Belt Overview: Twelve Candidate Transects Located

The extent is a constraint; the collaboration loop is the main story.

Belt Overview: Twelve Candidate Transects Located

One spine links three areas; 12 candidates, 0 surveyed [metric:cross_section_candidate_count]

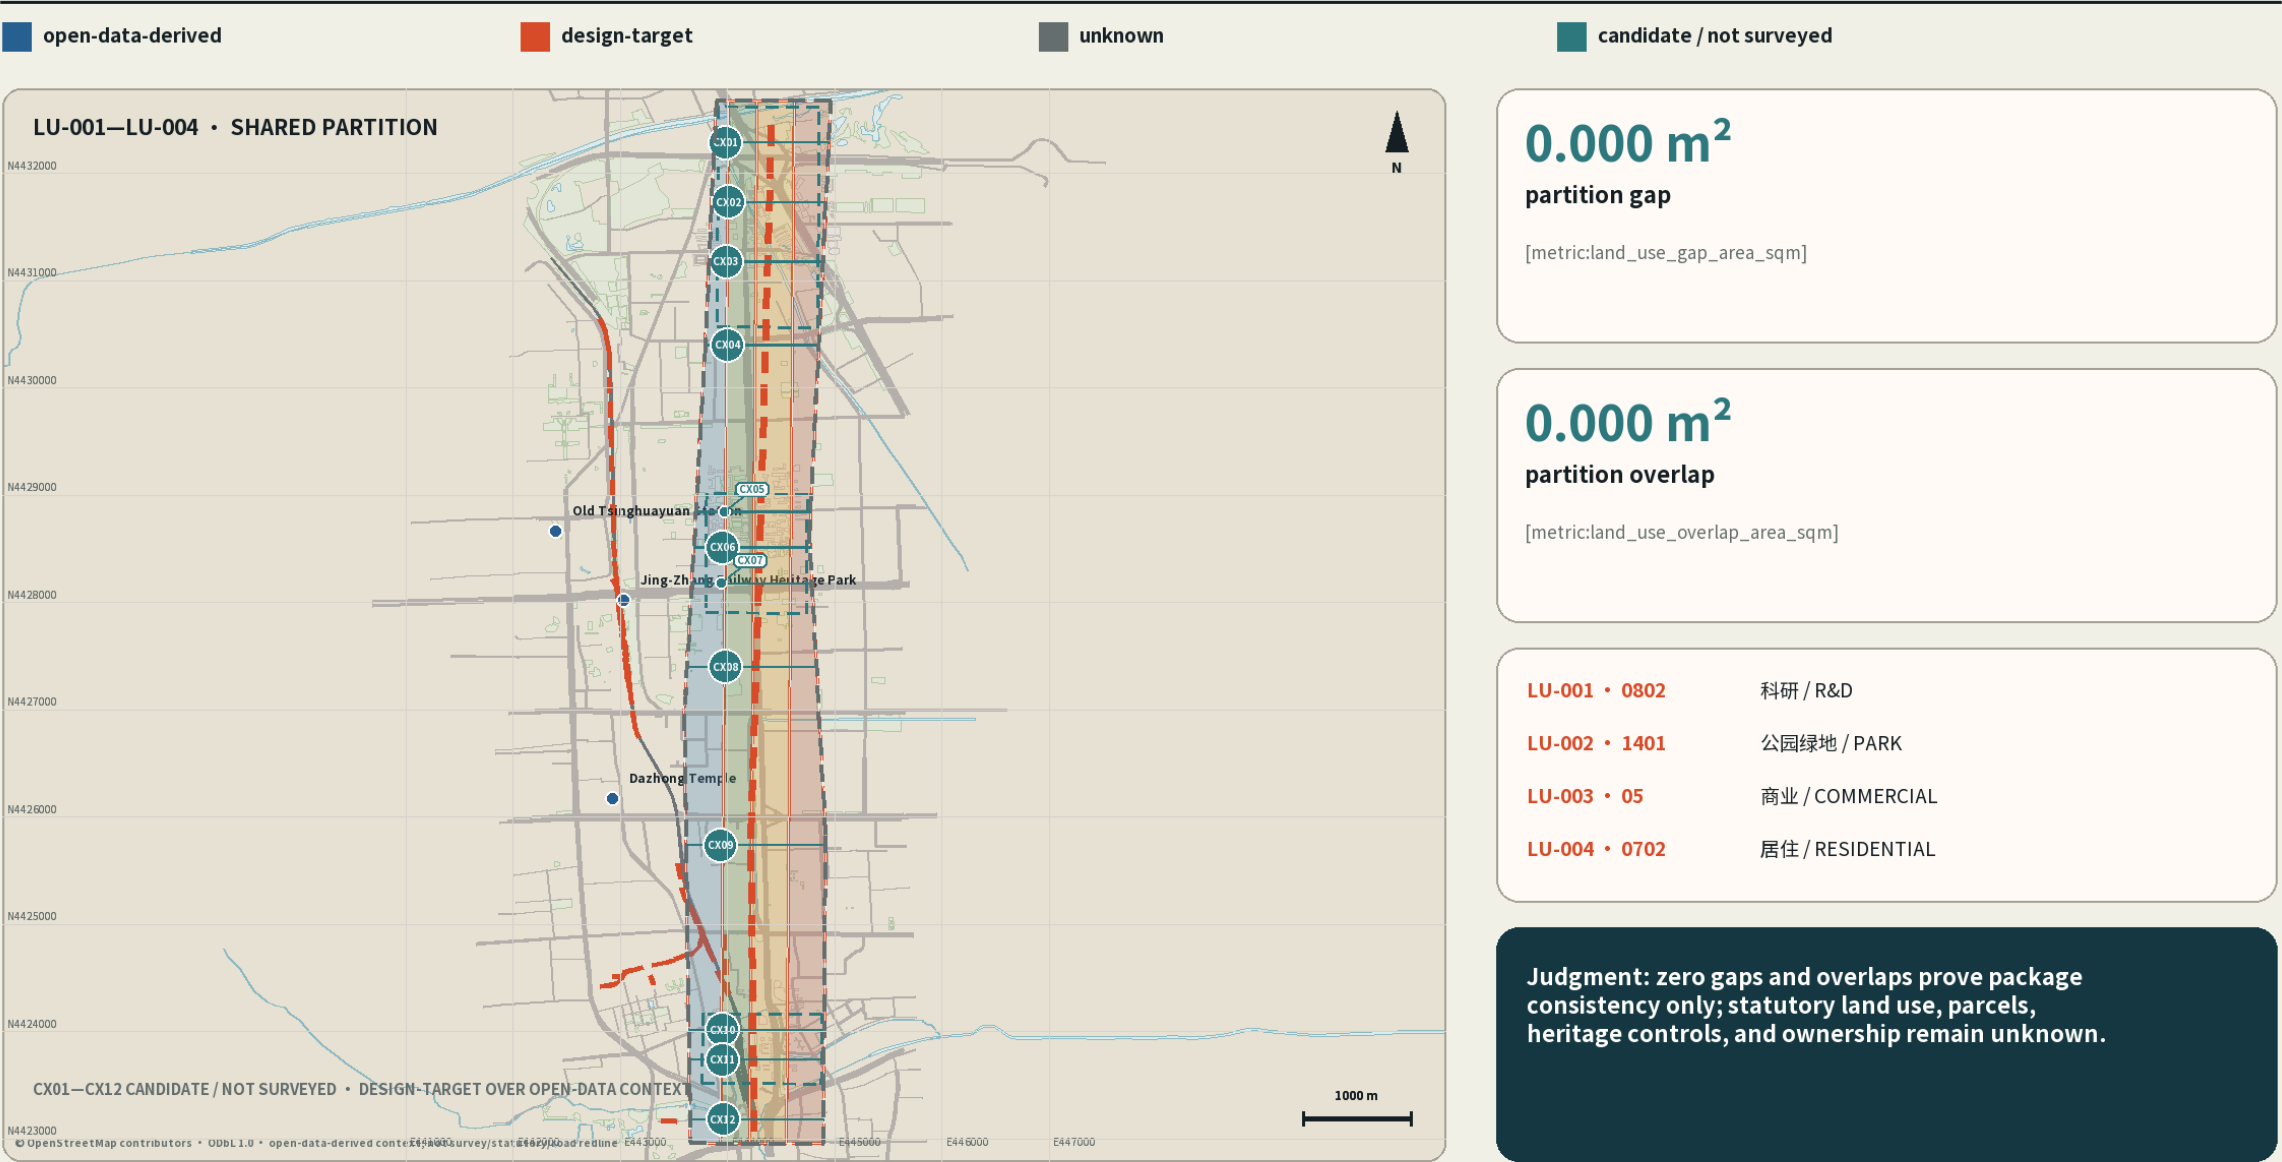

Shared Partition: Same Edges, Zero Gaps, Zero Overlaps

Complete coverage supports recalculation, not statutory zoning or parcels.

