

Centennial Jingzhang AI Belt

From railway heritage to an AI-native innovation district · Urban design proposal (A3 booklet)

1. Overall structure (one spine, three cores)

The Jingzhang railway heritage park slow spine links Zhongzhiyuan, Beijing AI Origin and Dazhongsi into a linear innovation district. Three-tier scope: study 43.6 km², overall 11.4 km², key areas 368.4 ha.

2. Key areas & land use

Zhongzhiyuan (192.1 ha) — incubation & industry services; Beijing AI Origin (104.3 ha) — talent living & scenario testing; Dazhongsi (72.0 ha) — digital consumption & culture. Land use dominated by R&D; (08H2), commercial (14) and green squares (14G).

用地结构 · Land-use structure

3. Mobility & blue-green network

A 'rail + slow mobility + micro-bus' green system: road 8.48%, green ratio 12.34%, public-space ratio 7.33%. The slow spine connects the three districts; 5-min walk to rail.

交通慢行与蓝绿公共空间复合系统

4. Building renewal & AI scenarios

Retain-renovate-new strategy; 84 buildings, density 7.63%, FAR 0.79. 14 AI service nodes along the spine cover incubation, elder care, guidance, energy, mobility and investment scenarios.
