

HUMAN HOURS

HUMAN HOURS / JING-ZHANG

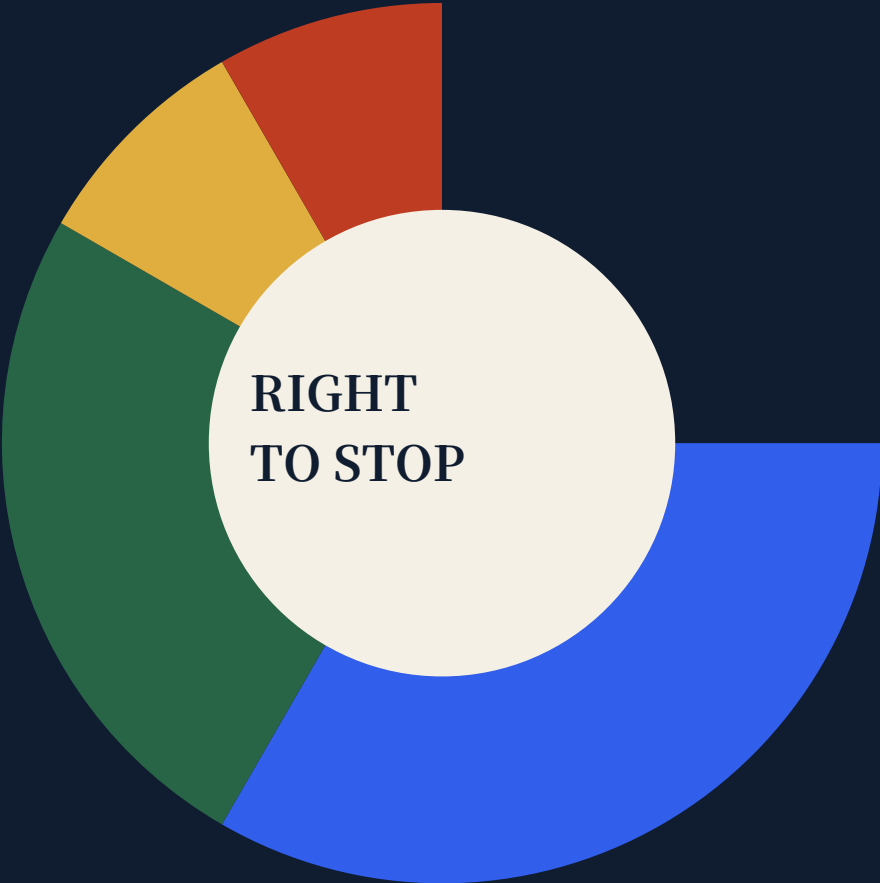

A CITY CANNOT ONLY COUNT HOW LONG TALENT WORKS.
IT MUST ASK WHETHER EVERYONE'S TIME IS RESPECTED.

WHO ULTIMATELY PAYS FOR THE TIME A CITY SAVES?

RESPONSIBILITY > TIME > FAILURE

TASKBOOK WINGS: ZHONGGUANCUN TECHNOLOGY SERVICES WING + XIAOYUE RIVER SCENARIO ENABLEMENT WING

JING-ZHANG PUBLIC CULTURE = NARRATIVE LAYER, NOT A THIRD OR REPLACEMENT WING

FIVE BANDS = REVIEW COORDINATES
!= ALWAYS-ON SERVICE

THREE POSITIONINGS × FIVE FUNCTIONS: ONE PRIMARY BEARER EACH

Official terms remain intact; the proposal adds spatial bearers, responsibility, and stop conditions instead of turning eight concepts into a slogan wall

POSITIONING ↓ / FUNCTION →	FULL-STACK INDEPENDENT AI INNOVATION	WORLD-CLASS AI INNOVATION ECOSYSTEM	AI+ SCENARIO EMPOWERMENT	INTELLIGENT AI VIBRANT CITY	GLOBAL VOICE IN AI GOVERNANCE

THREE ZONES CARRY PRIMARY DUTIES • TWO WINGS PROVIDE INTERFACES • JING-ZHANG CULTURE CARRIES THE NARRATIVE; OWNERS, RESOURCES, BUDGET, CAPACITY, AND PARTNERSHIP STILL REQUIRE VERIFICATION.

