AI ALONG JINGZHANG

Official textual figures, provisional geometry, and real-world locations are separated; boundaries are not official planning lines.

01 Site, Evidence, and Overall Concept

Three Zones as a chain · Two Wings as a loop · Jing-Zhang integrated with the city

Value chain

Research & validation → translation → market adoption

Shared capabilities

Professional services and real scenarios form a feedback loop

Public spine

A green shortcut on weekdays; a heritage and technology experience route on weekends.

Provisional overall boundary

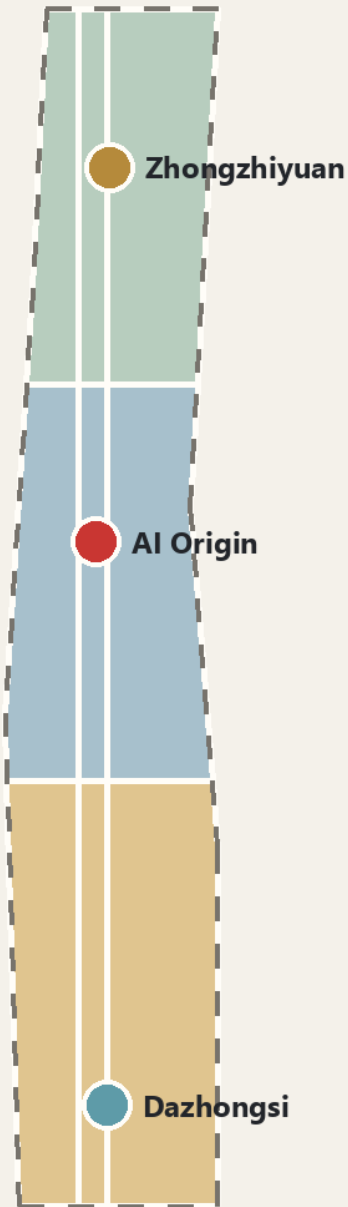

Provisional rough boundary | Concept reference, not an official planning boundary; full recalculation required

Zhongzhiyuan validates, AI Origin translates, Dazhongsi adopts; the Two Wings provide services and real-world feedback.

02

Land Use, Value Chain, and Two Wings

Complete partition coverage 1.0 | Functional diagram, not statutory land use

01 Zhongzhiyuan

Independent research | trusted validation | AI governance

02 AI Origin

Outcome translation | incubation | public co-creation

03 Dazhongsi

Market adoption | urban services | international presentation

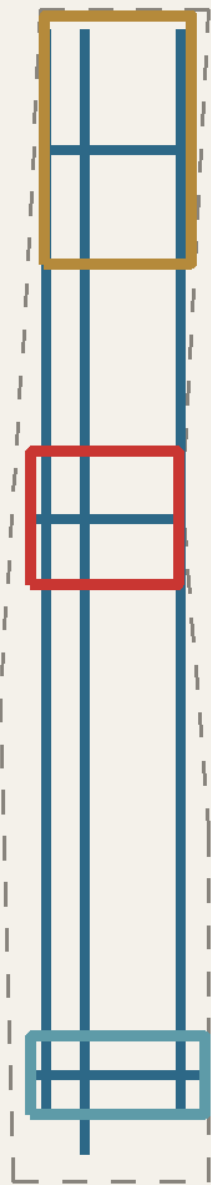

The Two Wings do not duplicate the Three Zones

The west wing provides professional services; the east wing provides testing, ecological, and public feedback.

Each area has a position, spatial interfaces, project levers, operations, risks, and conditions for further work.

03 Three Key Areas and Four Landmarks

One value chain, distinct spatial tasks; locations require official-boundary and survey calibration

Zhongzhiyuan

Trusted Validation Ground
Public foyer | booked tests | compliance route | feedback interface
Gate | Planning controls, engineering conditions, and operator pending

AI Origin

Open-Source Milestone Court + Qinghuayuan City Question Station
Translation | developer work | interior conservation | reversible external questions
Gate | Heritage lines, ownership, and real location pending

Dazhongsi

Global AI Living Gallery
Open days | controlled commercial validation | multilingual events | station walk audit
Gate | Area location, road redlines, and visitor permission pending

Eight personas, twelve scenarios, and three industry validation types; digital services retain human alternatives and exit.

