

GREEN.JZ: Zero-Carbon Demo Campus & Green Energy Synergy System (Conceptual Design)

Provisional boundary - not an official redline - recompute on official data

Zero-carbon corridor concept along the Jingzhang AI Innovation Belt - campus-corridor-station - sub-scope of the three official levels

Design Proposal (Concept)
Package 41 - zero-carbon-demo-garden

Official three-level scope (announcement): coordinated research ~43.6 km² / overall design ~11.4 km² / key areas ~368.4 ha; this package is the overall-design-level sub-scope (GREEN.JZ concept, project, and implementation)

All drawings are participant provisional model data, not authoritative data; they constitute neither government conclusions, statutory redlines, ownership, engineering nor approval basis. Full recalculation after official boundary, survey, and approval.

GREEN.JZ: Zero-Carbon Demo Campus & Green Energy Synergy System (concept)

Zero-carbon corridor concept along the Jingzhang AI Innovation Belt - campus-corridor-station - sub-scope of the three official levels

Provisional boundary - not an official redline - recompute on official data

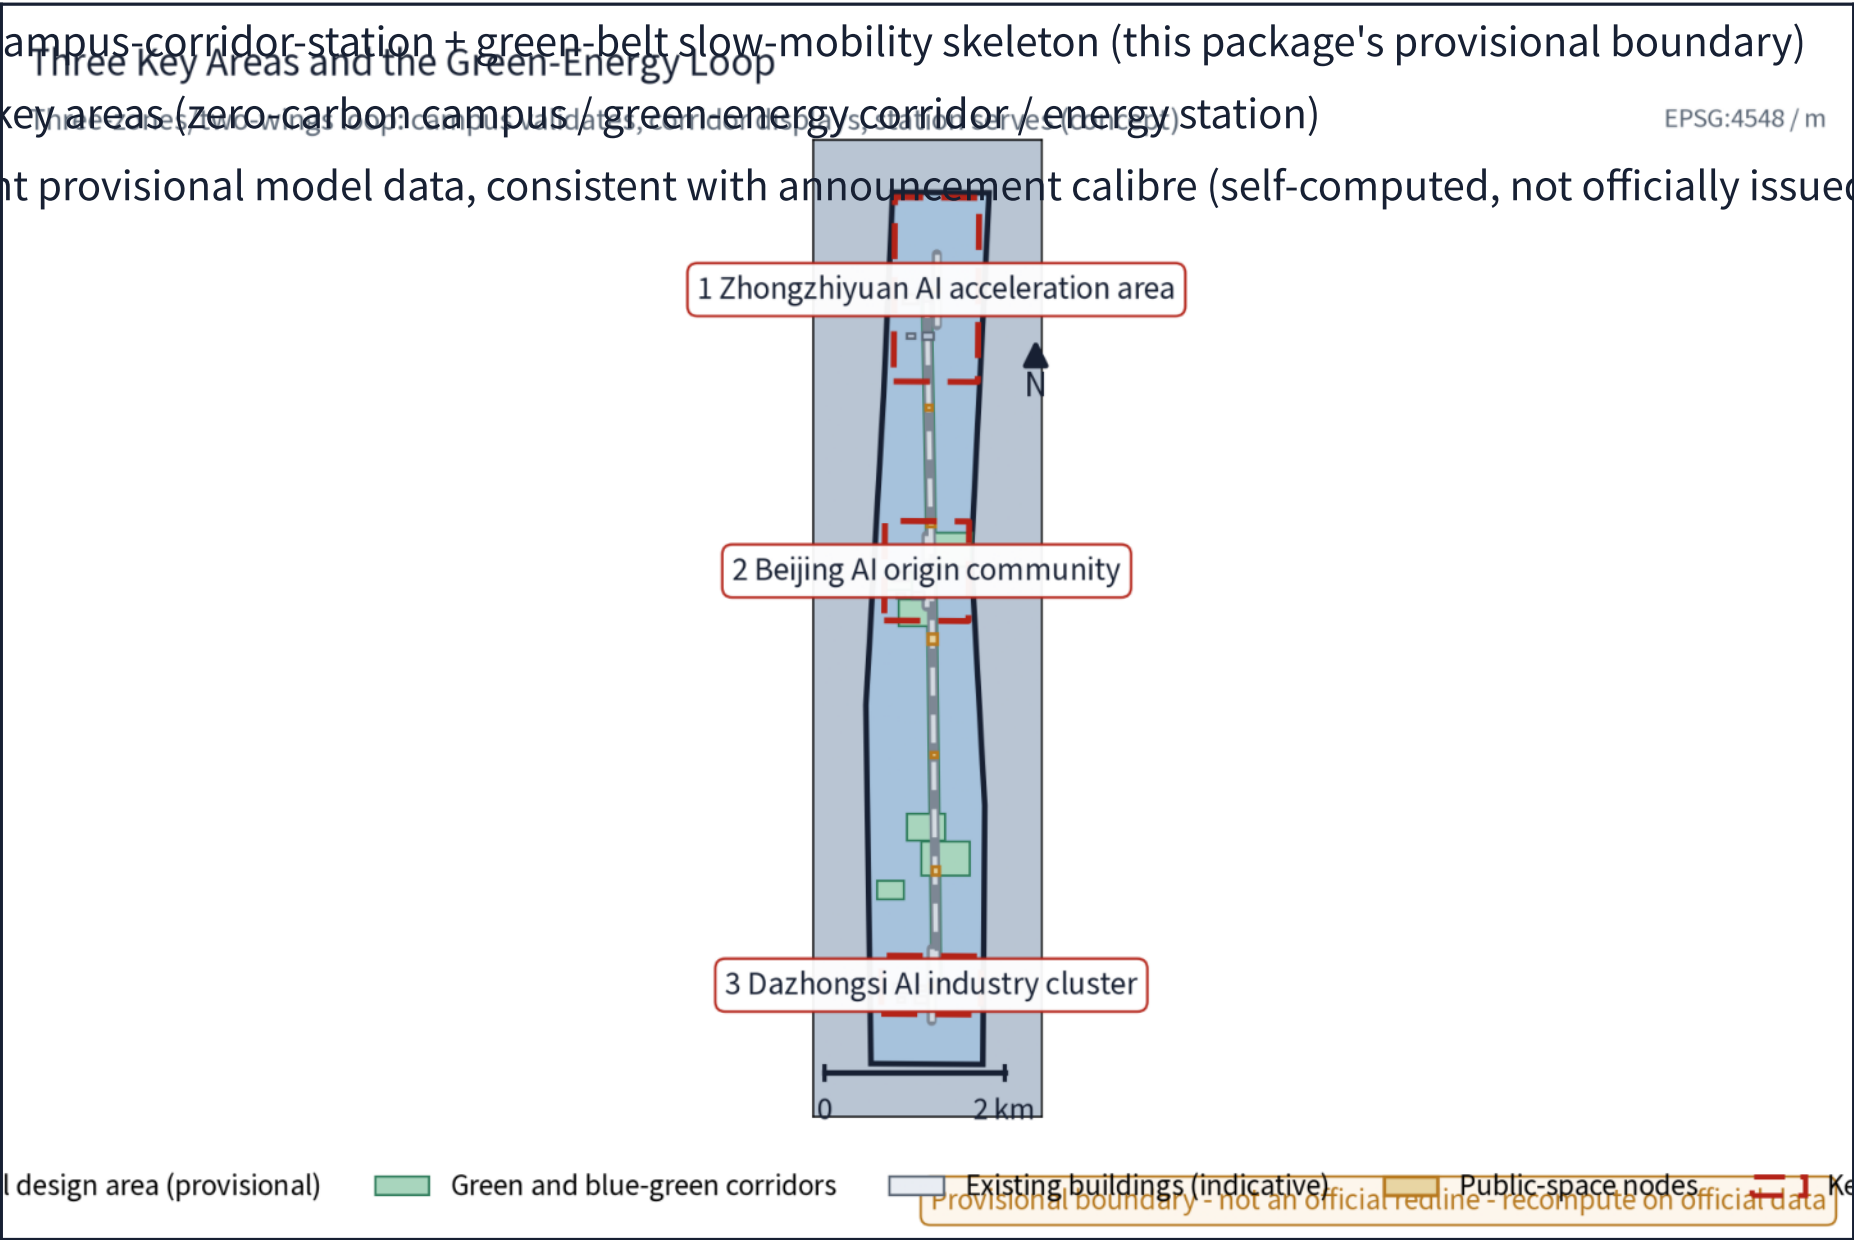

Three-Level Scope and Official Hierarchy

Coordinated research ~43.6 km2: green-industry and future-city opportunities (industry and future-city research)

Overall design ~11.4 km2: campus-corridor-station + green-belt slow-mobility skeleton (this package's provisional boundary)

Key areas ~368.4 ha: three key areas (zero-carbon campus/ green-energy corridor/ energy station)

Package data are participant provisional model data, consistent with announcement calibre (self-computed, not officially issued); full recomputation on official geo

