

JING-ZHANG HANDOVER LINE

A railway shift handover becomes a civic AI accountability protocol

JZ / 01

JING-ZHANG HANDOVER LINE

Intelligence moves. Responsibility stays visible.

PROVISIONAL BOUNDARY / EPSG:4548 METRICS

HANDOVER PROTOCOL

01 / BUILD TO VERIFY

Models, robots, compute and data enter tests with versions, risks and shutdown rules.

02 / VERIFY TO SHARE

Results, licences, failures and limits travel together; open source never means exposing personal data.

03 / SHARE TO SERVE

Civic services retain a human desk, a no-AI equivalent, appeal and exit records.

04 / RETURN THE PROBLEM

Complaints, repairs and shutdown causes travel back to research as public learning.

**Human takeover is not a fallback feature.
It is civic infrastructure.**

Source: submitted geometry and metrics.json; provisional boundary, conceptual design only

JING-ZHANG HANDOVER LINE / v1.0

Human takeover is not a fallback feature. It is civic infrastructure.

BUILD→VERIFY

VERIFY→SHARE

SHARE→SERVE

Three scopes, land-use topology and key areas

Full coverage without statutory fiction; three yards, three shifts of duty

JZ / 02

FULL COVERAGE, NO STATUTORY FICTION

Topological land-use partition + three scopes + three yards / two wings

LAND USE

- 0802 R&D / validation
- 0804 Learning / open source
- 05 Tech services / business
- 0701 Talent living
- 0702 Community service
- 0803 Culture / civic service
- 1401 Continuous parkland

43.6 km² → 11.4 km² → 3 YARDS

RESEARCH Industry + future city OVERALL DESIGN Spatial + delivery system KEY AREAS Detailed validation

Design recommendation: all zones recalculate when official boundaries arrive; no ownership or statutory land-use claim.

Data: land_use.geojson and site_boundary.geojson; codes from the public MNR subset

JING-ZHANG HANDOVER LINE / v1.0

JZ / 03

THREE HANDOVER YARDS, THREE SHIFTS OF DUTY

Each key area links programme, space, scenario, human takeover and delivery gates

01

BUILD→VERIFY YARD

- Public validation street
- Model red team / robot sandbox
- Physical stop by safety staff

PROVISIONAL KEY AREA

02

VERIFY→SHARE YARD

- Public handover table
- Research relay / translation
- Licence, withdrawal, human desk

PROVISIONAL KEY AREA

03

SHARE→SERVE YARD

- Century logbook
- Oral history / AI-native service
- Non-commercial access / no-AI service

PROVISIONAL KEY AREA

Key-area geometry is provisional; detailed strategies are directions for professional development

JING-ZHANG HANDOVER LINE / v1.0

Ecosystem map and regional innovation synergy

Eight shared stacks x three areas and two wings; synergy at four levels

JZ / 06

Eight shared stacks, handed to the next shift

Land / space / industry / finance / talent / compute / data / scenarios x three areas, two wings

Source: agent_taskbook.json three-areas-two-wings and eight-element mechanisms; concept advice only

JING-ZHANG HANDOVER LINE / v1.0

WITHIN BELT	Three areas and two wings organise the research-validation-service loop; objections and shutdown reasons travel back north.
WITHIN CITY	Connects to the official "two zones and one belt" framework, matching Zhongguancun technology supply to this belt's validation and scenario demand.
MUNICIPAL	Future Science City, Huairou Science City and BDA form an original-research / engineering-validation / scale-delivery division; this belt is the public-validation output end.
REGIONAL	Compute, energy and scenario interfaces reserved toward Zhangjiakou and other Beijing-Tianjin-Hebei nodes; feasibility to be confirmed by authorities.

Twelve reversible scenarios and human takeover

Movement, blue-green ground, human takeover and no-AI equivalents

JZ / 04

ONE SPINE, EIGHT STITCH LINKS, TWELVE TAKEOVER POINTS

The smart layer is removable; basic access and human service stay available

MOVEMENT / SERVICE

- Continuous walk-cycle spine
- East-west connection intent
- Blue-green comfort ground
- Human takeover + AI scenario

- A OFFLINE BY DEFAULT**
Static signs, light, tactile maps and human help do not rely on a model.
- B GRADED TAKEOVER**
Low confidence, boundary breach, objection or outage calls the duty person.
- C EXIT IS RECORDED**
Shutdown cause, deletion and service continuity enter the public logbook.

Conceptual connectivity, not road redlines or engineering feasibility; lengths calculated in EPSG:4548

JING-ZHANG HANDOVER LINE / v1.0

SCN-01

Model red-team desk

Human review + paper risk log

SCN-02

Robot right-of-way sandbox

Safety staff + physical stop

SCN-03

Edge energy test station

Manual shutdown + offline meter

SCN-04

Data-consent rehearsal

Paper consent + deletion desk

SCN-05

Accessible-route copilot

Tactile map + human direction

SCN-06

Public translation desk

Human desk + multilingual paper

SCN-07

Campus research relay

Human curation + open catalogue

SCN-08

Visible maintenance stop

Phone report + human dispatch

SCN-09

Community care roster

Staff telephone roster

SCN-10

Night-shift safety light

Fixed light + human patrol

SCN-11

Jing-Zhang oral-history booth

Human guide + paper catalogue

SCN-12

Global Handover Week route

Fixed signs + volunteers

Recalculable, exitable, continuable

Metrics, phasing, risk, sources and professional review gates

JZ / 05

EVERY NUMBER RETURNS TO GEOMETRY, FORMULA AND ASSUMPTI

Known values recalculate; statutory FAR and height remain unknown

EVIDENCE CHAIN

KEPT UNKNOWN: FAR, building height, ownership, road redlines, utility capacity, investment and output

metrics.json × geometry/*.geojson × assumptions.json; displayed values are rounded

JING-ZHANG HANDOVER LINE / v1.0

PHASE 01	Return to baseline: official data, inventory, wayfinding and three low-risk human-led pilots.
PHASE 02	Open-source yard: ground floors, research relay and community service after ownership and community review.
PHASE 03	Belt-wide operation: complex validation networks only after transport, utilities, heritage, privacy and safety conditions.

Unknown by design: FAR, height, ownership, road redlines, utility capacity, investment and output.
