

Reversible home-work handovers replace one-off talent attraction. The provisional boundary is only a generation container; the design claim lies in the public spine, three stations and six transverse relay links.

01 / HOME-WORK RELAY

A RELAY THAT KEEPS DAILY LIFE CONNECTED

A spatial protocol inside provisional geometry: one line, three stations, four home types, six relays

DERIVED FROM: geometry/site_boundary.geojson + roads.geojson + key_areas.geojson

01 ONE LINE

A reversible relay connects homes, workspaces and everyday services.

02 THREE STATIONS

Project live-work, family transition and arrival transfer serve distinct stages.

03 FOUR HOME TYPES

Arrival, project rental, adaptable and long-term homes remain distinct choices.

04 SIX RELAYS

Tenure, layout, work, service, consent and return are handed over visibly.

PROVISIONAL CONSTRAINT: not an official planning boundary; recalculate the full chain when official polygons arrive.

PROVISIONAL CONSTRAINT | CONCEPTUAL RECOMMENDATION | EPSG:4548 RECALCULATION

Research, residential, service, cultural, road, green and plaza areas derive from one partition.
Buildings express four prototypes only, without statutory intensity, floor, ownership or parcel-level retain/renovate/demolish claims.

02 / LAND-USE STRUCTURE

LAND USE AS A TEST OF CONTINUITY, NOT A STATUTORY PLAN

Every partition comes from one topology source; areas are recalculable design quantities inside a provisional boundary

RECALCULATED MIX

Residential	40.2%
Commercial service	18.3%
Research	17.5%
Community service	11.8%
Park green	8.8%
Plaza	2.6%
Road	0.7%

These shares are not statutory controls. They only test whether home, work, service and green space can coexist continuously in one topology.

DERIVED FROM: geometry/land_use.geojson + metrics.json

PROVISIONAL CONSTRAINT | CONCEPTUAL RECOMMENDATION | EPSG:4548 RECALCULATION

The public spine and relay links are conceptual walking and service connections, not road redlines.
Rail, parking, capacity and utility proposals await official data and professional review.

04 / MOBILITY + BLUE-GREEN

SHORTEN THE HOME-WORK LINK BEFORE OPTIMISING TRAVEL

One public spine and six transverse relay links; conceptual centrelines are not road redlines

DERIVED FROM: geometry/roads.geojson + green_space.geojson + public_space.geojson

DOOR-TO-DESK: FIVE OPTIONAL LINKS

- Private threshold
- Shared foyer
- Care/service node
- Walking relay link
- Workspace/lab

- No continuous tracking inside private homes
- Every AI service retains human and no-AI routes
- Every pilot can pause, withdraw and hand over maintenance responsibility

PROVISIONAL CONSTRAINT | CONCEPTUAL RECOMMENDATION | EPSG:4548 RECALCULATION

Railway language becomes thresholds, handovers and return mechanisms. Public space links green areas, care, services and three landmarks while remaining reversible and subject to pending heritage-control geometry.

04 / MOBILITY + BLUE-GREEN

SHORTEN THE HOME-WORK LINK BEFORE OPTIMISING TRAVEL

One public spine and six transverse relay links; conceptual centrelines are not road redlines

DERIVED FROM: geometry/roads.geojson + green_space.geojson + public_space.geojson

DOOR-TO-DESK: FIVE OPTIONAL LINKS

- No continuous tracking inside private homes
- Every AI service retains human and no-AI routes
- Every pilot can pause, withdraw and hand over maintenance responsibility

PROVISIONAL CONSTRAINT | CONCEPTUAL RECOMMENDATION | EPSG:4548 RECALCULATION

Zhongzhiyuan tests project live-work, AI Origin tests family transition and Dazhongsi tests arrival transfer. Every location and area remains provisional, without actual station or engineering-siting claims.

03 / THREE STATIONS

THREE STATIONS, THREE VISIBLE HANDOVERS

Each key area tests a different stage; all locations remain constrained by provisional polygons

01

ZHONGZHIYUAN | PROJECT
LIVE-WORK

Project rental + shared lab + reversible fit-out test

Align project cycles with living, experimentation and visible exit responsibility.

02

AI ORIGIN | FAMILY TRANSITION

Adaptable home + care relay + partner work interface

A changing household stage does not require leaving the innovation network; human and no-AI paths remain.

03

DAZHONGSI | ARRIVAL
TRANSFER

Arrival stay + city services + transfer to long-term options

A conceptual first relay connects identity, housing, work and everyday services without automatic allocation.

Key-area location uncertainty is documented in Issue #1029; these diagrams make no claim about actual station footprints, official boundaries or engineering siting.

DERIVED FROM: geometry/key_areas.geojson + public_space.geojson

PROVISIONAL CONSTRAINT | CONCEPTUAL RECOMMENDATION | EPSG:4548 RECALCULATION

AI explains options and coordinates resources. It does not decide eligibility, rent or allocation, nor score people or households. Every service retains human review, a no-AI route, withdrawal and offline fallback.

03 / THREE STATIONS

THREE STATIONS, THREE VISIBLE HANDOVERS

Each key area tests a different stage; all locations remain constrained by provisional polygons

01

ZHONGZHIYUAN | PROJECT
LIVE-WORK

Project rental + shared lab + reversible fit-out test

Align project cycles with living, experimentation and visible exit responsibility.

02

AI ORIGIN | FAMILY TRANSITION

Adaptable home + care relay + partner work interface

A changing household stage does not require leaving the innovation network; human and no-AI paths remain.

03

DAZHONGSI | ARRIVAL
TRANSFER

Arrival stay + city services + transfer to long-term options

A conceptual first relay connects identity, housing, work and everyday services without automatic allocation.

Key-area location uncertainty is documented in Issue #1029; these diagrams make no claim about actual station footprints, official boundaries or engineering siting.

DERIVED FROM: geometry/key_areas.geojson + public_space.geojson

PROVISIONAL CONSTRAINT | CONCEPTUAL RECOMMENDATION | EPSG:4548 RECALCULATION

Areas, ratios, footprints, nodes and phases derive from GeoJSON. Rent, housing stock, observed commute, FAR, height, service capacity and retention remain unknown. Passing machine gates is not approval or professional-scoring eligibility.

05 / METRICS + EVIDENCE

EVERY NUMBER HAS A SOURCE; EVERY GAP HAS A REASON

GeoJSON -> EPSG:4548 recalculation -> metrics -> figures/HTML; unknown values never masquerade as numbers

PENDING OFFICIAL OR AGGREGATED DATA

Machine-gate and content-review readiness do not equal approval or official-geometry-dependent professional scoring eligibility.

DERIVED FROM: metrics.json + geometry/*_geojson + self_check.json

PROVISIONAL CONSTRAINT | CONCEPTUAL RECOMMENDATION | EPSG:4548 RECALCULATION