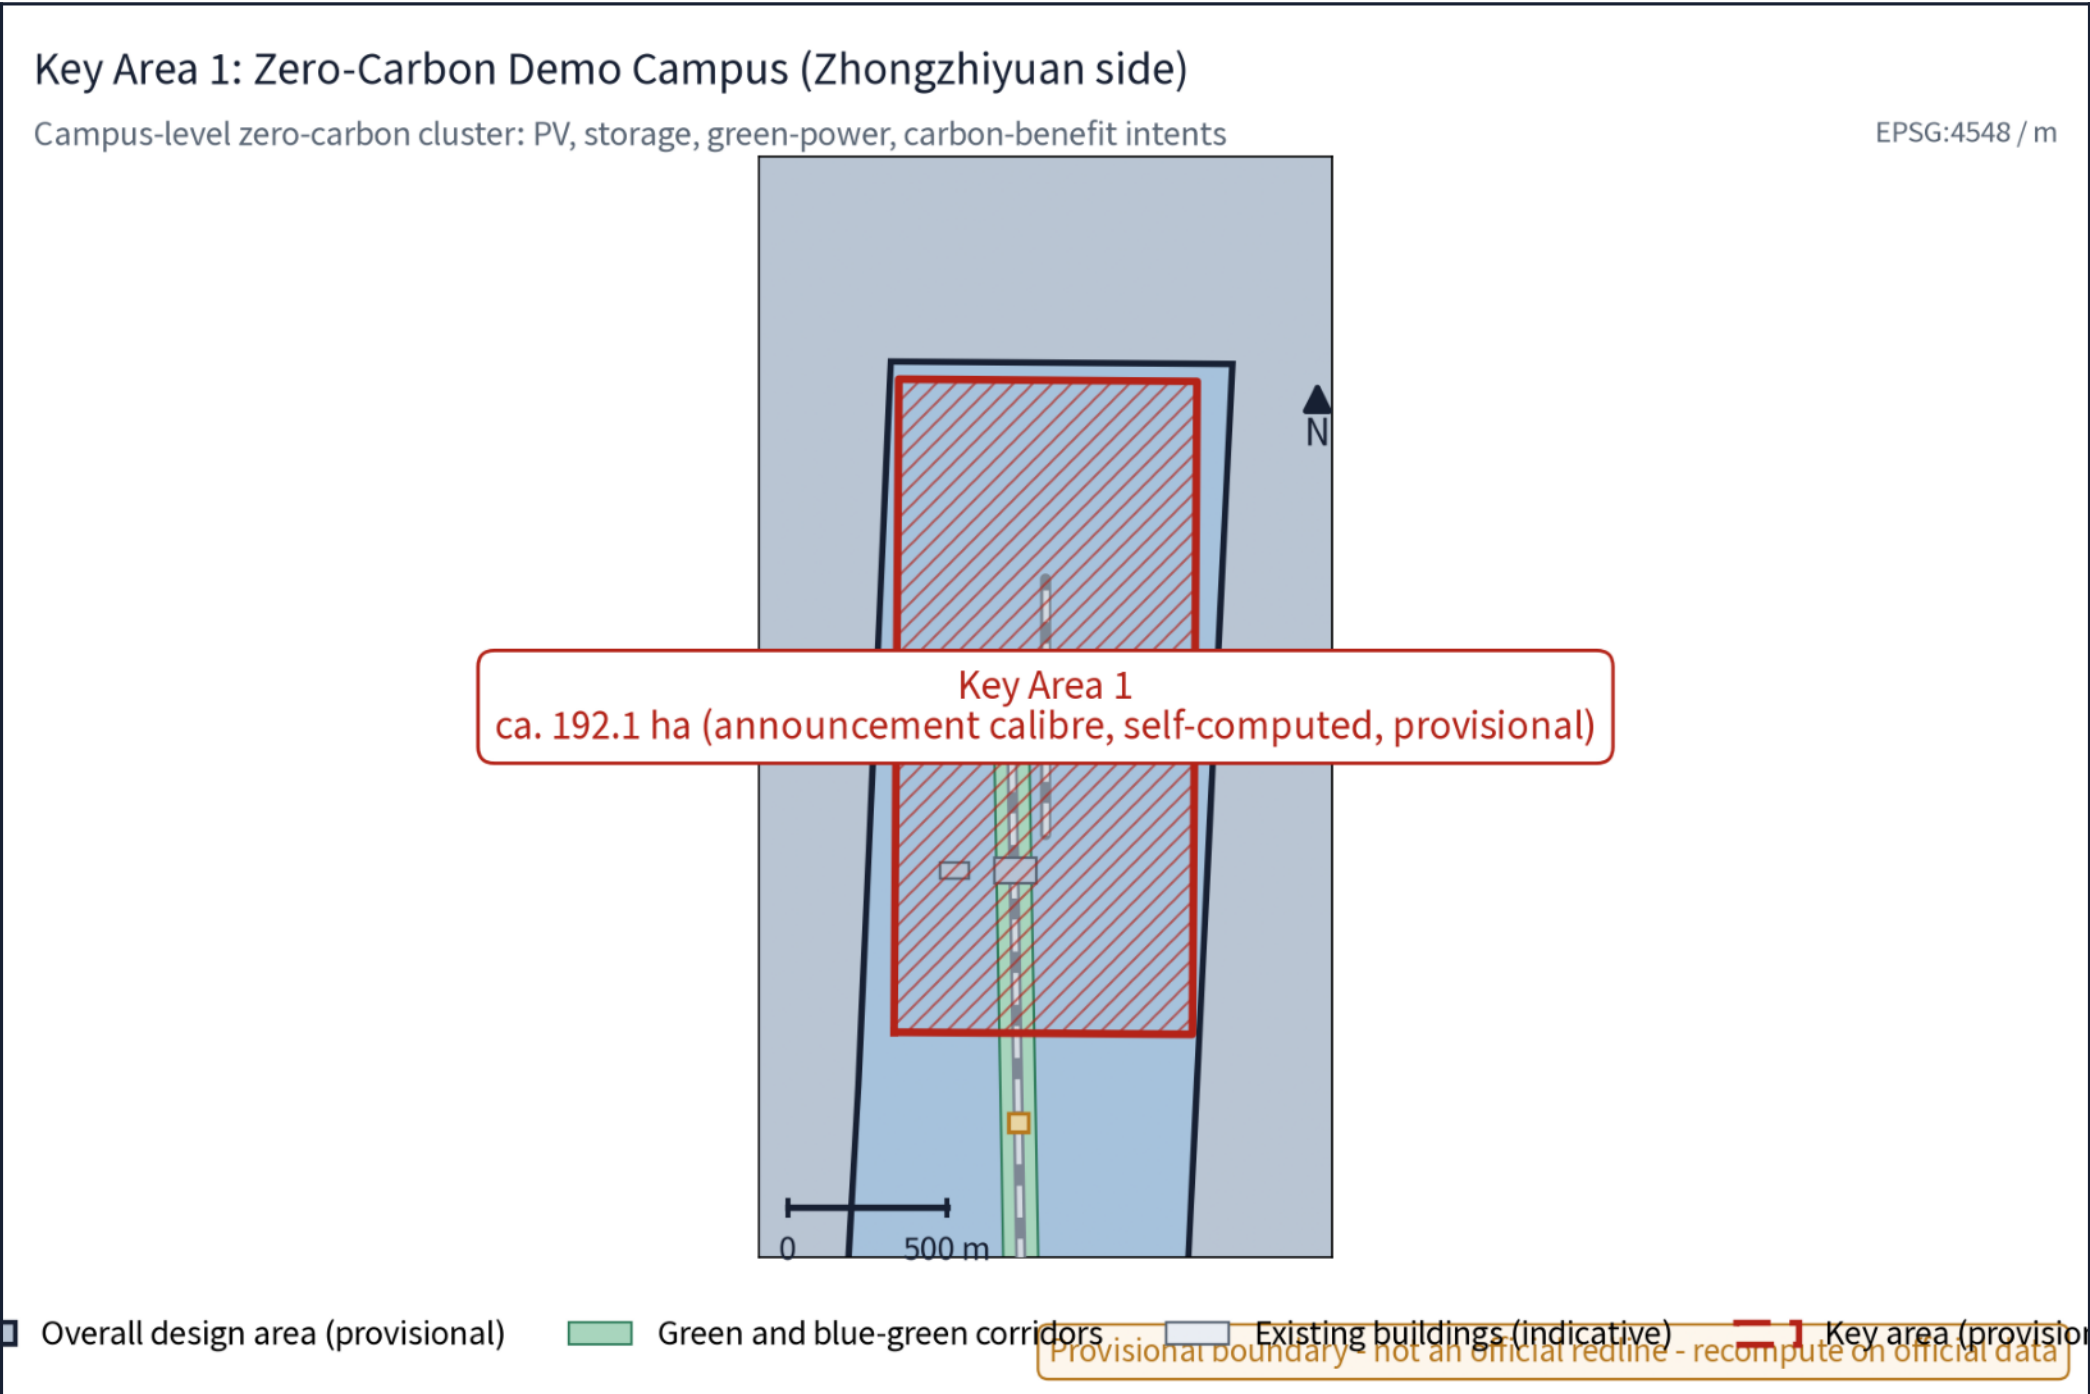

GREEN.JZ: Zero-Carbon Demo Campus & Green Energy Synergy System (concept)

