

The First Mile from Lab to City

Public facts, provisional extents, rail vertically, and missing evidence remain separate

JZ-RCT / 01 / V0.1

01 / HISTORY × REAL SPACE

EVIDENCE LAYERED

WHY JING-ZHANG?
AI'S FIRST MILE INTO REAL CITY LIFE

In 1909, Jing-Zhang proved autonomous engineering through terrain and long operation.
Today: can a city understand, take over, correct and exit AI?

FOUR VERIFIED FACTS

1905—1909

Autonomous survey, design, construction and operation became a working railway

≈ 9 km

Official planning context, Beijing North to the North Fifth Ring; not fully open today

≈ 6.02 km

Active Qinghuayuan Tunnel; HSR remains exposed at its south and north ends

2.5 km / 16.8 ha

Phase I, Qinghua East Road to Zhichun Road, officially open

THEREFORE: NOT AN AI DISPLAY BACKDROP

The heritage spine represents long operation and public space;
cross-links expose access, maintenance and service responsibility;
the real city can stop a trial and return to ordinary use.

Status: green = open; blue rail = active HSR (dashed below grade); black = Line 13; red dash = old rail; amber = proposal.
Sources: Beijing planning, parks and reform authorities; Haidian parks authority; OpenStreetMap contributors, 2026–08–10.

One Spine, Three Zones, Two Wings, Three Testbeds

Repair the ordinary city first; trial only inside bounded, take-over-ready, recoverable units

JZ-RCT / 02 / V0.1

02 / SPATIAL STRUCTURE: LAB TO CITY

ONE ORDINARY PUBLIC SPINE EIGHT CROSS-LINKS, THREE TESTBEDS

This is not a statutory land-use plan.
It shows one causal rule:
repair the ordinary city before a bounded, reversible AI trial.

CONCEPTUAL / NOT ZONING

Structure: organiser-provided three areas/two wings + eight proposal interfaces + City Release. Testbeds are conceptual, not zoning, official boundaries or permits.

BILINGUAL REVIEW PACKAGE / CONCEPT—NOT AN APPROVAL

JZ-RCT / 04 / V0.1

04 / REAL PUBLIC SPINE x CROSS-BLUE-GREEN NETWORK

NOT ONE GLOWING AI LINE A STATUS-AWARE PUBLIC NETWORK

Distinguish open, approved and merely mapped segments.
Then use eight cross-links to organise
station-park-campus-street-service journeys.

STATUS-AWARE NETWORK

Basemap and park geometry: OpenStreetMap contributors, 2026-08-10. Open/approved status: official Beijing and Haidian sources. Cross-links are concepts, not road or engineering alignments.

BILINGUAL REVIEW PACKAGE / CONCEPT—NOT AN APPROVAL

Three Key Areas and Three Flagships

Technology / Innovation / Urban Life Testbeds; six project searches and two-line journeys

JZ-RCT / 03 / V0.1

03 / THREE KEY AREAS: ALIGN FUNCTION, DO NOT INVENT BOUNDARIES

THREE TESTBEDS, NOT SHOWROOMS
THREE DISTINCT FAILURE TESTS

Official names and approximate areas remain unchanged.
Without exact boundaries, this figure shows
interfaces, questions and hard gates only.

