

CENTURY RAIL COMMONS / CIVIC AI PROTOCOL

JINGZHANG NEON SPINE

A Visible, Contestable and Reversible Civic AI Belt

Illustrative cover only. Not a map or geographic claim.

Protocol Beacon 100 m / First 100 Days

V1.1 / 02 / 100×100 CONTRACT

Concept-only, removable, staffed and fail-closed; operational_status=not_authorized_not_run

100 m / 100 d

Gate 0 selects the exact removable interface; Day 100 forces continue, modify or sunset.

G0–G5 / RACI

Space, roles, rights, synthetic tabletop, staffed public trial, audit and exit.

4 / 3 TABLETOP

Four synthetic fixtures match; all three negative fixtures fail closed. This is not live evidence.

7 RIGHTS / 6 COSTS

No-app parity and seven rights are mandatory; six currency cost ledgers remain unknown and block G1.

Seven mechanisms, zero copied form

Co-location, agile pilots, heritage reuse, open science, independent review and bounded tests

Punggol Digital District

Education, industry and community co-location with an open digital platform → Shared but tiered test ports: simulate, contain, then pilot in public

Helsinki Smart City

Agile pilots, resident co-creation and evaluation in real settings → Each pilot gets a baseline, stop rule and public review

London King's Cross

Rail-industrial heritage, a university anchor and public realm renewal → Treat Jing-Zhang heritage as social infrastructure for learning and exchange

Paris STATION F

Many startup programs and shared support within adapted heritage → Use a multi-program commons to reduce friction for teams

Montreal Mila

Open science, talent, transfer and responsible AI → Join research, governance and translation in the Trust Foundry

Toronto Waterfront digital review

Independent review, privacy and democratic accountability → Keep a civic review seat and public test registry independent of vendors

Amsterdam Marineterrein

Publicly accessible, professionally managed outdoor living lab → Run bounded land-and-water tests with time, season and removal rules

Provisional geometry, reproducible evidence

Site Overview

Three scopes / One Spine / provisional geometry

01 / OVERVIEW

JINGZHANG NEON SPINE

01 Trust Foundry Garden

Safety, standards, energy and physical-AI validation

02 Station Zero Open Commons

Open release, translation and everyday talent life

03 Agent Bazaar

Human-confirmed applications, exchange and creation

Two Ledgers

Evidence Ledger: sources, geometry, metrics, assumptions. Civic AI Passport: purpose, minimum data, steward, human review, appeal, exit.

Overall and key-area boundaries are provisional, not official redlines

Provisional geometry, reproducible evidence

Land Use and Spatial Stack

Complete partition / five uses / two ledgers

02 / LAND USE

JINGZHANG NEON SPINE

VISIBLE SPATIAL STACK

- L4 Civic governance
- L3 Scenarios and services
- L2 Buildings and open ground
- L1 Mobility, blue-green and public realm
- L0 Evidence, constraints and assumptions

- Trust R&D
- Rail Commons
- Open Culture
- Industry Services
- Community Support

Provisional geometry, reproducible evidence

Three Key Areas

Trust Foundry / Station Zero / Agent Bazaar

03 / KEY AREAS

JINGZHANG NEON SPINE

1

01 Trust Foundry Garden

Safety, standards, physical AI, edge compute Protocol Beacon + four-gate test yards

2

02 Station Zero Open Commons

Open source, university translation, talent life Open ground + translation clinic

3

03 Agent Bazaar

Agents, devices, content and small business Human-first link + provenance stage

CAUTION

provisional polygons ≠ parcels / roads / ownership

Mobility and Blue-Green Commons

Human-first links / continuous commons / reversible tests

04 / MOBILITY

JINGZHANG NEON SPINE

01 Walking spine

Continuous, no-app, staff-guided

02 Parallel cycle line

Slow at nodes and separate from walking

03 Blue-green commons

Rest, shade, rain, removable tests

04 Civic protocol ports

Steward, human stop, appeal, sunset

GOVERNANCE FLOOR

Robots never default to accessible paths; navigation is opt-in; environmental data does not track people; failure returns to staffed or offline service.

Core Metrics and Delivery Contract

100 m / 100 days / six gates / fail closed

05 / DELIVERY

JINGZHANG NEON SPINE

SITE

11.413 km²

provisional overall area

GREEN

15.03%

designed green ratio

PUBLIC

2.99%

public-space ratio

PILOT

100 m / 100 d

removable interface / maximum window

GATES

G0–G5

six admission and exit gates

TABLETOP

4 / 3

fixtures / negative fail closed

RACI

roles appointed

RIGHTS

seven first-use rights

SYNTH

one positive / three
negative

PUBLIC

staffed public trial

EXIT

continue / modify /
sunset

100-DAY CONTRACT LIMIT

Currently not_authorized_not_run; currency costs remain unknown; any severe incident, absent steward, corrupt source, access failure or undeleted data stops the pilot.
