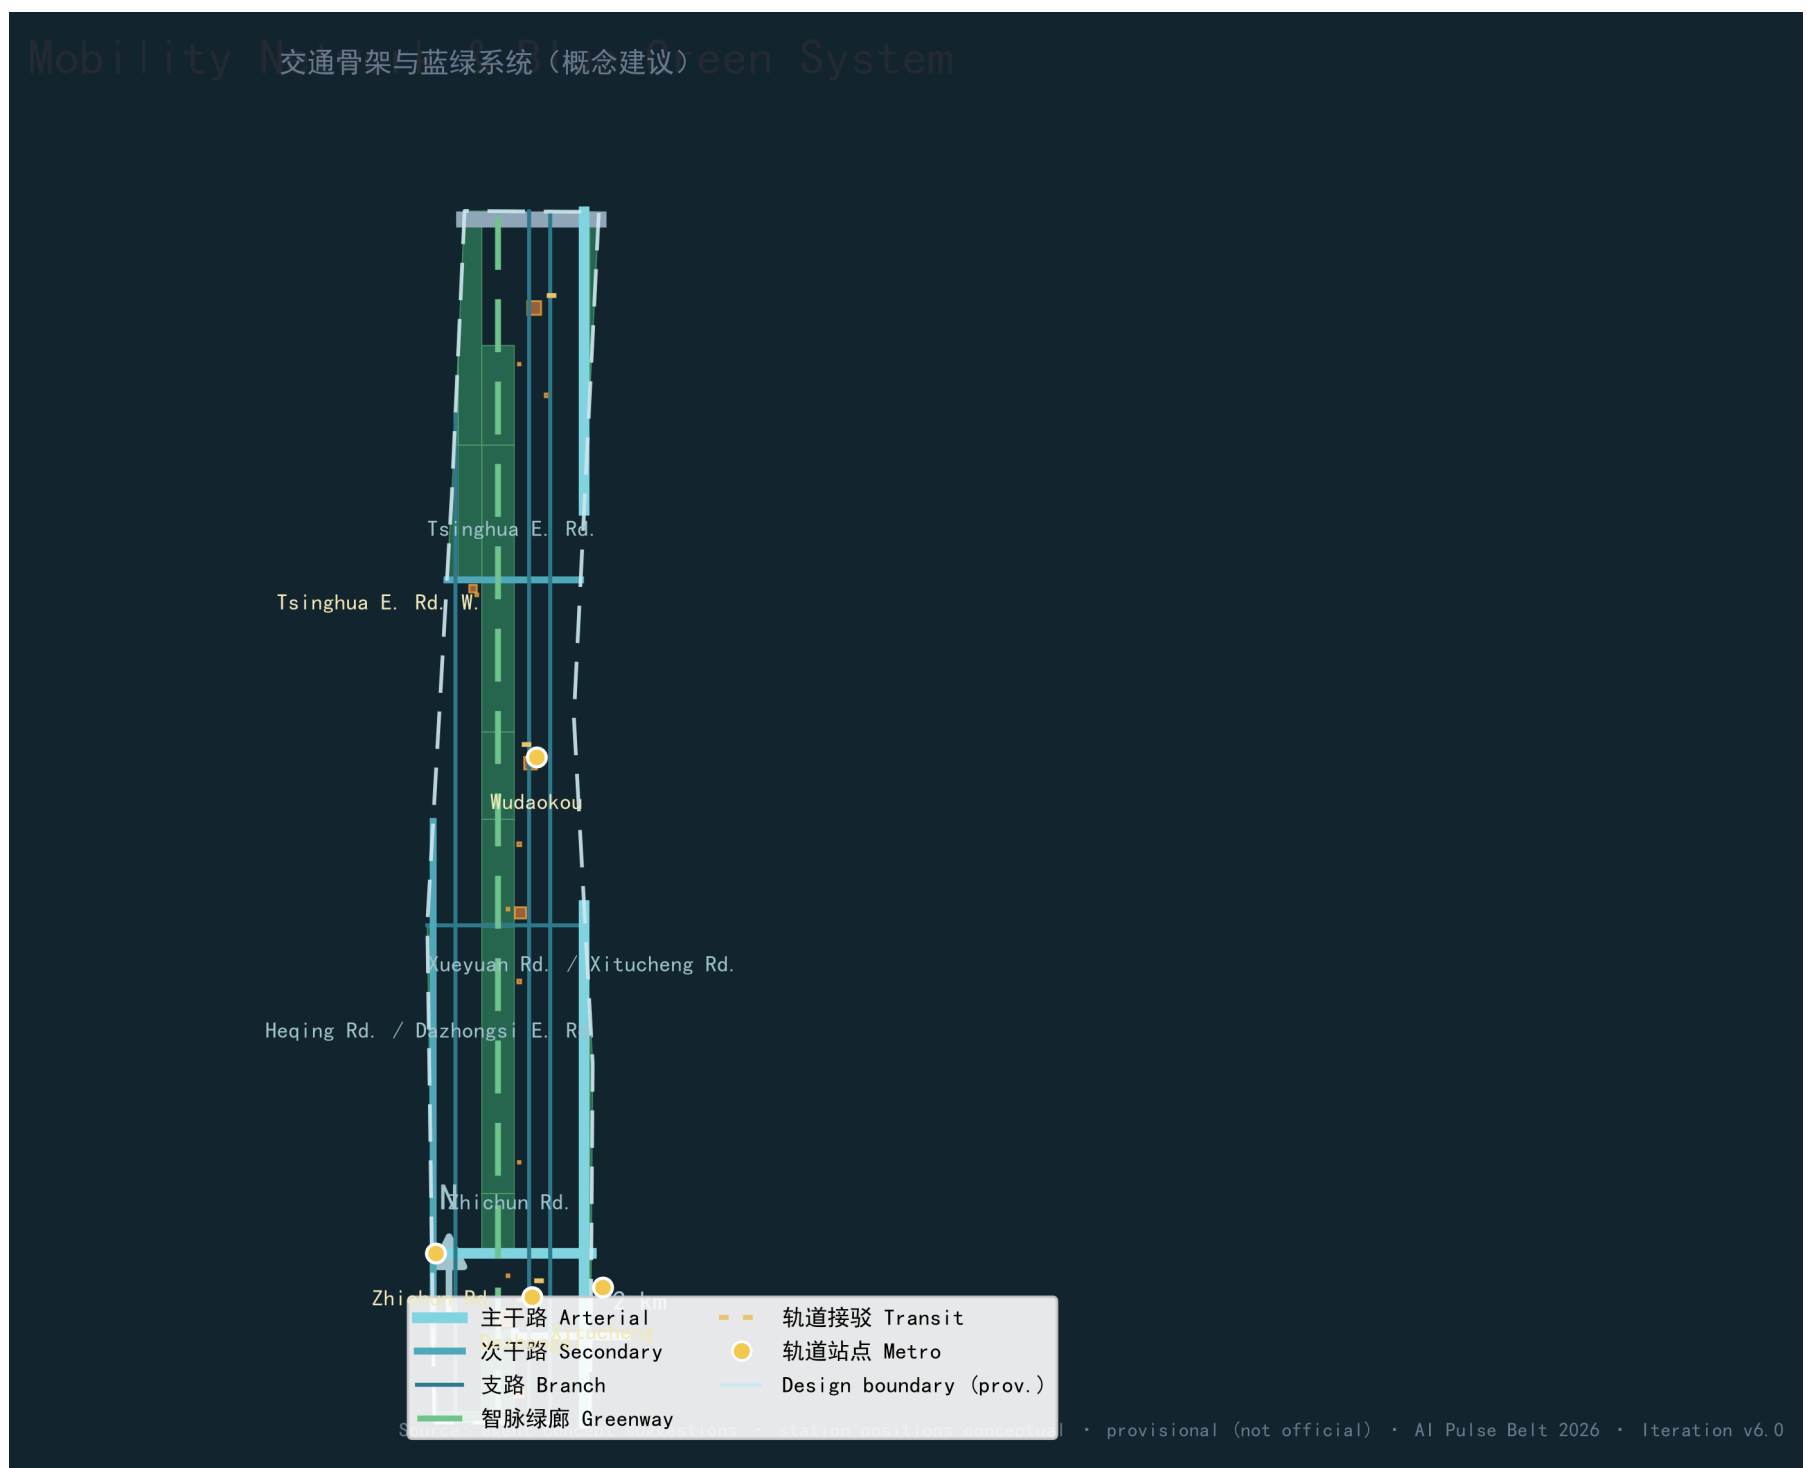

03 三重点区详细设计（概念建议）

Zhongzhizui (AI full-stack innovation accelerator) focuses on foundation-model training and open-source ecology; the Beijing AI Origin Community

Mobility Network & Blue-Green System

04 交通骨架与蓝绿系统（概念建议）

A three-tier mobility system of rail + smart feeder + slow-traffic greenways; blue-green network with a greenway spine, pocket parks and protect.

Key Metrics & Evidence

05 核心指标与证据

Source: agent geometry computed in EPSG:4548 • official areas from planning_limits.json • provisional (not official) • AI Pulse Belt 2026 • Iteration v6.0

Overall design area 11.413 km2 (official 11.4 km2, 0.11% deviation); ~25.0% green ratio; 93 concept buildings; key-area areas disclosed vs offic

Design Notes & Compliance Statement

1. All land uses, buildings, roads, green and public spaces are concept proposals (design_proposal), not official boundaries. No conclusions on FAR, building height, demolition or relocation.
2. All geometry is generated from official provisional boundaries; the 0.11% area deviation (11.413 vs 11.424) is due to rounding. No official_boundary attribute is claimed.
3. Areas computed in EPSG:4548 (CGCS2000 / 3-degree zone); data exchanged in EPSG:4326.
4. Scenario nodes, pilgrimage landmarks and phasing are agent-generated concept suggestions for review.
5. See proposal.md (zh/en) and the 9 matrix JSONs for full argumentation and source lists.
6. This booklet is generated by an AI agent for open-call review purposes only.