Who Pays for the Time a City Saves?

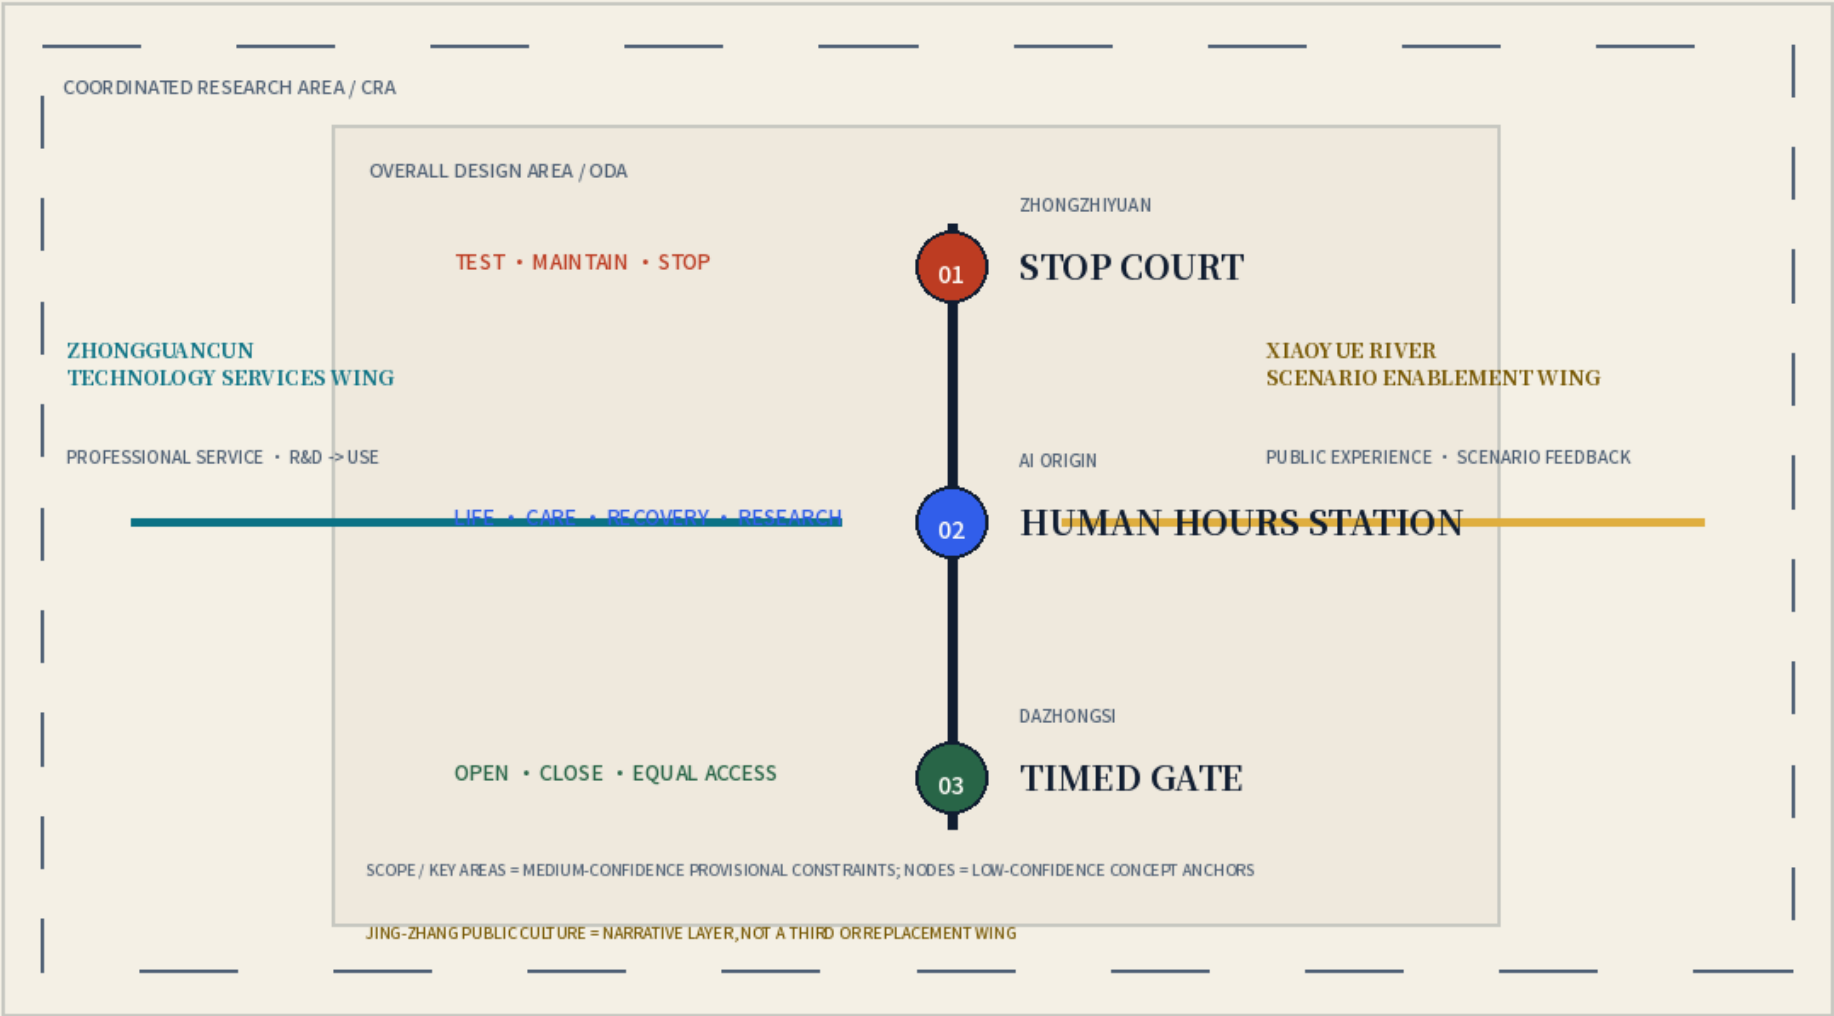

Read one responsibility network first; then audit the three scopes, Three Zones + Two Wings, and evidence states

01 / CORE CLAIM

No efficiency may depend on invisible, involuntary overtime transferred to families, carers, or night-service workers.

RECOMPUTABLE Submission-geometry calculations only; not official geometry

BOUNDARY Scope + key areas: medium-confidence provisional constraints

Recompute all nine GeoJSON layers, every derived value, every drawing, and the narrative.

TWO TIME BILLS SHARE FIVE REVIEW BANDS

Waiting, care, handoff, recovery, and reset enter urban design; five bands do not mean always-on service

	00-06	06-10	10-18	18-22	22-24
AI RESEARCHER FAMILY	REST NO ALWAYS-ON	CARE HANDOFF HUMAN CONFIRMS	RESEARCH QUIET SEAT REMAINS	PICKUP / MEAL NO RESET SQUEEZE	RECOVER / CLOSE NO 24/7 OFFICE
NIGHT OPERATOR / DAYTIME CARE	PLANNED MAINT. STOP ALLOWED	PAID HANDOFF OFFLINE RETURN	RECOVERY FIRST NO CARE TRANSFER	CARE HANDOFF NO UNPAID EARLY START	CLOSE + RESET ALL PAID TIME

IF ONE PERSON'S SHORTER WAIT COMES FROM ANOTHER'S UNPAID EXTENSION: THE PROPOSAL FAILS

THE TWO PROTAGONISTS ARE COMPOSITE STRESS TESTS, NOT REAL RESIDENTS, WORKERS, OR EVIDENCE OF LABOUR COMPLIANCE.

