

Qinghe Smart Shore - AI Innovation Commons - Concept Booklet (provisional)

QSS-AIC / 清河智岸 • AI创新公地

Centennial Jing-Zhang AI Innovation Belt (Haidian) - Qinghe Demonstration Segment - Concept Proposal

Official three-level scopes (announcement):

Coordinated research area ~43.6 km² (tier 1 strategic)

Overall design area ~11.4 km² (tier 2; this segment provisional boundary ~11.41 km²)

Key areas ~368.4 ha (Zhongzhiyuan 192.1 / Origin 104.3 / Dazhongsi 72.0)

Official geometry pending: all boundaries here are schematic; recompute on official release

Philosophy: Waterfront as Commons - One Corridor, Three Cores, Many Nodes - dual-use - data commons - human review

All outcomes are conceptual (provisional) and do not replace statutory planning; areas and ratios are schematic pending official data.

PROVISIONAL concept boundary - not an official redline - recompute once official data is published

Overall Structure & Site Context

Site Overview: One Corridor, Three Cores, Multiple Nodes & Three-Level Scopes

Provisional schematic concept map

Site context (concept)

- Qinghe: real water node, blue-green base
- Jing-Zhang Railway Heritage Park north: rail
- Three cores: Wenshu (culture) / Yongzhi (innovation)
- Innovation clusters: toward Shangdi/Zhongguancun
- Communities: residential stretches beside Qilan
- Nodes: AI points / stations / observation points
- Legend, north arrow and schematic scale included
- Three-level scopes panel top right
- Provisional boundary; recompute on official map

Three Segment Nodes x Three Mandated Key Areas

Three Segment Nodes (Wenshu-Yongzhi-Qilan) x Three Mandated Key Areas

Node-landmark-key-area synergy loops (conceptual; official geometry pending)

Node-landmark-key-area mapping (conceptual)

- Wenshu Core - Data Beacon - Zhongzhiyuan (T01-T03 inter)
- Yongzhi Core - AI Eco-Watch Ark - Origin Community (talent, dev commons)
- Qilan Core - Shoreline Echo Gallery - Dazhongsi (events, experience)
- Key area areas (announced): 192.1 / 104.3 / 72.0 ha
- Official redlines not redrawn; no detailed design b

Slow Mobility, Blue-Green & AI Scenario Network

Mobility & Blue-Green Network: 3-tier trails + node network

Provisional schematic concept map

Mobility & scenario network (concept)

- Three-tier mobility: greenway / neighbourhood
- Scenario nodes S01-S10 along the corridor
- Three landmarks: Beacon / Ark / Echo Gallery
- Rail station connection circle (conceptual 1 km)
- Green ~25.5%, public space ~0.66% (provisional)
- Corridor-wide anonymous aggregation + human

Land Use & Core Metrics

Land use & metric basis (concept)

Land-Use Structure (concept) & Metric Denominator Notes

Recomputed from geometry/land_use.geojson; provisional conceptual geometry

- 7 land-use classes: R&D 29.2% / finance 18.9% / parks 21.5% / commercial 14.5% / cultural 6.8% / residential 6.3% / logistics 2.9%
- Denominator notes in left chart: pie = land_use layer; ratios = layer unions / site
- Formulas / confidence / triggers: metrics.json & Ch.11

Core Metric Evidence: area / ratio / count on SEPARATE axes

Source: geometry/* .geojson; formulas & confidence in metrics.json; provisional values are schematic only

A. Area metrics (single unit: ha)

C. Count metrics (separate from ratios)

Evidence chain:

Formulas: site area = polygon area (EPSG:4548 recompute); green_ratio = green union / site; public_space_ratio = public-space union / site | Source: geometry/* .geoj
PROVISIONAL concept boundary - not an official redline - recompute once official data is published

Implementation, Operation & Compliance

Near term (1-2 yrs)

Mid term (3-4 yrs)

Long term (5-6 yrs)

Minimum pilot: one node/corridor, sample station, event launch, data integration, preliminary links, bridge deepening, node delivery, dual-use finalization, completion, p

Packages: blue-green / scenario commons / mobility / community waterfront / dual-use / operation (concept)

RACI: pilot operation (operator lead) - scenario filing (tech team, authority approval) - data commons (tech + research) - dual-use drills (local emergency authori

Annual programs 5 (Tech Week / Light & Shadow / Hackathon-Dev Week / Study Season / White Paper) - AI content labelled + human review

Operations: preconditions (scheme/risk/safety/approval/public notice), public KPIs, feedback closure, failure-exit

Accessibility: concept checklist (path/tactile/info/stations/help/children-seniors/digital) - Sec 8.5

Brand: QSS-AIC bilingual lock-up (VI concept draft) - internal working codename until trademark clearance (Ch.12-5)

Risk & copyright: statutory/data/AI-compliance/copyright/privacy/force-majeure; minors soundscape requires guardian consent, revocable

PROVISIONAL concept boundary - not an official redline - recompute once official data is published
