

Overall design: three areas, two wings and three nodes

One heritage greenway / one dual-use spine / three accountable spatial units

PROVISIONAL CONCEPT - not an official redline; recalculate after official records

Three nodes: differentiated dual-use tasks

One belt, three nodes • peacetime operation - emergency conversion - accountable acceptance

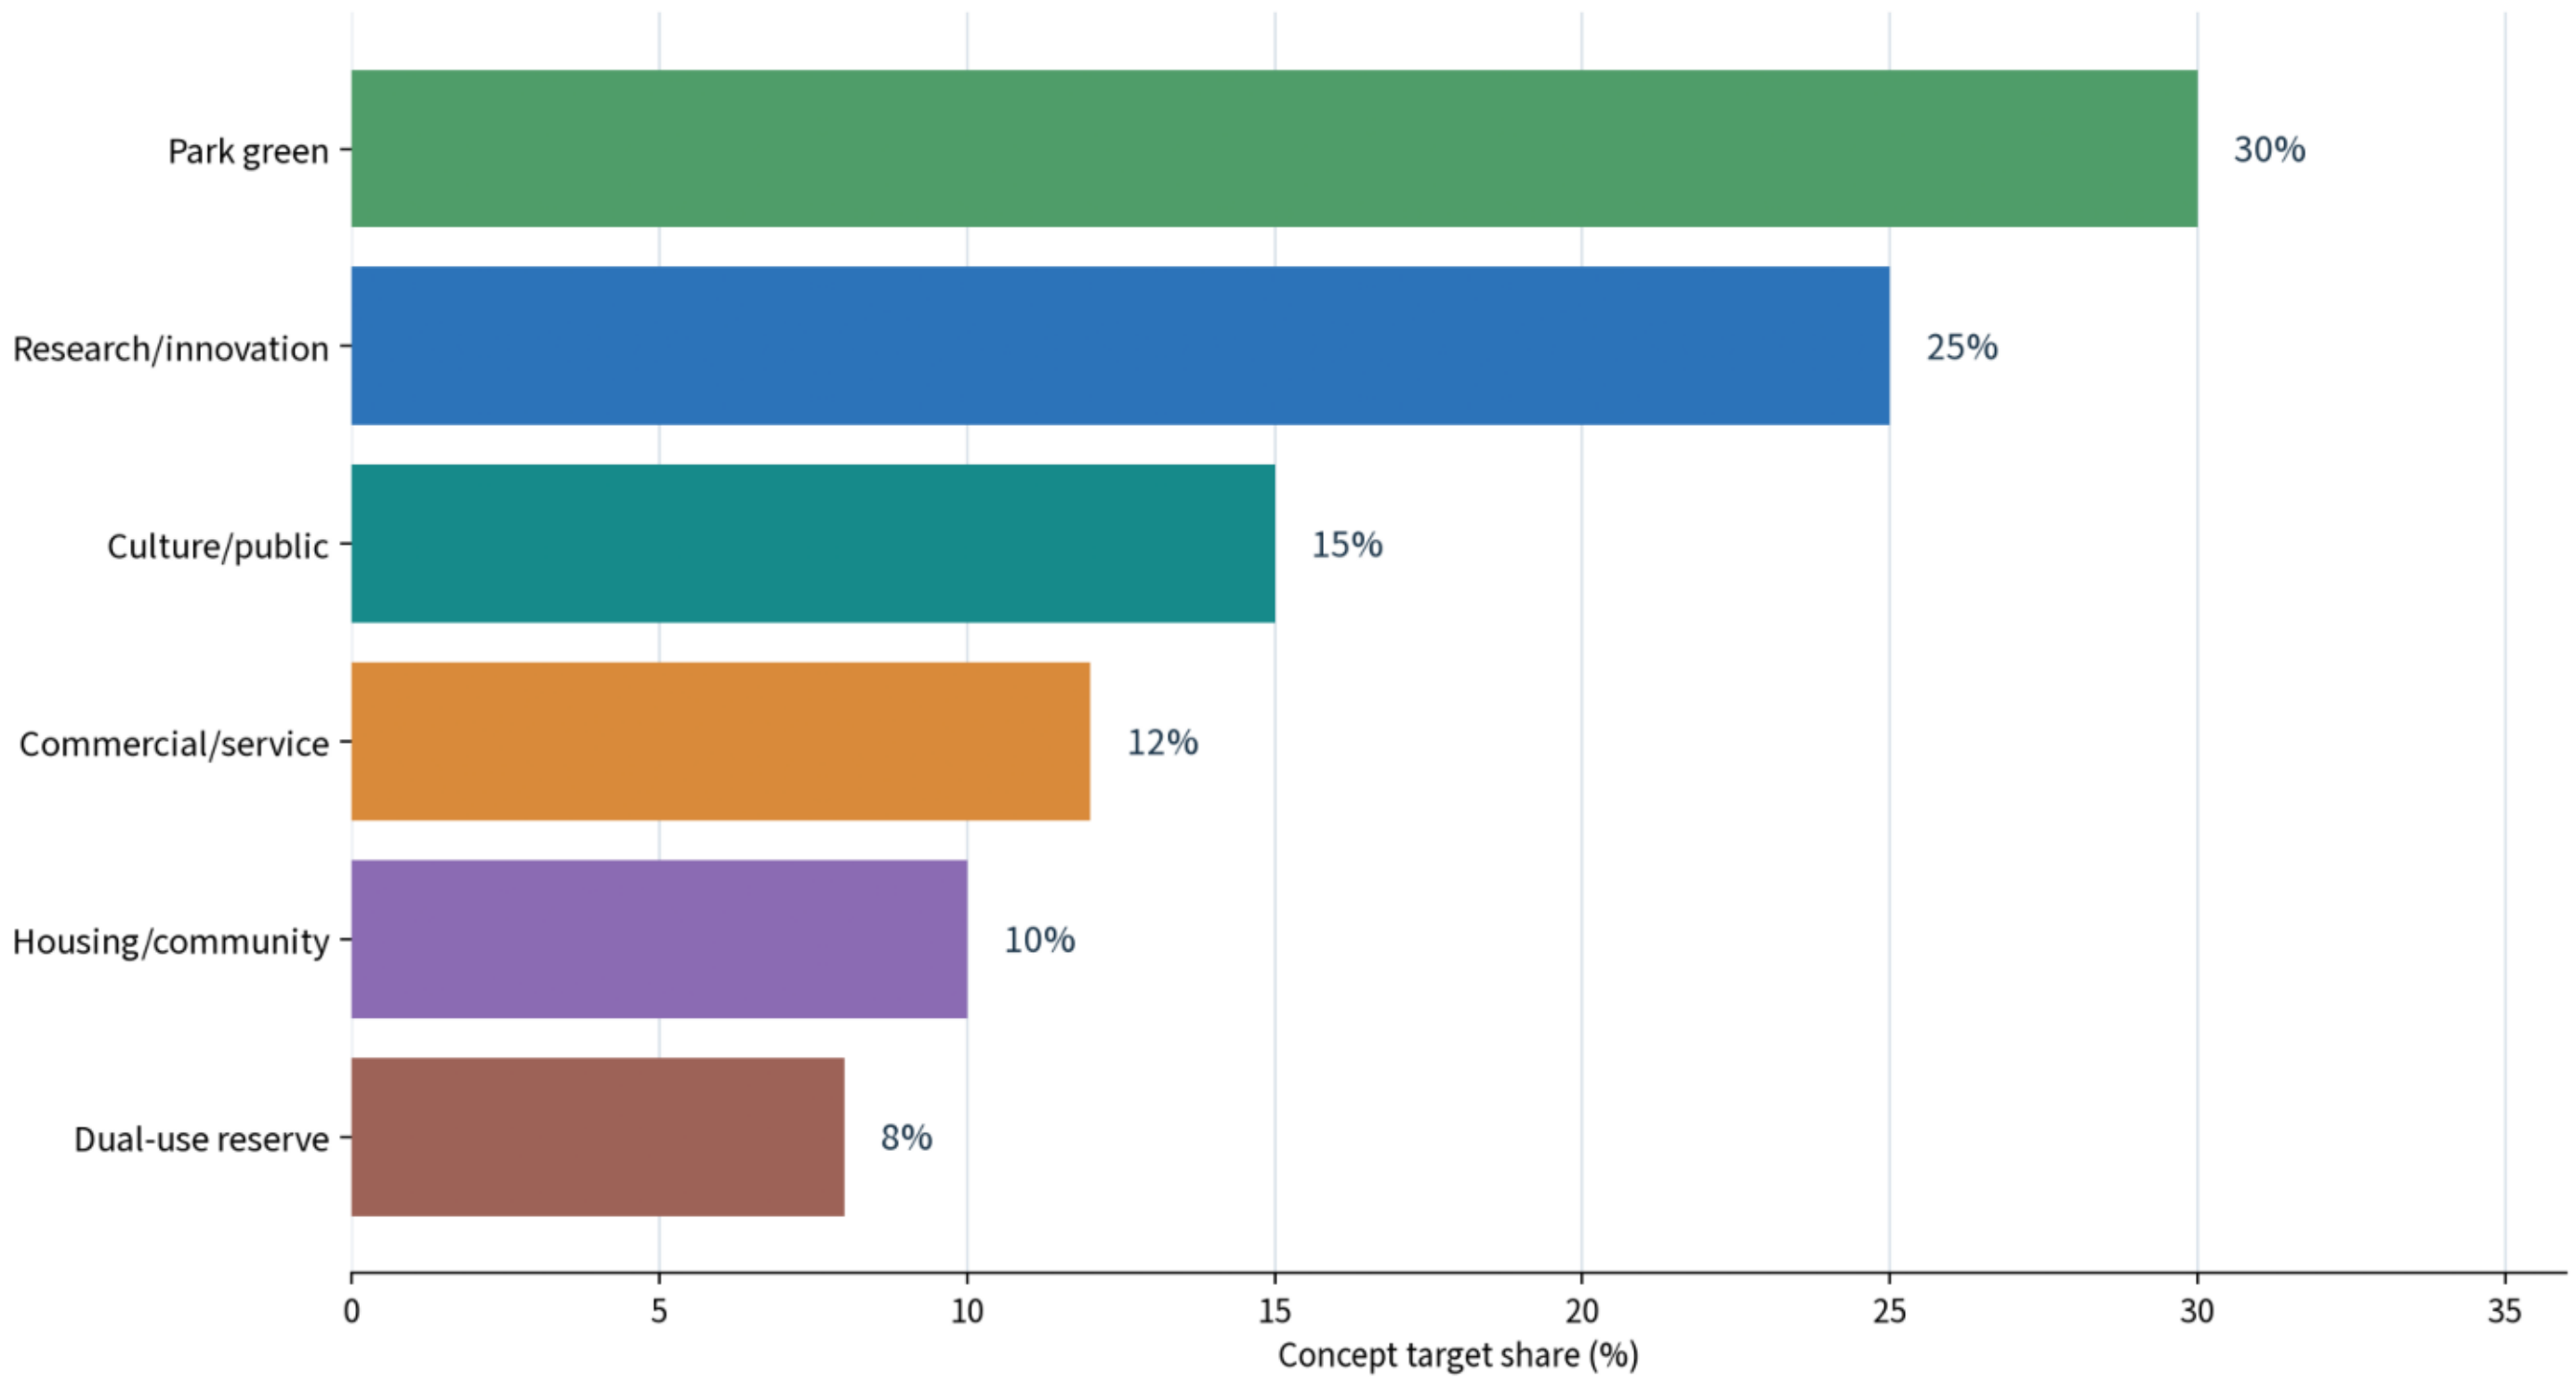

Dual-Use Hall	Convertible Gallery	Resilience Court
Station-front hub (concept location)	Greenway-neighbourhood link (concept)	Community open space (concept location)
Peace: interchange, service, events	Peace: slow modes, rotating storage, service	Peace: neighbourhood, child, age-friendly use
Emergency: human command, supplies	Emergency: egress, interface kits, assembly	Emergency: shelter, information, assisted communication
Lead: locality + operator; proof: conversion drill	Lead: operator + community; proof: access/interface test	Lead: community + emergency office; proof: access/service audit

All three are provisional concept locations; relocate and accept only after official boundary, ownership, rail, fire, heritage and utility checks.