06

Twelve Scenarios and Governance Gates

Public service, industry validation, and ecological feedback share human safeguards but use distinct protocols

01

City questions

Operator | minimum data | human review
KPI | failure | appeal | pause | exit

02

Multilingual service

Operator | minimum data | human review
KPI | failure | appeal | pause | exit

03

Accessible navigation

Operator | minimum data | human review
KPI | failure | appeal | pause | exit

04

AI learning

Operator | minimum data | human review
KPI | failure | appeal | pause | exit

05

Health navigation

Operator | minimum data | human review
KPI | failure | appeal | pause | exit

06

Heritage guide

Operator | minimum data | human review
KPI | failure | appeal | pause | exit

07

International open day

Operator | minimum data | human review
KPI | failure | appeal | pause | exit

08

Enterprise compliance

Operator | minimum data | human review
KPI | failure | appeal | pause | exit

09

Trusted models

Operator | minimum data | human review
KPI | failure | appeal | pause | exit

10

Robot testing

Operator | minimum data | human review
KPI | failure | appeal | pause | exit

11

Smart commerce

Operator | minimum data | human review
KPI | failure | appeal | pause | exit

12

Blue-green citizen science

Operator | minimum data | human review
KPI | failure | appeal | pause | exit

Red public participation Blue service referral Gold industry validation Green ecological feedback

Common floor

Digital service cannot become the sole entry to basic service; high-risk scenarios require human takeover, immediate pause, and site restoration.

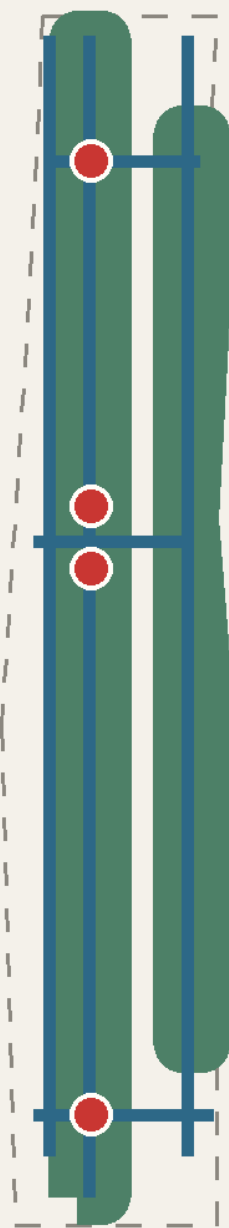

Provisional rough boundary | Concept reference, not an official planning boundary; full recalculation required

Everyday movement comes first; the Jing-Zhang spine links three stitches and Xiaoyue River provides ecological feedback.

04

Walking, Blue-Green, and Public Participation Network

Protect everyday movement before adding events, testing, and ecological feedback

Weekdays

Study, work, and community services
Jing-Zhang spine as a green shortcut

Weekends

Heritage and technology experience
Bookable open days and co-creation

Blue-green feedback

Heat, rainwater, and biodiversity observation
Human validation; no watercourse or tree alteration

Safety gates

Capacity threshold | physical stop
Human takeover | quiet periods

Ten actions start with surveys and protocols; one secretariat, three stations, two wings, and one public committee.

07 Renewal Actions, Phasing, and Risk Gates

Dates express work sequence, not a construction commitment; every phase requires professional and public review

Near term 2026-2028

Surveys and governance protocols

Boundaries, buildings, flows, accessibility, ecology, facilities; reversible wayfinding, open days, and small scenarios

Medium term - north

Research validation and blue-green links

Trusted validation, three stitches, AI Origin translation network, and Xiaoyue River citizen science

Medium-long term - south

Adoption, services, and international presentation

Dazhongsi location calibration, controlled commerce, multilingual service, and international events