Zero-carbon corridor concept along the Jingzhang AI Innovation Belt - campus-corridor-station - sub-scope of the three official levels

Provisional boundary - not an official redline - recompute on official data

Key Area 1: Zero-Carbon Demo Campus (Zhongzhiyuan side)

Campus-level zero-carbon cluster: distributed PV, storage, green-power trading and carbon-benefit intents; public experience: carbon-efficiency wall and demonstration route;

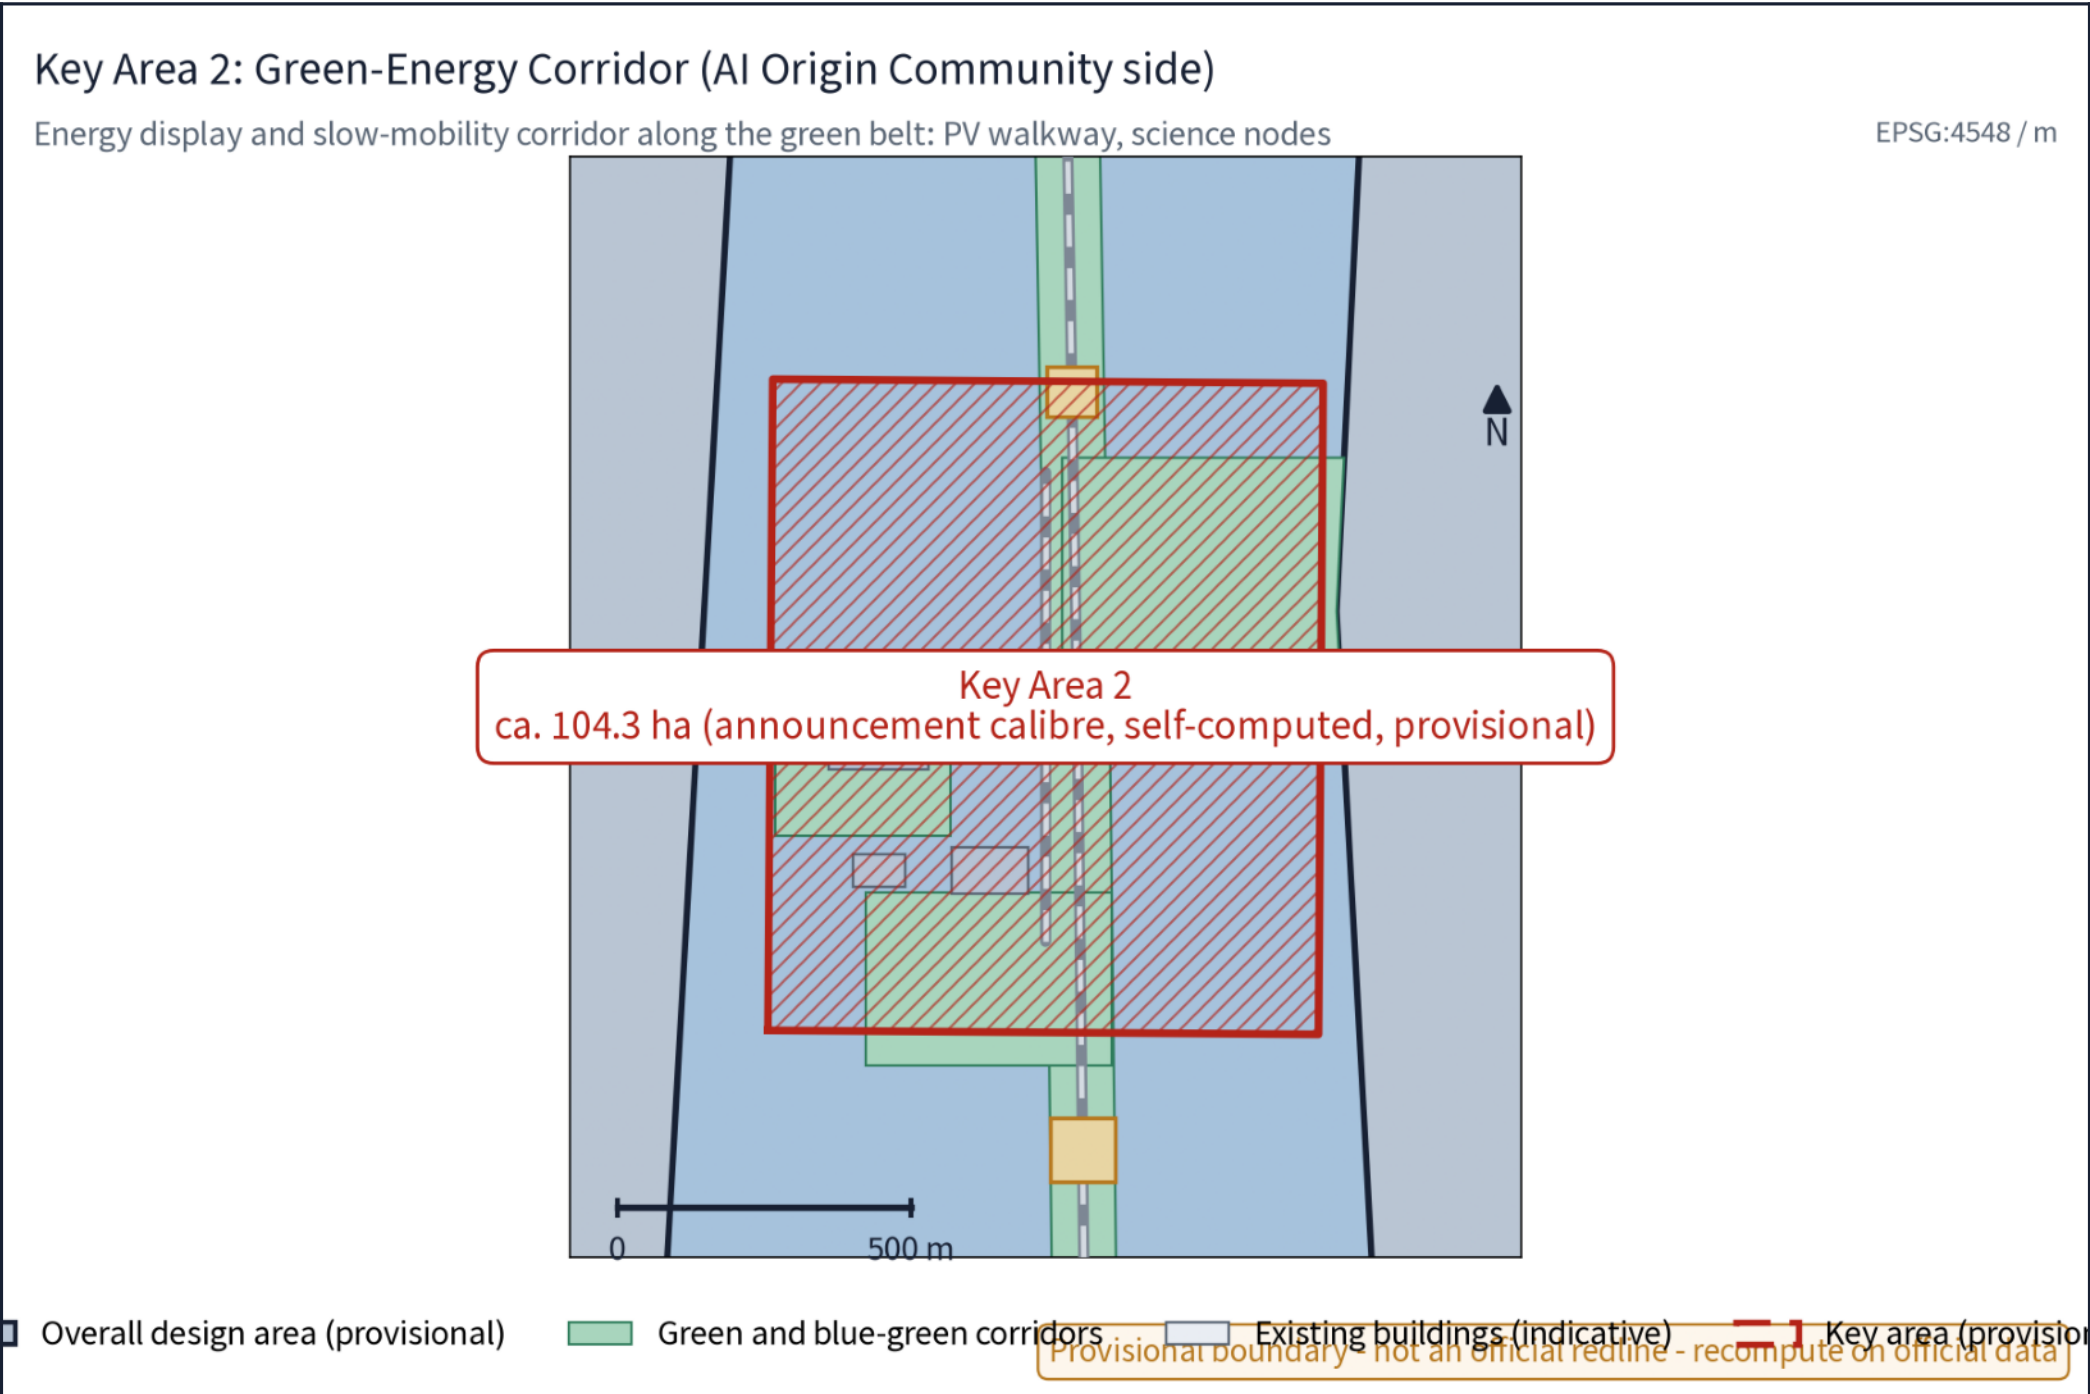

GREEN.JZ: Zero-Carbon Demo Campus & Green Energy Synergy System (concept)

Zero-carbon corridor concept along the Jingzhang AI Innovation Belt - campus-corridor-station - sub-scope of the three official levels

Provisional boundary - not an official redline - recompute on official data

Key Area 2: Green-Energy Corridor (AI Origin Community side)

Energy display and slow-mobility corridor along the green belt: PV walkway and science nodes; shade, rest and wayfinding remain available offline.

