

The Slow Variables

京张慢变量 JINGZHANG · THE SLOW VARIABLES

How a city decides how fast AI may go

1909: the Jing-Zhang railway crossed Badaling on a switchback — steel learned to turn; today it teaches algorithms to wait.

FIG.01 总体鸟瞰 SITE OVERVIEW

FIG.01 · CENTENNIAL JING-ZHANG AI INNOVATION BELT

A city runs on two clocks

AI updates quarterly · shade, soil and daily life take years · five slow variables gate expansion

FAST clock · 1 revolution = 1 quarter

SLOW clock · 1 revolution = 10 years

CONCEPT ONLY · PROVISIONAL BOUNDARY · FIELD CHECK PENDING · NOT A STATUTORY REDLINE

THE SLOW VARIABLES 京张慢变量 · v2.0

FIG.02 总体结构 STRUCTURE

FIG.02 · CENTENNIAL JING-ZHANG AI INNOVATION BELT

One Time Spine, Three Workshops

Four conceptual land-use strips cover the provisional site · a measure—negotiate—deliver sequence, with two feedback wings

两只钟 TWO CLOCKS

FAST CLOCK · quarterly

AI updates quarterly: test, update, release

SLOW CLOCK · by the year

five slow variables gate expansion

SV-01 Canopy · 8–15 yrs

SV-03 Barrier-free access · 2–3 yrs

SV-05 Children's independent mobility · 1–3 yrs

SV-02 Soil infiltration · 3–5 flood seasons

SV-04 Retail survival · 5–10 yrs

01 Zhongzhi Yard · Measure

sensors + crowd measurement, get it right

one-year baseline starts here

sensor calibration

02 AI Origin · Explain

every algorithmic decision is explainable

decisions can be questioned

explainable decisions

03 Dazhongsi · Deliver

public services delivered in daily life

the annual ledger closes here

services & annual ledger

Wings · Links · 3 Scales

three E—W links rejoin the city fabric

wings host daily life, feed data back

43.6 km² belt · 11.41 km² site · 368.4 ha key areas

Depth & Evidence

深度与证据 DEPTH & EVIDENCE

Section · key areas · mobility & blue-green · metrics

FIG.04 典型剖面 TYPICAL SECTION

FIG.04 · CENTENNIAL JING-ZHANG AI INNOVATION BELT

One street, four speeds

Typical concept section · walking, shade, infiltration and staffed service each in place

AI devices retreat to the edge — ordinary passage never depends on being connected

CONCEPT ONLY · PROVISIONAL BOUNDARY · FIELD CHECK PENDING · NOT A STATUTORY REDLINE

THE SLOW VARIABLES 京张慢变量 · v2.0

FOUR SCALE GATES

no gate passed, no expansion

G1

Data safety

non-compliant data, no go

G2

Human review

key decisions need a signature

G3

Public objection

residents can call a stop

G4

No slow-variable regression

any regression halts expansion

INTENTIONAL BLANKS

Blank constraint layer

reserved for statutory redlines

Floor-area ratio

awaiting official data

Slow-variable baseline

awaiting one-year baseline survey

Blanks are not gaps — they make room for compliance and measurement.

FIG.03 三座工场 KEY AREAS

FIG.03 · CENTENNIAL JING-ZHANG AI INNOVATION BELT

Three workshops, one pilot

Measurements, public dissent and long-term promises cannot be settled in a single table row

CONCEPT ONLY · PROVISIONAL BOUNDARY · FIELD CHECK PENDING · NOT A STATUTORY REDLINE

THE SLOW VARIABLES 京张慢变量 · v2.0

FIG.05 四种速度 MOBILITY

FIG.05 · CENTENNIAL JING-ZHANG AI INNOVATION BELT

Continuous N-S, Stitched E-W

Four everyday speeds, each with a continuous place · blue-green system takes the rain · still walkable offline

CONCEPT ONLY · PROVISIONAL BOUNDARY · FIELD CHECK PENDING · NOT A STATUTORY REDLINE

THE SLOW VARIABLES 京张慢变量 · v2.0

FIG.06 指标证据 METRICS

FIG.06 · CENTENNIAL JING-ZHANG AI INNOVATION BELT

Baseline first, decade goals later

Recomputable design quantities kept strictly apart from life metrics not yet known

CONCEPT ONLY · PROVISIONAL BOUNDARY · FIELD CHECK PENDING · NOT A STATUTORY REDLINE

THE SLOW VARIABLES 京张慢变量 · v2.0
