

JZ Public Ledger · A3 booklet

One ledger: every AI-space suggestion carries provenance, review, exit and public return.

Three loops: trust testing / knowledge transfer / daily delivery; two wings support services and open scenarios.

Provisional geometry is for intake and discussion only.

Evidence page · from space to public value

Five figures, GeoJSON, metrics and matrices share one evidence chain.
Unknown regulatory, ownership, road, heritage and engineering conditions are not presented as settled metrics.
