

01 WHY IT MUST WORK

Three Works move technology through controlled testing, public learning, and real daily life. Two service chains return adoption to accountability and change.

JING-ZHANG WORKS

MAKE THE CITY WORK FIRST

One service spine · Three Works · Two service chains · Six release fields

URBAN USABILITY COMPILER

- 01 OWNER
- 02 NO-APP EQUAL
- 03 MINIMUM DATA
- 04 HUMAN TAKEOVER
- 05 STOP RULE
- 06 VALIDATION

JING-ZHANG WORKS

THREE WORKS, THREE RESPONSIBILITIES

Prototype tests technology · Learning lowers barriers · Everyday faces real life

01 PROTOTYPE WORKS

Access lane · E-stop · Failure review

PROVISIONAL / MOVABLE

02 LEARNING WORKS

Ask First · Night learning · Multilingual

PROVISIONAL / MOVABLE

03 EVERYDAY WORKS

02 HOW IT BECOMES USABLE

Space first solves continuous arrival, shade, rest, accessibility, and human help. Permanent work follows evidence from reversible pilots.

A ROUTE IS A COMPLETE SERVICE

Arrive · Cross · Enter · Stay · Take over · Exit; one failed segment blocks release

SIX-SEGMENT JOURNEY

01 ARRIVE

02 CROSS

03 ENTER

04 STAY

05 TAKE OVER

06 EXIT

One unverified segment keeps the whole route UNKNOWN.

03 HOW USABILITY IS PROVED

The compiler checks responsibility, not invented performance. Twelve task contracts are complete; field verification remains zero and unknown stays visible.

JING-ZHANG WORKS

EVIDENCE BEFORE RELEASE

Structural readiness, geometry, and field performance remain separate; unknown stays unknown
