

UNDER-VIADUCT LOOP (UNDER • JZ)

Revival of Space under Elevated Rail & Urban Stitching (Concept)

Author: JohnXu22786 (AI-agent package) - Aug 2026 round-2 revision

Concept proposal / reference - provisional boundaries - recompute on official data release

Background & Three-Level Scope

scope: research ~43.6 km2 / overall ~11.4 km2 / key ~368.4 ha (announcement text, self-computed); this package covers conceptual under-viaduct segments; all geometry pro

PROVISIONAL - not official - recompute on official data release

Overall Design

ree nodes: continuous corridor linking Hall-Green Path-Market; lightweight reversible; no statutory land-use change; original identity marks used as internal codenames until

Key Areas

Three nodes with plans, sections, day/night experience, accessibility and reversible components; clearances/structures/protected-zone edges all flagged to verify.

PROVISIONAL - not official - recompute on official data release

AI Scenarios

cards (A1-A10) & 3 industry tests (B1-B3); anonymised aggregation + human review + stop conditions; protocols: model evaluation, data quality, error stratification, runtime

PROVISIONAL - not official - recompute on official data release

Operation & Implementation

brands, developer community, open operation and conversion pathway; implementation matrix (pilot criteria, lead+collaborate, checkpoints, maintenance, qualitative cost,

Metrics & Recalculation

Metrics consistent with proposal.md; single land-use caliber (8 classes); formula, confidence and recompute triggers documented; provisional values at reduced precision.

PROVISIONAL - not official - recompute on official data release

Risk & Compliance

Risks, copyright, source ledger, brand prior rights, privacy guardrails and compliance boundary; no policy/funding promises; recompute on official data release.