PROVISIONAL CONCEPT - not an official redline; recalculate after official records

Land-use structure: six concept targets (not existing conditions)

Targets sum to 100%; not statutory or geometric areas; 11.0044% is a separate provisional geometry ratio

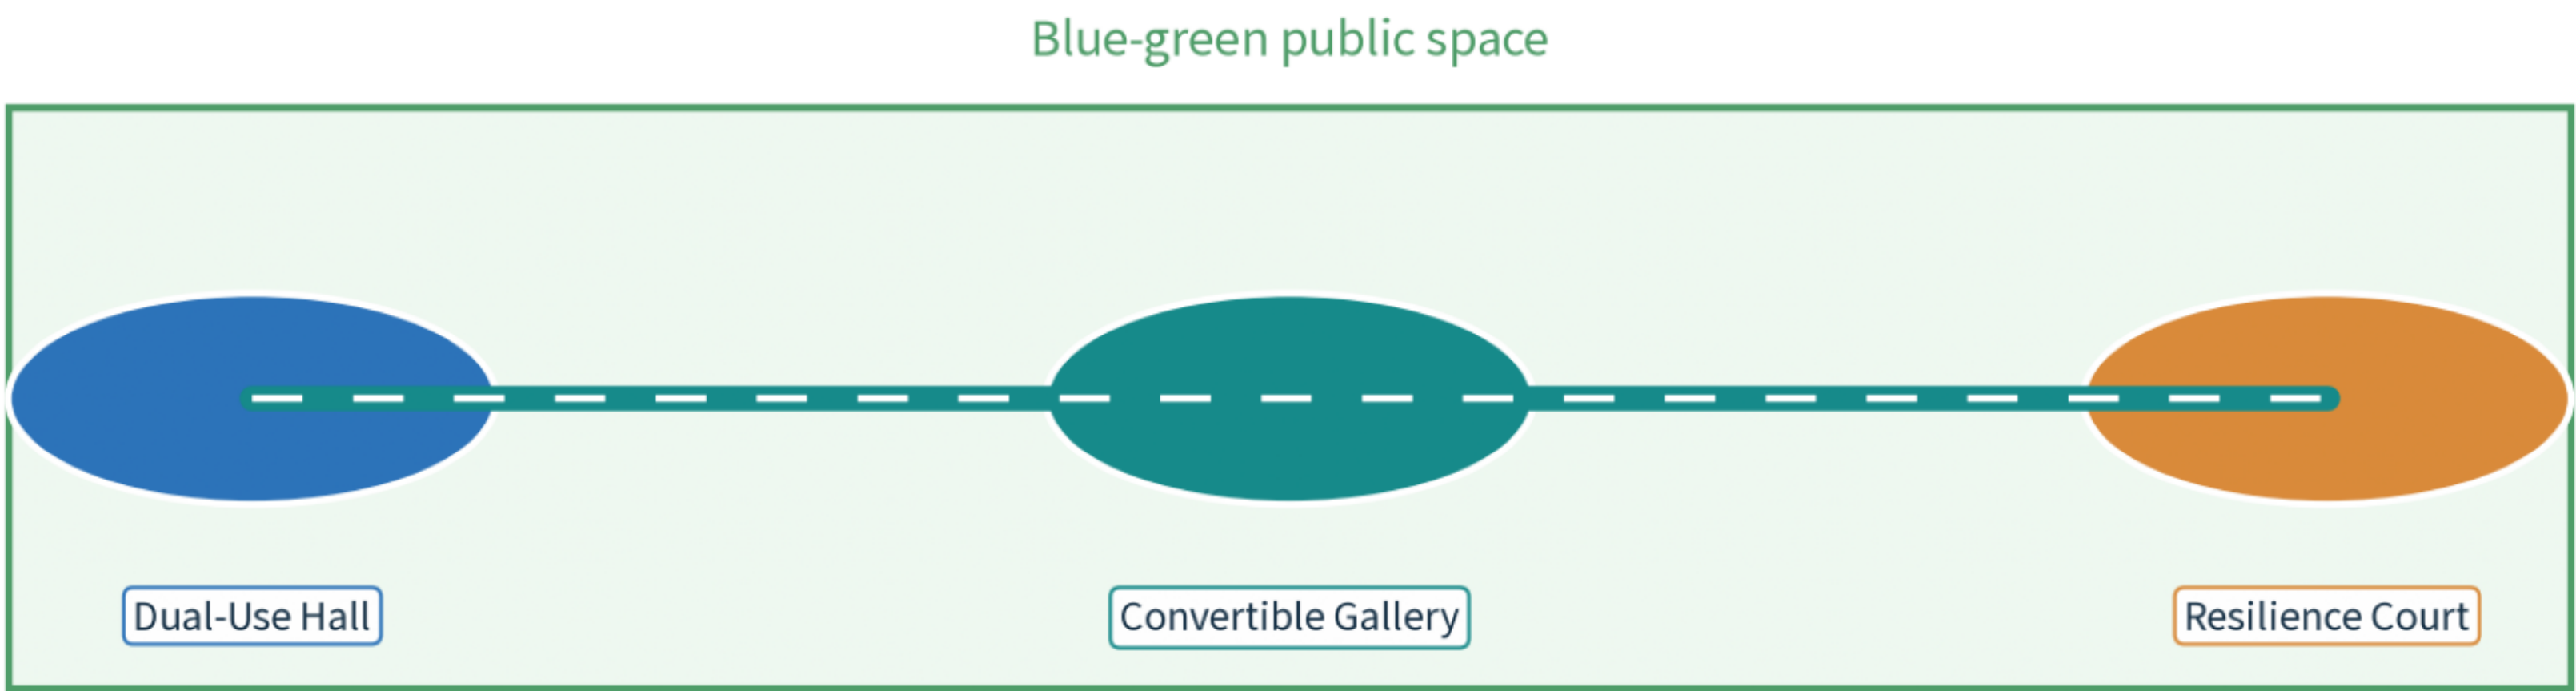

six concept targets sum to 100%; not existing/statutory/geometric areas; recalculate after official controls

PROVISIONAL CONCEPT - not an official redline; recalculate after official records

