

JINGZHANG CODE OPEN-JZ

Centennial Jing-Zhang AI Innovation Belt • Open-Source City Operating System

The city as a codebase: one MAIN line + three core repositories (Zhongzhiyuan TRAIN-REPO / Origin Community COMMUNITY-REPO / Dazhongsi APP-REPO) + three protocol layers (data flow / scenario testing / ethics governance). Urban renewal = commit, review, merge, revert. Citizens are reviewers, developers are contributors, government is maintainer.

Scope: research 43.6 km² / overall design 11.4 km² / key areas 368.4 ha. All geometry based on provisional boundary; recalculate after official redline. Conceptual proposal only.

All sheets carry scale bars, north arrows and provisional-boundary warnings; CN/EN versions are substantively equivalent (bilingual contract v2).

1. Overall Concept & Regional Collaboration

Jing-Zhang Railway = origin of Chinese independent innovation; Zhongguancun = origin of Chinese open source. OPEN-JZ merges both: MAIN public spine, three evolvable REPOs, three stitching protocol layers. Two wings: West (Zhongguancun tech-services) and East (Xiaohe River scenario-empowerment), linking Future Science City, Huairou Science City, E-Town and the Jing-Jin-Ji network.

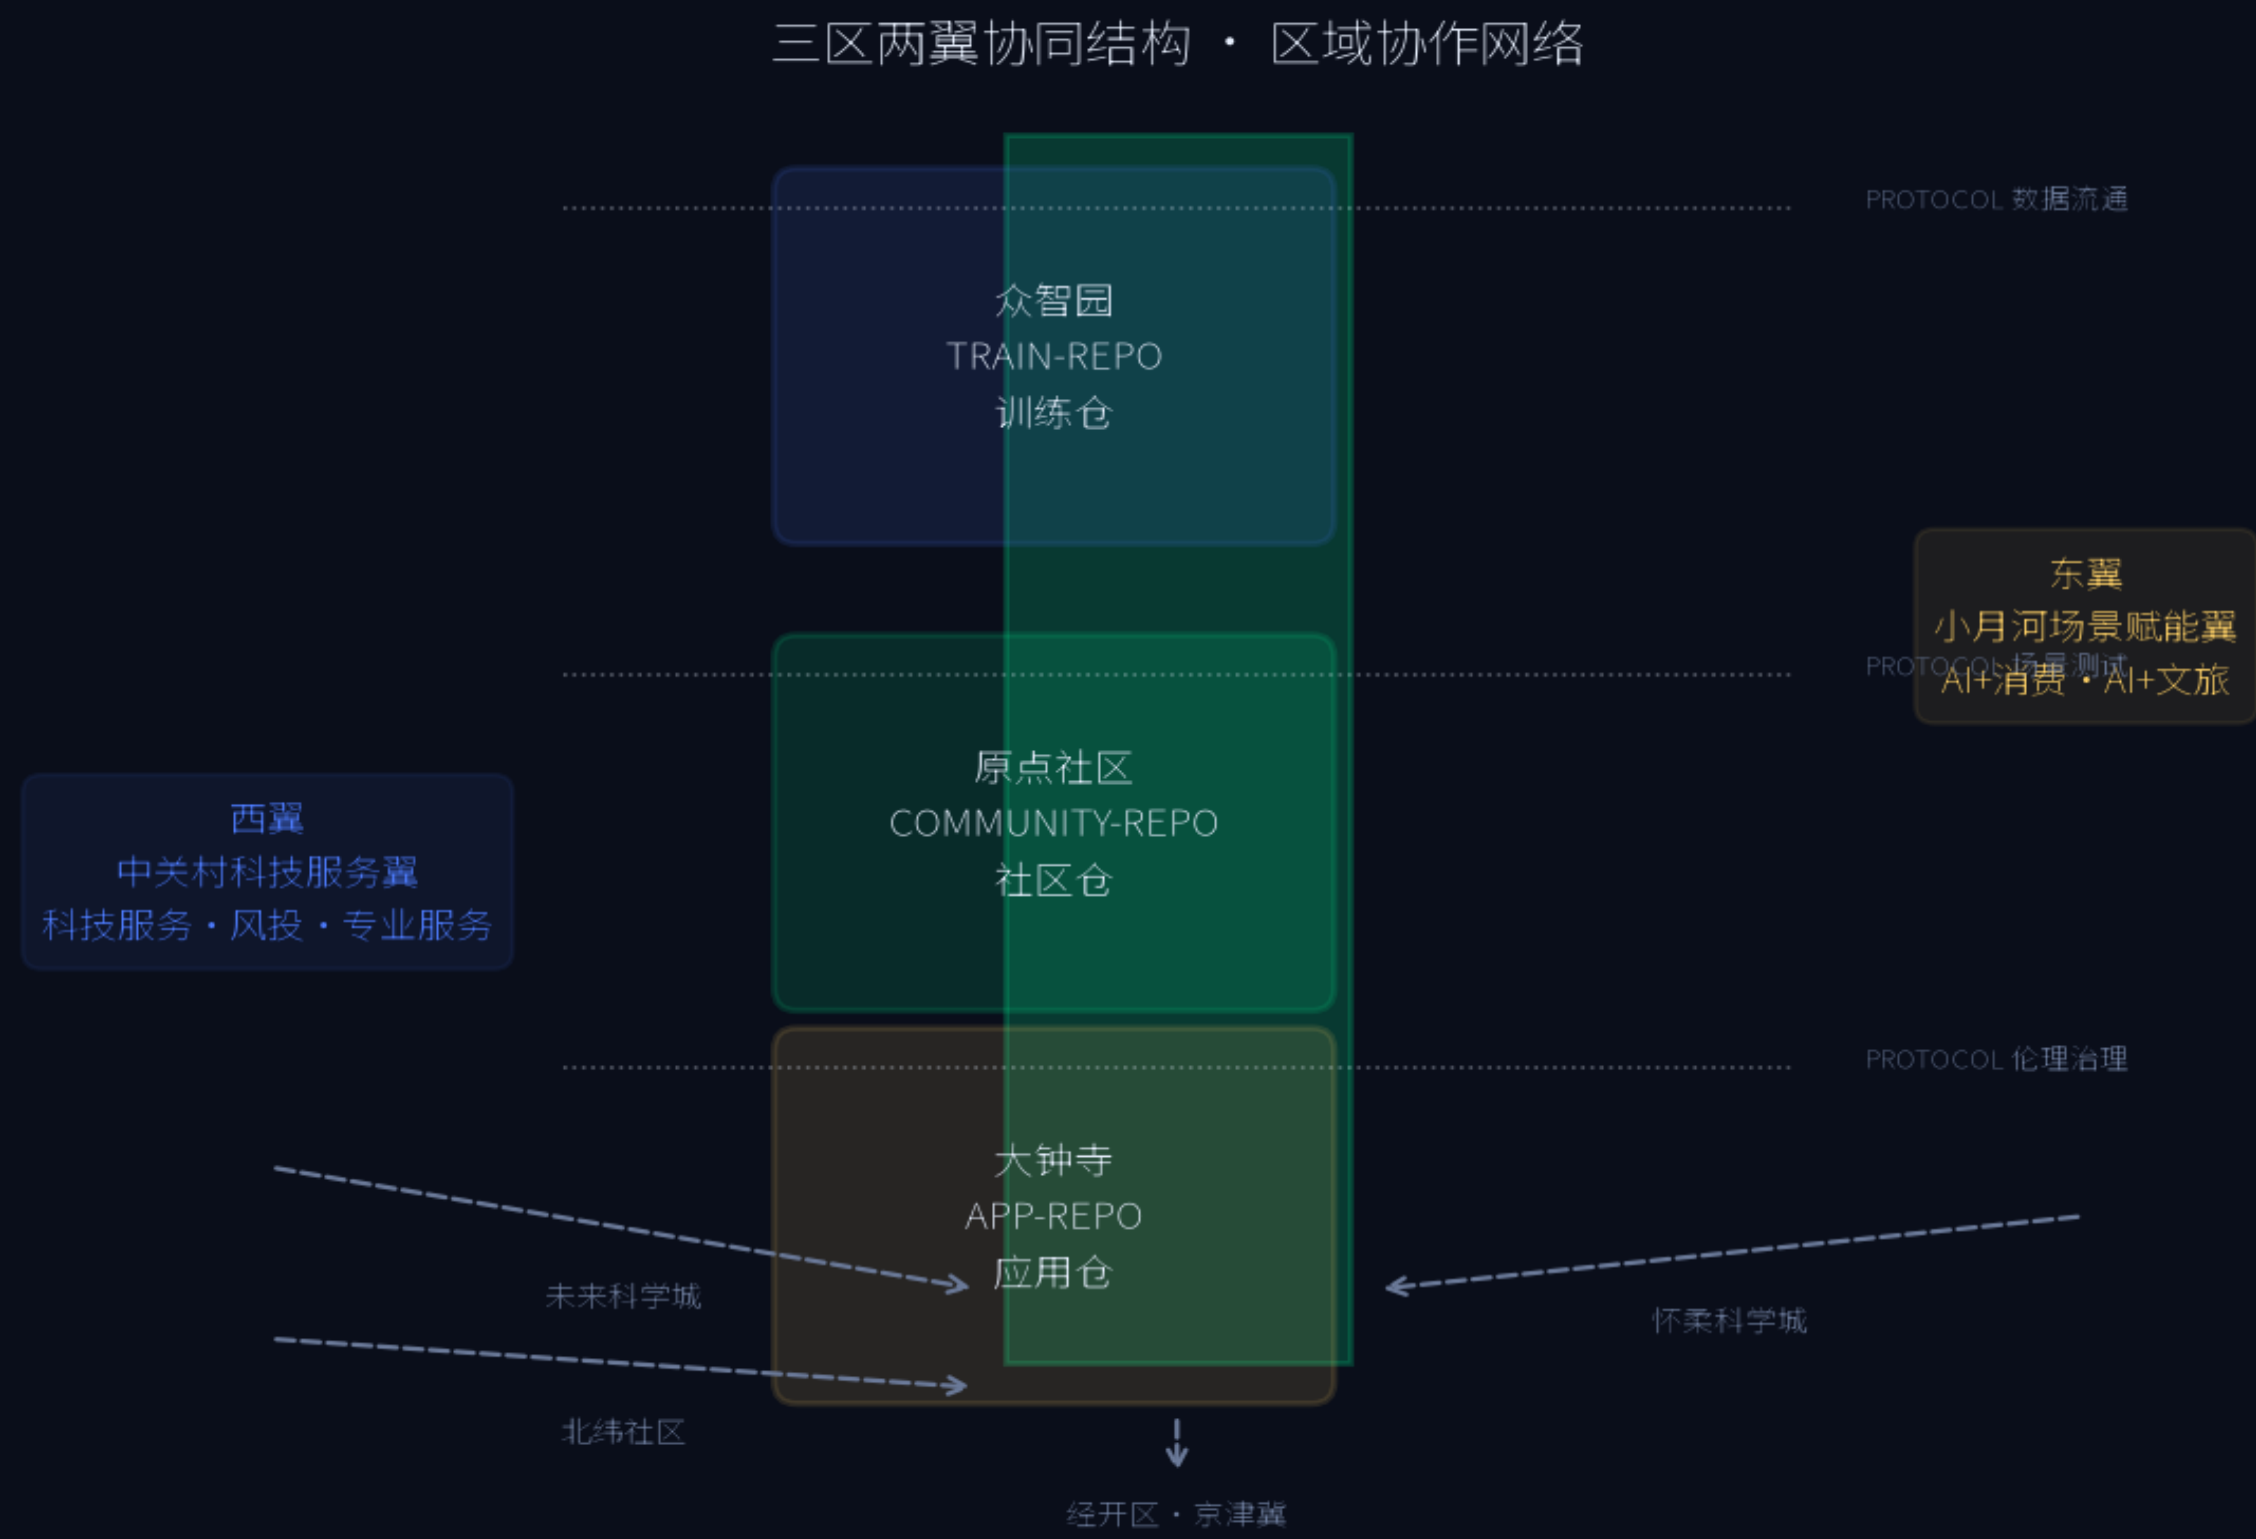

Fig 1 · Three districts + two wings collaboration (FIG-06)