One Network, Two Time Layers, Three Nodes, Four Land Roles

Spatial responsibility structure: one provisional base audits the life-time and support-time layers together

ONE BASE, TWO RESPONSIBILITY LAYERS

Audit both layers across five shared bands; they are neither physical loops nor proposed opening hours.

LAYER	00-06	06-10	10-18	18-22	22-24
LIFE-TIME	EVERY CELL: OPEN • CLOSE • HUMAN FALL BACK • RECOVER				
SUPPORT-TIME	EVERY CELL: PAID HANDOFF • MAINTAIN • STOP • RESET • APPEAL				

2 LAYERS × 5 CELLS; AUDIT TOGETHER, WITHOUT INVENTING TIME-SPECIFIC OPERATIONS.

METHODS LAND IN DRAWINGS—AND ACCEPTANCE

First audit responsibility with four protagonist questions. Each method then receives one primary drawing, a falsifiable acceptance field, and a redraw trigger; copy cannot make an obsolete drawing pass.

01 Who commits to opening?		02 Who pays for waiting and detours?		03 Who retakes responsibility and can stop?		04 Who signs off paid reset and reopening?	
STATE • HUMAN ACCESS • SHIFT OWNER		WAIT / DETOUR • STAFF TIME • NO-AI PATH		STATIC FALLBACK • TAKEOVER • PHYSICAL STOP		PAID RESET • FAILURE RECORD • REOPEN EVIDENCE	
THE FOUR QUESTIONS ARE A SCENARIO RESPONSIBILITY AUDIT, NOT A REAL PERSON'S ROUTE OR A NEW SPATIAL AXIS.							
METHOD		PRIMARY DRAWING		HUMAN ACCEPTANCE FIELD • REDRAW TRIGGER			
M-01	Three-level scope + official 3×5 contract	FIG-01 • A3-P02 • A3-P03 • A0-BOARD-1		Three working depths, Three Zones + Two Wings, three positionings, and five functions are findable within ten seconds, with no third-wing or statutory-redline implication. REDRAW: Taskbook or official scope change			
M-02	Two-time network + four concept land roles	FIG-02 • A3-P05 • A0-BOARD-1		Life-time and support-time layers, four land roles, and 0802/1401/05/0702 mappings are legible as a concept-role overlay only. REDRAW: Official polygon or statutory-control change			
M-03	Three conditional key-area packages	FIG-03 • A3-P06 • A0-BOARD-1		Each area shows its official question, verification sequence, no-AI minimum, and stop condition; landmarks cannot read as building sites. REDRAW: Key-area, building-base, or professional-review change			
M-04	Interface evidence + concept-network diagnosis	FIG-04 • A3-P07 • A0-BOARD-2		Show that ROAD-001 intersects only one of three provisional key areas and leaves two NOT DRAWN; make no three-zone connectivity or accessibility claim. REDRAW: Official scope + route audit + interface review			
M-05	Two-protagonist four-question audit + twelve scenarios	A3-P04 • A3-P08 • VISUAL-SCENARIOS		Opening, use, failure, and reopening each land in spatial evidence; all 12 cards expose people, time, place, no-AI, data, takeover, budget, stop, and metrics. REDRAW: Persona, scenario-contract, or operating-boundary change			
M-06	4+6 evidence ledger + delivery loop	FIG-05 • A3-P09 • A3-P10 • A0-BOARD-2		Separate four recomputable spatial values from six unmeasured fairness outcomes; UNKNOWN is not zero, any FAIL stops the whole, and all three work packages can stop.
