

JING-ZHANG HANDOVER LINE

Intelligence moves. Responsibility stays visible.

Human takeover is not a fallback feature. It is civic infrastructure.

Full coverage, no statutory fiction

Topological land-use partition + three scopes + three areas, two wings

Official positions, real interfaces

Three positions, five functions, three areas and two wings x four levels of synergy

POSITION 01 Centennial Jing-Zhang Culture Belt Century Logbook, oral-history booth and the Tsinghuayuan Station anchor form one continuous public record.	POSITION 02 Urban AI Life Experience Belt Twelve reversible scenarios on continuous public ground: enterable, refusable, exitable.	POSITION 03 AI Integrated Innovation Belt Eight shared stacks interface across the three areas in a build-verify-share-serve-feedback loop.
--	---	--

WITHIN BELT	Three areas and two wings organise the research-validation-service loop; objections and shutdown reasons travel back north.
WITHIN CITY	Connects to the official "two zones and one belt" framework, matching Zhongguancun technology supply to this belt's validation and scenario demand.
MUNICIPAL	Future Science City, Huairou Science City and BDA form an original-research / engineering-validation / scale-delivery division; this belt is the public-validation output end.
REGIONAL	Compute, energy and scenario interfaces reserved toward Zhangjiakou and other Beijing-Tianjin-Hebei nodes; feasibility to be confirmed by authorities.

Eight shared stacks, handed to the next shift

Land, space, industry, finance, talent, compute, data, scenarios: interface and duty owner visible

JZ / 06

Eight shared stacks, handed to the next shift

Land / space / industry / finance / talent / compute / data / scenarios x three areas, two wings

Source: agent_taskbook.json three-areas-two-wings and eight-element mechanisms; concept advice only

JING-ZHANG HANDOVER LINE / v1.0

Three yards, three shifts of duty

Each key area answers programme, space, scenario, human takeover and delivery gate

JZ / 03

THREE HANDOVER YARDS, THREE SHIFTS OF DUTY

Each key area links programme, space, scenario, human takeover and delivery gates

01

BUILD?VERIFY YARD

- Public validation street
- Model red team / robot sandbox
- Physical stop by safety staff

PROVISIONAL KEY AREA

02

VERIFY?SHARE YARD

- Public handover table
- Research relay / translation
- Licence, withdrawal, human desk

PROVISIONAL KEY AREA

03

SHARE?SERVE YARD

- Century logbook
- Oral history / AI-native service
- Non-commercial access / no-AI service

PROVISIONAL KEY AREA

Key-area geometry is provisional; detailed strategies are directions for professional development

JING-ZHANG HANDOVER LINE / v1.0

Twelve reversible AI scenarios

Four controlled validation sandboxes; every scenario keeps human takeover and a no-AI equivalent

SCN-01 Model red-team desk Human review + paper risk log	SCN-02 Robot right-of-way sandbox Safety staff + physical stop	SCN-03 Edge energy test station Manual shutdown + offline meter	SCN-04 Data-consent rehearsal Paper consent + deletion desk
SCN-05 Accessible-route copilot Tactile map + human direction	SCN-06 Public translation desk Human desk + multilingual paper	SCN-07 Campus research relay Human curation + open catalogue	SCN-08 Visible maintenance stop Phone report + human dispatch
SCN-09 Community care roster Staff telephone roster	SCN-10 Night-shift safety light Fixed light + human patrol	SCN-11 Jing-Zhang oral-history book Human guide + paper catalogue	SCN-12 Global Handover Week route Fixed signs + volunteers

Movement and blue-green public ground

The smart layer is removable; ordinary movement and human service stay online

JZ / 04

ONE SPINE, EIGHT STITCH LINKS, TWELVE TAKEOVER POINTS

The smart layer is removable; basic access and human service stay available

MOVEMENT / SERVICE

- Continuous walk-cycle spine
- East-west connection intent
- Blue-green comfort ground
- Human takeover + AI scenario

- A OFFLINE BY DEFAULT**
Static signs, light, tactile maps and human help do not rely on a model.
- B GRADED TAKEOVER**
Low confidence, boundary breach, objection or outage calls the duty person.
- C EXIT IS RECORDED**
Shutdown cause, deletion and service continuity enter the public logbook.

Conceptual connectivity, not road redlines or engineering feasibility; lengths calculated in EPSG:4548

JING-ZHANG HANDOVER LINE / v1.0

Building renewal and condition-triggered phasing

Inventory first, temporary use second, fixed work last

R / RETAIN

Keep in use

Keep in use and complete the condition record.

A / ADAPT

Low-impact repair

Fire safety, energy, accessibility and open ground floor first.

I / INSERT

Removable trial

Removable elements and short-term use only.

D / INVESTIGATE

Not demolition

Awaits survey, structure, ownership, fire and heritage review.

PHASE 01

Return to baseline: official data, inventory, wayfinding and three low-risk human-led pilots.

PHASE 02

Open-source yard: ground floors, research relay and community service after ownership and community review.

PHASE 03

Belt-wide operation: complex validation networks only after transport, utilities, heritage, privacy and safety conditions.

Core metrics and the evidence chain

Known values recompute; FAR, height, AI innovation index, talent density and output scale stay unknown

The planning indicator system gives definitions and data preconditions only; one model assigns them once official data exists.

Risk, copyright and the next shift

Open co-design advice; it does not replace statutory planning or professional approval

DATA	Full recalculation once official boundaries, controls, ownership, roads, utilities, fire and heritage data exist.
PUBLIC	People without a phone, without Chinese, with disabilities, older people and those declining AI keep equivalent service.
COPYRIGHT	Original graphics, text and layout; external cases paraphrased only, no reused image, mark or protected chart.

Intelligence moves. Responsibility stays visible.