Slow modes and public-space network

Three operating modes: daily slow modes / event management / emergency egress

Scale: relational concept diagram

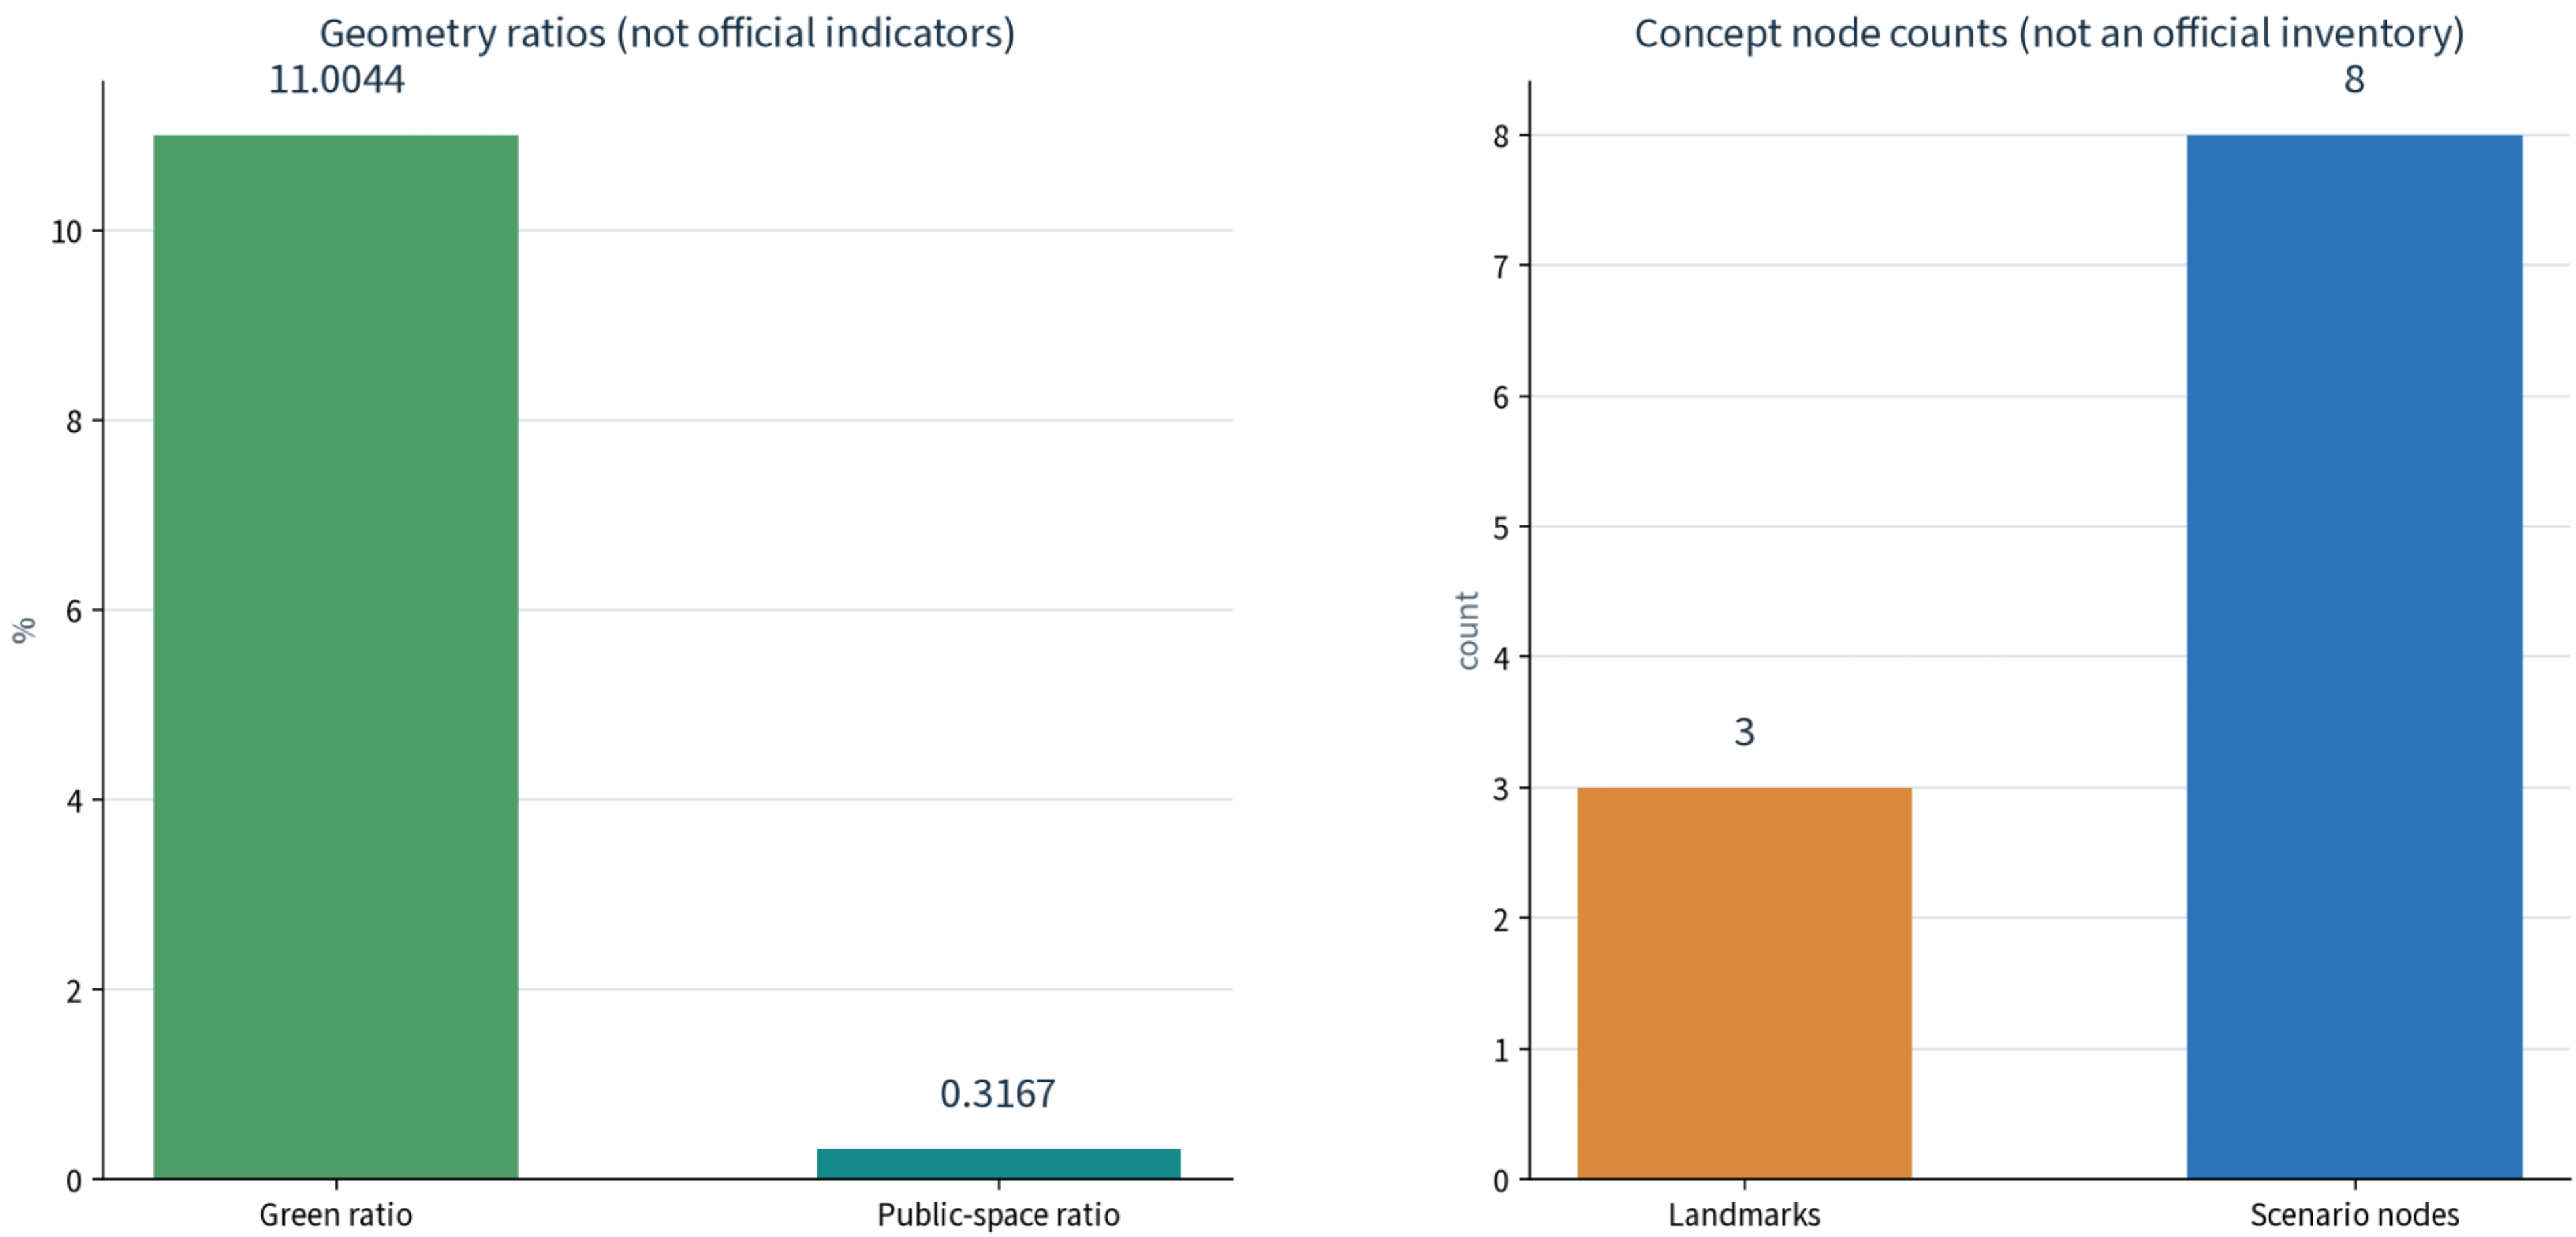

The slow-mode spine keeps emergency access; open nodes reserve human service, supply assembly and assisted communication.

PROVISIONAL CONCEPT - not an official redline; recalculate after official records

Metrics evidence

From metrics.json • provisional geometry • ratios and counts use separate axes

Formula: union area / provisional boundary area; counts come from geometry layers

PROVISIONAL CONCEPT - not an official redline; recalculate after official records