Five implementation gates

Spatial

Official boundaries and survey base

Heritage

Control lines and impact assessment

Engineering

Planning, structure, fire, and utilities

Operations

Owner, budget, insurance, restoration

Public

Capacity, accessibility, complaints, and exit

Pause condition

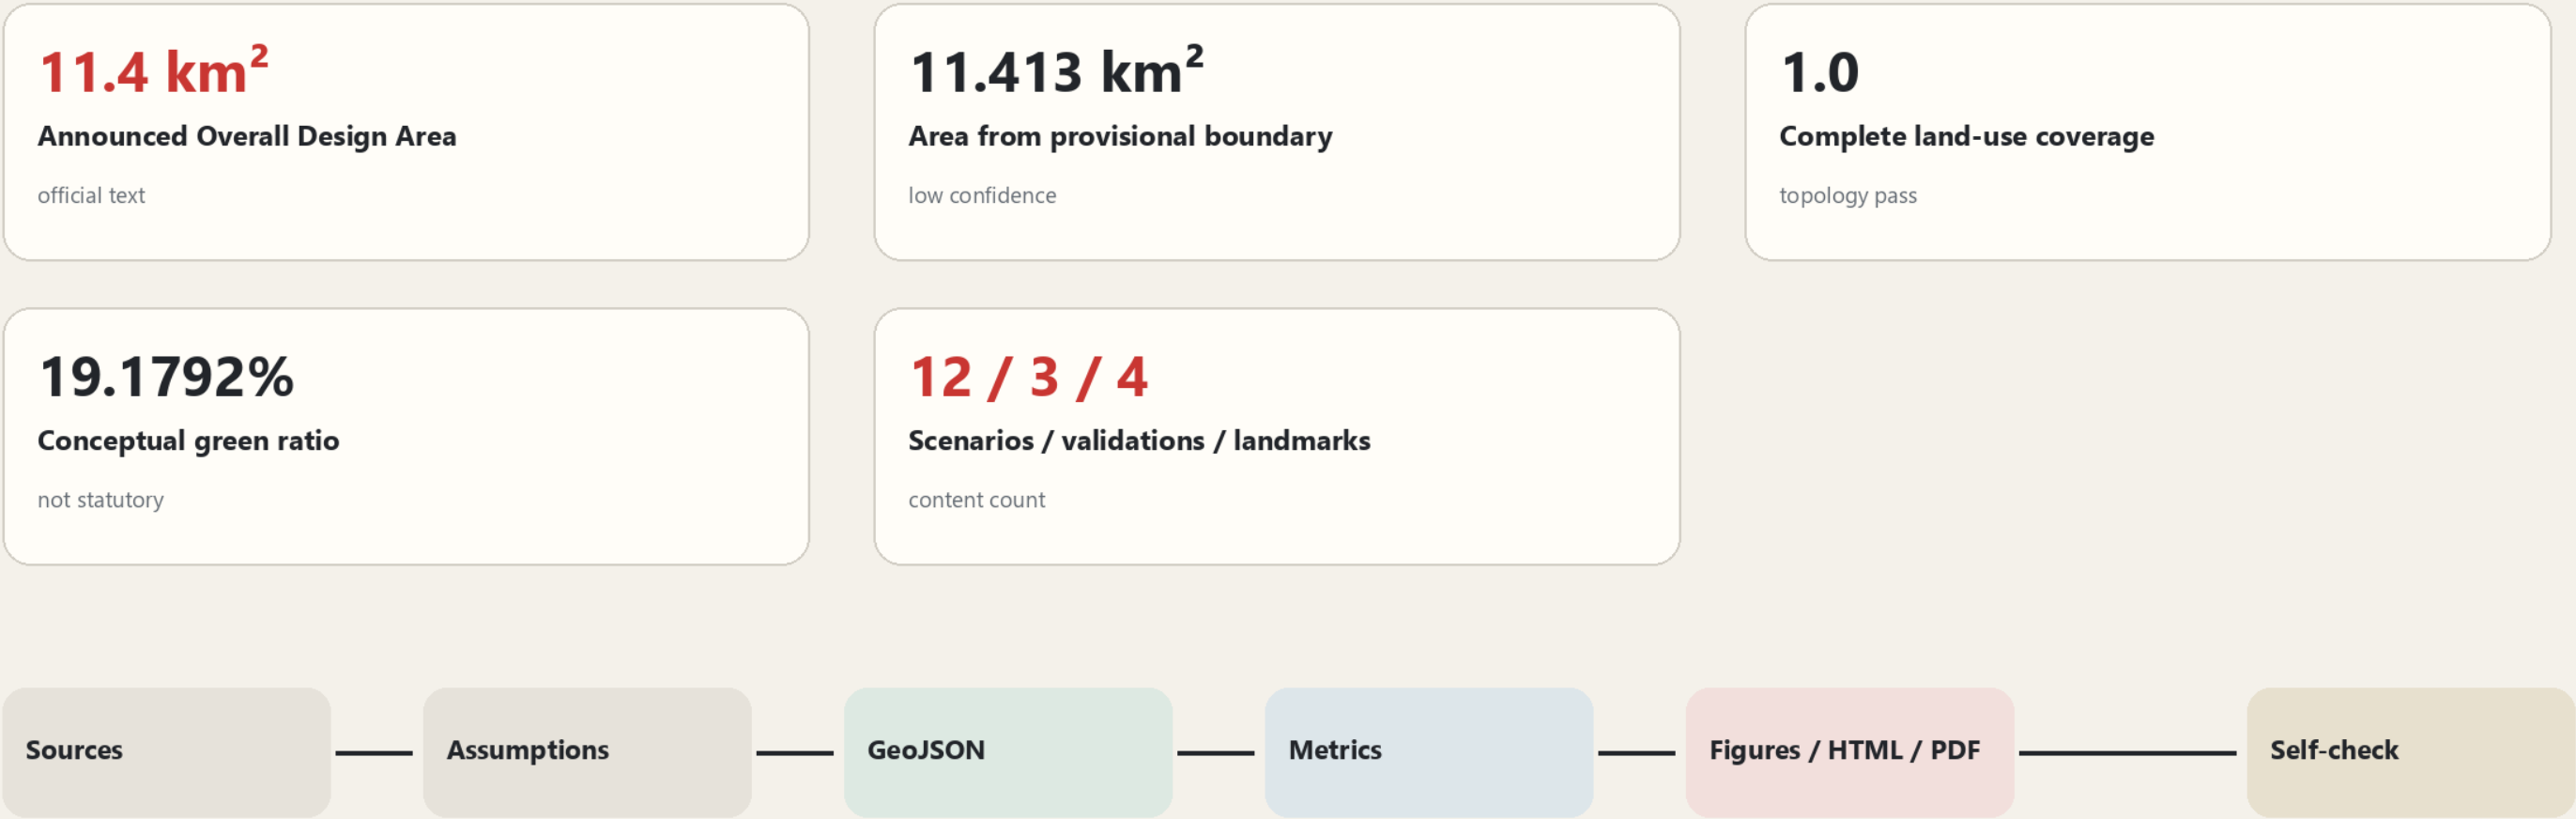

Pause immediately on boundary conflict, missing heritage permission, insufficient capacity, failed human takeover, digital-only basic service, or ecological disturbance.

Known metrics are reproducible; unknown statutory and engineering indicators are not invented; official boundaries trigger full recalculation.

05

Metrics, Evidence, and Recalculation

Known values are reproducible | Unknowns remain unknown | Full replacement after official boundaries

Data boundary

Remain unknown: total floor area, FAR, road area, building height, and statutory green ratio

Formal prose uses Jing-Zhang; the confirmed brand lockup retains AI ALONG JINGZHANG.

B Logo and Core Guidelines

Do not redraw the core symbol | Formal prose uses Jing-Zhang | Brand lockup retains AI ALONG JINGZHANG

AI在京张

AI ALONG JINGZHANG

00 / Ink

000 / Jing-Zhang Red

00 / Blue-Green

Transparent

For documents, figures, and digital interfaces

Reversed

Only on dark backgrounds with clear space

Do not

Stretch, outline, recolour, or merge with metro line symbols

Monochrome

For material limits, embossing, or low-cost wayfinding

Minimum size

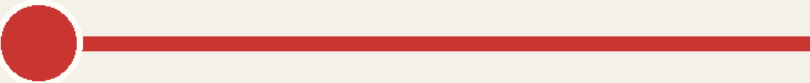

Mark ≥24px digitally; full lockup ≥180px

Spatial, heritage, data, transport, municipal, ecological, and operational risks have pause gates and professional review paths.

07 Renewal Actions, Phasing, and Risk Gates

Dates express work sequence, not a construction commitment; every phase requires professional and public review

Near term 2026-2028

Surveys and governance protocols