2. Spatial Structure: MAIN + REPO + PROTOCOL

OPEN-JZ • Site Overview (provisional boundary)

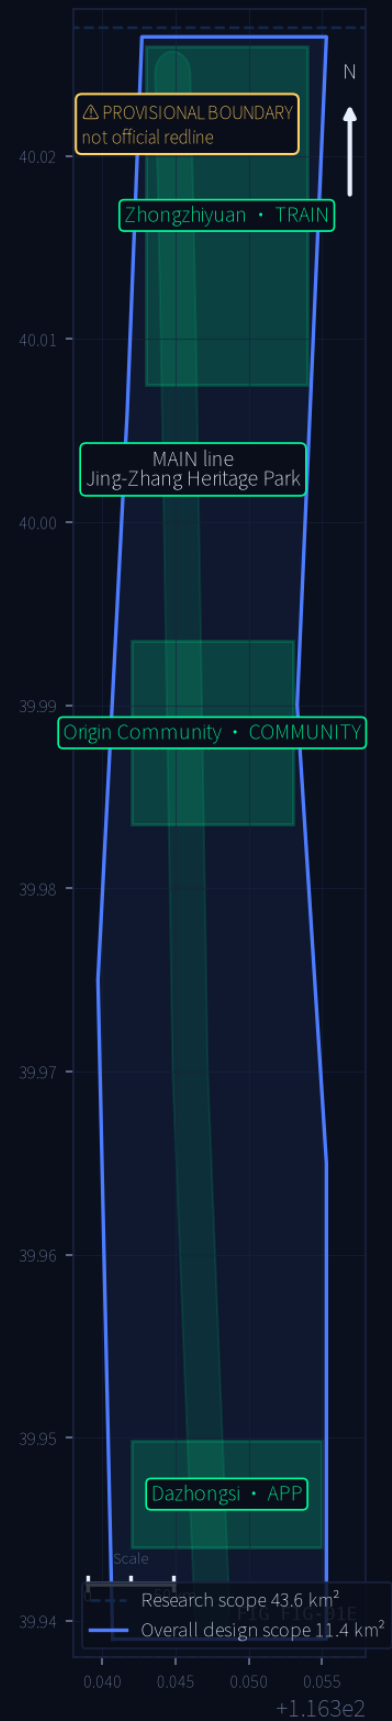

Fig 2 • Site overview: three scopes and MAIN line (FIG-01)

MAIN line: Jing-Zhang Heritage Park green corridor, approx. 9 km, slow-traffic first, heritage narrative, AI experience.

TRAIN-REPO (Zhongzhiyuan): computing, model training, AI standards and safety governance.

COMMUNITY-REPO (Origin Community): open-source collaboration, incubation, talent and brand events.

APP-REPO (Dazhongsi): agents, smart terminals, content consumption, data elements.

PROTOCOL: three east-west stitching lines for data flow, scenario testing and ethics governance.

3. Key Areas: Three Core Repositories

OPEN-JZ • Three Core Repositories (Key Areas)

Fig 3 • Three core repositories index (FIG-03)

Zhongzhiyuan (192.1 ha): computing cluster, model evaluation, AI standards lab; landmark "Zhongzhi Computing Tower" whose night light column shows training-task status.
Origin Community (104.3 ha): open-source square, incubator blocks, release hall, talent apartments; Qinghuayuan station heritage transformed into "Origin Station • Open-Source Monument Square".
Dazhongsi (72.0 ha): smart-terminal experience street, content consumption and data-element exchange; "AI Bell Tower Square" recreates bell-drum imagery with data-flow soundscapes; four-quadrant pedestrian connectivity.

5. Phasing & Public Space

Phase 1 (2026-2028) First commit: Origin Community first. Phase 2 (2028-2030) Main-branch merge: green corridor + Zhongzhiyuan. Phase 3 (2030-2035) Continuous delivery: Dazhongsi + city-wide operation. Each phase: lead/collaborating bodies, prerequisites, approval gates, cost ranges, pilot acceptance metrics and rollback triggers (full: report/implementation_matrix.md).

组件规格/造价量级见 report/public_interest.md；无障碍按 GB 50763 执行