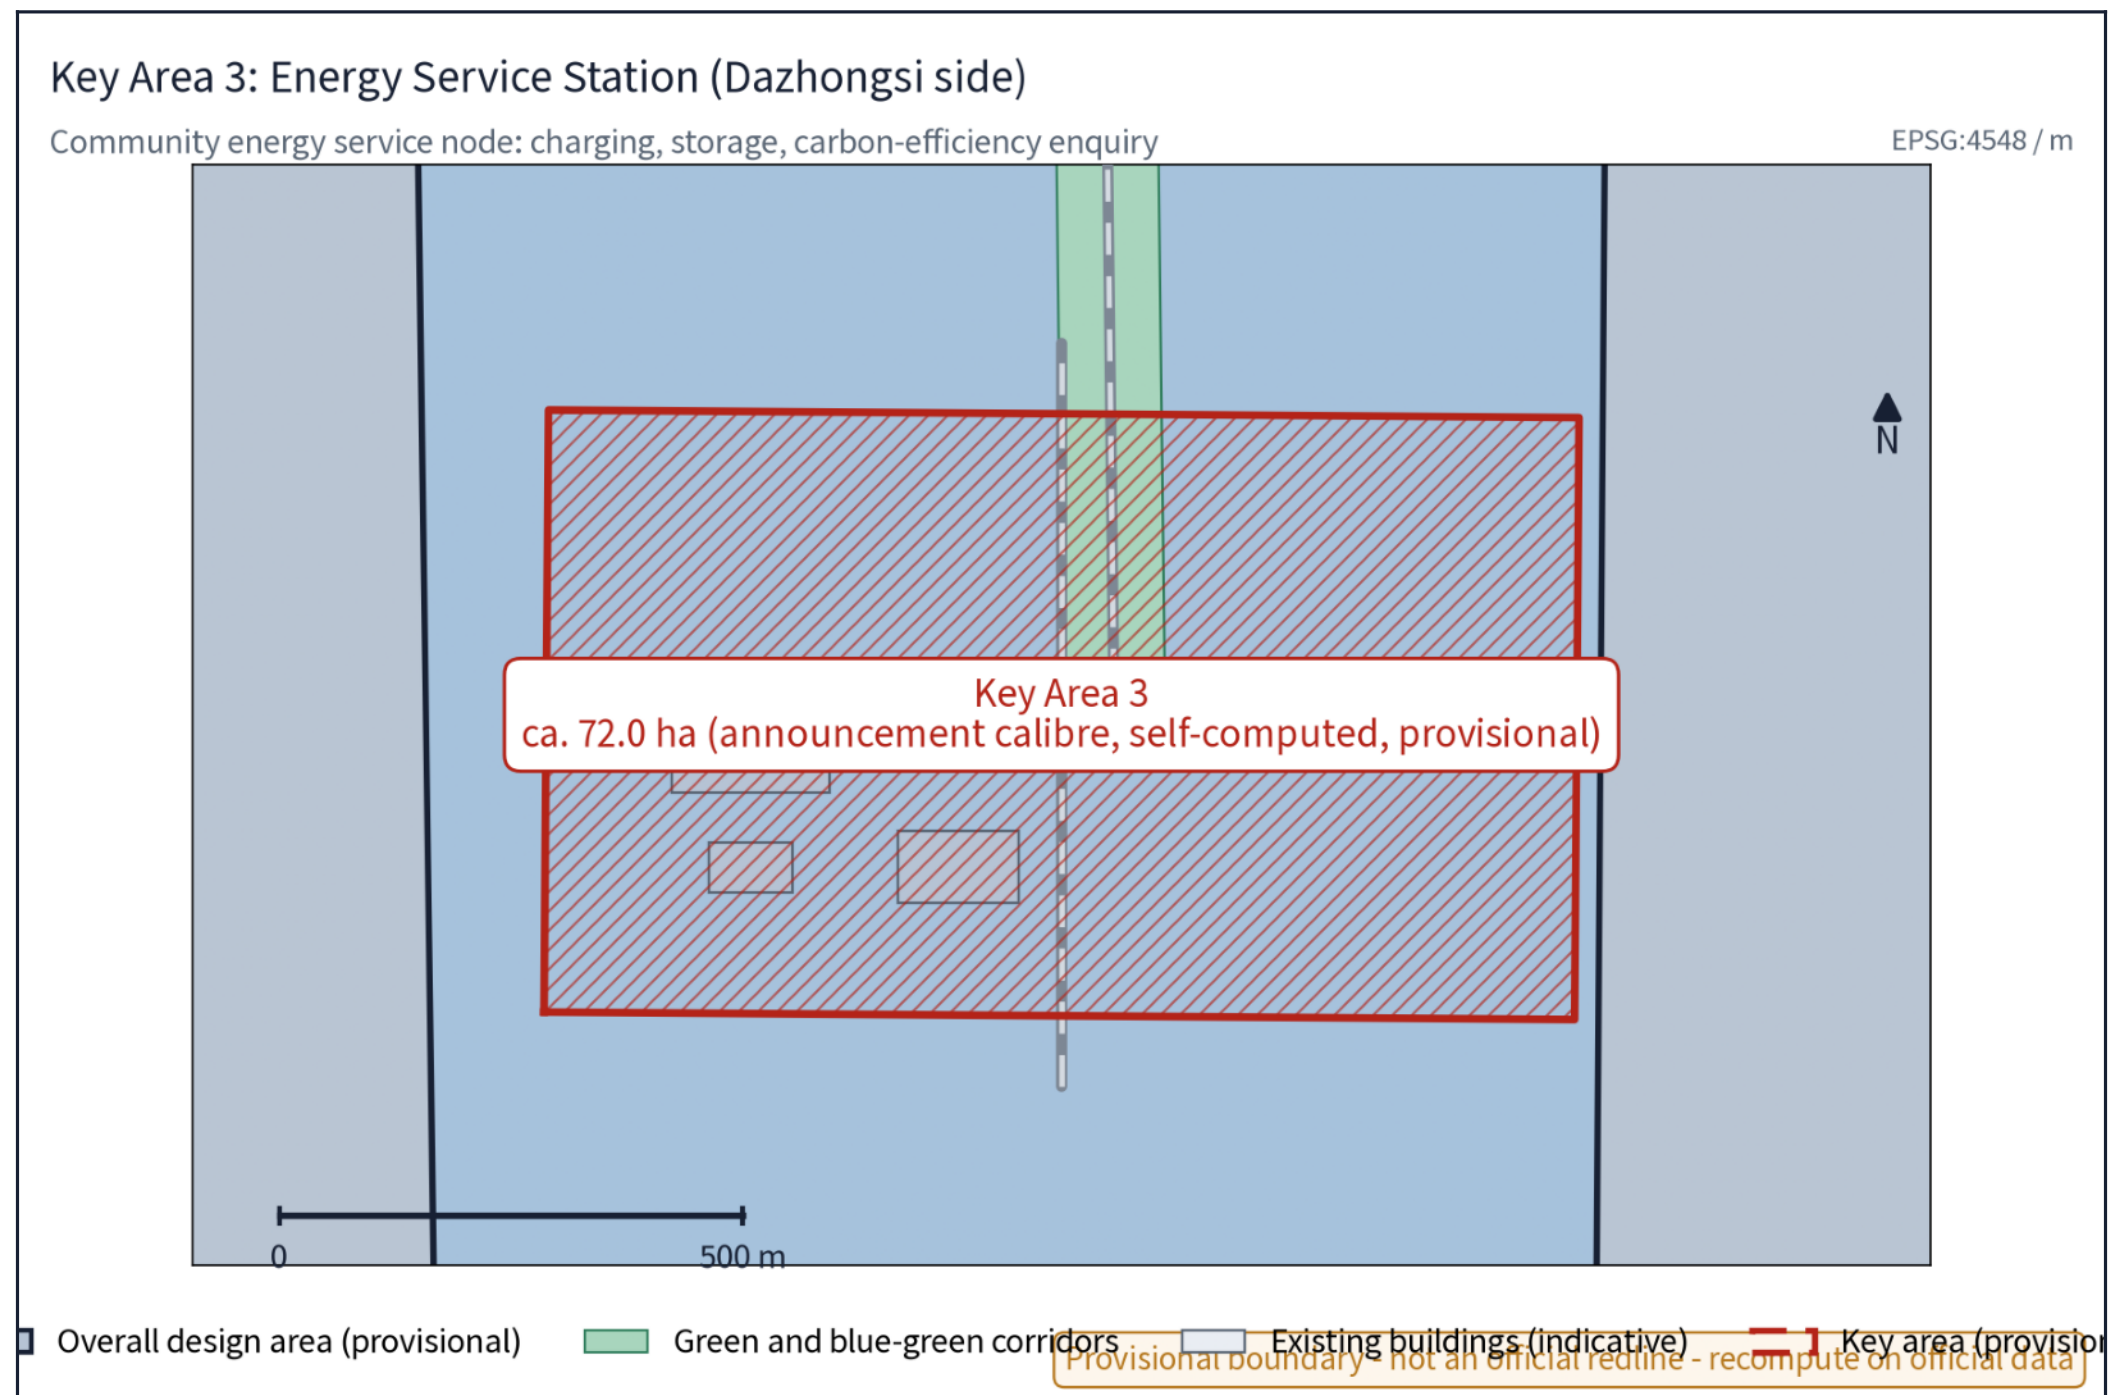

GREEN.JZ: Zero-Carbon Demo Campus & Green Energy Synergy System (concept)

Zero-carbon corridor concept along the Jingzhang AI Innovation Belt - campus-corridor-station - sub-scope of the three official levels

Provisional boundary - not an official redline - recompute on official data

Key Area 3: Energy Service Station (Dazhongsi side)

Community energy service node: charging, storage, carbon enquiry; suggestion box + quarterly public responses + appeal channel (concept).