F02 • OPEN CITY DESIGN / 2026

Shared Partition: Same Edges, Zero Gaps, Zero Overlaps

A recalculable scenario partition—not statutory zoning, parcels, or control planning [metric:land_use_gap_area_sqm]

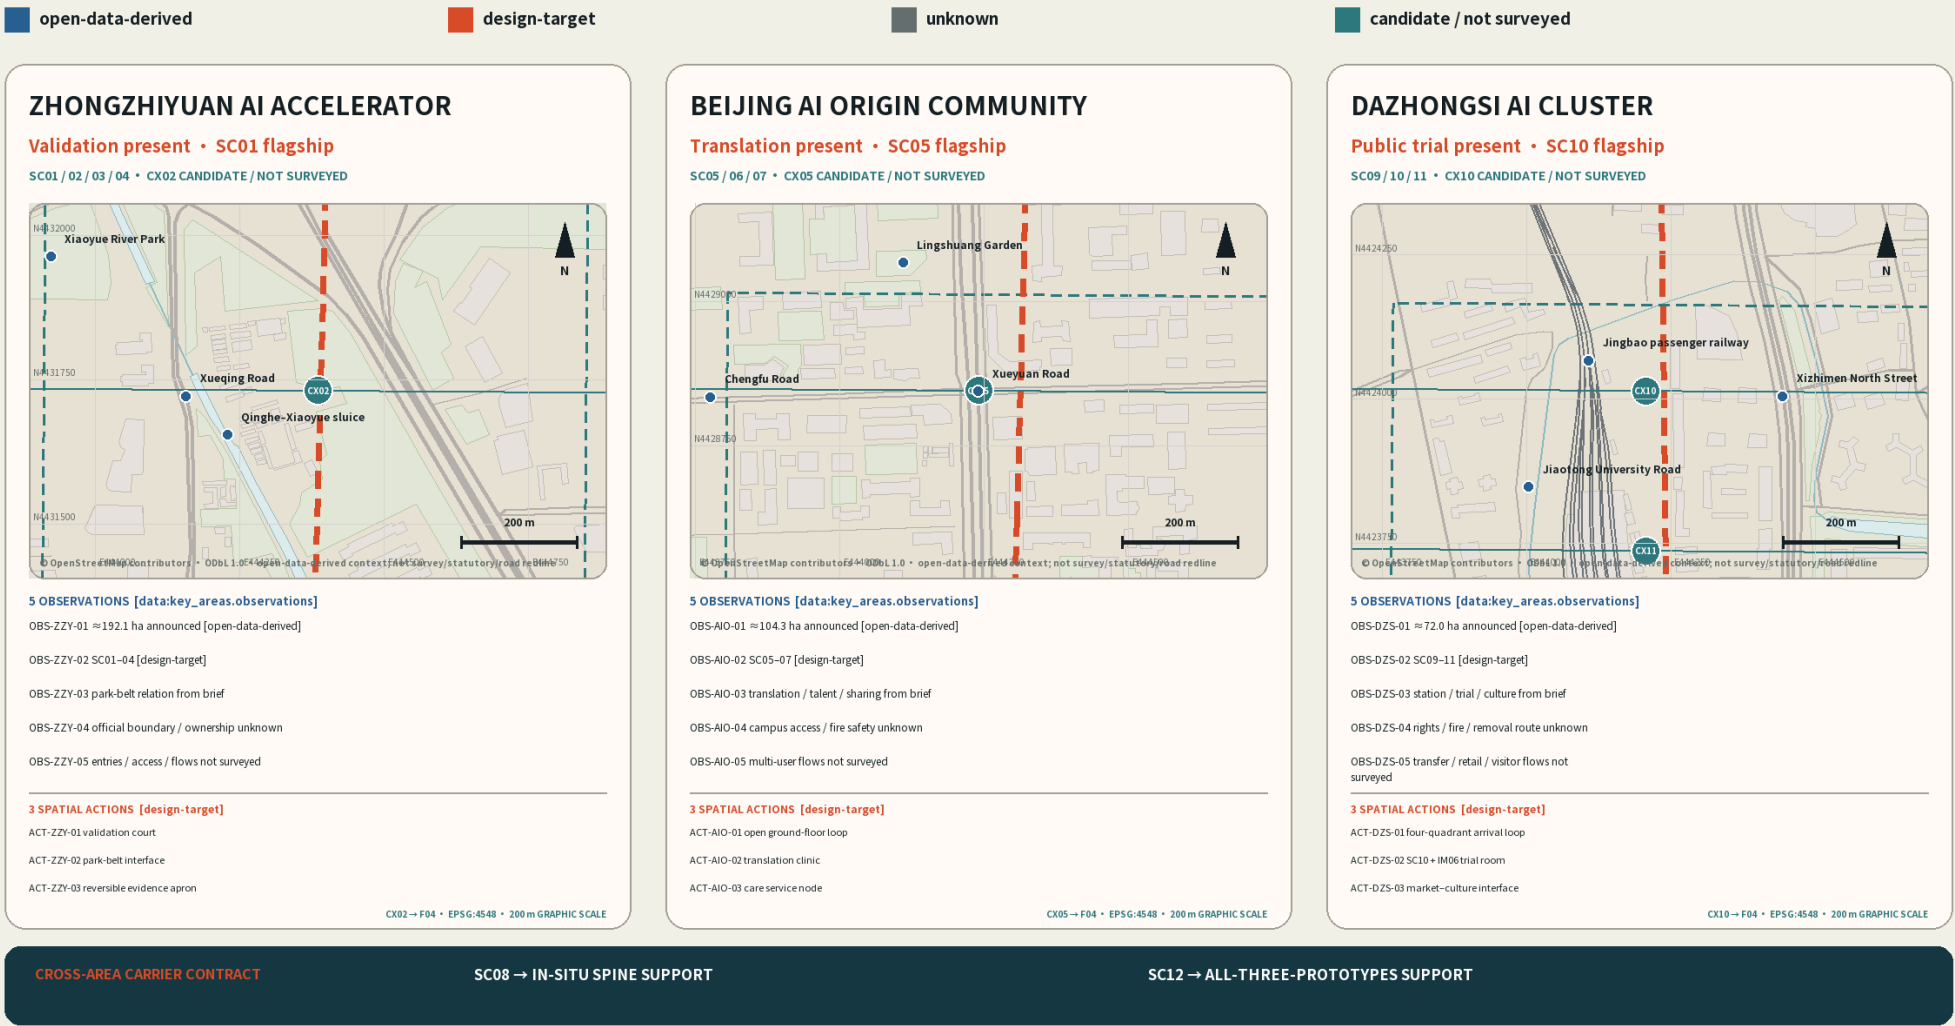

Three Key Areas at One Comparative Scale

Zhongzhiyuan validates, AI Origin translates, and Dazhongsi hosts public trials; all three boundaries are provisional.

Three Key Areas at One Comparative Scale

Five background observations + three spatial moves per area; facts, targets, and unknowns stay distinct

F04 • OPEN CITY DESIGN / 2026

CX02 / CX05 / CX10 are relational design targets; the other nine are not presented as completed design

Evidence + Metrics: Adverse Results Stay Visible

Twenty-one metrics are known, six remain unknown, and nineteen are independently recomputable; adverse results stay visible.

Evidence + Metrics: Adverse Results Stay Visible

19 package-recalculable metrics; 0 surveyed, 0% OSM intersection, and 667 m offset remain visible

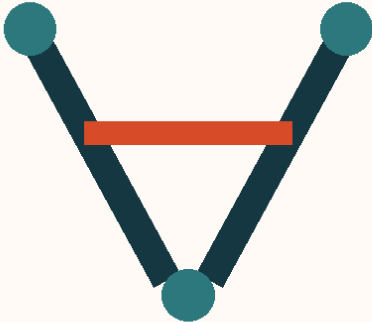

Identity System: One Belt, Three Interfaces, One Grammar

The shared language supports recognition, takeover, verification, and withdrawal without implying official identity.

Identity System: One Belt, Three Interfaces, One Grammar

A shared language—not an official government or place identity