PROVISIONAL / NO OFFICIAL BOUNDARY

01192.1 ha

ZHONGZHIYUAN AI ACCELERATION AREA

TECHNOLOGY TESTBED

01 / ORDINARY CITY FIRST

ENCLOSURE / ORDINARY BYPASS / STAFF / FIRE / RECOVERY FIRST

02 / BOUNDED TRIAL

LOW-SPEED MOBILITY, TAKEOVER AND FAILURE START CLOSED

03 / HARD GATE

NO WRITTEN SITE, SAFETY OWNER OR INSURANCE → NO TRIAL

NOW: V0.1 / NOT STARTED

02104.3 ha

BEIJING AI ORIGIN COMMUNITY

INNOVATION TESTBED

01 / ORDINARY CITY FIRST

OPEN PARK / SEATING / STATIC EXPLANATION / HUMAN DESK FIRST

02 / BOUNDED TRIAL

PUBLIC PROBLEMS ENTER LABS; FAILURE AND REVISION STAY PUBLIC

03 / HARD GATE

PROBLEM OWNER REJECTS REWRITE → RETURN TO V0.1

NOW: V0.1 / NOT STARTED

0372.0 ha

DAZHONGSI AI INDUSTRY CLUSTER

URBAN LIFE TESTBED

01 / ORDINARY CITY FIRST

NO-PHONE WAYFINDING / REST / TOILET / HUMAN WINDOW FIRST

02 / BOUNDED TRIAL

TEST NON-DIAGNOSTIC JOURNEYS; NO HEALTH SCORE OR TRACKING

03 / HARD GATE

PROV-KEY-003 DRIFTS ≈2.26 KM → DO NOT INFER FROM ITS POLYGON

NOW: V0.1 / NOT STARTED

Approximate organiser-provided areas: 192.1 / 104.3 / 72.0 ha. Diagrams are interface concepts, not parcel plans, official boundaries, construction or partnerships.

BILINGUAL REVIEW PACKAGE / CONCEPT—NOT AN APPROVAL

JZ-RCT / SCENE-LEARNING / V0.1

FLAGSHIP 01 / AI LEARNING CORRIDOR

THE CITY ASKS FIRST.
THE LAB ANSWERS SECOND.

A human hosts the problem desk; AI only offers optional grouping and explanation.
People can submit, understand and reach a human without a login or QR code.

AI-GENERATED CONCEPT SCENE / NOT A SITE PHOTO / NOT AN APPROVAL

Concept image explains spatial and role relationships only. It is not existing condition, site permission, partnership, device selection or final design.
Generated with built-in OpenAI image generation. Exact copy, data and boundaries remain deterministic vector overlays.

SPATIAL RELATION

- CONTINUOUS ORDINARY PATH + SHADE
- HUMAN-HOSTED PROBLEM DESK
- OPTIONAL, SWITCHABLE AI TERMINAL
- RAIL HERITAGE + PUBLIC LEARNING SPACE

REAL TASK

Let people confirm the real urban problem
instead of allowing a technical team to
rewrite it for them.

STOP NOW

Stop if a request is distorted, identity
leaks, urgency is downgraded, or no human
owns the response.

WHAT REMAINS WITHOUT AI

Paper problem desk, places to sit,
no-screen explanation and a public
failure/revision archive.

NOW: V0.1 / NO FIELD TRIAL

LOCAL CANDIDATE / DO NOT SUBMIT

City Release: Evidence, Permission, Stop, and Public Return

V0.1 Observe → V0.5 Prototype → V1.0 Deploy → V2.0 Scale

JZ-RCT / 05 / V0.1

05 / INNOVATION × DAILY LIFE: EVIDENCE DECIDES WHAT COMES FIRST

RELATIVE PROXY / NOT OFFICIAL

157 HIGH-I × LOW-LIFE CELLS
MEAN FIELD CHECKS, NOT AI PROJECTS

These are field-verification candidates
under current public mapped proxies.
Ordinary-city repair first; conditional AI second.

DAILY-LIFE SUPPORT (RELATIVE MAPPED PERCENTILE) →

INNOVATION DENSITY (RELATIVE MAPPED PERCENTILE) →

EVIDENCE LEDGER

906

STUDY-WINDOW CELLS
≈200–250 m samples; not parcels

587 / 38 / 281

HIGH / MED / LOW CONFIDENCE
Low confidence is greyed in formal figures

98

INNOVATION NETWORK NODES
176 internal/semantic items excluded

40

OFFICIAL NEAR-CORRIDOR ELDER STATIONS
Unverified coordinates; excluded from score

DIAGNOSIS → SPATIAL ACTION

HIGH-I × LOW-LIFE: VERIFY ORDINARY SERVICES; DO NOT AUTO-DEPLOY AI;
LOW-I × LOW-LIFE: FILL EVIDENCE GAPS; UNKNOWN IS NOT ZERO;
K1 conflicts with its label; K2 varies internally; K3 geometry drifts;
EVERY TESTBED NEEDS FIELD, PERMISSION, OPERATOR AND EXIT RESOURCE.

MAIN: S0 / 800 M / DL4

SENSITIVITY: S1 / 400–1200 M / DL5

Data: OpenStreetMap contributors, common baseline 2026-08-10T03:51:58Z; official Haidian elder-service lists. Median-relative quadrants are not official service, capacity, quality or need assessments.