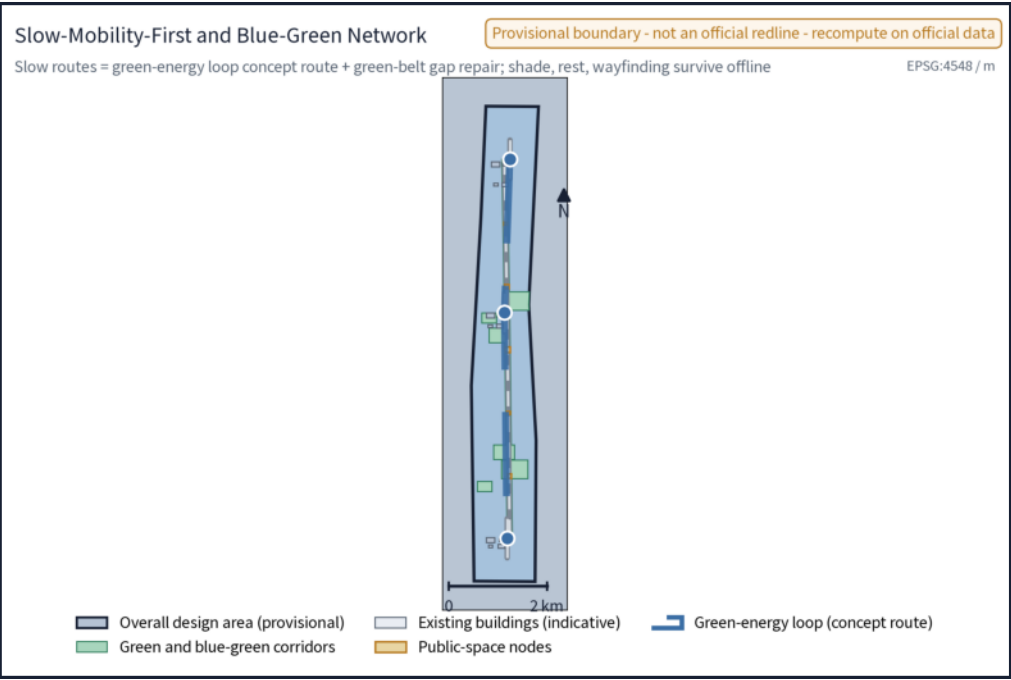

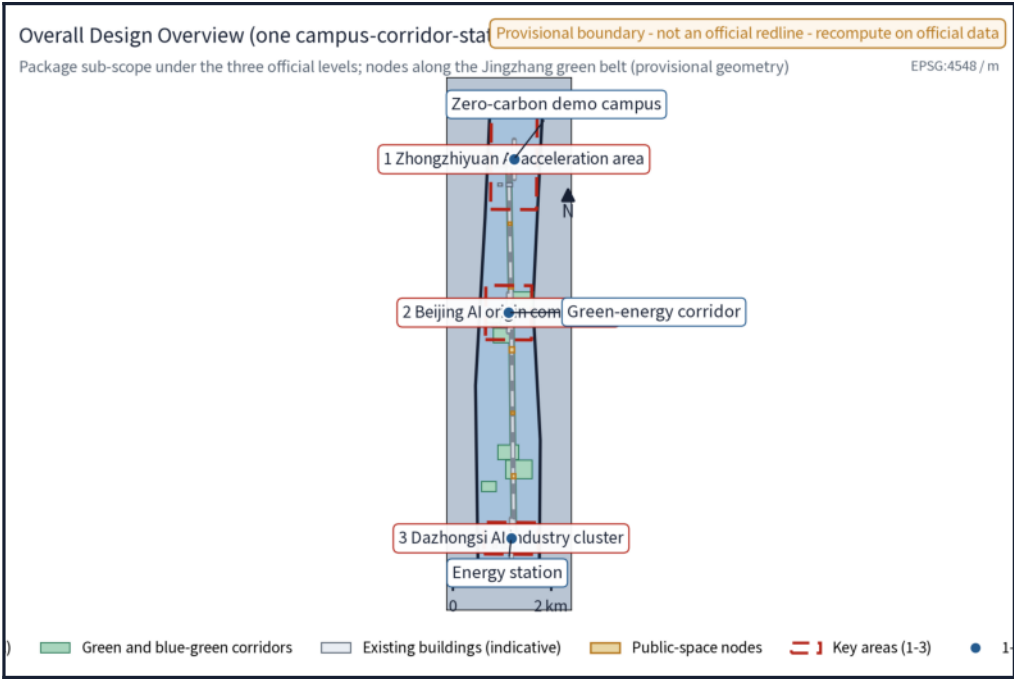

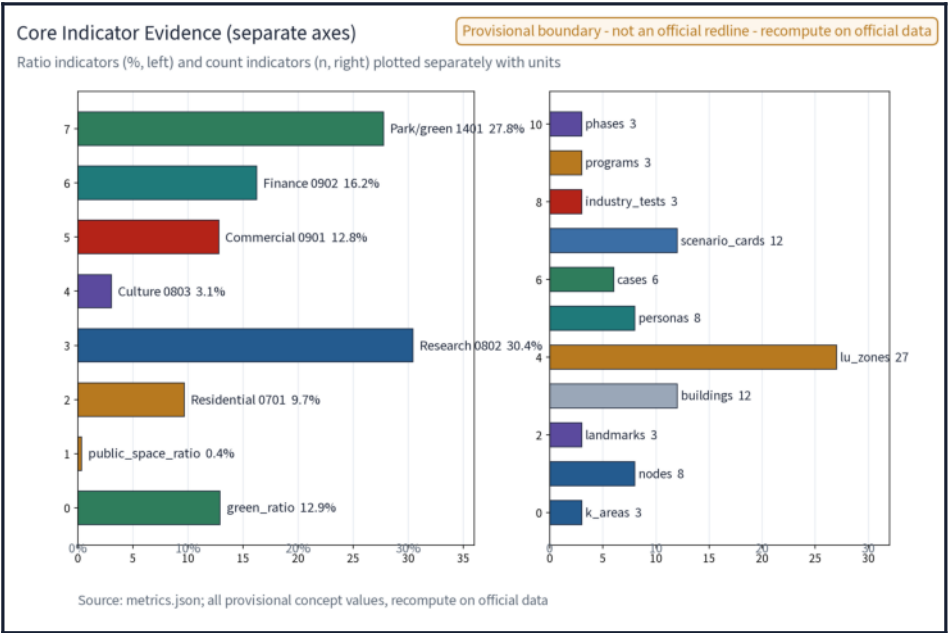

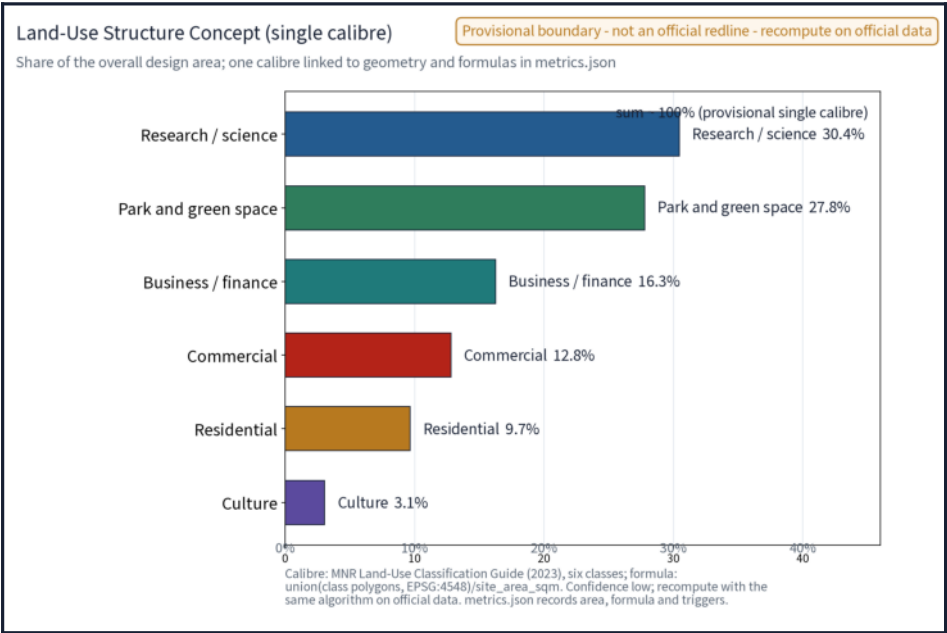

GREEN.JZ: Zero-Carbon Demo Campus & Green Energy Synergy System (concept)

Zero-carbon corridor concept along the Jingzhang AI Innovation Belt - campus-corridor-station - sub-scope of the three official levels

Provisional boundary - not an official redline - recompute on official data

Land-Use Structure and Core Indicators (single calibre)

Six land-use ratios and core indicators recomputed from package geometry; ratios and counts on separate axes with units; confidence low-medium; recompute on official data.

GREEN.JZ: Zero-Carbon Demo Campus & Green Energy Synergy System (concept)

Zero-carbon corridor concept along the Jingzhang AI Innovation Belt - campus-corridor-station - sub-scope of the three official levels

Provisional boundary - not an official redline - recompute on official data

Implementation and Stage Gates (concept)

Three phases: short-term 1-3y pilot validation - mid-term 3-5y skeleton - long-term 5-10y system synergy; pilot stage gates G0-G4 (preconditions / data dictionary / privacy audit)

G0 Pre-initiation	Fire/grid/structural preconditions checked; official boundary and regulatory conditions confirmed
G1 Data ready	Data dictionary published; energy/carbon baseline at public calibre, gaps logged
G2 Pilot allowed	Privacy audit passed; anonymisation + human review points ready; RACI signed
G3 Operation	Runtime monitoring/false-alarm rate/error stratification live; fallback plan
G4 Acceptance/exit	Acceptance indicators met; annual recompute; otherwise stop/exit per conditions

Core indicators: site_area_sqm, green_ratio, public_space_ratio and six land ratios all recomputed from package geometry; ratios and counts plotted on separate axes

GREEN.JZ: Zero-Carbon Demo Campus & Green Energy Synergy System (concept)

Zero-carbon corridor concept along the Jingzhang AI Innovation Belt - campus-corridor-station - sub-scope of the three official levels

Provisional boundary - not an official redline - recompute on official data

Sources, Rights and Compliance (summary)

Six benchmark cases, font (Noto Sans SC, OFL-1.1), icons and tools registered per item in sources.json; no trademark search completed at concept stage - names treated as internal

All drawings are participant provisional model data, not authoritative data; they constitute neither government conclusions, statutory redlines, ownership, engineering nor approval basis. Full recalculation
